

UC DAVIS

2022-23 General Catalog

TABLE OF CONTENTS

Home	12	Campus Security, Crime Awareness, and Alcohol & Drug Abuse Prevention	26
Academic Calendars	14	Academic Advising & Student Services	27
Introduction	15	Student Disability Center (SDC)	27
Visiting the Campus	15	Office of Educational Opportunity & Enrichment Services	27
Accreditation	15	Student Housing	28
UC Davis Principles of Community	15	Student Conduct & Support Services	29
Educational Objectives for Students	16	Nondiscrimination & Sexual Harassment/Sexual Violence Prevention	29
Mission Statement, Philosophy of Purpose	16	Associated Students, University of California at Davis (ASUCD)	29
Colleges & Schools	16	Academic Assistance & Tutoring Centers	29
Research Programs & Resources	16	Internship & Career Center (ICC)	30
Administrative Offices & U.C. Governance	17	Academic Resources	30
Undergraduate Admissions	18	CalTeach/Mathematics & Science Teaching Program (CalTeach/MAST)	30
Examination Credit	18	Global Learning Hub	30
Advanced Placement Credit & Chart	18	Undergraduate Research Center	30
International Baccalaureate Credit & Chart	20	Student Resource & Information Centers	30
AP & IB Charts Archive	21	Center for Advocacy, Resources & Education (CARE)	31
Fees, Expenses, & Financial Aid	22	Center for Chicana/Latina Academic Student Success (CCLASS)	31
Course Materials & Service Fees	22	Center for Leadership Learning	31
Part-Time & Employee Students Fees	22	Cross-Cultural Center	31
Parking & Bicycle Fees	22	Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center (LGBTQIARC)	31
Costs for a Year at UC Davis	22	Native American Academic Student Success Center (NAASSC)	31
International Student Expenses	22	Services for International Students & Scholars (SISS)	31
Fee Refunds	22	Strategic Asian and Pacific Islander Retention Initiative (SAandPIRI)	31
Residence for Tuition Information	22	Women's Resources & Research Center (WRRRC)	32
Financial Aid	22	Academic Information, Policies, & Regulations	33
Undergraduate Scholarships & Awards	23	Registration & Course Load	33
Student Life	24	Academic Credit	33
Living at Davis	24	Examinations	33
Transportation & Parking	24	Grades & Grading	33
WorkLife	24	Probation & Dismissal	34
Health & Counseling Services	24	Honors & Prizes	34
Extracurricular Activities	25	Leaving UC Davis	35
Silo Union	25	Returning to UC Davis	35
Intercollegiate Athletics	25	Undergraduate Education	36
Arts & Music	26	University Degree Requirements	36
Student Government	26	Entry Level Writing Requirement (ELWR)	36
Center for Student Involvement	26		
Cal Aggie Student Alumni Association (SAA)	26		
University Policies on Nondiscrimination, Sexual Harassment/Sexual Violence, Student Records & Privacy	26		

American History & Institutions Requirement	37	Anthropology	74
Unit Requirements & Limitations	38	Anthropology, Bachelor of Arts	74
Senior Residence Requirements	38	Anthropology, Bachelor of Science	79
General Education (GE) Requirements	38	Anthropology, Minor	81
Additional Conditions	39	Anthropology, Master of Arts	83
Scholarship Requirement	39	Anthropology, Doctor of Philosophy	83
College Major & Minor Information	40	Applied Mathematics (Graduate Group)	83
Agricultural & Environmental Sciences	40	Applied Mathematics, Master of Science	84
Biological Sciences	41	Applied Mathematics, Doctor of Philosophy	84
Engineering	43	Art History & Art Studio	84
Letters & Science	43	Art History, Bachelor of Arts	84
Bachelor's Degree Requirements Archive	47	Art History, Minor	87
Departments, Programs, & Degrees	48	Art History, Master of Arts	87
African American & African Studies	54	Art Studio, Bachelor of Arts	87
African American & African Studies, Bachelor of Arts	54	Art Studio, Minor	88
African American & African Studies, Minor	56	Art Studio, Master of Fine Arts	89
Agricultural & Environmental Chemistry (Graduate Group)	57	Museum Studies, Minor	89
Agriculture & Environmental Chemistry, Master of Science	57	Asian American Studies	89
Agriculture & Environmental Chemistry, Doctor of Philosophy	57	Asian American Studies, Bachelor of Arts	90
Agricultural & Resource Economics	57	Asian American Studies, Minor	91
Agricultural & Resource Economics, Master of Science	57	Social, Ethnic & Gender Relations, Minor	92
Agricultural & Resource Economics, Master of Science/Master of Business Administration	58	Atmospheric Science (Graduate Group)	93
Agricultural & Resource Economics, Doctor of Philosophy	58	Atmospheric Science, Master of Science	93
Managerial Economics, Bachelor of Science	58	Atmospheric Science, Doctor of Philosophy	93
Managerial Economics, Minor	61	Avian Sciences (Graduate Group)	93
American Studies	61	Avian Sciences, Master of Science	94
American Studies, Bachelor of Arts	62	Biochemistry, Molecular, Cellular & Developmental Biology (Graduate Group)	94
American Studies, Minor	63	Biochemistry, Molecular, Cellular & Developmental Biology, Master of Science	94
Animal Behavior (Graduate Group)	63	Biochemistry, Molecular, Cellular & Developmental Biology, Doctor of Philosophy	94
Animal Behavior, Master of Science	63	Biological & Agricultural Engineering	95
Animal Behavior, Doctor of Philosophy	63	Agricultural & Environmental Technology, Bachelor of Science	95
Animal Biology (Graduate Group)	63	Biological Systems Engineering, Bachelor of Science	99
Animal Biology, Master of Science	63	Biological Systems Engineering, Bachelor of Science/Master of Science Integrated	104
Animal Biology, Doctor of Philosophy	64	Biological Systems Engineering, Master of Engineering	104
Animal Science	64	Biological Systems Engineering, Master of Science	105
Agricultural & Environmental Education, Bachelor of Science	64	Biological Systems Engineering, Doctor of Engineering	105
Animal Science & Management, Bachelor of Science	66	Biological Systems Engineering, Doctor of Philosophy	106
Animal Science, Bachelor of Science	69	Energy Efficiency, Minor	106
Animal Science, Minor	72		
Avian Sciences, Minor	73		

Energy Policy, Minor	107	Cinema & Digital Media, Bachelor of Arts	135
Energy Science & Technology, Minor	107	Film Studies, Minor	137
Geographic Information Systems, Minor	108	Civil & Environmental Engineering	137
Precision Agriculture, Minor	108	Civil Engineering, Bachelor of Science	137
Biological Sciences	109	Civil & Environmental Engineering, Master of Science	140
Biological Sciences, Bachelor of Arts	109	Civil & Environmental Engineering, Doctor of Philosophy	140
Biological Sciences, Bachelor of Science	110	Construction Engineering & Management, Minor	141
Biological Sciences, Minor	114	Environmental Engineering, Bachelor of Science	142
Quantitative Biology & Bioinformatics, Minor	114	Sustainability in the Built Environment, Minor	143
Biomedical Engineering	115	Classics	144
Biomedical Engineering, Bachelor of Science	115	Classical Civilization, Bachelor of Arts	144
Biomedical Engineering, Minor	118	Classical Civilization, Minor	147
Biomedical Engineering (Graduate Group)	119	Greek, Minor	147
Biomedical Engineering, Master of Science	119	Latin, Minor	148
Biomedical Engineering, Doctor of Philosophy	119	Clinical Research (Graduate Group)	148
Biophysics (Graduate Group)	120	Clinical Research, Master of Advanced Studies	148
Biophysics, Doctor of Philosophy	120	Cognitive Science	148
Biostatistics (Graduate Group)	120	Cognitive Science, Bachelor of Arts	148
Biostatistics, Master of Science	120	Cognitive Science, Bachelor of Science	150
Biostatistics, Doctor of Philosophy	120	Communication	152
Chemical Engineering	121	Communication, Bachelor of Arts	152
Biochemical Engineering, Bachelor of Science	121	Communication, Minor	153
Chemical Engineering, Bachelor of Science	123	Communication, Master of Arts	154
Chemical Engineering, Master of Engineering	124	Communication, Doctor of Philosophy	154
Chemical Engineering, Master of Science	125	Comparative Literature	154
Chemical Engineering, Doctor of Philosophy	125	Comparative Literature, Bachelor of Arts	154
Chemistry	125	Comparative Literature, Minor	155
Applied Chemistry, Bachelor of Science	125	Comparative Literature, Master of Arts	156
Chemistry, Bachelor of Arts	128	Comparative Literature, Doctor of Philosophy	156
Chemistry, Bachelor of Science	129	Computer Science	156
Chemistry, Minor	130	Computational Biology, Minor	157
Chemistry & Chemical Biology, Master of Science	130	Computer Science & Engineering, Bachelor of Science	157
Chemistry & Chemical Biology, Doctor of Philosophy	130	Computer Science, Bachelor of Science	159
Chemical Physics, Bachelor of Science	130	Computer Science, Minor	160
Pharmaceutical Chemistry, Bachelor of Science	131	Computer Science (Graduate Group)	160
Pharmaceutical Chemistry, Master of Science	133	Computer Science, Master of Science	160
Chicana/Chicano Studies	133	Computer Science, Doctor of Philosophy	161
Chicana/Chicano Studies, Bachelor of Arts	133	Cultural Studies (Graduate Group)	161
Chicana/Chicano Studies, Minor	134	Cultural Studies, Master of Arts	161
Child Development (Graduate Group)	135	Cultural Studies, Doctor of Philosophy	161
Child Development, Master of Science	135	Design	162
Cinema & Digital Media	135	Design, Bachelor of Arts	162

Design, Master of Fine Arts	163	Electrical & Computer Engineering	193
Designated Emphasis, Ph.D	164	Computer Engineering, Bachelor of Science	193
Biotechnology, Designated Emphasis	164	Electrical & Computer Engineering, Bachelor of Science/Master of Science	196
Computational Social Science, Designated Emphasis	164	Electrical & Computer Engineering, Master of Science	196
Critical Theory, Designated Emphasis	164	Electrical & Computer Engineering, Doctor of Philosophy	197
Feminist Theory & Research, Designated Emphasis	164	Electrical Engineering, Bachelor of Science	197
Global Nutrition, Designated Emphasis	165	Electrical Engineering, Minor	201
Earth & Planetary Sciences	165	Energy Systems (Graduate Group)	202
Earth & Planetary Sciences, Master of Science	166	Energy Systems, Master of Science	202
Earth & Planetary Sciences, Doctor of Philosophy	166	Energy Systems, Doctor of Philosophy	202
Environmental Geology, Minor	166	Engineering, College of	202
Geology, Bachelor of Arts	166	English	203
Geology, Bachelor of Science	168	Creative Writing, Master of Fine Arts	203
Geology, Minor	170	English, Bachelor of Arts	203
Geophysics, Minor	171	English, Minor	206
Marine & Coastal Science, Bachelor of Science	172	English, Master of Arts	206
Oceanography, Minor	176	English, Doctor of Philosophy	206
East Asian Languages & Cultures	176	Entomology & Nematology	206
Chinese, Bachelor of Arts	177	Agricultural Pest Management, Minor	207
Chinese, Minor	179	Animal Biology, Bachelor of Science	207
Japanese, Bachelor of Arts	179	Entomology, Bachelor of Science	208
Japanese, Minor	181	Entomology, Master of Science	209
East Asian Studies	181	Entomology, Doctor of Philosophy	209
East Asian Studies, Bachelor of Arts	181	Forensic Entomology, Minor	209
East Asian Studies, Minor	183	Insect Biology, Minor	210
Ecology (Graduate Group)	183	Insect Ecology & Evolution, Minor	210
Ecology, Master of Science	183	Medical-Veterinary Entomology, Minor	210
Ecology, Doctor of Philosophy	184	Nematology, Minor	210
Ecology, Doctor of Philosophy (Joint Doctorate with SDSU)	184	Environmental Policy & Management (Graduate Group)	211
Economics	184	Environmental Policy & Management, Master of Science	211
Economics, Bachelor of Arts	184	Environmental Science & Policy	211
Economics, Minor	190	Climate Science & Policy, Minor	211
Economics, Master of Arts	190	Environmental Policy Analysis & Planning, Bachelor of Science	212
Economics, Doctor of Philosophy	190	Environmental Policy Analysis & Planning, Minor	215
Education, School of	191	Environmental Science & Management, Bachelor of Science	215
Education, Minor	191	Environmental Toxicology	221
Education, Master of Arts	192	Environmental Toxicology, Bachelor of Science	221
Education, Doctor of Philosophy	192	Environmental Toxicology, Minor	223
Education Leadership, Doctorate in Education (CANDEL)	192	Epidemiology (Graduate Group)	223
Integrated Teaching Credential, Teaching Credential, Master of Arts	193	Epidemiology, Master of Science	223

Epidemiology, Doctor of Philosophy	224	History, Master of Arts	253
Evolution & Ecology	224	History, Doctor of Philosophy	253
Evolution, Ecology & Biodiversity, Bachelor of Arts	225	Jewish Studies, Minor	253
Evolution, Ecology & Biodiversity, Bachelor of Science	226	Horticulture & Agronomy (Graduate Group)	254
Evolution, Ecology & Biodiversity, Minor	228	Horticulture & Agronomy, Master of Science	254
Food Science & Technology	228	Horticulture & Agronomy, Doctor of Philosophy	255
Food Science, Bachelor of Science	229	Human Development (Graduate Group)	255
Food Science (Graduate Group)	230	Human Development, Doctor of Philosophy	255
Food Science, Master of Science	230	Human Ecology	255
Food Science, Doctor of Philosophy	230	Aging & Adult Development, Minor	255
Forensic Science (Graduate Group)	230	Community & Regional Development, Bachelor of Science ...	256
Forensic Science, Master of Science	230	Community Development, Minor	260
French & Italian	231	Community Development, Master of Science	260
French & Francophone Studies, Master of Arts	231	Geographic Studies, Minor	261
French & Francophone Studies, Doctor of Philosophy	231	Human Development, Bachelor of Science	261
French, Bachelor of Arts	231	Human Development, Minor	263
French, Minor	233	Landscape Architecture, Bachelor of Science	263
Italian, Bachelor of Arts	234	Sustainable Environmental Design, Bachelor of Science	265
Italian, Minor	235	Human Rights Studies	266
Gender, Sexuality, & Women's Studies	236	Human Right Studies, Minor	266
Gender, Sexuality, & Women's Studies, Bachelor of Arts	236	Humanities	267
Gender, Sexuality, & Women's Studies, Minor	238	Hydrologic Sciences (Graduate Group)	267
Sexuality Studies, Minor	239	Hydrologic Sciences, Master of Science	267
Geography (Graduate Group)	239	Hydrologic Sciences, Doctor of Philosophy	268
Geography, Master of Arts	239	Immunology (Graduate Group)	268
Geography, Doctor of Philosophy	240	Immunology, Master of Science	268
German & Russian	240	Immunology, Doctor of Philosophy	268
German, Bachelor of Arts	240	Individual Major	269
German, Minor	242	Agricultural & Environmental Sciences, Bachelor of Science, Individual	269
German, Master of Arts	242	Biological Sciences, Bachelor of Arts, Individual	269
German, Doctor of Philosophy	242	Biological Sciences, Bachelor of Science, Individual	270
Russian, Bachelor of Arts	242	Letters & Science, Bachelor of Arts, Individual	270
Russian, Minor	243	Letters & Science, Bachelor of Science, Individual	271
Global Learning Hub	243	Integrative Genetics & Genomics (Graduate Group)	271
Global Studies, Minor	245	Integrative Genetics & Genomics, Master of Science	272
Health Informatics (Graduate Group)	245	Integrative Genetics & Genomics, Doctor of Philosophy	272
Health Informatics, Master of Science	246	Integrative Pathobiology (Graduate Group)	272
Hemispheric Institute of the Americas	246	Integrative Pathobiology, Master of Science	272
Latin American & Hemispheric Studies, Minor	246	Integrative Pathobiology, Doctor of Philosophy	272
History	248	International Agricultural Development (Graduate Group)	273
History, Bachelor of Arts	248	International Agricultural Development, Master of Science ...	273
History, Minor	253		

Land, Air, & Water Resources	273	Mechanical & Aerospace Engineering	300
Atmospheric Science, Bachelor of Science	274	Aerospace Science & Engineering, Bachelor of Science	300
Atmospheric Science, Minor	275	Mechanical Engineering, Bachelor of Science	302
Hydrology, Bachelor of Science	275	Mechanical & Aerospace Engineering, Master of Science	306
Hydrology, Minor	277	Mechanical & Aerospace Engineering, Doctor of Philosophy	307
International Science Studies, Minor	277	Medicine, School of	308
Soil Science, Minor	278	Doctor of Medicine	308
Sustainable Agriculture & Food Systems, Bachelor of Science	278	Medieval & Early Modern Studies	308
Watershed Science, Minor	282	Medieval & Early Modern Studies, Bachelor of Arts	308
Law, School of	282	Medieval & Early Modern Studies, Minor	310
Master of Laws	283	Microbiology & Molecular Genetics	310
Doctor of Jurisprudence	283	Molecular & Medical Microbiology, Bachelor of Arts	310
Linguistics	283	Molecular & Medical Microbiology, Bachelor of Science	312
General Linguistics, Minor	283	Microbiology (Graduate Group)	313
Linguistics, Bachelor of Arts	284	Microbiology, Master of Science	314
Linguistics, Master of Arts	285	Microbiology, Doctor of Philosophy	314
Linguistics, Doctor of Philosophy	285	Middle East/South Asia Studies	314
Linguistics for Language Teachers, Minor	285	Arab Studies, Minor	314
Management, Graduate School of	286	Arabic, Minor	315
Accounting, Minor	286	India & South Asia Studies, Minor	316
Business Analytics, Master of Science	286	Iran & Persian Studies, Minor	316
Master of Business Administration	287	Middle East/South Asia Studies, Bachelor of Arts	317
Master of Business Administration Online	287	Middle East/South Asia Studies, Minor	319
Master of Professional Accountancy	287	Military Science	319
Technology Management, Minor	287	Molecular & Cellular Biology	322
Materials Science & Engineering	288	Biochemistry & Molecular Biology, Bachelor of Science	322
Materials Science & Engineering, Bachelor of Science	288	Cell Biology, Bachelor of Science	324
Materials Science, Minor	290	Genetics & Genomics, Bachelor of Science	326
Materials Science & Engineering, Master of Engineering	290	Molecular, Cellular, & Integrative Physiology (Graduate Group)	327
Materials Science & Engineering, Master of Science	291	Molecular, Cellular, & Integrative Physiology, Master of Science	327
Materials Science & Engineering, Doctor of Philosophy	291	Molecular, Cellular, & Integrative Physiology, Doctor of Philosophy	328
Mathematics	291	Music	328
Applied Mathematics, Bachelor of Science	291	Music, Bachelor of Arts	328
Mathematics, Bachelor of Arts	293	Music, Minor	334
Mathematics, Bachelor of Science	294	Music, Master of Arts	335
Mathematics, Minor	296	Music, Doctor of Philosophy	335
Mathematics, Master of Arts	297	Native American Studies	335
Mathematics, Doctor of Philosophy	297	Native American Studies, Bachelor of Arts	335
Mathematical & Scientific Computation, Bachelor of Science	297	Native American Studies, Minor	338
Mathematical Analytics & Operations Research, Bachelor of Science	298	Native American Studies, Master of Arts	338

Native American Studies, Doctor of Philosophy	339	Physics, Minor	368
Neurobiology, Physiology, & Behavior	339	Physics, Master of Arts	368
Exercise Biology, Minor	339	Physics, Doctor of Philosophy	368
Human Biology, Bachelor of Science	339	Plant Biology	368
Human Physiology, Minor	341	Plant Biology, Bachelor of Arts	368
Neurobiology, Physiology, & Behavior, Bachelor of Science	342	Plant Biology, Bachelor of Science	369
Neuroscience, Minor	345	Plant Biology, Minor	371
Neuroscience (Graduate Group)	346	Systems & Synthetic Biology, Bachelor of Science	371
Neuroscience, Doctor of Philosophy	346	Plant Biology (Graduate Group)	373
Nursing Science & Health-Care Leadership	346	Plant Biology, Master of Science	373
Doctor of Nursing Practice—Family Nurse Practitioner Degree Program	346	Plant Biology, Doctor of Philosophy	373
Family Nurse Practitioner Program, Master of Science	346	Plant Pathology	373
Master's Entry Program in Nursing	347	Fungal Biology & Ecology, Minor	374
Nursing Science & Health-Care Leadership, Doctor of Philosophy	347	Global Disease Biology, Bachelor of Science	374
Physician Assistant Studies, Master of Health Services	347	Global Disease Biology, Minor	376
Nutrition	348	Plant Pathology, Master of Science	376
Clinical Nutrition, Bachelor of Science	348	Plant Pathology, Doctor of Philosophy	376
Community Nutrition, Minor	349	Plant Sciences	377
Food Service Management, Minor	349	Agricultural Systems & Environment, Minor	377
Maternal & Child Nutrition, Master of Advanced Study	350	Biotechnology, Bachelor of Science	378
Nutrition & Food, Minor	350	Ecological Management & Restoration, Bachelor of Science	382
Nutrition Science, Bachelor of Science	351	Environmental Horticulture & Urban Forestry, Bachelor of Science	383
Nutrition Science, Minor	354	Environmental Horticulture, Minor	385
Nutritional Biology (Graduate Group)	354	International Agricultural Development, Bachelor of Science	385
Nutritional Biology, Master of Science	355	International Agricultural Development, Minor	388
Nutritional Biology, Doctor of Philosophy	355	Landscape Restoration, Minor	388
Performance Studies (Graduate Group)	355	Plant Sciences, Bachelor of Science	388
Performance Studies, Doctor of Philosophy	355	Political Science	392
Pharmacology & Toxicology (Graduate Group)	355	International Relations, Bachelor of Arts	392
Pharmacology & Toxicology, Master of Science	356	Political Science—Public Service, Bachelor of Arts	399
Pharmacology & Toxicology, Doctor of Philosophy	356	Political Science, Bachelor of Arts	401
Philosophy	356	Political Science, Minor	403
Philosophy, Bachelor of Arts	356	Political Science, Master of Arts	404
Philosophy, Minor	359	Political Science, Master of Arts/Doctor of Jurisprudence	404
Philosophy, Master of Arts	359	Political Science, Doctor of Philosophy	404
Philosophy, Doctor of Philosophy	360	War-Peace Studies, Minor	404
Physics & Astronomy	360	Population Biology (Graduate Group)	405
Applied Physics, Bachelor of Science	360	Population Biology, Master of Science	405
Physics, Bachelor of Arts	365	Population Biology, Doctor of Philosophy	405
Physics, Bachelor of Science	366	Preventive Veterinary Medicine (Graduate Group)	405

Master of Preventive Veterinary Medicine	405	Statistics, Master of Science	444
Psychology	406	Statistics, Doctor of Philosophy	444
Psychology, Bachelor of Arts	406	Textiles (Graduate Group)	444
Psychology, Bachelor of Science	408	Textiles, Master of Science	444
Psychology, Minor	412	Theatre & Dance	444
Psychology, Master of Arts	413	Dramatic Art, Master of Fine Arts	445
Psychology, Doctor of Philosophy	413	Theatre & Dance, Bachelor of Arts	445
Public Health Sciences	413	Theatre & Dance, Minor	448
Master of Public Health	413	Transportation Technology & Policy (Graduate Group)	449
Public Health Sciences, Doctor of Philosophy	414	Transportation Technology & Policy, Master of Science	449
Public Health Sciences, Minor	414	Transportation Technology & Policy, Doctor of Philosophy	450
Religious Studies	415	University Writing Program	450
Religious Studies, Bachelor of Arts	415	Professional Writing, Minor	450
Religious Studies, Minor	416	Veterinary Medicine, School of	451
Study of Religion, Master of Arts	417	Viticulture & Enology	451
Study of Religion, Doctor of Philosophy	417	Viticulture & Enology, Bachelor of Science	451
Science & Society	418	Viticulture & Enology (Graduate Group)	454
Contemporary Leadership, Minor	418	Viticulture & Enology, Master of Science	454
Science & Society, Minor	418	Wildlife, Fish, & Conservation Biology	454
Science & Technology Studies	419	Wildlife, Fish & Conservation Biology, Bachelor of Science	454
History & Philosophy of Science, Minor	419	Wildlife, Fish & Conservation Biology, Minor	457
Science & Technology Studies, Bachelor of Arts	420	Additional Education Opportunities	458
Sociology	422	Bodega Marine Laboratory Program	458
Organizational Studies, Bachelor of Arts	422	First-Year Seminar Program	458
Sociology, Bachelor of Arts	425	Independent Study Program	458
Sociology, Minor	432	Internship Program	459
Sociology, Master of Arts	433	UC Washington Program (UCDC)	459
Sociology, Doctor of Philosophy	433	University Honors Program	460
Soils & Biogeochemistry (Graduate Group)	433	About Courses	461
Soils & Biogeochemistry, Master of Science	433	Courses by Subject Code	463
Soils & Biogeochemistry, Doctor of Philosophy	433	Aerospace Science & Engineering (EAE)	465
Spanish & Portuguese	433	African American Studies (AAS)	467
Luso-Brazilian Studies, Minor	434	Agricultural & Environmental Chemistry (AGC)	473
Spanish, Bachelor of Arts	434	Agricultural & Environmental Technology (TAE)	473
Spanish, Minor	436	Agricultural & Resource Econ (ARE)	473
Spanish, Master of Arts	437	Agricultural Education (AED)	483
Spanish, Doctor of Philosophy	437	American Studies (AMS)	484
Statistics	437	Anatomy, Physiology, & Cell Biology (APC)	489
Data Science, Bachelor of Science	437	Anesthesiology (ANE)	489
Statistics, Bachelor of Arts	438	Animal Behavior (ANB)	491
Statistics, Bachelor of Science	439	Animal Biology (ABI)	492
Statistics, Minor	443	Animal Biology Graduate (ABG)	493

Animal Genetics (ANG)	494	Cultural Studies (CST)	693
Animal Science (ANS)	496	Dermatology (DER)	694
Anthropology (ANT)	504	Design (DES)	695
Applied Biological Systems Technology (ABT)	518	Designated Emphasis, Biotechnology (DEB)	706
Applied Science Engineering-Davis (EAD)	521	Dramatic Art (DRA)	706
Arabic (ARB)	522	East Asian Studies (EAS)	719
Art History (AHI)	525	Ecology (ECL)	719
Art Studio (ART)	533	Economics (ECN)	722
Asian American Studies (ASA)	542	Education (EDU)	732
Astronomy (AST)	545	Education Abroad Program (EAP)	745
Atmospheric Science (ATM)	546	Electrical & Computer Engineering (EEC)	746
Avian Sciences (AVS)	551	Emergency Medicine (EMR)	763
Biochemistry, Molecular, Cellular, & Developmental Biology (BCB)	554	Endocrinology & Metabolism (ENM)	766
Biological Chemistry (BCM)	555	Energy Systems (EGG)	766
Biological Sciences (BIS)	557	Engineering (ENG)	767
Biological Systems Engineering (EBS)	561	English (ENL)	770
Biomedical Engineering (BIM)	567	Entomology (ENT)	782
Biophotonics (BPT)	579	Environmental Horticulture (ENH)	787
Biophysics (BPH)	579	Environmental Policy & Management (ENV)	788
Biostatistics (BST)	580	Environmental Science & Management (ESM)	789
Biotechnology (BIT)	581	Environmental Science & Policy (ESP)	792
Business Analytics (BAX)	582	Environmental Toxicology (ETX)	797
Cardiology (CAR)	584	Epidemiology (EPI)	802
Cell Biology & Human Anatomy (CHA)	585	Evolution & Ecology (EVE)	805
Chemical Engineering (ECH)	587	Exercise Biology (EXB)	811
Chemistry (CHE)	595	Exercise Science (EXS)	814
Chicano Studies (CHI)	608	Family Practice (FAP)	814
Chinese (CHN)	615	Fiber & Polymer Science (FPS)	819
Cinema & Digital Media (CDM)	621	Film Studies (FMS)	821
Cinema & Technocultural Studies (CTS)	626	Fine Arts & Humanities (FAH)	822
Civil & Environmental Engineering (ECI)	627	Food Science & Technology (FST)	822
Classics (CLA)	641	Food Service Management (FSM)	827
Clinical Research (CLH)	646	Forensic Science (FOR)	828
Cognitive Science (CGS)	649	French (FRE)	831
College of Letters & Science (LTS)	650	Freshman Seminar (FRS)	838
Communication (CMN)	650	Future Undergraduate Science Educators (FSE)	839
Community & Regional Development (CRD)	660	Gastroenterology (GAS)	839
Comparative Literature (COM)	665	Gender, Sexuality, & Women's Studies (GSW)	840
Computer Science Engineering (ECS)	675	General Medicine (GMD)	840
Consumer Sciences (CNS)	692	Genetics (GGG)	841
Critical Theory (CRI)	692	Geography (GEO)	843
		Geology (GEL)	846

German (GER)	859	Medical Sciences (MDS)	1073
Global Disease Biology (GDB)	867	Medicine & Epidemiology (VME)	1081
Graduate Education (GRD)	868	Medieval Studies (MST)	1082
Greek (GRK)	868	Microbiology (MIB)	1083
Health Informatics (MHI)	870	Microbiology (MIC)	1083

From Chancellor May

I'm delighted that you've chosen to be part of our thriving UC Davis community. We remain resilient and focused as our campus community—like most of the world—confronts uncertainty and challenges. Still, we push forward.

We've redefined the teaching environment and improved our capabilities. You can be certain that all of us—faculty, staff and alumni—are committed to helping you achieve academic success and make the most of your college experience.

A degree from UC Davis is one that commands respect in graduate schools and the workplace worldwide. You have an incredible opportunity to learn from some of the best and brightest professors and students from around the globe.

You're joining a community that's driven by curiosity and motivated to solve the world's greatest problems. Our research and innovations help feed a growing population, sustain our natural resources and advance

health worldwide. Our alumni have provided leadership in government, the arts, technology, business, education and much more.

My hope is that your own world opens up like never before. At UC Davis, you can develop new ways of thinking, seeing and being. You can challenge limitations and outgrow the expected.

You are building on our legacy. The personal touch, social engagement and passion for learning you bring to UC Davis elevates the university as a whole.

I wish you much success in your studies and all your future endeavors.

Gary S. May, Chancellor

UC Davis 2022-2023 General Catalog

Published April 25, 2022; Volume 53 | Content Effective: 4/25/2022–4/23/2023, unless otherwise noted.

The provisions of this General Catalog reflect information as of the date of publication. Content is subject to change without notice. All times are local Pacific time zone (PT), unless otherwise stated. It is the responsibility of the individual student to become familiar with the announcements and regulations of the university contained in this General Catalog.

Programs (majors & minors) are updated for fall term only; once-a-year at the publication date.

Courses are updated & published with effective terms (p. 461), as they are approved. To better understand course descriptions, see the About Courses (p. 461). **Courses listed in this catalog are subject to change without notice.**

UC Davis will provide assistance to the visually impaired regarding the information contained in this catalog; questions should be directed to the office or department concerned.

Printing the Catalog

To **print the entire** General Catalog, see General Catalog Downloads (p. 1364).

To **print a single section**, like *Animal Science* or *Introduction*, use *Print Options* in the right panel of every web page.

Editorial & Production Coordination

Davis, CA 95616-8692

Disclaimer Notice

This General Catalog is not a contract nor an offer to enter into a contract. While every effort is made to ensure the accuracy of the information provided in this General Catalog, it must be understood that all courses, course descriptions, designations of instructors, curricular and degree requirements and other academic information described herein are subject to change or elimination at any time without notice or published amendment to this catalog. In addition, The University of California reserves the right to make changes at any time, without prior notice, to other programs, policies, procedures and information, which are described in this General Catalog only as a convenience to its readers. Fees and all other charges are subject to

change at any time without notice. Students should consult the appropriate academic or administrative department, school, college, graduate division or other service provider for currently accurate information on any matters described in this General Catalog; contact information is available at <http://ucdavis.edu>.

ACADEMIC CALENDARS

All major UC Davis Academic Calendars are maintained by the Office of the University Registrar; see:

- Master Academic Calendar (<https://registrar.ucdavis.edu/calendar/master/>)
- Registration Calendar (<https://registrar.ucdavis.edu/calendar/registration/>)
- Quarter Dates & Deadlines (<https://registrar.ucdavis.edu/calendar/quarter/>)
- Fees & Billing Calendar (<https://registrar.ucdavis.edu/calendar/fees/>)
- University Holidays & Academic Breaks (<https://registrar.ucdavis.edu/calendar/holidays/>)
- Undergraduate Readmission Deadlines (<https://registrar.ucdavis.edu/registration/return/>)

For graduation and commencement dates, see Applying to Graduate (<https://registrar.ucdavis.edu/registration/leave/graduate/>).

For a variety of campus calendars, see the Campus Events calendar (<http://www.ucdavis.edu/calendar/>).

Other important calendars:

- Graduate Student Deadlines & Dates (<https://grad.ucdavis.edu/academics/academic-dates-deadlines/>)
- Summer Sessions Master Calendar (<https://summer-sessions.ucdavis.edu/calendar/master-calendar/>)
- Semester Dates (<https://registrar.ucdavis.edu/calendar/semester/>)

INTRODUCTION

UC Davis

For the full UC Davis story, see About UC Davis (<https://www.ucdavis.edu/about/>).

Visiting the Campus

UC Davis Welcome Center (<http://visit.ucdavis.edu/>); 530-752-2971

During campus closures, see <http://visit.ucdavis.edu>.

Welcome Center normal operating hours:

- Monday-Friday 8:00 a.m.-4:00 p.m. (PT)
- Saturdays 10:00 a.m.-2:00 p.m. (PT)
- Closed Sundays except for Apr 1-Apr 30 10:00 a.m.-2:00 p.m. (PT)

Campus Tours

Monday-Friday 9:00 a.m. & 1 p.m. (PT) | Saturdays 11:00 a.m. & Sundays, Apr 1-30 11:00 a.m. (PT). Register at <http://visit.ucdavis.edu>.

UC Davis Virtual Tours can be accessed at <https://www.ucdavis.edu/about/visit/campus-virtual-tour> (<https://www.ucdavis.edu/about/visit/campus-virtual-tour/>).

Virtual Student-Led Campus Tours

Registration available at <https://ua.ucdavis.edu/portal/guidedvirtualtours> (<https://ua.ucdavis.edu/portal/guidedvirtualtours/>).

Accreditation

The University of California, Davis has been fully accredited since 1954 by the WASC Senior College & University Commission (WSCUC) (<https://wasc.ucdavis.edu/>), our regional accreditation agency.

In addition, selected UC Davis schools, colleges, and programs are accredited by:

- Accreditation Board for Engineering & Technology
- Accreditation Council for Graduate Medical Education
- Accreditation Review Commission on Education for the Physician Assistant (ARC-PA)
- American Association for Accreditation of Laboratory Animal Care
- American Bar Association
- American Chemical Society
- American Dietetic Association
- American Psychological Association

- American Society of Crime Lab Directors Laboratory Accreditation Board (ASCLD/LAB)
- American Society of Landscape Architects
- Association of American Law Schools
- Association of American Medical Colleges
- Association to Advance Collegiate Schools of Business
- Commission on Collegiate Nursing Education
- Commission on Teacher Credentialing
- Computer Science Accreditation Commission
- Council on Education & Public Health
- Council on Education of the American Veterinary Medical Association
- Intersocietal Commission for the Accreditation of Vascular Laboratories (ICAVL)
- Liaison Committee on Medical Education

Contact the campus Accreditation Liaison Officer (ALO) (<https://wasc.ucdavis.edu/contact/>).

UC Davis Principles of Community

The University of California, Davis, is first and foremost an institution of learning, teaching, research and public service. UC Davis reflects and is committed to serving the needs of a global society comprising all people and a multiplicity of identities. The university expects that every member of our community acknowledge, value, and practice the following guiding principles.

We affirm the dignity inherent in all of us, and we strive to maintain a climate of equity and justice demonstrated by respect for one another. We acknowledge that our society carries within it historical and deep-rooted injustices and biases. Therefore, we endeavor to foster mutual understanding and respect among the many parts of our whole.

We affirm the right of freedom of expression within our community (<https://diversity.ucdavis.edu/affirm-right-freedom-expression/>). We affirm our commitment to non-violent exchange and the highest standards of conduct and decency toward all. Within this context we reject violence in all forms (<https://diversity.ucdavis.edu/we-reject-violence-all-forms/>). We promote open expression of our individuality and our diversity within the bounds of courtesy, sensitivity and respect. We further recognize the right of every individual to think, speak, express and debate any idea limited only by university regulations governing time, place and manner.

We confront and reject all manifestations of discrimination (<https://diversity.ucdavis.edu/confront-and-reject-all-manifestations-discrimination/>), including those based on race, ethnicity, gender and gender expression, age, visible and non-visible disability, nationality, sexual orientation, citizenship status, veteran status, religious/non-religious, spiritual, or political beliefs, socio-economic class, status within or outside the university, or any of the other differences among people which have been excuses for misunderstanding, dissension or hatred. We recognize and cherish the richness contributed to our lives by our diversity. We take pride in all our achievements, and we celebrate our differences.

We recognize that each of us has an obligation to the UC Davis community of which we have chosen to be a part. We will strive to build and maintain a culture and climate based on mutual respect and caring.

For more information, to learn more about the *Living the Principles of Community* e-learning course, and translations, see Diversity, Equity & Inclusion (<https://diversity.ucdavis.edu/>) & the Principles of Community (<https://diversity.ucdavis.edu/principles-community/>).

Educational Objectives for Students

The Educational Objectives for Students were adopted by the Academic Senate in April 2002. They articulate our aspirations for student learning; help to establish campus priorities and guide decision making related to student development; and guide academic programs in the review of how their classes and course requirements interact with the goals to demonstrate educational effectiveness.

Develop effective communication skills:

- Written, oral, interpersonal, group

Develop higher cognitive skills:

- Critical thinking, creativity, analytical ability

Cultivate the virtues:

- Ethics, responsibility, honor, tolerance, respect for others, empathy

Develop focus and depth in one or more disciplines.

Develop leadership skills:

- Ability to stimulate and direct collaborative learning and collaborative action

Develop a global perspective:

- Broad intellectual and cultural experience through active engagement, an understanding of the interactions among the individual, society, and the natural world

Prepare for lifelong learning:

- Independent thinking and learning, learning to find information, asking the right questions

Mission Statement, Philosophy of Purpose

UC Davis is dedicated to academic excellence and serving the public good. As a major research institution, UC Davis takes a holistic approach in addressing the most critical issues faced by the region, state and the world. The university embraces the principles of diversity, inclusion and equity to sustain a culture of mutual respect.

Examination Credit

The University awards credit for successful completion of the College Board (p. 18) Advanced Placement (AP) and the International Baccalaureate Higher Level Examinations (IB) (p. 20). Students must have official test score reports sent directly from the testing service to UC Davis to receive credit. Students will meet with advising staff during New Student Orientation to discuss which courses or requirements they may have satisfied based on transfer credit for scores in these examinations.

Advanced Placement Credit & Chart

Students who earn scores of 3, 4, or 5 on College Board Advanced Placement Examinations taken before high school graduation will receive 2, 4, or 8 units of credit toward graduation at UC Davis for each such test completed with the required scores, provided official scores are submitted to the Office of Admissions.

Students should be advised that college courses taken before or after attending UC may duplicate AP, IB and/or A Level (GCE) examinations. Additionally, exams may duplicate each other (for example, and AP or IB exam in the same subject area). If the student does duplicate an exam with another exam of the same subject content, and/or an exam with a college course, we will award credit only once.

Note: Advanced Placement credit earned prior to entering the university will not be counted toward maximum unit limitations either for selection of a major or for graduation.

Effective April 25, 2022-April 23, 2023

AP Exam with Score of 3 or 4 or 5	Units Awarded	UC Davis Course Equivalent	Duplicate Credit Allowed
2D Art & Design (Studio Art) ¹	8	None	N/A
3D Art & Design (Studio Art) ¹	8	None	N/A
Art History	8	Exam prior to 2020 with score of 5 receive credit for Art History 001A/B/C. Effective May 2020, Art History 001A/B/C no longer awarded	N/A
Biology	8	Biological Sciences 010	No
Calculus AB (or AB subscore of BC exam) ¹			
With score of 3	4	None	N/A
With score of 4 or 5	4	Mathematics 012, 016A, 017A or 021A	Math 012 No
Calculus BC ¹			
With score of 3 or 4	8	Mathematics 012, 016A, 017A or 021A	Math 012 No
With score of 5	8	Mathematics 012, 016A/B, 017A/B or 021A/B	Math 012 No
Chemistry			
With score of 3 or 4	8	Chemistry 010	No
With score of 5	8	Chemistry 02A	Yes
Chinese Language & Culture	8	Consult with Department	N/A

Comparative Government & Politics	4	Exams prior to 2015 receive credit for Political Science 002. Effective May 2015, Political Science 002 no longer awarded credit	N/A
Computer Science A (through S17) ²	2 or 8	Engineering Computer Science 032A	No
Computer Science Principles (effective S17 and S18)	8	Engineering Computer Science 015	Yes
Drawing (Studio Art) ¹			
With score of 3	8	None	N/A
With score of 4 or 5	8	Art Studio 002	No
English—Language & Composition or Literature & Composition ¹			
With score of 3	8	None	N/A
With score of 4 or 5	8	English 003, University Writing Program 001	No
Environmental Science	4	Environmental Science & Policy 10	No
European History	8	History 004B/C	Yes
French Language & Culture ¹			
With score of 3	8	French 003	No
With score of 4	8	French 021	No
With score of 5	8	French 022	No

With score of 3	8	German 003	No
With score of 4	8	German 020	No
With score of 5	8	German 021	No
Human Geography	4	Landscape Architecture 010	Yes
Italian Language & Culture ¹			
With score of 3	8	Italian 003	No
With score of 4	8	Italian 004	No
With score of 5	8	Italian 005	No
Japanese Language & Culture	8	Consult with Department	N/A
Latin	8	Latin 002	No
Latin Literature	4	None	N/A
Macroeconomics	4	Economics 001B	No
Microeconomics	4	Economics 001A	No
Music Theory	8	Music 003A	No
Physics 1 (beginning S15) ¹			
With score of 3	8	None	N/A

With score of 4 or 5	8	Physics 001A/B	No
Physics 2 (beginning S15) ¹			
With score of 3	8	None	N/A
With score of 4 or 5	8	Physics 001A	No
Physics B (last offered S14) ¹			
With score of 3	8	None	N/A
With score of 4 or 5	8	Physics 001A/B	No
Physics C: Mechanics ¹			
With score of 3	4	None	N/A
With score of 4 or 5	4	Physics 001A	No
Physics C: Electricity & Magnetism ¹	4	None	N/A
Psychology			
With score of 3 or 4	4	None	N/A
With score of 5	4	Psychology 001	No
Spanish Language & Culture ¹			
With score of 3	8	Spanish 021	No
With score of 4	8	Spanish 022	No
With score of 5	8	Spanish 023	No
Spanish Literature & Culture			
With score of 3	8	Spanish 023	No
With score of 4 or 5	8	Spanish 024	No
Statistics			
With score of 3	4	None	N/A
With score of 4 or 5	4	Statistics 013	Yes
United States Government & Politics	4	None	N/A
United States History	8	History 017A/B	Yes
World History: Modern	8	History 010B/C	Yes

¹ A maximum of 8 units EACH in art studio, English, mathematics, physics, and language other than English is allowed. The Physics B exam is no longer offered.

² The change from 2 units to 8 units for AP Computer Science A was approved for students matriculating at a UC campus in fall 2018 or later. Students who matriculated in fall 2018 may earn 8 units for the exam if it was taken in spring 2015 or later.

To have AP scores sent to UC Davis, contact:

AP Services at 609-771-7300 or 888-225-5427; use the UC Davis CEEB code 004834; View Your AP Scores (<https://apstudents.collegeboard.org/view-scores/>).

Older CollegeBoard test scores require additional fulfillment time.

International Baccalaureate Credit & Chart

Students who earn scores of 5, 6, or 7 on International Baccalaureate (IB) Higher Level (HL) Examinations taken before high school graduation will receive 8 units of credit toward graduation at UC Davis for each such test completed with the required scores, provided official scores are submitted to the Office of Admissions. Students who complete the IB diploma with a score of 30 or above will receive 6 quarter units in addition to the units earned for individual Higher Level exams (effective S20). The university does not grant credit for Standard Level (SL) exams.

Students should be advised that college courses taken before or after attending UC may duplicate AP, IB and/or A Level examinations. Additionally, exams may duplicate each other (for example, an AP or IB exam in the same subject area). If the student does duplicate an exam with another exam of the same subject content, and/or an exam with a college course, we will award credit only once.

Note: International Baccalaureate credit earned prior to entering the university will not be counted toward maximum unit limitations either for selection of a major or for graduation.

Effective April 25, 2022-April 23, 2023

Note: This is not a comprehensive list. If your exam is not listed, credit will be determined in consultation with an advisor.

IB Higher Level (HL) Exam with score of 5 or 6 or 7	Units Awarded	UC Davis Course Equivalent	Duplicate Credit Allowed
Biology	8	Biological Science 010	No
Business Management	8	None	N/A
Chemistry			
With score of 5 or 6	8	Chemistry 010	No

FEES, EXPENSES, & FINANCIAL AID

Give careful consideration to the total financing of your university education. If you need funds beyond those that you and your family can provide, you should apply for financial aid well in advance of enrollment. There are deadlines for applying for financial aid; grants, loans, Work Study and scholarships.

For current student fee information, see Tuition & Fees (<https://financeandbusiness.ucdavis.edu/student-resources/tuition-fees/>). Every student must pay the quarterly fees, and any amounts charged to the student account, in full by the fee payment deadlines in the Fees & Billing calendar (<https://registrar.ucdavis.edu/calendar/fees/>). A Deferred Payment Plan (DPP) (<https://afs.ucdavis.edu/student-resources/accounting/mybill/dpp/>) is available, allowing students to pay quarterly tuition & fees, health insurance, document, orientation, international, equitable access and housing fees in three monthly installments, or semester fees in four monthly installments.

Course Materials & Service Fees

Students may be charged fees in some courses for the use, rental or consumption of materials, tools or equipment, or for the costs of materials or services necessary to provide a special supplemental educational experience. For example, course materials fees may cover the purchase of chemicals and glassware for a science laboratory or art supplies for an art studio class. They might also cover film rentals, field trips, or the purchase or rental of specific equipment. Courses that may be subject to the course materials and services fee are noted in the Schedule Builder (<https://registrar.ucdavis.edu/registration/register-for-classes/schedule-builder/>). The course materials & services fees list is available at Tuition & Fees (<https://financeandbusiness.ucdavis.edu/student-resources/tuition-fees/>).

Part-Time & Employee Students Fees

Part-Time Students Fees

Students approved for part-time status for tuition purposes are assessed one-half of Tuition. Nonresident students are also assessed one-half of Nonresident Supplemental Tuition. There is no reduction in the Student Services Fee or in any of the campus-base fees. For more information and specific requirements, see Part-Time Status (<https://registrar.ucdavis.edu/registration/part-time/>).

UC Employee-Student Fees

Reduced fees are available to UC career employees and certain UC retirees who are qualified for admission to the university. For full information, see Career Staff Reduced Fee (<https://registrar.ucdavis.edu/tuition/staff-reduced-fee/>).

Parking & Bicycle Fees

Vehicle Parking Permit & Bicycle Licensing Fees

Parking permit information & rates (https://taps.ucdavis.edu/types_and_rates/) or 530-752-8277. A California State bicycle license sticker is required on all bicycles operated on campus; full information

(https://taps.ucdavis.edu/bicycleprogram/parking_security/#register) or 530-752-2453.

Costs for a Year at UC Davis

For the most recent Cost of Attendance figures, see undergraduate (<https://financialaid.ucdavis.edu/undergraduate/cost/>); graduate/professional (<https://financialaid.ucdavis.edu/graduate/gradstudies/cost/>).

International Student Expenses

International students are responsible for all of their expenses while studying at UC Davis. The expenses include nonresident supplemental tuition, systemwide tuition & fees, campus-based fees, room & board, books and a modest amount for personal expenses. For the latest costs, see Cost of Attendance (<http://financialaid.ucdavis.edu/undergraduate/cost.html>). It is extremely important that students arrive on campus with sufficient funds for the entire academic year to cover all fees, tuition and expenses such as room & board, health insurance, books, supplies, transportation and other miscellaneous expenses. Careful budgeting is essential for international students.

During the admission process, most international undergraduate students are required to demonstrate that they have financial support and that these funds are available for nine months. Students need to have adequate, reliable and continuing financial support for the whole time they are here. After students arrive in the United States, it is extremely difficult to obtain additional funding. The university does not offer grants or financial aid to international undergraduate students.

Fee Refunds

UC Davis follows the University of California's system-wide refund procedures and any refund is based upon a Schedule of Refunds (<https://registrar.ucdavis.edu/registration/leave/refunds/>). When considering a leave of absence or separating from the university, any refund is based upon the number of calendar days elapsed from the start of instruction to when such request is filed with the Office of the University Registrar.

Cancellation or Withdrawal From the University (<https://registrar.ucdavis.edu/registration/leave/>) | Planned Educational Leave Program (PELP) (<https://registrar.ucdavis.edu/registration/leave/>) | University of California Student Health Plan (SHIP) (<https://shcs.ucdavis.edu/insurance/>)

Residence for Tuition Information

For complete information for determination of residence for tuition, see Tuition & Residence (<https://registrar.ucdavis.edu/tuition/>).

Financial Aid

Financial Aid & Scholarships (<https://financialaid.ucdavis.edu/>) provides financial assistance in the form of grants, scholarships, loans, and work-study employment. To apply, undergraduates and graduate students are required to annually file the Free Application for Federal Student Aid (FAFSA) (<https://studentaid.ed.gov/sa/fafsa/>), or the California Dream Act Application (CADAA) (<http://dream.csac.ca.gov/>).

UC Education Finance Policy for Undergraduates (<https://financialaid.ucdavis.edu/undergraduate/types/need/>) | Graduate Student Funding (<https://financialaid.ucdavis.edu/graduate/>)

Satisfactory Academic Progress

Federal regulations require that undergraduate and graduate student financial aid recipients meet the published Standards for Satisfactory Academic Progress (SAP) for Financial Aid concerning GPA, Pace of Progression, and Maximum Timeframe of attempted units allowed to obtain a degree; see Satisfactory Academic Progress (SAP) (<https://financialaid.ucdavis.edu/consumer/sap/standards/>).

Financial Aid Types

Grants

A grant is an award that does not have to be repaid as long as the student remains eligible. Whenever criteria and funding levels permit, a student's financial aid award includes grants; see Available Grant Awards (<https://financialaid.ucdavis.edu/undergraduate/types/grants/>).

Loans

Financial aid often includes a long-term loan; see Undergraduate Student Loans (<https://financialaid.ucdavis.edu/loans/undergraduate/>) or Graduate Student Loans (<https://financialaid.ucdavis.edu/graduate/loans/>).

Work-Study

Undergraduate Work-Study allows students to earn part of their financial aid through part-time employment; see Work-Study for Undergraduate Students (<https://financialaid.ucdavis.edu/undergraduate/types/work-study/>).

Community Service Work-Study

A wide variety of community service jobs are available for students who apply for Work-Study funding; see Work-Study for Undergraduate Students (<https://financialaid.ucdavis.edu/undergraduate/types/work-study/>).

Work-Study for Graduate Students

Work-Study funds for graduate students are allocated directly to the chairpersons of the graduate programs; see Work-Study for Graduate Student Researchers (<https://financialaid.ucdavis.edu/graduate/work-study/>).

Scholarships

With their UC admissions application, first-year students are automatically considered for campus scholarships. Continuing students are encouraged to apply every academic year for consideration. Students may also apply for Outside and Prestigious Scholarships; see Undergraduate & Prestigious Scholarships (<https://financialaid.ucdavis.edu/scholarships/>).

Undergraduate Scholarships & Awards

Undergraduates with outstanding academic records are encouraged to apply for scholarships. For information about the scholarship application process, see Undergraduate & Prestigious Scholarships (<http://financialaid.ucdavis.edu/scholarships/>).

STUDENT LIFE

As a UC Davis student, you're part of a creative, innovative community. Located in a vibrant college town where bicycles abound and students make up half the population, UC Davis offers resources to create your unique path whether you have established academic and career goals or are still open to opportunities. Living-learning communities and welcoming student centers are spaces for exploring and affirming diverse identities. The campus's multiple advising, tutoring, leadership and career resources will help you excel and achieve your aspirations, and the array of UC Davis professional schools—business, law, veterinary medicine and medicine—offer unique opportunities for undergraduates. With over 750 student organizations, you will find supportive groups that share your interests and passions, and when it's time to get active, options at UC Davis encompass everything from arts & crafts to indoor rock climbing.

Living at Davis

On-Campus Housing

Student Housing & Dining Services (<https://housing.ucdavis.edu/>)

UC Davis students who live on campus benefit from being close to classes and study opportunities, campus dining (<http://dining.ucdavis.edu/>), and campus life (<https://www.ucdavis.edu/campus-life/>). They also tend to do better academically and are more involved in campus (<https://housing.ucdavis.edu/value/>).

All incoming fall quarter freshmen and transfer students are guaranteed housing (<https://housing.ucdavis.edu/guaranteed-housing/>) in Student Housing, provided they meet eligibility requirements and all Student Housing and university deadlines. All other students should contact Student Housing to inquire about their housing options.

For more information about housing, see the following:

- Residence Halls (<https://housing.ucdavis.edu/residence-halls/>)
- Apartments (<https://housing.ucdavis.edu/apartments/>)
- Capital Projects (<https://housing.ucdavis.edu/capital-projects/>)

Off-Campus Housing

The majority of UC Davis students live off campus. There are many apartments for rent in the City of Davis, from one-person studio apartments to five- or six-person suites. Townhouses, duplexes and houses throughout the city are also available for student rental. Associated Students, University of California, Davis (ASUCD (<https://asucd.ucdavis.edu/>)) maintains a list of available community housing (<https://chl.ucdavis.edu/>) and, early every year, hosts Housing Day (<https://housing.ucdavis.edu/returning-students-program/>), an event that brings dozens of local housing managers to campus to introduce their communities to UC Davis students.

Transportation & Parking

Transportation Services

Transportation Services (TS) (<https://taps.ucdavis.edu>)

The restricted, gated central campus is closed to unauthorized motor vehicles. Walking and bicycling are the most common ways to traverse

the campus. For complete information, see Transportation Services (TS) (<https://taps.ucdavis.edu/>).

- Bicycles (<http://taps.ucdavis.edu/bicycle/>) | Parking (<https://taps.ucdavis.edu/parking/>) | Motorist Assistance (<https://taps.ucdavis.edu/parking/assistance/>) | Commute Options (<http://taps.ucdavis.edu/transportation/>)

Buses

Unitrans (<http://www.unitrans.com>) provides year-round public transit bus service across Davis from two main UC Davis campus bus terminals—the Memorial Union and Silo Bus Terminals. Information on bus schedules and fares is available at Unitrans (<http://www.unitrans.com>) or 530-752-2877.

WorkLife

Heitman Staff Learning Center (<http://worklife-wellness.ucdavis.edu/>); WorkLife (worklife@ucdavis.edu); 530-754-8791

WorkLife is the principal resource on campus for referrals, outreach, education and programming that enable students, faculty and staff to meet commitments and pursue interests both in and outside of the university. For services addressing child care, elder care, lactation support, rewards & recognition, wellbeing, community involvement, and workplace flexibility, see WorkLife (<http://worklife-wellness.ucdavis.edu/>). See also UC Davis Student Parent Child Care Funding Program (http://worklife-wellness.ucdavis.edu/family_care/children/childcaresub.html), Community Child Care Programs (http://worklife-wellness.ucdavis.edu/family_care/children/childcareoptions.html), & Lactation Support Program (<https://hr.ucdavis.edu/departments/worklife-wellness/breastfeeding/>).

Health & Counseling Services

Student Health & Counseling Services (SHCS)

Medical Services

Student Health & Wellness Center (<https://shcs.ucdavis.edu/>); Appointments: 530-752-2349; General information: 530-752-2300

Student Health Services provides wellness resources and cost-sensitive medical care tailored to the unique and diverse needs of UC Davis students. All registered students choose a primary care provider (PCP) who coordinates their wellness care and treatment needs. SHCS staff includes physicians, nurse practitioners, registered nurses, physical therapists, dietitians and health educators. Pharmacy, lab, and x-ray services are available. Medical care is provided at the Student Health & Wellness Center (<http://campusmap.ucdavis.edu/?b=146>). Services are available to all registered students regardless of insurance coverage. After hours, students can speak with an advice nurse at 530-752-2349. To read about services and fees, make an appointment, get urgent care information, or contact an advice nurse after hours, see Medical Services (<https://shcs.ucdavis.edu/medical-services/>).

Student Health Insurance

The University of California (UC) requires that all students have health insurance. To ensure this requirement is met, all UC students are automatically enrolled in UC Student Health Insurance Plan (UC SHIP) and fees for coverage are charged to your student account each term.

UC SHIP includes medical, dental and vision benefits. Students with comparable health insurance can apply for a UC SHIP student health insurance waiver (<https://shcs.ucdavis.edu/insurance/waiver/>). For complete information, see Insurance Services (<https://shcs.ucdavis.edu/insurance/>).

Immunizations

All incoming new, transfer and graduate students, including students in the Veterinary Medicine and School of Nursing programs, are required to meet the UC Immunization & TB Risk Screening requirement (<https://shcs.ucdavis.edu/services/primary-care/immunizations-nursing-appointments/>). Students become compliant with this requirement by entering their vaccination dates, uploading a copy of their immunization records, and completing the TB Risk Screening Questionnaire via the SHCS Health-e-Messaging (<https://hem.ucdavis.edu/>) website.

Students who do not complete this requirement will have a hold on their registration and will not be able to register for their second term.

Counseling Services

Student Health & Counseling Services (SHCS) (<https://shcs.ucdavis.edu/>); 219 North Hall; Appointments: 530-752-0871; General information: 530-752-2300

SHCS Counseling Services offers short-term individual counseling services to all registered students, as well as group therapy and workshops. There are also case managers and mental health advocacy specialists who assist in using insurance and referrals to community resources. To make a counseling or case management appointment, or for consultations, call 530-752-0871. Students can also schedule appointments online through the SHCS Patient Portal (<https://hem.ucdavis.edu/>). Mental Health Crisis Consultation Services are available at Counseling Services (<https://shcs.ucdavis.edu/about/locationshours/>) at 219 North Hall, and in the Student Health & Wellness Center (<https://shcs.ucdavis.edu/about/locationshours/>) in Acute Care. If you need to speak to someone on the weekend, holiday, or after hours, call 530-752-0871 and follow the prompts.

Health Education & Promotion

Health Education & Promotion (HEP) (<https://shcs.ucdavis.edu/services/health-education-and-promotion/>) uses a health equity lens to foster environments, institutional practices and a campus culture that promote student well-being and academic success. HEP focuses on the following areas:

- Alcohol.
- Tobacco & other drug use.
- Sexual, Mental, & Physical well-being.

Extracurricular Activities

By participating in extracurricular activities at UC Davis, students benefit from numerous opportunities for educational, personal, cultural and social enrichment. In general, registered and enrolled UC Davis students may participate in extracurricular activities sponsored by the campus. Some activities have additional eligibility criteria, so you are encouraged to inquire about the particular requirements of the groups and programs that interest you.

Campus Recreation & Memorial Union

Department of Campus Recreation (<https://campusrecreation.ucdavis.edu/>); Activities & Recreation Center (ARC) (<https://campusrecreation.ucdavis.edu/arc/>) | Memorial Union (<https://memorialunion.ucdavis.edu/>)

The UC Davis Department of Campus Recreation (<https://campusrecreation.ucdavis.edu/>) and Memorial Union (<https://memorialunion.ucdavis.edu/>) manage the following programs and facilities, creating opportunities to build community, cultivate friendships and enhance learning; complementing the academic mission of the university and enhancing the quality of life for the campus:

- Activities & Recreation Center (ARC) (<https://campusrecreation.ucdavis.edu/arc/>)
- Aquatics/Recreation Pool (<https://campusrecreation.ucdavis.edu/recreation/aquatics/>)
- Craft Center (<https://campusrecreation.ucdavis.edu/recreation/craft-center/>)
- Dairy Outdoor Recreation Complex (<https://campusrecreation.ucdavis.edu/dairy-outdoor-recreation-complex/>)
- Equestrian Center (<https://campusrecreation.ucdavis.edu/recreation/equestrian-center/>)
- Games Area (<https://memorialunion.ucdavis.edu/games-area/>)
- Gunrock Gaming (<https://memorialunion.ucdavis.edu/gunrock-gaming/>)
- Living Well (exercise, well-being, & personnel training) (<https://campusrecreation.ucdavis.edu/recreation/living-well/>)
- Memorial Union (<https://memorialunion.ucdavis.edu/>)
- Outdoor Adventures (<https://campusrecreation.ucdavis.edu/outdoor-adventures/>)
- Rec Sports (<https://campusrecreation.ucdavis.edu/recreation/rec-sports/>)
- Sport Clubs (<https://campusrecreation.ucdavis.edu/sport-clubs/>)
- UC Davis Marching Band (<https://campusrecreation.ucdavis.edu/band/>)
- UC Davis Student Fitness Center (<https://campusrecreation.ucdavis.edu/ucdhs-fitness/>)
- University Credit Union Center (<https://campusrecreation.ucdavis.edu/university-credit-union-center/>)

UC Davis Stores

The UC Davis Stores (<http://ucdavisstores.com/>) are full-service stores owned and operated by the university.

Silo Union

The Silo Union (<https://campusmap.ucdavis.edu/?b=137>) common area houses the Gunrock restaurant (<https://housing.ucdavis.edu/dining/restaurants/the-gunrock/>), the Crepe Bistro (<https://housing.ucdavis.edu/dining/crepe-bistro/>), the Silo Market (<https://housing.ucdavis.edu/dining/markets/silo-market/>), the Silo Food Truck Patio (<https://housing.ucdavis.edu/dining/food-trucks/>), meeting/conference facilities, and indoor & outdoor lounge areas.

Intercollegiate Athletics

UC Davis is the home of the Aggies (<https://ucdavisaggies.com/>). We sponsor 25 NCAA Division I sports spreading the UC Davis brand

across the country as student-athletes compete for conference and national championships. Athletics affords many opportunities for student engagement. Tens of thousands of students come to games to spend time with friends, enjoy the many give-aways such as t-shirts or free pizza as well as check some key traditions off their bucket list such as storming the football field prior to the first game of the season. Learn more (<https://www.ucdavis.edu/campus-life/athletics-sports/>) about how to get involved and show your school spirit.

Arts & Music

Arts

Robert & Margrit Mondavi Center for the Performing Arts | UC Davis

The Mondavi Center (<https://www.mondaviarts.org/>) is the premier performance venue in Northern California and the regional destination for the best in music, dance, distinguished speakers, jazz, theater, and world music.

Music

Department of Music (<http://music.ucdavis.edu/>)

Theatre & Dance

Department of Theatre & Dance (<http://arts.ucdavis.edu/theatre-dance/>)

Art Galleries

Manetti Shrem Museum (<https://manettishremmuseum.ucdavis.edu/>)
 UC Davis Design Museum (<https://arts.ucdavis.edu/designmuseum/>)
 Basement Gallery (<https://arts.ucdavis.edu/art-studio-basement-gallery/>)
 C.N. Gorman Museum (<https://gormanmuseum.ucdavis.edu/>)

Student Government

Associated Students (ASUCD)

ASUCD Student Services & Administrative Office (<https://asucd.ucdavis.edu/>)

UC Davis Administrative Advisory Committees

Office of the Chancellor (<https://leadership.ucdavis.edu/about/councils-committees-boards/>)

Graduate Student Association (GSA)

Graduate Student Association (GSA) (<https://gsa.ucdavis.edu/>)

Center for Student Involvement

The Center for Student Involvement (CSI) (<https://csi.ucdavis.edu/>) has over 750 student organizations registered and supported at UC Davis. To find a list of all Registered Student Organizations (RSOs), see AggieLife (https://aggielife.ucdavis.edu/club_signup/). Each fall, CSI hosts the Involvement Fair (<https://csi.ucdavis.edu/involvement-fair/>) on the quad where students can connect and learn about registered student organizations.

If you are interested in Greek Life, Sorority & Fraternity Life (<https://csi.ucdavis.edu/chapters/>) (SFL) comprises six governing councils, around 50 chapters, and almost 2800 Aggies. Prior to the fall quarter, SFL

chapters recruit new members, and some chapters recruit new members in the spring quarter as well.

If you have any questions, contact getinvolved@ucdavis.edu.

Cal Aggie Student Alumni Association (SAA)

Cal Aggie Student Alumni Association (SAA) (<https://alumni.ucdavis.edu/membership/student-alumni-association/>) is a student organization that was established in 1989 with the mission to advance student and alumni relations. With support from the Cal Aggie Alumni Association (CAAA), SAA connects current students to UC Davis alumni around the world.

University Policies on Nondiscrimination, Sexual Harassment/Sexual Violence, Student Records & Privacy

Nondiscrimination (<https://ucdavispolicy.ellucid.com/documents/view/39/59/>) | Sexual Harassment/Sexual Violence Prevention (<https://ucdavispolicy.ellucid.com/documents/view/41/>) | Accommodations for Students with Disabilities (<https://sdc.ucdavis.edu/>)

Disclosures from Student Records (<https://registrar.ucdavis.edu/records/privacy/>); see also UC Davis Policy & Procedure Manual Section 320-21 (<https://ucdavispolicy.ellucid.com/documents/view/397/active/>)

Social Security Numbers (https://registrar.ucdavis.edu/records/changes-personal-information/#u_ssn) | Release of Registration Material & Grades (<https://registrar.ucdavis.edu/records/privacy/reg-materials-grades/>)

Campus Security, Crime Awareness, and Alcohol & Drug Abuse Prevention

In accordance with federal laws, Crime Awareness and Campus Security Act of 1990, and the Drug Free Schools and Communities Act of 1989, UC Davis annually makes information available to students and employees regarding campus security (<https://police.ucdavis.edu/crime-safety-data/>), crime statistics (<https://police.ucdavis.edu/crime-safety-data/>), and alcohol & drug abuse prevention (<https://shcs.ucdavis.edu/health-and-wellness/alcohol-tobacco-and-other-drugs/>). Also see victim support services (<https://care.ucdavis.edu/>).

ACADEMIC ADVISING & STUDENT SERVICES

To help you get the most from your education, UC Davis offers many different types of academic advising. College advisors assist you in meeting degree requirements and taking maximum advantage of available university resources. A conference at least once a quarter with your faculty or staff advisor is especially desirable during your first year and during your final quarters preceding graduation. A meeting with a faculty or staff advisor is required each year for students in the College of:

- Engineering (<http://engineering.ucdavis.edu/undergraduate/advising/>)
- Letters & Science (<https://lettersandscience.ucdavis.edu/mandatory-advising/>)

College of Biological Sciences matriculating students in their first year at UC Davis are required to meet with a BASC advisor in the Biology Academic Success Center (<http://basc.ucdavis.edu/>) (BASC).

For complete information on academic advising, see the College of:

- Agricultural & Environmental Sciences (<http://www.caes.ucdavis.edu/students/advising/>)
- Biological Sciences (<http://basc.ucdavis.edu/>)
- Engineering (<http://engineering.ucdavis.edu/undergraduate/advising/>)
- Letters & Science (<https://ls.ucdavis.edu/advising/>)

Student Disability Center (SDC)

Student Disability Center (<http://sdc.ucdavis.edu/>), 530-752-3184. The SDC is the campus unit designated to receive requests for academic accommodation, approve services, and coordinate support for students with disabilities. We are committed to equitable educational access and inclusive programming that allows students to thrive. The SDC advises students on their rights and responsibilities, as well as strategies and tools for managing their disabilities. Current and prospective students, faculty, and staff are encouraged to contact the SDC for additional information.

Office of Educational Opportunity & Enrichment Services

The Office of Educational Opportunity and Enrichment Services (OEOES) (<https://opportunity.ucdavis.edu/>) is a family of services, programs and centers designed to support student learning, enhance the student experience and foster strong communities where students are empowered to achieve their goals. Transition assistance, support services and co-curricular opportunities are offered to all students along with specialized support geared toward various diverse student communities.

Aggie Compass Basic Needs Center

The Aggie Compass (<https://aggiecompass.ucdavis.edu/>) is a comfortable space for students to build community and learn about basic needs resources, pick up fresh fruits and vegetables, receive CalFresh

enrollment assistance and get financial support and help finding stable housing and healthy food options.

Educational Opportunity Program (EOP) Services

Educational Opportunity Program (EOP) (<https://eop.ucdavis.edu/>), 530-752-9366, offers an array of services to help first-generation students and students from disadvantaged backgrounds adapt both academically and socially to the University setting and successfully achieve their educational goals. EOP provides a caring and supportive environment for students to meet with peer and staff advisors and network with other students. For complete information, see Educational Opportunity Program (EOP) (<https://eop.ucdavis.edu/>).

First-Year Aggie Connections (FYAC)

First-Year Aggie Connections (FYAC) (<https://opportunity.ucdavis.edu/programs/aggie-connect/>), 530-752-4474, groups first-year students (freshmen and transfers, including international students) into 25-person "Connections" based on a shared purpose, interest, or theme. Connections meet regularly for one academic quarter and are led by staff or faculty facilitators who engage students in discussions surrounding crucial topics related to transitioning to life at UC Davis. The First-Year Aggie Connections program aims to foster opportunities that will empower students as they navigate their first year at UC Davis.

Guardian Scholars Program (GSP)

The mission of the Guardian Scholars Program (GSP) (<https://opportunity.ucdavis.edu/programs/guardian-scholars/>), 530-752-1211, is to empower foster and former foster youth at UC Davis to reach their potential by providing a community network that supports their academic progress and personal growth. For complete information, see Guardian Scholars Program (GSP) (<https://opportunity.ucdavis.edu/programs/guardian-scholars/>).

Mentorships for Undergraduate Research in Agriculture, Letters & Science (MURALS)

Mentorships for Undergraduate Research in Agriculture, Letters & Science (MURALS) (<http://murals.ucdavis.edu/>), 530-752-4475, is designed to enrich the research experience of students situationally disadvantaged in their access to graduate school. For complete information, see MURALS (<http://murals.ucdavis.edu/>).

Pre-Graduate/Law Advising Services

Pre-Graduate/Law Advising (<https://opportunity.ucdavis.edu/services/pre-grad-law/>), 530-752-4475, offers individualized advice and information to students interested in admission to professional and graduate schools (law, Masters and Ph.D. programs, etc.) including prerequisite course planning, exam preparation, evaluation of competitiveness and assistance with all aspects of the application process such as writing the personal statement, getting good letters of recommendation, selecting schools/programs and strategies for becoming the most competitive applicant possible. In addition, the program offers small group advising and informative workshops, and hosts visits from admissions officers from various professional schools. For complete information, see Pre-Graduate/Law Advising (<https://opportunity.ucdavis.edu/services/pre-grad-law/>).

Special Transitional Enrichment Program (STEP)

Incoming first-year EOP students are invited to participate in the Special Transitional Enrichment Program (STEP) (https://eop.ucdavis.edu/step/?utm_source=step&utm_medium=redirect-hostname), 530-752-0280.

The program begins in summer and continues through the first two academic years. STEP offers academic course work, transitional support, academic assistance and advising to help students adjust and succeed academically and socially. For complete information, see Special Transitional Enrichment Program (STEP) (https://eop.ucdavis.edu/step/?utm_source=step&utm_medium=redirect-hostname).

Success Coaching & Learning Strategies

Services offered by Success Coaching & Learning Strategies (<https://opportunity.ucdavis.edu/services/scls/>), 530-752-4475, are designed to help undergraduate students become the designer and driver of their academic, personal, and professional success. Through workshops and one-on-one appointments, students learn new strategies, build skills, and reflect on their experiences to develop practical strategies for solving problems and achieving goals.

Transfer and Reentry Center

If you transferred to UC Davis or if you are a reentry student, the Transfer & Reentry Center (<https://trc.ucdavis.edu/>), (<http://trc.ucdavis.edu>) 530-752-2200, is here to serve you. Reentry refers to undergraduate students who are 25 years old or older, graduate students who are 30 years old or older, married students or student parents. The Transfer and Reentry Center addresses the important areas of a transfer and reentry student progress while here at UC Davis: transfer transition, academic excellence, community engagement and beyond the Bachelors. Specialized programs combined with collaborations with campus partners allow the Center a unique opportunity to work with transfer and reentry students at each phase of their education. For complete information, see Transfer & Reentry Center (<https://trc.ucdavis.edu/>).

TRiO Scholars Program

The TRiO Scholars Program (<https://opportunity.ucdavis.edu/programs/trio-scholars/>), 530-752-0681, also known as Student Support Services (SSS), supports the success and graduation of first-generation and low-income students and students with disabilities. Through a variety of services and activities, the program promotes academic excellence, financial empowerment and community building. The TRiO Scholars program is funded by the U.S. Department of Education and serves 160 UC Davis students.

Veterans Success Center

The Veterans Success Center (<https://veterans.ucdavis.edu/>) provides veterans, service members and dependents a welcoming space, a community network, guidance with educational benefits and engagement opportunities that span the university and the larger Davis community. For complete information, see Veterans Success Center (<https://veterans.ucdavis.edu/>).

Student Housing

Residential Academics (<https://housing.ucdavis.edu/academics/residential-academics/>), is one component of the *New Student Academic Services* unit in Student Housing & Dining Services, which includes the UC Davis Orientation program and the academic year Residential

Peer Mentor program. The academic support provided consists of one-on-one Peer Mentorship, academic success workshops, and much more. Residential Academics collaborates with several departments on campus, such as the Academic Assistance & Tutoring Center, the Internship & Career Center, and the four colleges to provide academic & career readiness support and tutoring within the residence halls.

Academic Peer Mentors

Making the academic transition into and through UC Davis can be difficult. Class structure, instructor interaction, academic rigor, expectations, and studying are all different from high-school or two-year institutions. Academic Peer Mentors are one source of support for new and continuing students. Academic Peer Mentors are current students who meet one-on-one with students to answer questions, share experiences and offer tips and guidance. Each student living in the residence halls and The Green will have an Academic Peer Mentor who they will meet during Aggie Orientation or the first week of classes.

Academic Peer Mentors are trained to assist students in all four colleges and can help: prepare for academic advising appointments, strategize for test taking and studying, explore and change majors, utilize campus resources, identify and help to resolve academic concerns, get engaged on campus and find community, learn to navigate technological systems (OASIS, Schedule Builder, Canvas, etc.) and support new students in academic pursuits. For Academic Peer Mentor hours of availability, refer to Residential Academic Centers (<https://housing.ucdavis.edu/academics/residential-academic-centers/>).

Residential Academic Centers

The Residential Academic Centers (RAC) are academic hubs for studying, information, charging devices, and more. A Center is located in each living area: Segundo, Tercero, and Cuarto. The Residential Academic Centers, staffed by Academic Peer Mentors, are open from the first day of instruction until the quarter ends. *Note:* Residents may use any Residential Academic Center, regardless of the residence hall area they live in.

Segundo Area: Segundo Services Center, First Floor; 530-754-0279

Tercero Area: Tercero Services Center, First Floor; 530-752-5566

Cuarto Area: Shasta Hall, First Floor; 530-754-0278

Students may email questions to Residential Academic Support. (reshallacademics@ucdavis.edu)

New Student Orientation (<https://orientation.ucdavis.edu/>), 530-752-4443 or orientation@ucdavis.edu, assists new students and their families with the transition to UC Davis. Orientation is mandatory for all incoming first-year and transfer students. Orientation consists of three required parts: Aggie 101, Aggie Advising, and Aggie Orientation. **Aggie 101** is an online platform that helps students learn about UC Davis resources and prepare for academic advising and course registration. **Aggie Advising** provides all new students with an individual, remote advising appointment to discuss requirements and prepare to register for fall classes. Finally, **Aggie Orientation** is an on-campus experience for students to build community, find networks of support and resources, and get excited about being an Aggie!

Student Conduct & Support Services

Office of Student Support & Judicial Affairs (<https://ossja.ucdavis.edu>), 530-752-1128

The Office of Student Support & Judicial Affairs (OSSJA) supports the University's educational mission by upholding standards of academic honesty and responsible behavior, promoting student development, and assisting students in need.

Student Support

Every year, students struggle with challenges and crisis-related issues that interfere with their academic and student life success. The non-clinical case managers in OSSJA provide support and assistance to students experiencing difficulties and to staff and faculty members who become aware of such students. Case managers serve students in distress by reaching out to understand each student's needs and then coordinating with campus and community resources for assistance and care. They also provide consultation to faculty and staff regarding students of concern, help problem-solve situations involving students of concern, and provide feedback to involved parties as needed. Finally, they serve on the Students of Concern Response Team (SCRT), an interdisciplinary group of professionals that manages situations involving students of concern who present potentially serious risk of harm to self or others.

Student Responsibilities

UC Davis policies, rules, and regulations serve multiple purposes:

- To support the safety and security of all members of our community.
- To promote responsible and engaged involvement in the campus community.
- To uphold the University's standards of excellence in education and promote the ethical, intellectual, and emotional growth and development of students involved in the disciplinary process.
- To ensure compliance with federal, state and local laws and regulations.

Students are responsible for complying with the announcements and regulations in this catalog and with all policies, rules and regulations of the university and this campus. The student conduct officers in OSSJA uphold campus standards of academic honesty and student conduct by resolving alleged violations of university policies or campus regulations. The Code of Academic Conduct and other policies related to student conduct may be found on the Policies (<https://ossja.ucdavis.edu/policies/>) page at the Office of Student Support & Judicial Affairs (<https://ossja.ucdavis.edu>). Students are not able to register or receive transcripts of record or diplomas until they have met all university obligations.

Student Grievances

OSSJA serves as a resource for the informal resolution of student grievances and general problem solving. Students who are not sure whom to contact regarding a concern or grievance can contact OSSJA for guidance and consultation.

Nondiscrimination & Sexual Harassment/Sexual Violence Prevention

Nondiscrimination (<https://hdapp.sf.ucdavis.edu/complaint-type/>) | Sexual Harassment (<https://hdapp.sf.ucdavis.edu/complaint-type/>) | Sexual Violence (<https://sexualviolence.ucdavis.edu/>)

If students believe that they have been subjected to prohibited discrimination, harassment, sexual harassment, and/or sexual violence, they may contact the Harassment & Discrimination Assistance & Prevention Program (<https://hdapp.ucdavis.edu/>) (HDAPP) at 530-747-3864 or hdapp@ucdavis.edu. We also offer an anonymous call-in line at 530-747-3865.

Associated Students, University of California at Davis (ASUCD)

The Associated Students, University of California, Davis (<https://asucd.ucdavis.edu/>) (ASUCD), 530-752-1990, is the association representing the students of UC Davis. Composed of over 35 units, committees, and commissions, each with its own unique mission, ASUCD provides programs and services to its students based on four pillars: basic services, media, advocacy, and social.

As one of the largest student employers on campus, ASUCD empowers students to advocate for topics they are passionate about, express themselves creatively, and develop themselves professionally. ASUCD's mission is to improve the quality of campus life by cultivating a culture of involvement and student leadership. Get connected at ASUCD (<https://asucd.ucdavis.edu>).

Academic Assistance & Tutoring Centers

Academic Assistance & Tutoring Centers (AATC)

Academic Assistance & Tutoring Centers (AATC) (<http://success.ucdavis.edu/about/aat/>), 530-752-2013, exists to help undergraduate students thrive at UC Davis and beyond. We provide an inclusive and interactive environment where students participate in reinforcing and retaining knowledge in multi-disciplinary writing, math and science through co-curricular academic services provided by both professional staff and peer tutors. We strive to support students in developing the academic competence and confidence that will empower them to succeed at UC Davis. AATC provides academic support to undergraduate students enrolled in Biology, Chemistry, Economics, Mathematics, Physics, Statistics, and Writing Across the Disciplines. Our instructional professional staff offer classes, workshops, office hours, individual writing appointments, and a Writing Studio. To support our professional staff and our services, AATC hires 300 undergraduate tutors to provide drop-in tutoring in various campus locations and subjects. Both in-person and remote services are available. For complete information on our academic support services, see <https://tutoring.ucdavis.edu/>.

Internship & Career Center (ICC)

The Internship & Career Center (ICC) (<https://icc.ucdavis.edu/>), located in South Hall (<http://campusmap.ucdavis.edu/?b=143>), works with undergraduate, masters, and Ph.D. students, postdoctoral scholars and recent graduates. The ICC can help you identify your abilities and interests and relate them to career options; gain access to practical experience to increase your competitiveness in the job market; and find employment. ICC workshops on finding an internship or part-time job, beginning a job search, developing a resume, networking and preparing for an interview are available on our website and YouTube channel. Each academic year, the ICC hosts four to six large internship and career fairs (in-person or remote), giving UC Davis students and alumni the opportunity to connect with employers.

Internship Programs

Gain practical skills that will transfer to the workplace. Apply your coursework. Launch your career! Take advantage of thousands of internships organized through the Internship & Career Center (ICC) (<https://icc.ucdavis.edu/>) or initiate your own. There is literally something for everyone! An internship may be full-time or part-time, credit-bearing or non-credit bearing, voluntary or paid, depending on your skills, needs and interests, as well as the availability of openings. We are continuing to create more paid opportunities through Federal Work-Study and grants. Internship experiences emphasize learning and must be supervised by a professional. Get your approved internship documented on your UC Davis transcript by completing Transcript Notation (TN) (<https://icc.ucdavis.edu/find/internships/tn/>). Academic credit is awarded for experiences planned and approved in advance by a sponsoring faculty member.

Masters, Ph.D., & Postdoc Services

The Internship & Career Center (ICC) (<http://icc.ucdavis.edu>), located in South Hall, provides comprehensive career services for UC Davis Masters and Ph.D. students, and Postdoctoral scholars (MPP). Career advisors can assist you with all aspects of your career search whether your goal is a career in industry, government or academia. Our team realizes these are complex decisions. Our career services include confidential one-to-one advising with an individualized review of curriculum vitae (CV), resumes, and cover letters; workshops and panel discussions; recruiting and networking events; and employer information sessions, all specifically designed for advanced degree holders.

Student Employment

Student Employment is a resource within the Internship & Career Center (ICC) (<https://icc.ucdavis.edu/>) that connects students to paid opportunities (on and off campus) that help fund their educational expenses, while gaining professional skills and a professional network. With support from the Internship & Career Center, students have easy access to student employment as well as internship and career opportunities.

Academic Resources

UC Davis has many academic resources to help you succeed and enjoy your time here on campus; here are just a few:

- University Library (<http://www.lib.ucdavis.edu/>); 530-752-8792
- Information & Educational Technology (<http://iet.ucdavis.edu/>); 530-754-HELP (4357)

- UC Davis Arboretum & Public Garden (<https://arboretum.ucdavis.edu/>); 530-752-4880
- CalTeach/Mathematics & Science Teaching Program (CalTeach/MAST) (p. 30)
- Global Learning Hub (p. 30)
- Undergraduate Research Center (p. 30)
- Student Resource & Information Centers (p. 30)

CalTeach/Mathematics & Science Teaching Program (CalTeach/MAST)

The UC Davis CalTeach/Mathematics & Science Teaching Program (CalTeach/MAST) (<https://mast.ucdavis.edu/>), 530-754-1056, provides STEM undergraduate majors with seminar and internship opportunities to explore careers in K-16 mathematics and science education. For more complete information, see Mathematics & Science Teaching Program (CalTeach/MAST) (<https://mast.ucdavis.edu/>).

Global Learning Hub

Through the Global Learning Hub (<https://globallearning.ucdavis.edu/>), each and every UC Davis student can find global learning opportunities available on campus, in the region, virtually, and internationally. The Hub offers global learning programs, workshops, and resources that enhance all UC Davis students' academic and career pursuits through four broad areas of opportunities: Community Engagement; Global Skills & Leadership; Internships & Research; and Study Abroad. UC Davis is committed to preparing the next generation of global problem-solvers and change-makers. As such, we aim to prepare our undergraduate, graduate, and professional students to solve global challenges collaboratively, equitably, and sustainably. As part of Global Affairs, the Global Learning Hub aims to inspire global curiosity, understanding and engagement. For complete information, see the Global Learning Hub (<https://globallearning.ucdavis.edu/>).

Undergraduate Research Center

The Undergraduate Research Center (<https://urc.ucdavis.edu/>) (URC) encourages and facilitates research opportunities for UC Davis undergraduates in all majors and class levels. We offer awards and activities to support undergraduate research across the university. The URC promotes research as a high-impact student experience to enhance readiness to succeed in future careers. From scientific experiments to the scholarly analysis of literature, doing research is an ideal way to improve your future career prospects. Hands-on experience can help you narrow your interests and identify your aptitudes. For more information, see Resources for Students (<https://urc.ucdavis.edu/discover-resources-students/>) or contact urc@ucdavis.edu.

Student Resource & Information Centers

The following is just a small sampling of the many student resource & information centers here at UC Davis:

- Center for Advocacy, Resources & Education (CARE) (p. 31)
- Center for Chicana/Latinx Academic Student Success (CCLASS) (p. 31)
- Center for Leadership Learning (p. 31)

- Cross-Cultural Center (p. 31)
- Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center (LGBTQIARC) (p. 31)
- Native American Academic Student Success Center (NAASSC) (p. 31)
- Services for International Students & Scholars (SISS) (p. 31)
- Strategic Asian and Pacific Islander Retention Initiative (SAandPIRI) (p. 31)
- Women's Resources & Research Center (WRRRC) (p. 32)

Center for Advocacy, Resources & Education (CARE)

The UC Davis Center for Advocacy, Resources & Education (CARE) (<https://care.ucdavis.edu/>) is committed to reducing sexual violence and its impact using a multifaceted approach including primary prevention, education & awareness, trauma-informed survivor services, and advocacy for victim rights at the campus, UC, and state level. We work to broaden public awareness about the nature of sexual assault, intimate partner violence, stalking, sexual harassment, and their impact on people of all identities. We foster a culture intolerant of sexual violence by promoting healthy sexual communication, safe relationships, and respect.

All survivor advocacy and support services are confidential, free, and available to any UC Davis affiliate who has experienced sexual harassment, sexual assault, intimate partner violence, or stalking. For complete information, see Center for Advocacy, Resources & Education (CARE) (<https://care.ucdavis.edu/>), 530-752-3299 (Davis Campus) or 916-734-3799 (Sacramento Campus).

Center for Chicana/Latina Academic Student Success (CCLASS)

The Center for Chicana/Latina Academic Student Success (<https://cclass.ucdavis.edu/>) is dedicated to welcoming, supporting, retaining, and informing students as they navigate the university. It is a space for students to find community and *familia* on campus. The unit contributes to the university's commitment to campus diversity and inclusion. At its core, the unit acts as an academic support space for students to thrive as scholars and unique individuals. We are dedicated to retaining, empowering, and graduating Chicana and Latina students at UC Davis. By offering and providing authentic and culturally relevant opportunities for academic and personal growth, *El Centro* seeks to support Chicana and Latina students as they navigate the university from first-year students to graduating seniors. For complete information, see Center for Chicana/Latina Academic Student Success (<https://cclass.ucdavis.edu/>) or 530-752-8402.

Center for Leadership Learning

The Center for Leadership Learning (CLL) (<https://cll.ucdavis.edu/>), 530-752-6908, offers a unique space for undergraduates to engage in the study of leadership through a variety of interactive programs, including quarterly workshops, certificate programs, an annual conference, and internships. The CLL's programs and services are open to all UC Davis undergraduate students and are free of charge. Undergraduates from all majors, class levels, degrees of leadership and professional experience are welcome to participate. The CLL embraces all students who wish to

enhance their personal and professional lives! For complete information, see Center for Leadership Learning (<https://cll.ucdavis.edu/>).

Cross-Cultural Center

Our mission at the Cross Cultural Center (<https://ccc.ucdavis.edu/>) (CCC) at UC Davis is to work towards a more just and liberated world. We create compassionate community spaces that foster identity development, critical consciousness, and collective innovation. For complete information, see Cross Cultural Center (<https://ccc.ucdavis.edu/>) or email ccc@ucdavis.edu.

Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center (LGBTQIARC)

The Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center (LGBTQIARC) (<https://lgbtqia.ucdavis.edu/>), located in the Student Community Center, provides an open and inclusive space and community that is committed to challenging sexism, cissexism/trans oppression/transmisogyny, heterosexism, monosexism, and allosexism. For complete information, see Lesbian, Gay, Bisexual, Transgender, Queer, Intersex, Asexual Resource Center (<https://lgbtqia.ucdavis.edu/>); 530-752-2452.

Native American Academic Student Success Center (NAASSC)

The Native American Academic Student Success Center (NAASSC) (<https://naassc.ucdavis.edu/>) is a collaborative and multifaceted academic success program focused on increasing retention, persistence, and graduation rates of Native American students, in a culturally appropriate way. Following our theme, "Building connection and strengthening community," programming focuses on academic success and resilience through building a strong connection to students. We take a holistic approach of student success creating a community that not only survives but thrives at UC Davis. For complete information, see Native American Academic Student Success Center (<https://naassc.ucdavis.edu/>) or contact nari@ucdavis.edu.

Services for International Students & Scholars (SISS)

Services for International Students & Scholars (SISS) (<https://siss.ucdavis.edu/>), 530-752-0864, assists international students, faculty and researchers in gaining and maintaining an appropriate immigration status while at UC Davis. SISS provides orientation and other information and assistance as part of its mission to build a campus community that is fully inclusive of international students and scholars. For complete information, see Services for International Students & Scholars (<https://siss.ucdavis.edu/>).

Strategic Asian and Pacific Islander Retention Initiative (SAandPIRI)

The Strategic Asian and Pacific Islander Retention Initiative (SAandPIRI) (<https://apiretention.ucdavis.edu/>) is dedicated to the academic, personal, and professional success of all students who identify with the

Asian and Pacific Islander (AandPI) diasporas. The SAandPIRI seeks to create culturally inclusive support networks for all students as they participate in orientation, enroll in their courses, persisting through each year, and graduate. The retention initiative offers programs and events geared towards academic excellence, connectedness, and empowering leaders. For more information, see Strategic Asian and Pacific Islander Retention Initiative (SAandPIRI) (<https://apiretention.ucdavis.edu/>) or contact apiretention@ucdavis.edu.

Women's Resources & Research Center (WRRC)

The Women's Resources & Research Center (WRRC) (<https://wrrc.ucdavis.edu/>), 530-752-3372, promotes gender equity and offers educational and community-building programming to all, while centering women, transgender, and nonbinary campus community members. Visit us in North Hall to connect with community, use our study space, and access resources like free menstrual supplies or our Student Parent Closet. For more information, see Women's Resources & Research Center (<https://wrrc.ucdavis.edu/>).

ACADEMIC INFORMATION, POLICIES, & REGULATIONS

From registration to graduation, there are many aspects to being a successful UC Davis student. To guide you along your path to graduation, see the following sections:

- Registration & Course Load (p. 33)
- Academic Credit (p. 33)
- Examinations (p. 33)
- Grades & Grading (p. 33)
- Probation & Dismissal (p. 34)
- Honors & Prizes (p. 34)
- Leaving UC Davis (p. 35)
- Returning to UC Davis (p. 35)

Registration & Course Load

Registration

Office of the University Registrar (<https://registrar.ucdavis.edu/>); 530-752-3639

Registration includes the process of enrolling in classes, the financial obligation to pay tuition, fees and all other charges, filing current address (mailing, permanent, and emergency) information with the Office of the University Registrar, and completing and submitting any forms pertaining to your registration status. To be a continuing student at the university, you must enroll in classes each academic term. To be considered a registered student, you must also pay all tuition, fees and any outstanding balance due.

If you are a *new* student, your acceptance letter directs you to all of the required next steps to obtain student status at the university. Graduate students who previously attended UC Davis as undergraduates are considered to be *new* students. If you do not enroll in classes for a future academic term or did not take an approved leave of absence, you must apply for Readmission to return to the university and resume student status.

For complete information, see Registration (<https://registrar.ucdavis.edu/registration/>).

Important Registration-Related Subjects

Change of Name (<https://registrar.ucdavis.edu/records/changes-personal-information/>) | Change of Address (<https://registrar.ucdavis.edu/records/changes-personal-information/>)

Preparing to Register (<https://registrar.ucdavis.edu/registration/register/>) | Undergraduate Registration Priority (<https://registrar.ucdavis.edu/registration/register-for-classes/pass-times/>) | Late Registration (<https://registrar.ucdavis.edu/registration/register-for-classes/course-changes/late-actions/>)

Adding and Dropping Courses (<https://registrar.ucdavis.edu/registration/register-for-classes/schedule-adjustments/add-drop/>) | Late Adding and Dropping Courses (<https://registrar.ucdavis.edu/registration/register-for-classes/course-changes/late-actions/>) | Retroactive Drop & Add (<https://registrar.ucdavis.edu/records/retroactive/>)

Course Load

Both Undergraduate and Graduate students need to carry a study load of at least 12 units each quarter in order to be certified as full-time students.

Full-Time Status (<https://registrar.ucdavis.edu/registration/>) | Part-Time Status for Tuition Purposes (<https://registrar.ucdavis.edu/registration/part-time/>) | Undergraduate Expected & Minimum Progress (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#EXPECTED%20AND%20MINIMUM%20PROGRESS>)

Academic Credit

Units of Credit & Credit by Examination (p. 38)

Concurrent Enrollment

Per Davis Division Academic Senate Regulation A553 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A553->), a student may not obtain transfer credit for courses taken at a non-University of California campus in a term during which the student is registered as a UC Davis full-time student. A variance can be obtained only by petitioning the dean of your college well in advance of the desired registration. For more information, see Concurrent Enrollment (<https://registrar.ucdavis.edu/registration/special-programs/>).

Special Programs

There are a variety of special programs that allow students to take courses at other UCs, at Community or CSUs, in Sacramento, in Washington DC, or abroad. Each program has its own requirements and application process.

Intercampus Visiting Programs (<https://registrar.ucdavis.edu/registration/special-programs/icv/>) | Concurrent Enrollment: California State University, California Community College, & UC Davis ROTC Students (<https://registrar.ucdavis.edu/registration/special-programs/>) | Study Abroad (<https://studyabroad.ucdavis.edu/>) | Summer Sessions (<https://summer-sessions.ucdavis.edu/>)

UC Davis Continuing & Professional Education (<https://cpe.ucdavis.edu/>) | Open Campus (<https://extension.ucdavis.edu/open-campus/>)

Examinations

Final Examination Information & Schedule (<https://registrar.ucdavis.edu/registration/schedule/finals/>) | Academic Senate Regulations – Examinations (http://academicsenate.ucdavis.edu/bylaws_and_regulations/regulations.cfm?#538-) | Midterms (<https://registrar.ucdavis.edu/registration/schedule/midterms/>)

Grades & Grading

For complete information on grades & grading, see Grading (<https://registrar.ucdavis.edu/records/grades/>).

Each college has different rules regarding P/NP grading; see College of:

- Agricultural & Environmental Sciences (<https://caes.ucdavis.edu/students/advising/academic-policies/grading-repeats/>)
- Biological Sciences (<https://biology.ucdavis.edu/undergrad/degree-requirements/>)
- Engineering (<https://engineering.ucdavis.edu/undergraduates/academic-advising/advising-faqs/#a7>)

- Letters & Science (<https://lettersandscience.ucdavis.edu/frequently-asked-questions/>)

Grade Changes

Students who believe they received an incorrect grade due to a clerical or procedural error should ask their instructor to file a Request for Grade Change form (<https://registrar.ucdavis.edu/records/grades/changes/>) with the Office of the University Registrar; for complete information, see Grade Changes (<https://registrar.ucdavis.edu/records/grades/changes/>) and the guidelines for the Committee on Grade Changes (<http://academicsenate.ucdavis.edu/GCC/>).

Probation & Dismissal

The University of California Academic Senate (UCSR 900 (<https://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart4.html#r900>)) and UC Davis Division Academic Senate (DD Reg A540C (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A540->), DD Reg A552 (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#A552->)) Regulations govern probation and dismissal. Students must meet both academic and minimum standards of progress toward degree completion. For complete information on Probation & Dismissal, see Academic Standing (<https://registrar.ucdavis.edu/records/transcripts/academic-standing/>).

Honors & Prizes

Deans' Honors Lists

According to UC Davis Academic Senate Regulation 551 (ASR 551.A (<https://academicsenate.ucdavis.edu/bylaws-regulations/regulations/#551->)), the quarterly Dean's Honors List includes names of students who have completed, for a letter grade, a minimum of 12 units in a specific quarter with a grade point average equal to or higher than the minimum grade point average attained by the upper 16 percent of those registered in the same class level and college during that quarter. Honors lists will be posted quarterly on deans' office websites or made available by other means and a notation of these honors will be placed on each student's permanent record by the Office of the University Registrar.

College of

- Agricultural & Environmental Sciences (<https://caes.ucdavis.edu/students/resources/honors/>)
- Biological Sciences (<http://biology.ucdavis.edu/awards-and-recognition/deans-list/>)
- Engineering (<http://engineering.ucdavis.edu/undergraduate/deans-honor-list/>)
- Letters & Science (<https://lettersandscience.ucdavis.edu/advising/>)

Graduation Honors

Honors at graduation are awarded to students who have a grade point average in the top percent of their college as shown in the table below. The College of Letters & Science (<https://ls.ucdavis.edu/advising/academic-resources/>) requires that additional criteria be met for high and highest honors.

Total Quarter Units at UC	Highest Honors	High Honors	Honors	Total
45-89	2%	next 2%	next 4%	8%
90-134	3%	next 3%	next 6%	12%
135+	4%	next 4%	next 8%	16%

Grade point averages from the winter quarter prior to graduation are used to determine the averages that will earn an honors designation. Following are the averages for winter quarter 2021. These averages will be used through winter quarter 2022.

Grade Point Average by College

Percent Determining Cut-Off Point	Agricultural & Environmental Sciences	Biological Sciences	Engineering	Letters & Science
2%	3.974	3.984	3.982	3.989
3%	3.955	3.971	3.966	3.979
4%	3.937	3.961	3.937	3.967
6%	3.907	3.941	3.890	3.945
8%	3.876	3.919	3.864	3.924
12%	3.815	3.855	3.864	3.881
16%	3.759	3.807	3.750	3.839

An honors notation is made on a student's diplomas and on their permanent records in the Office of the University Registrar.

Prizes & Awards

The University Medal (<https://medalists.ucdavis.edu/>) is the highest campus honor awarded to a graduating senior in recognition of superior scholarship and achievement. A College or School Medal is also given to the outstanding graduating student in each of the colleges and professional schools.

Departmental citations, special awards, and prizes are also awarded to students for superior achievement and scholarship.

Prizes & Awards for, College of

- Agricultural & Environmental Sciences (<https://caes.ucdavis.edu/students/resources/honors/>)
- Biological Sciences (<https://biology.ucdavis.edu/about/awards/students/>)
- Engineering (<https://engineering.ucdavis.edu/undergraduate/deans-honor-list/>)
- Letters & Science (<https://lettersandscience.ucdavis.edu/advising/>)

Chancellor's Award for Excellence in Undergraduate Research & Mentoring Undergraduate Research

These prestigious awards recognize up to two graduating seniors who have distinguished themselves through their excellence in undergraduate research; and faculty, postdocs, or graduate students who have excelled in mentoring undergraduate researchers. For complete information, see Chancellor's Award for Excellence in Undergraduate Research (<https://urc.ucdavis.edu/Chancellors-Award/>).

University Honors Program

The University Honors Program (<https://honors.ucdavis.edu/>) (UHP), 530-752-3225, is a four-year, interdisciplinary, campus-wide program for high potential and socially conscious undergraduate students interested

in enhancing their educational experience through special courses, close faculty contact, dynamic peer interaction, and positive social change.

Leaving UC Davis

To graduate, undergraduate students must complete and submit an Application for Graduation with the Office of the University Registrar by the posted graduation application deadlines (<https://registrar.ucdavis.edu/graduate/>). To participate in the Commencement Ceremony, a student **must** register to walk. **These are separate actions.**

Graduation (<https://registrar.ucdavis.edu/registration/leave/graduate/>) | Commencement Ceremony (<http://commencement.ucdavis.edu/>)

Leave of Absence: Planned Educational Leave Program (PELP)

The Planned Educational Leave Program (PELP (<https://registrar.ucdavis.edu/registration/leave/pelp/>)) allows any continuing undergraduate or graduate level student to temporarily suspend academic work at UC Davis.

Withdrawal

Withdrawal (<https://registrar.ucdavis.edu/registration/leave/>) | Retroactive Withdrawal (<https://registrar.ucdavis.edu/records/retroactive/>)

Returning to UC Davis

Undergraduate Readmission (<https://registrar.ucdavis.edu/registration/return/>)

For any term a student does not register, is not on an approved leave of absence, or has cancelled/withdrawn from the university, the student is considered non-continuing and must apply for readmission to return to registered status.

UNDERGRADUATE EDUCATION

UC Davis offers the Bachelor of Arts (A.B.) and Bachelor of Science (B.S.) degrees in over 100 major programs, as well as over 110 minors in a variety of disciplines; see Departments, Programs, & Degrees (p. 49). For complete program information; see Colleges of;

- University Degree Requirements (p. 36)
- College Major & Minor Information (p. 40)
- Agricultural & Environmental Sciences (p. 40)
- Biological Sciences (p. 41)
- Engineering (p. 43)
- Letters & Science (p. 43)

Bachelor's Degree Requirements

Students must satisfy four groups of requirements before they can become eligible for candidacy for the bachelor's degree:

- University Requirements (p. 36); applies to all colleges.
- General Education Requirements (p. 38); applies to all colleges.
- College Requirements; **see links above for each college**; college requirements may be stricter than University Requirements for the same obligation.
- College Major & Minor Information (p. 40); find how to declare, change majors, etc., and additional information about minors.
- Major requirements as listed in Departments, Programs, & Degrees (p. 48).

Students are responsible for seeing that all of their degree requirements are fulfilled.

University Degree Requirements

University Requirements

To earn a Bachelor's Degree, all students must fulfill the following University of California requirements:

- Entry Level Writing (p. 36)
- American History & Institutions (p. 37)
- Unit Requirements & Limitations (p. 38)
- Senior Residence Requirements (p. 38)
- Scholarship Requirement (p. 39)
- General Education (GE) Requirements (p. 38)
- College Requirements; see:
 - College Major & Minor Information (p. 40)
 - Agricultural & Environmental Sciences (p. 40)
 - Biological Sciences (p. 41)
 - Engineering (p. 43)
 - Letters & Science (p. 43)
- Major/Degree; course requirements for each major/degree are listed in Departments, Programs, & Degrees (p. 48).

For older Bachelor's Degree Requirements, see Bachelor's Degree Requirements Archive (p. 47).

Entry Level Writing Requirement (ELWR)

The Entry Level Writing Requirement (ELWR) is a University of California requirement. Every first-year student in the UC system must demonstrate their college-level proficiency in writing by fulfilling the ELWR. University-level writing requires students to read carefully, analyze readings with understanding, and draw conclusions about what is read. For more information, see Entry Level Writing Requirement (<https://elw.ucdavis.edu>).

Students must fulfill ELWR by the end of their third quarter of enrollment; students who do not fulfill ELWR by the end of their third quarter of enrollment face disenrollment from the university.

Before enrolling at UC Davis, students can fulfill ELWR two ways:

1. Earning at least one threshold score on one of the following exams:
 - 30 or better on the ACT, English Language Arts.
 - 63 or better on the ACT English exam + the ACT Reading exam.
 - 680 or better on the SAT, Evidence-Based Reading and Writing.
 - 3 or higher on AP English Language and Composition or AP English Literature and Composition.
 - 5 or higher on Higher Level IB English A: Literature or Higher Level IB English A: Language and Literature.
 - 6 or higher on Standard Level IB English A: Literature or Standard Level IB English A: Language and Literature.
 - Passing score on the University of California Analytical Writing Placement Exam (AWPE) offered by the UC Office of the President.
2. Earning a passing grade in a transferable college writing course. For more information about transferable college writing courses, see Assist.org (<https://assist.org>).

NOTE: Official score reports/transcripts must be sent to UC Davis (<https://www.ucdavis.edu/admissions/undergraduate/transcripts-test-scores/>) for ELWR fulfillment.

After enrolling at UC Davis, students can fulfill ELWR three ways:

1. **UC Davis Writing Placement Survey.** Writing Placement Survey can be taken only once and is only available to incoming first-year undergraduate students. For more information, see Entry Level Writing Requirement (<https://elw.ucdavis.edu>).
2. **UC Davis ELWR fulfilling course.** Earning a C or higher in a designated, credit-bearing writing course fulfills ELWR:
 - UWP 007, a face-to-face 4 unit writing course.
 - UWP 007Y, a hybrid 4 unit writing course.
 - UWP 007M, a face-to-face 4 unit writing course.
 - UWP 001A, a face-to-face 2 unit writing co-course that must be taken concurrently with UWP 001.
 - ENL 003A, a face-to-face 2 unit writing co-course that must be taken concurrently with ENL 003.
 - NAS 005A, a face-to-face 2 unit writing co-course that must be taken concurrently with NAS 005.

NOTE: Currently, P/NP grade mode is not permitted if the course is used for ELWR fulfillment.

3. **UC Online ELWR fulfilling course.** Earning a C or higher in a designated, credit-bearing writing course offered by UC Online/Cross Campus Enrollment (listed below) that fulfills ELWR.

- WR 039A, a fully online 4 unit writing course offered through Cross-Campus enrollment (<https://registrar.ucdavis.edu/registration/special-programs/uc-online/>) and taught by UC Irvine.

NOTE: Students must meet certain eligibility criteria to enroll through Cross-Campus enrollment and should check in with the advisors in their Dean's Office prior to enrollment.

American History & Institutions Requirement

The American History & Institutions requirement ensures that every graduating student will have at least a minimum knowledge of the background of this country's development and an understanding of the political, economic and social interrelationships of its way of life.

You may meet this requirement in any of these ways:

- Complete one high school unit in American history, or 1/2 high school unit in American history and 1/2 high school unit in civics or American government, with a grade of C or better in each course
- Complete any one of the following courses:

Code	Title	Units
African American & African Studies (AAS)		
AAS 010	African-American Culture & Society	4
AAS 100	Survey of Ethnicity in the US	4
Asian American Studies (ASA)		
ASA 001	Historical Experience of Asian Americans	4
ASA 002	Contemporary Issues of Asian Americans	4
Chicana/Chicano Studies (CHI)		
CHI 010	Introduction to Chicana/o Studies	4
Economics (ECN)		
ECN 111A	Economic History	4
ECN 111B	Economics History	4
History (HIS) ¹		
HIS 017A	History of the United States	4
HIS 017B	History of the United States	4
HIS 072A	Women & Gender in America, to 1865	4
HIS 072B	Women & Gender in America, 1865-Present	4
HIS 170A	Colonial America	4
HIS 170B	The American Revolution	4
HIS 170C	The Early National Period, 1789-1815	4
HIS 171A	Slavery, Society & Expansion in the Early U.S.	4
HIS 171B	Civil War Era	4
HIS 174A	The Gilded Age & Progressive Era: United States, 1876-1917	4
HIS 174B	War, Prosperity, & Depression: United States, 1917-1945	4
HIS 174C	The United States Since World War II, 1945 to the Present	4
HIS 176A	Cultural & Social History of United States	4
HIS 176B	Cultural & Social History of United States	4

HIS 177A	History of Black People & American Race Relations: 1450-1860	4
HIS 177B	History of Black People & American Race Relations: 1860-Present	4
HIS 179	Asian American History, 1850-Present	4
HIS 180AN	American Political History, 1789-1896	4
HIS 180BN	American Political History, 1896-present	4
HIS 183A	The Frontier Experience: Trans-Mississippi West	4
HIS 183B	The Frontier Experience: Trans-Mississippi West	4

Native American Studies (NAS)		
NAS 001	Introduction to Native American Studies	4
NAS 010	Native American Experience	4
NAS 116	Native American Traditional Governments	4
NAS 130A	Native American Ethno-Historical Development	4
NAS 130B	Native American Ethno-Historical Development	4
NAS 130C	Native American Ethno-Historical Development	4

Political Science (POL)		
POL 001	American National Government	4
POL 005	Contemporary Problems of the American Political System	4
POL 100	Local Government & Politics	4
POL 102	Urban Public Policy	4
POL 104	California State Government & Politics	4
POL 105	The Legislative Process	4
POL 106	The Presidency	4
POL 108	Policy Making in the Public Sector	4
POL 109	Public Policy & the Governmental Process	4
POL 113	American Political Thought	4
POL 130	Recent U.S. Foreign Policy	4
POL 131	Analysis of U.S. Foreign Policy	4
POL 160	American Political Parties	4
POL 163	Group Politics	4

Students electing to complete one of the above courses in order to meet this requirement are subject to the rules for prerequisites and majors.

¹Upper division courses may be taken only with the consent of the instructor.

- Present evidence that the requirement has been accepted as satisfied at another campus of the university.
- Present evidence that the requirement has been satisfied through courses in the area of American History and Institutions at another collegiate institution whose credits are acceptable for transfer to UC Davis.
- Successful completion of the Advanced Placement (AP) Examination in United States Government and Politics taken May 2014 and prior with a score of 3 or higher. As of May 2015, AP examination, AP

United States Government & Politics no longer satisfies the American History & Institutions requirement.

- Successful completion of the International Baccalaureate (IB) Examination in History of the Americas Higher Level (HL) with a score of 5, 6, or 7.
- Successful completion of the SAT Subject Examination in U.S. History with a score of 550 or higher.

International students, regardless of the type of visa they hold, must meet the university's American History & Institutions requirement for graduation.

Unit Requirements & Limitations

Minimum. A minimum of 180 quarter units is required for graduation. These must be distributed according to the minimum requirements set forth by the faculty of your college.

Unit Credit Limitations. For certain courses, there may be limits established on the number of units countable towards the 180-unit minimum required for the degree. To avoid discovering just before graduation that a student is short on units, a student should regularly meet with their advisor to keep track of the number of units taken and credited.

Internship Courses. A maximum of 15 units of internship courses may be counted toward the 180-unit bachelor's degree requirement; however, some colleges have set a lower maximum. Unless the student has completed a minimum of 84 units, the student shall not receive University credit for an internship course numbered 192 (p. 463). (ASR 532.A & B (http://academicsenate.ucdavis.edu/bylaws_and_regulations/regulations.cfm#532-))

Special Study Courses. Unless the student has completed a minimum of 84 units, the student shall not receive University credit for a Special Study courses course numbered 194H or 199 (p. 463). (ASR 535 (http://academicsenate.ucdavis.edu/bylaws_and_regulations/regulations.cfm#535-))

Transfer Courses. The acceptability of transfer courses (<https://registrar.ucdavis.edu/records/transfer-credit/>) for unit credit is determined by Undergraduate Admissions (<https://www.ucdavis.edu/admissions/undergraduate/transfer/planning/>). The acceptability of such courses toward specific requirements is determined by the individual college or school. To eliminate the possibility of duplication of credit, students should refer to the Advanced Placement Examination (p. 18) & International Baccalaureate (p. 18) charts and their transcripts.

Senior Residence Requirements

The minimum senior residence requirement for a bachelor's degree at the University of California is one academic year (three quarters). Thirty-five of the final 45 quarter units completed by each candidate must be earned while in residence on the UC Davis campus (UCSR 630.A (<http://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart3.html#r630>)). Each summer session in which a student completes a course of at least 2 quarter units may be counted as half a quarter's residence.

Regularly approved courses (laboratory, field, or other individual work) done outside of a regular session but under the direction of a department of instruction may be accepted upon the recommendation of the department in partial fulfillment of the senior residence requirement for

the bachelor's degree. Registration is with the consent of the instructor only.

UC Davis Continuing & Professional Education (<https://cpe.ucdavis.edu/>) (CPE) courses are not accepted as part of the senior university residence requirement.

There are additional senior residence requirements for students enrolled in the College of Letters & Science (<https://www.ls.ucdavis.edu/advising/academic-resources/degree-require.html>). If you are planning to study abroad during your senior year, you should consult your college dean's office or the Biology Academic Success Center (<http://basc.ucdavis.edu/>).

With the approval of the dean of a student's college or school, a candidate for the bachelor's degree who was in active service in the armed forces of the United States in the year preceding the awarding of the degree may be recommended for the degree after only one quarter of university residence in which the candidate completes at least 16 units or passes a comprehensive examination in the major or field of concentration (UCSR 614 (<http://senate.universityofcalifornia.edu/bylaws-regulations/regulations/rpart3.html#r610>)).

General Education (GE) Requirements

For complete information, see General Education Requirements (<https://ge.ucdavis.edu/>). For a list of courses that contain GE attributes and GE search tools, see General Education (GE) Requirements (<https://registrar.ucdavis.edu/registration/plan/ge/>).

The General Education (GE) requirement promotes the intellectual growth of all undergraduates by ensuring that they acquire a breadth of knowledge that will enlarge their perspectives beyond the focus of a major and serve them well as participants in a knowledge-based society. It seeks to stimulate continued growth by providing knowledge of both the content and the methodologies of different academic disciplines. It involves students in the learning process by its expectation of considerable writing and class participation, and encourages students to consider the relationships between disciplines.

The GE requirement has two components, Topical Breadth and Core Literacies, and is defined in terms of units, not courses.

Topical Breadth Component—52 units

A GE course in topical breadth addresses broad subject areas that are important to the student's general knowledge. The units of most undergraduate courses at UC Davis are assigned to one of the three Topical Breadth Areas.

Note: In the case of a course that has been certified in more than one Topical Breadth Area, a student may count the units of the course in only one of the areas in which it has been certified.

- **Arts & Humanities—12-20 units.** Courses in this area provide students with knowledge of significant intellectual traditions, cultural achievements and historical processes.
- **Science & Engineering—12-20 units.** Courses in this area provide students with knowledge of major ideas and concepts of science and engineering and their applications.
- **Social Sciences—12-20 units.** Courses in this area provide students with knowledge of the individual, social, political and economic activities of people.

Core Literacies Component—35 units

The literacies are crucial both for success in one's profession and for a thoughtful, engaged citizenship in the community, nation and world.

Note: In the case of a course that has been certified in more than one Core Literacy Area, a student may count the units of the course in only one of the core literacy areas in which it has been certified.

1. **Literacy with Words & Images—20 units.** The objective of this core literacy is to help students communicate their ideas effectively in written, oral and visual forms. The requirement also seeks to enhance students' critical judgment of oral, written, and visual messages created by others.

Note: A student must have completed the Entry Level Writing Requirement (formerly known as the Subject A requirement) before receiving General Education credit for coursework satisfying requirements b and Writing Experience coursework satisfying requirement c, below. Students should contact their college before taking courses for requirement a, as there may be limitations on credit for students who have not completed the Entry Level Writing Requirement.

- a. **English Composition—8 units.** As described by College of Agricultural & Environmental Sciences, College of Biological Sciences, College of Engineering, or College of Letters & Science.
 - b. **Writing Experience coursework in the student's major or in other departments—6 units.** Courses in writing experience provide students instruction on how to communicate ideas in the subject matter of the course. The opportunity to improve writing after having received careful commentary is crucial to this requirement.
 - c. **Oral Skills coursework or additional writing experience coursework—3 units.** Courses in oral literacy involve effective communication of ideas through oral presentation and build on and strengthen the critical thinking skills exercised through writing. As an alternative to developing oral communication skills, students may take additional coursework certified as writing experience (see requirement b, above).
 - d. **Visual Literacy coursework—3 units.** Courses in visual literacy provide students with the analytical skills they need to understand how still and moving images, art and architecture, illustrations accompanying written text, graphs and charts, and other visual embodiments of ideas inform and persuade people. Coursework may stress the skills needed to communicate through visual means as well as the analytical skills needed to be a thoughtful consumer of visual messages.
2. **Civic & Cultural Literacy—9 units.** The objective of this core literacy is to prepare students for thoughtful, active participation in civic society. Students will learn to think analytically about American institutions and social relations, understand the diversity of American cultures, and see the relationships between national and local cultures and the world.
 - a. **American Cultures, Governance, & History—3 units.** Courses in American Cultures, Governance, & History provide students with an understanding and appreciation of the social and cultural diversity of the United States and of the relationships between these diverse cultures and larger patterns of national history and institutions.
 - b. **Domestic Diversity—3 units.** Courses in Domestic Diversity provide students with an understanding of issues such as race, ethnicity, social class, gender, sexuality, and religion within the

United States, and develop the student's ability to think critically about diverse socio-cultural perspectives.

- c. **World Cultures—3 units.** Courses in World Cultures provide students with a global perspective in a world where communication technologies, economic relationships, and the flow of people across national borders increasingly challenge national identities and create transnational cultures. Students can satisfy this requirement through coursework or through certified study abroad.
3. **Quantitative Literacy—at least 3 units.** The objective of this core literacy is to provide students with an understanding of quantitative reasoning and skills for evaluating claims and knowledge generated through quantitative methods.
 4. **Scientific Literacy—at least 3 units.** The objective of this core literacy is to provide students with an understanding of the fundamental ways scientists approach problems and generate new knowledge, and an understanding of how scientific findings relate to other disciplines and to public policy.

Approved General Education Courses

Please note that you cannot claim GE credit for a course you completed *before* it was an approved GE course.

Additional Conditions

Meeting Total Units Requirement. With the exception of units used to satisfy the English Composition element, units approved for a Core Literacy will be accepted toward satisfaction of the appropriate Topical Breadth component. Course units that satisfy requirements in the candidate's major or majors may also be counted toward satisfaction of General Education requirements.

Grading. Students may take courses P/NP to fulfill their General Education requirements, up to the limits set by college and campus regulations.

Advanced Placement & International Baccalaureate. Students may not present Advanced Placement or International Baccalaureate credit in satisfaction of GE requirements, except insofar as it may be applied to the English Composition component of the Literacy with Words and Images requirement.

Transfer Students who have successfully completed the Intersegmental General Education Transfer Curriculum (IGETC) lower division course work are exempt from all General Education requirements that may be met with lower division courses. Transfer students who have not completed the IGETC, and who are not entitled to graduate under the provisions of a General Catalog issued prior to Fall 2011 as permitted by the applicable college policy on degree requirement changes, are required to satisfy all General Education components under the revised requirement but may offer previously completed coursework toward their satisfaction.

Scholarship Requirement

To receive a bachelor's degree, you must obtain twice as many grade points as units (a 2.000 GPA) for all courses you have attempted in the university. Each college has specific requirements, as well; see College Requirements:

- Agricultural & Environmental Sciences (p. 40)
- Biological Sciences (p. 41)

- Engineering (p. 43)
- Letters & Science (p. 43)

A preliminary degree check can be used to help track your progress. You can also utilize the MyDegree (<https://mydegree.ucdavis.edu/>) advising tool to review requirements. It is the responsibility of the undergraduate scholar to ensure all requirements are fulfilled.

College Units & Limitations

- A minimum of 180 quarter units is required for the degree. At least 54 of the 180 units must be in upper division or graduate courses except that a maximum of 9 units in graduate level courses (200 series) and professional courses (300 and 400 series) will be accepted toward the 54 upper division requirement.
- No more than 6 units of Physical Education 001 and/or 006 and no more than 20 units of Internship 092 and 192 and courses numbered 099, 190C, 197T, and 199 may be counted toward the total of 180 units for the degree.
- A maximum of 12 units of Internship 092 and 192 is permitted. Credit will not be given for 192, 199 numbered courses prior to completion of 84 units.
- The Academic Senate limits the total number of courses grades *P*, including units earned in courses graded "*P/NP only*" to one third of the units completed on the UC Davis campus. The *P/NP* option should not be used for major requirements.
- Students may apply credit for courses taken in the Open Campus Program through UC Davis Continuing and Professional Education (formerly known as UC Davis Extension) towards the 180-unit undergraduate degree requirement. The grade points earned when enrolled in Open Campus courses will count toward the calculation of a student's UC GPA upon his/her admission or readmission to regular student status at UC Davis. Students registered at UC Davis may not enroll in Open Campus courses.
- University of California Extension courses can be used to satisfy graduation requirements only with approval of the dean, as long as the units are deemed as transferable units by the Undergraduate Admissions office. Only grade points from University of California, Davis Extension courses, not Extension courses from other campuses, will be counted toward the student's overall UC grade point average.

- Undergraduate students may not exceed 225 units; registration for enrollment when the limit has been reached may only be approved by the dean by petition.

College Residence

- 35 of the final 45 units must be taken while an undergraduate scholar is in the college. University of California Extension courses can be used to satisfy graduation requirements only with approval of the dean. Only grade points from University of California, Davis extension courses will count toward the student's overall UC grade point average.
- Education Abroad Courses are not considered in residence. Please speak to the Dean's Office if you are planning to study abroad.

College Scholarship

- The minimum grade point average (GPA) to satisfy the scholarship requirement is 2.000 for all courses counted toward the major and for all upper division courses used to satisfy major requirements.
- Only grades earned in courses taken at UC Davis will be included in the grade point computations.
- Cumulative grade point average (GPA) is a minimum of 2.000; major grade point average (GPA) is also a minimum of 2.000 - both are required in order to be eligible for graduation.
- Major grade point average (GPA) calculation varies per program of study. Questions regarding major GPA should be directed to the department advisor.
- To obtain these minimum averages in the major, you may repeat courses that are graded D or F. If you have to repeat a course more than once, scholars must obtain approval from the Dean's Office prior to enrolling.

English Composition

This requirement may be met in one of three ways:

(1) Either two courses emphasizing written expression or one course emphasizing written expression and one course emphasizing oral expression, with a grade of C- (or P) or better. The following UC Davis courses satisfy this requirement:

(a) One course must be selected from English (ENL) 003; University Writing Program (UWP) 001, 048, 049, 101, 102 series, or 104 series (courses with primary emphasis in writing skills), and;

(b) One course selected from the courses not selected above, or from Communication (CMN) 001; Comparative Literature (COM) 001, 002, 003, 004, or Native American Studies (NAS) 005 (courses emphasizing either writing or speaking skills.)

(2) Advanced Placement English score of 4 of 5 PLUS any course listed in 1(a) or 1(b) above EXCEPT University Writing Program (UWP) 001 or English (ENL) 003.

(3) By successfully passing the English Composition Examination administered by the College of Letters & Science upon completion of 70 units of degree credit (the examination does not yield credit).

For specific examination dates, instructions, and to sign up to take an examination, see the University Writing Program-Upper Division Composition Exam Information (<http://writing.ucdavis.edu/compexam/>). It is recommended that students with disabilities contact the Student Disability Center at 530-752-3184 and the Entry Level Writing Program

Office 530-752-0450 at least two weeks prior to the exam date to arrange accommodations.

Biological Sciences

College of Biological Sciences

College of Biological Sciences

Unit Requirements

Total Units

Complete no less than 180 units allowing for the unit credit limitations listed below. No student may exceed 225 units in their academic career without approval of the Dean. Units earned in Advanced Placement and International Baccalaureate exams are not counted toward this 225-unit limit. Upon reaching 200 units, a student must submit an Academic Graduation Plan and an Excess Unit Petition on OASIS.

Upper Division Units

Complete 64 upper division units.

Unit Credit Limitations

- **Passed/Not Passed Units.** All courses used to satisfy major requirements must be taken on a letter-graded basis, unless courses are only offered on a Passed/Not Passed basis. If a student adds or changes a major course offered for a letter grade to Passed/Not Passed, the college will return it to a letter grade. In addition, the Academic Senate limits the total number of courses graded P, including units earned in courses graded "P/NP only," to one third of the units completed on the UC Davis campus.
- **Physical Education.** Maximum of 6 units of Physical Education (PHE 001 & PHE 006), and similar physical activity courses including transfer work.
- **Transfer Work.** Maximum of 105 units of credit earned at two-year institutions (community college).
- **Graduate Courses.** Units from courses in the 200 series (with the exception of course 299) may apply toward the minimum 64-unit upper division requirement and/or as a substitution for undergraduate courses in the major under the following conditions:
 - Students must obtain written permission from the course instructor and the faculty advisor for their major.
 - The faculty advisor will confirm that students have a minimum 3.400 GPA in the major at the time that they register for the course.
- **Professional and teaching courses.** Maximum of 9 units in courses numbered 300-399 and 400-499. These units may not be applied toward the 64-unit upper division requirement.
- **Upper division standing.** Must complete 90 units before enrolling in 192, 194H and 199 to receive degree and upper division credit.
- **Special Study.** No more than 5 units per quarter of Special Study courses (099, 194H, 199).
- **Nonstandard Courses.** A maximum of 20 units of nonstandard courses including transfer work can be counted towards the degree.¹ Nonstandard courses are defined here as tutoring, internship, research, research conference, honors research and similar course activities. Some examples of these courses are, but are not limited to, courses numbered 090C, 091, 092, 092C, 097T, 097TC, 099, 189, 190C, 191, 192, 192C, 193, 194H, 197T, 197TC, 199, etc. Courses numbered 098 or 198 are not included in this 20-unit limitation.

Within these 20 units, there are additional unit credit limitations on tutoring and internship units:

- **Tutoring.** Maximum of 3 tutoring units including but not limited to 097T, 197T, 097TC and 197TC.
- **Internship.** A maximum of 6 internship units including but not limited to 092, 192, 92C, 192C.

¹ Specific exceptions to these limits may be granted by the Committee on Undergraduate Curriculum and Educational Policy (CUCEP) based on the uniqueness of the experiences and their concordance with the petitioner's educational objectives.

Credit for Open Campus (Concurrent) Courses

Students may apply credit for courses taken in the Open Campus (Concurrent) Program through UC Davis Extension towards the 180-unit undergraduate degree requirement. The grade points earned when enrolled in Open Campus courses will count toward the calculation of a student's UC GPA upon his/her admission or readmission to regular student status at UC Davis. However, the units earned do not satisfy the university residence requirement. Students registered at UC Davis may not enroll in Open Campus courses.

Residence

Meet university residence requirement. No additional college residence requirements.

Scholarship

Students must attain at least a 2.000 GPA for all courses required in their major by graduation. Students must also attain a 2.000 GPA in all Depth Subject Matter courses required in their major.

- **Repeating Courses.** Students may repeat courses once in which they received a grade of D+ or less. To repeat a course more than once, students must submit Multiple Repeat Petition in OASIS for review prior to enrolling in the course.

English Composition

English Composition requirement may be satisfied in one of two ways:

1. Completing 8 units, to include 4 upper division units, in English composition courses with at least a C- or Passed grade from the following list:
 - Comparative Literature 001, 002, 003, 004
 - English 003
 - Native American Studies 005
 - University Writing Program 001, 001V, 001Y, 048, 049, 101, 101V, 101Y, UWP 104AY, UWP 104FY, 102 series, or 104 series
- OR**
2. Passing the English Composition Examination, administered by the University Writing Program, upon completion of 70 units of degree credit. This examination does not yield credit. Students interested in entering the health science field should check with the Health Professions Advising office or the Biology Academic Success Center before choosing this option.

English Composition Examination

The no-fee, no-unit examination is typically offered on a Saturday in October, January, and April. For specific dates, see Upper Division Composition Exam (UDCE) (<http://writing.ucdavis.edu/compexam/>).

If students choose to take this challenge exam, they are strongly advised to do so in their junior year. Register for the English Composition Examination at Upper Division Composition Exam (UDCE) (<http://writing.ucdavis.edu/compexam/>) from the Monday before the exam date until Friday at noon or until no spaces remain. The AWPE/Upper Division Composition Examination form, available at the UC Davis Bookstore, is required. It is recommended that students with disabilities contact the Student Disability Center 530-752-3184 and the University Writing Program 530-752-6283 at least two weeks prior to the exam date to arrange accommodations. No examinations are given during the summer.

Additional Bachelor of Arts Requirements

Bachelor of Arts degrees are available in Biological Sciences; Evolution, Ecology and Biodiversity; Microbiology; and Plant Biology. These degrees offer students an opportunity to broaden their education while pursuing a rigorous life science major. Candidates for the Bachelor of Arts degrees must complete two additional requirements.

Foreign Language

The requirement can be met in one of three ways:

- Complete with passing grades 15 quarter units of college level course work, or the equivalent thereof, in a single language.
- Attain a minimal score prescribed by the Committee on Undergraduate Curriculum and Educational Policy (CUCEP), in the College Entrance Examination Board Achievement Test in Foreign Language, which may be taken at any time during the student's high school career, or any other achievement test approved by the Committee on Undergraduate Curriculum and Educational Policy.
- Placement beyond the 15-unit level on a placement/proficiency examination offered by one of the foreign language departments of the University.

Breadth Requirements

Satisfaction of the campus General Education requirement (or IGETC for transfer students) in effect Fall 2011 will satisfy the Breadth requirement.

Declaration of Major/Undeclared—Life Sciences

Students must declare a major by 90 units. A hold will be placed on a student's registration if they are still undeclared after completing 90 UC Davis units.

All changes of major and college must be completed before the beginning of the student's quarter of graduation.

Students who are enrolled in a major administered by the College of Biological Sciences and students who are Undeclared-Life Sciences see an academic advisor in the Biology Academic Success Center for their major, university, general education, and college academic advising. Faculty advisors are also available in the department that houses their major, as listed in the catalog, or at the Biology Academic Success Center.

Degree Check

Students are encouraged to meet with their academic advisor at least once a year to ensure timely graduation. Students are strongly encouraged to consult a Biology Academic Success Center academic advisor at the following points in their academic careers:

- First-Year Mandatory Advising for transfer students during their first two quarters on the Davis campus (required).
- Before accumulating 90 units.
- Before accumulating 135 units.

- In addition, if you are taking courses which, if passed, will cause your unit total to exceed 200 units and you intend to register for the next quarter, you must file a plan with your advisor that leads to graduation within 225 units. If the plan anticipates registering after you have accumulated 225 units, the plan must be submitted to the Dean for approval.

Degree Requirement Changes or Catalog Rights

On occasion, the faculty makes changes in the requirements that students must satisfy to obtain the baccalaureate degree. So that you will not be penalized by changes that may work to your disadvantage and so that you will benefit by changes that assist you in completing your degree requirements, it is college policy that you may choose to fulfill the university and college requirements (see General Education Requirements) as stated in any UC Davis General Catalog in effect at the time you were registered at UC Davis. If you have transferred to UC Davis from a community college, state college, or another university, you may follow the requirements as stated in any UC Davis General Catalog in effect either during the three years immediately preceding your transfer to UC Davis or at the time you first registered at that institution, whichever is most recent. Once you have chosen the year of the General Catalog under which you wish to be governed, you must satisfy all of the university and college requirements specified in that catalog.

With respect to the completion of your major requirements, most of the majors in the College of Biological Sciences require completion of the major degree requirements in effect at the time you officially declared your major. However, because departments differ in how they handle these matters, check with your BASC academic advisor if you have any questions about your major requirements.

Engineering

College of Engineering

College of Engineering Unit

Each candidate must complete a program of study under an approved curriculum in Engineering, totaling at least 180 units.

Residence

College of Engineering students must meet the university residence requirement. There are no additional college residence requirements.

- **Limitation on Credit for UC Davis Extension Courses.** Students may apply a maximum of 16 units of credit for courses taken in the Open Campus Program through UC Davis Extension towards the unit requirement of their major. Courses may be taken only when written approval has been obtained from the Associate Dean for Undergraduate Studies. The grade points earned when enrolled in Open Campus courses will count toward the calculation of the student's UC GPA upon your admission or readmission to regular student status at UC Davis. Students registered at UC Davis may not enroll in Open Campus courses.

Scholarship

In addition to meeting the university scholarship requirement, College of Engineering students are required to maintain at least a 2.000 grade point average for all undergraduate course work within the College of Engineering at UC Davis.

English Composition

All students admitted to the University must complete the Entry Level Writing Requirement (p.) before credit for any composition course or general education writing experience course will be granted.

Once the Entry Level Writing Requirement has been satisfied, there are two distinct composition requirements for engineering students:

- **Lower division composition.** This requirement can be satisfied by completion of an
 - Advanced Placement English exam with a score of 4 or 5;
 - International Baccalaureate credit for English 3; or
 - completion of certain coursework with a grade of C- or better.

Courses allowed vary by major. Please see your program advisor to determine coursework that has been approved for your major.

- **Upper division composition.** Requirements for upper division composition vary by major. Please see your program advisor to determine the coursework that has been approved for your major. Please note that when you use coursework to satisfy either of the composition requirements, you must earn a grade of C- or better.

Current Catalog Curriculum

In order to ensure that students graduate with the most current engineering knowledge, College of Engineering Students must complete the major requirements in effect in the academic year of graduation or in the immediately preceding academic year.

Letters & Science

College of Letters & Science

College of Letters & Science Unit

A minimum of 180 units is required for the bachelor's degree. 64 units must be earned in upper division courses.

Registration Beyond the 225-Unit Limit

You are expected to fulfill all degree requirements within the 180- to 225-unit range. Once 225 units have been completed (excluding units awarded for College Board Advanced Placement Examinations or International Baccalaureate Examinations), you may register only with the permission of the Letters and Science Office of Undergraduate Education and Advising. Such permission is rarely granted and then typically only to allow completion of minimum degree requirements. A hold will be placed on a student's record when they reach 200 total units, requiring submission of an academic plan to verify the degree can be completed within the 225-unit cap. You will be expected to adhere to a program of courses agreed upon and to meet other conditions that may have been set. Approval must be obtained from Undergraduate Education and Advising in the Office of the Dean before you will be permitted to register for courses for the quarter following completion of 225 or more units.

If you are in good standing, you will be able to complete 12 quarters or the equivalent (e.g., four years) of college work even if you have earned more than 225 units before you finish your fourth year. You must petition for continuation, however, and file the quarter-by-quarter course program you have planned.

Unit Credit Limitations

For certain courses, limits have been established on the number of units that can be counted towards the 180-unit minimum required for the

degree. To avoid discovering just before graduation that you are short units, meet with an advisor regularly and keep track of the number of units you have taken in each of the following categories.

Limitation on Credit for Graduate & Professional Courses

Undergraduates may enroll in graduate and professional courses subject to the restrictions outlined on the petition to Request to Take a 200, 300 or 400 - Numbered Course for Degree Credit (http://ls.ucdavis.edu/sites/g/files/dgvnsk276/files/files/page/take-200-300-400-course_1.pdf). Graduate and professional courses that have been completed will be listed on the student's transcript in the usual manner. However, the units earned may be counted toward degree requirements only under the conditions listed below.

Within the limitations A, B and C given below, undergraduate students in the College may count up to a combined total of 9 units in graduate 200 series courses and in 300 and 400 series professional courses toward degree requirements. These units, however, are not counted as upper division units.

- A. The recommendations of the instructor in the course and the department chairperson—in addition to approval from Undergraduate Education and Advising in the Office of the Dean—must be obtained by petition in order to receive credit toward the degree for the following kinds of courses:
 - All graduate courses 200–298, whether offered by a department or program outside of or within the College of Letters and Science.
 - All professional courses 300–398 for teachers offered outside of the College of Letters & Science.
 - All postgraduate professional courses 400–498 offered outside of the College of Letters & Science.
 - All variable unit courses 300–398 and 400–498 offered within the College of Letters & Science.
- B. The minimum eligibility conditions for an undergraduate student in the College to petition for degree credit for a 200, 300, or 400 series course are a UC grade point average of 3.300 and completion of 18 upper division units basic to the subject matter of the course. These eligibility conditions may be waived, however, upon the recommendation of the course instructor and concurrence of the department chairperson if the student's preparation warrants exception.
- C. Undergraduates in the College cannot receive degree credit for special study courses 299, 399, or 499.

Limitation on Credit for Units Graded P

Students in the College of Letters & Science are subject to an additional limitation on the number of units that may be completed employing the Passed/Not Passed grading option. Graduating seniors and other students planning to undertake graduate or professional studies, should consult an advisor before electing for Passed/Not Passed grading in courses required for the major program. Excluding courses that are graded on a Passed/Not Passed (P/NP) basis only, the number of units graded P that may be accepted towards a degree in the College of Letters & Science is limited to not more than one fourth of the units completed in residence on the UC Davis campus. The Academic Senate limits the total number of courses graded P, including units earned in courses graded "P/NP only," to one third of the units completed on the UC Davis campus. This limitation applies to all UC Davis undergraduates, including Letters & Science students.

Limitation on Credit for UC Davis Extension Courses

- A. UC Davis Continuing and Professional Education courses with a designator of "X." Students may apply credit earned through lower division and upper division UC Davis Continuing and Professional Education "X" courses towards the 180-unit requirement only with written approval from Undergraduate Education and Advising in the Office of the Dean prior to registration. The degree credit allowed for such courses is usually less than the unit value listed in the course description. Additional limitations on UC Davis Continuing and Professional Education "X" courses include:
 - A maximum of 9 units may be offered for elective credit only, and
 - They may not be applied toward fulfillment of the Area, Foreign Language, Upper Division, or Residence requirements of the College.
- B. UC Davis Continuing and Professional Education courses with a designator of "XD." Students may apply credit earned through lower division and upper division UC Davis Continuing and Professional Education "XD" courses towards the 180-unit requirement. Additionally, credit from such courses may be applied toward fulfillment of all university, campus, college and major unit and subject matter requirements—including the Area, Foreign Language, Upper Division and Residence requirements of the College—in the same manner that the corresponding regular UC Davis course is so accepted.
- C. UC Davis Continuing and Professional Education courses with a designator of "XDC" [Open Campus (Concurrent) Program]. Subject to the following conditions, students may apply credit earned through lower division and upper division UC Davis Continuing and Professional Education Open Campus (Concurrent) courses—i.e., those bearing the "XDC" designator, towards university unit and subject requirements, and, effective Fall 2003, the calculation of the student's UC GPA, upon admission or readmission to regular student status at UC Davis.
 - Students on leave of absence and regular status students when matriculated, or regular status students for a period of one calendar year following the last term of regular enrollment at UC Davis, may not enroll in Open Campus (Concurrent) courses. Exceptions to this policy for undergraduate students may be made only under extraordinary circumstances by petition with prior approval by Undergraduate Education and Advising in the Office of the Dean and the Dean of UC Davis Continuing and Professional Education.
 - Concurrent ("XDC") courses do not count toward satisfaction of the University residence requirement or the residence requirements of the campus or the college.
 - Concurrent ("XDC") courses may constitute at most half of the units offered in satisfaction of the upper division requirements of the major.
 - In the event that the faculty of the college imposes further restrictions on the number of units of UC Davis Continuing and Professional Education Open Campus (Concurrent) course work that may be applied to undergraduate degree programs, the allowable number of units of course work will be determined chronologically, starting with the course completed first. Grade point credit for such courses will be determined in the same manner.

Other Unit Credit Limitations

The following are additional courses that have limits on the number of units that can be counted toward your degree:

- Internship courses (numbers 092, 192): 12 units maximum including internship units taken at other institutions; see *Nonstandard courses*, below.
- Music 130, 131, 140, 150 (combined): 19 units maximum.
- Nonstandard courses (092, 097T, 097TC, 099, 192, 194H, 197T, 197TC, 199 and similar courses): 30 units maximum or one sixth of the units taken at UC Davis, whichever is the smaller; note the separate unit limits on internship, special study and tutoring courses; and major limitations
- Physical Education 001 and 006 (combined): 6 units maximum.
- Special Study courses (099, 194H, 199): 5 units maximum in any one quarter; see *Nonstandard courses*, above.
- Tutoring courses (097T, 097TC, 197T, 197TC): 10 units maximum; see *Nonstandard courses*, above.

Residence

While registered in the College of Letters & Science, a minimum of 27 upper division units, including 18 upper division units in the major, must be completed on the Davis campus; work completed while registered in the UC Education Abroad Program or the UC Davis Continuing and Professional Education Open Campus Program does not satisfy university or College Residence requirements.

Scholarship

The minimum grade point average to satisfy the scholarship requirement is 2.000 for all courses counted toward the major and for all upper division courses used to satisfy major requirements. Only grades earned in courses taken at UC Davis will be included in the grade point computations. To obtain these minimum averages in the major, you may repeat courses that are graded D or F. If you have to repeat a course more than once, you need approval from Undergraduate Education and Advising in the Office of the Dean.

English Composition

All undergraduates in the College of Letters & Science must fulfill a two-course writing requirement, by completing each course with a grade of C- (or P) or higher or by testing out of one or both courses. All courses require a minimum of 6,000 words of writing, designed to introduce students to academic and professional writing, advance their analytic skills, and improve their writing process. Students may satisfy the writing requirement by completing:

1. One course from University Writing Program 001, English 003, Comparative Literature 001, 002, 003, 004, or Native American Studies 005; and,
2. After completing 84 units, one course selected from University Writing Program (UWP) 101, UWP 102 series, or UWP 104 series.

Transfer Courses in English Composition. Transfer courses considered to be equivalent or comparable to English 003, Comparative Literature 001, 002, 003, 004, Native American Studies 005, or University Writing Program 001, 001V, 001Y, 101, 102 or 104 series, will be accepted toward satisfaction of the English Composition requirement. Note that University Writing Program 101, 102 and 104 series courses or the equivalent must be taken after you have completed 84 units of degree credit.

Upper Division Composition Examination. The no-fee examination is typically offered on a Saturday morning in October, January and April. No examinations are given during the summer.

For specific examination dates, instructions, and to sign up to take an examination, see the University Writing Program-Upper Division Composition Exam Information at <http://writing.ucdavis.edu/compexam> (<http://writing.ucdavis.edu/compexam/>). It is recommended that students with disabilities contact the Student Disability Center at 530-752-3184 and the Entry Level Writing Program Office, 530-752-0450, at least two weeks prior to the exam date to arrange accommodations. Students are advised to complete this requirement in their junior year.

Area (Breadth)

The College Breadth Requirement promotes the intellectual growth of students by asking them to acquire a broader background of knowledge than is provided by the usual major. The Breadth requirement also guides students in exploring the interdependence of knowledge.

A.B. Degree

Satisfaction of the campus General Education requirement fulfills this requirement.

B.S. Degree

A total of 90 units in natural sciences/mathematics; units in the approved courses listed below used in satisfaction of the campus General Education requirement in Science & Engineering topical breath may also be used to satisfy this requirement.

Courses numbered 092, 097T, 097TC, 098, 192, 197T, 197TC, 198 and 200-499 cannot be counted toward satisfaction of the natural sciences/mathematics Area requirement. A maximum of 10 units in special study courses (099, 194H, 199) may be counted toward that portion of the Area requirement. Subject to the restrictions just listed, courses acceptable for fulfilling the 90-unit natural sciences/mathematics Area requirement are:

Natural Sciences and Mathematics

- Anatomy, Physiology & Cell Biology (APC) 100
- Anthropology (ANT) 001, 001Y, 005, 013, 015, 054, 151, 152, 153, 154A, 154BN, 154C, 154CL, 155, 156A, 156B, 157, 158, 159, 160, 180, 182
- Astronomy (AST)
- Avian Sciences (AVS) 013
- Biological Sciences (BIS)
- Cell Biology & Human Anatomy (CHA) 101, 101L
- Chemistry (CHE)
- Engineering (ENG) 006, 010, 035, 102
- Engineering: Biomedical (BIM) 126
- Engineering: Computer Science (ECS) 010, 012, 017, 020, 030, 032A, 032B, 032C, 034, 036A, 036B, 036C, 040, 050, 060, 089A-L, 113, 115, 116, 120, 122A, 122B, 124, 127, 129, 130, 132, 140A, 140B, 142, 145, 150, 152A, 152B, 152C, 153, 154A, 154B, 158, 160, 161, 162, 163, 164, 165A, 165B, 170, 171, 172, 173, 174, 175, 177, 178, 189A-N, 191, 193A, 193B
- Engineering: Electrical & Computer (EEC) 070, 170, 173A
- Entomology (ENT) 010, 100, 153
- Environmental & Resource Sciences (ERS) 030, 131
- Environmental Science & Policy (ESP) 030, 100, 121
- Environmental Toxicology (ETX) 101
- Evolution & Ecology (EVE)
- Exercise Biology (EXB) 101, 103, 106, 106L, 110, 111, 112, 113, 115, 116, 117, 126
- Fiber & Polymer Science (FPS) 110

- Food Science & Technology (FST) 100A, 100B, 101A, 101B
- Geology (GEL)
- Integrated Studies (IST) 008A
- Mathematics (MAT)
- Microbiology (MIC)
- Molecular & Cellular Biology (MCB)
- Neurobiology, Physiology, & Behavior (NPB)
- Nutrition 010, 010V, 019Y, 111AV, 111B
- Pathology, Microbiology, & Immunology (PMI) 126
- Physical Education (PHE) 133, 135
- Physics (PHY)
- Plant Biology (PLB)

Foreign Language (A.B. & B.A.S. Degrees)

A key component of liberal education, the study of another language exposes students to a ubiquitous and highly diverse component of human behavior and interaction. Language learning enables students to communicate effectively in an increasingly internationalized world, enhances their ability to understand ways of thinking different from their own, gives them direct access to cultural production from another time and place, awakens in them an awareness of the conditioned nature of their assumptions about the world, and trains them to cope more effectively with intellectual and practical problems they may face in their future careers.

The College of Letters & Science encourages its students to acquire functional proficiency in at least one language other than English before graduating. At a minimum, the College requires A.B. candidates to complete three sequenced quarters (15 units) of courses, or its equivalent, in one foreign language. B.S. candidate requirements are determined by their respective major program.

Languages Satisfying the Requirement

The Foreign Language Requirement may be satisfied in any language offered at UC Davis, including ancient languages, or which is normally taught at—and for which transfer credit is allowed—from another institution, including American Sign Language. Students may also satisfy this requirement by examination in a language not offered on the UC Davis campus (see below).

Satisfaction of the Requirement

At UC Davis or Another Accredited Institution

You may satisfy the requirement by taking 15 quarter units of one foreign or classical language offered at UC Davis. You may also fulfill this requirement by taking the equivalent number of transferable quarter units in one foreign language at an accredited institution. Transfer students should consult the Transfer Credit Evaluation, which is issued by Undergraduate Education and Advising in the Office of the Dean, within a quarter after their first enrollment at UC Davis. Students planning to continue to study the same language at UC Davis must consult the relevant language coordinator. If you have successfully completed the second or third year of a language in the tenth or higher grade in high school, you may receive unit credit for course 1 of that language when taken at UC Davis, but the grading mode will be P/NP only. Although a

Passed or Not Passed grade will be charged to your P/NP option, no petition is required.

Through Study Abroad

Certain study abroad programs offered by UC Davis through the Global Learning Hub (<https://globallearning.ucdavis.edu/>), UC Education Abroad Program and other accredited institutions may be used to satisfy the requirement. Some of these programs do not have a language prerequisite, but others do. If you intend to apply for a study abroad program with a language prerequisite, you should plan on completing the relevant foreign language requirement by the end of your second or third year, depending on the program.

With the Intersegmental General Education Transfer Curriculum (IGETC)

IGETC is a series of courses which prospective transfer students attending California community colleges may complete to satisfy the lower division breadth/general education requirements at the University of California. Students may satisfy the Foreign Language requirement by attaining certification of **IGETC completion**.

By Examination: Proficiency Exam

The UC Davis Language Center (DLC) offers proficiency tests in numerous languages. A proficiency test does not yield unit credit; it only determines whether the Foreign Language requirement has been met or at which point in the language sequence you should enroll. Students must follow the language program's placement policy if they decide to study the language at UC Davis.

By Examination: Standardized Tests

College Board Subject Test: Earning a qualifying score of at least 550 on a College Board Foreign Language Subject Test satisfies the requirement. This test may be taken at any time during your high school career. Once your score is on file at Undergraduate Admissions, notify Undergraduate Education and Advising in the Office of the Dean so that satisfaction of the College requirement can be noted on your record.

College Board Advanced Placement Examination

A score of 5, 4 or 3 on any foreign language College Board Advanced Placement Examination, with the exception of Latin, taken in high school will satisfy the Foreign Language requirement.

International Baccalaureate Higher Level Examination

A score of 7, 6, or 5 on the French A1, A2, or B Examination, the German A1, A2 or B Examination, the Italian A1 Examination, the Latin Examination, the Portuguese A1, A2 or B Examination, or the Spanish A1 Examination taken in high school will satisfy the Foreign Language requirement.

By Examination: Other Means

If you have not completed the required level language course, but assume you have attained equivalent language fluency and cultural knowledge, you may satisfy the language requirement by passing a proficiency examination. For more information, consult the appropriate foreign language department. You may validate your knowledge of a language acquired by any means before matriculating at UC Davis by taking a proficiency test or another form of evaluation (if available in the relevant language department). A test may not be taken, however, in a language for which you have already received degree credit.

Major Degree Certification

These requirements are fulfilled by completing a major program offered by a teaching department or program committee in the College of Letters & Science (see the list of majors) or an individual major program approved by the College's Committee on Individual Majors. No more than

6 units in internship courses (numbered 092, 192, or similar internship courses) may be accepted in satisfaction of the requirements of major programs. Courses numbered 097T, 097TC, 197T and 197TC do not satisfy unit or course requirements in the major. Please check with your major advisor to determine if there are any additional restrictions for your specific major. You can also learn more about the requirements for a major by talking with a Major Advisor and visiting the departmental website.

Degree Check

Freshman Admits

In your third year, you will be notified by Undergraduate Education and Advising in the Office of the Dean that a summary of your progress in fulfilling college and university requirements has been completed. At approximately this point, you should contact your departmental advisor for a check of your major requirements.

Transfer Admits

During your UC Davis Orientation Experience, your department/program advisor will review your major requirements with you. Additionally, you will receive notification of the evaluation of your transfer institution credit summarizing your progress in fulfilling college, campus and university requirements in late summer/early fall after your official transcripts have been processed.

Senior Year

Before the beginning of your senior year, take some time to consider your goals and to plan the academic program for your final year as an undergraduate. To plan properly and to ensure that you get the most out of your remaining education and complete all graduation requirements, you should know what requirements remain unsatisfied. You are encouraged to utilize the MyDegree (<https://mydegree.ucdavis.edu/>) advising tool for assistance. **While not a replacement for academic advising by your college and major advisors**, it is an online advising tool that allows you to understand your degree requirements, track your progress towards degree completion, and explore alternative and/or additional fields of study.

Degree Requirement Changes

On occasion, the faculty makes changes in the requirements that students must satisfy to obtain the baccalaureate degree. So that you will not be penalized by changes that may work to your disadvantage and so that you will benefit by changes that assist you in completing your degree requirements, it is College policy that, unless otherwise specified by the Davis Division of the Academic Senate, you may choose to fulfill the university, campus and College requirements as stated in any UC Davis General Catalog in effect at any time you were registered as a full-time student at a post-secondary institution of higher education; e.g., community college, college or university.

Once you have chosen the year of the General Catalog under which you wish to be governed, you must satisfy all of the university, campus and college requirements specified in that catalog. With respect to the completion of your major requirements, most of the majors in the College of Letters & Science require completion of the major degree requirements in effect at the time you officially declared your major. However, because departments differ in how they handle these matters, check with the department or major program office if you have any questions about which requirements apply to you.

African American & African Studies, Bachelor of Arts

College of Letters & Science

The Major Program

African American & African Studies is an interdisciplinary field of study in the humanities, arts, and social sciences. This major introduces students to the social, cultural, historical, and artistic dimensions of global African Diaspora and Black communities in the United States, Africa, Europe, Asia, the Caribbean, Latin America, and Pacific regions of the world. The instructors are creative, accessible and highly qualified, with specializations across a range of disciplines. Students are exposed to and trained to think critically about the conditions and demands of global societies. Students may choose to enrich their education by studying for a summer, a quarter, or a year in Africa, or by studying for a quarter in the Caribbean. Majors and Minors are also encouraged to take advantage of relevant internship opportunities.

The Program

The purpose of this program is to give students a sense of the individual characteristics and common concerns of Black communities in Africa, the United States, and the wider Diaspora. The African American emphasis includes courses on history, culture, and the impact of developments in politics and the economy on the social organization of Black people in the United States. The African Diaspora emphasis enables students to study the way Black communities outside Africa and the United States have dealt with questions of race and ethnicity. It also considers how they have defined their identity in the political arena by using religion, theater and dance, literature, and film. The African emphasis allows students to focus on Africa's recent history, social issues, and contemporary culture.

Career Alternatives

Students majoring in African American & African Studies gain knowledge and strong critical thinking and analytical skills, problem-solving skills, and communication skills, all suited for advanced studies in the social sciences, law, education and professional schools. Graduates in the major have pursued careers in education, the private and public sectors, the non-profit sector, international development agencies and human service. The interdisciplinary nature of African American & African Studies is excellent preparation for professions in community organizations such as the Urban League, NAACP, and the Office of Economic Opportunity.

Group Office

4139 Meyer Hall; 530-752-4516; Agricultural & Environmental Chemistry (Graduate Group) (<http://agchem.ucdavis.edu/>)

Faculty

The focus of our group is applying chemistry to solve the problems of society. Our group has more than 50 faculty from over a dozen academic departments within the College of Agricultural & Environmental Sciences, the College of Letters & Science, the College of Engineering, the School of Medicine, and the School of Veterinary Medicine.

- Agriculture & Environmental Chemistry, Master of Science (p. 57)
- Agriculture & Environmental Chemistry, Doctor of Philosophy (p. 57)

Agriculture & Environmental Chemistry, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The Graduate Group in Agricultural & Environmental Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in four areas: (1) Environmental & Analytical Chemistry, (2) Biological & Toxicological Chemistry, (3) Food & Wine Chemistry, and (4) Fiber & Polymer Chemistry. Detailed information regarding graduate study may be obtained at Agricultural & Environmental Chemistry (Graduate Group) (<http://agchem.ucdavis.edu/>).

Graduate Advisors

- Agricultural & Resource Economics, Master of Science/Master of Business Administration (p. 58)
- Agricultural & Resource Economics, Doctor of Philosophy (p. 58)
- Managerial Economics, Bachelor of Science (p. 58)
- Managerial Economics, Minor (p. 61)

Agricultural & Resource Economics, Master of Science

College of Agricultural & Environmental Sciences

The program is both an end in itself and a preparation for a Ph.D. degree in Applied Economics. The program includes courses emphasizing applications of economic theory and quantitative methods, along with elective field courses and a thesis option. The M.S. program prepares students for jobs in the academic industry and government. For more information, see M.S. program (<https://aremasters.ucdavis.edu/>).

Agricultural & Resource Economics, Master of Science/Master of Business Administration

College of Agricultural & Environmental Sciences

The program combines a course of study similar to the regular M.S. program with a complementary regime of M.B.A. courses similar to the regular M.B.A. program but with some savings in requirements and some synergy. This dual-degree program prepares students for a range of employment opportunities in business-oriented industries. For more information, see M.S./M.B.A. Joint Program (<https://are.ucdavis.edu/Ph.D./current-students/handbook/msmb-joint-program/>).

Agricultural & Resource Economics, Doctor of Philosophy

College of Agricultural & Environmental Sciences

The Ph.D. program provides intensive training in modern economic theory, econometrics, and mathematical programming, with elective fields such as natural resource and environmental economics, development economics, agricultural economics, and econometrics. Complementary fields in other areas of economics and management are also available. It is typically a four- or five-year course of study that prepares graduates for jobs in academia, government, near-government organizations, and the private sector.

Managerial Economics, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

The Managerial Economics major at UC Davis is a disciplinary program combining strong preparation in microeconomic theory and quantitative methods. It prepares students for the analysis of management and policy issues in business, finance, marketing, production, agriculture, food distribution, natural resources, the environment, resource allocation, and international trade and development. Students in the Managerial Economics program develop valuable skills and strengths that lead to careers in business and government. Students specialize in one or more emphases selected from the following:

- *Business Economics* focuses on the economic aspects of managerial decision-making essential for solving problems in business, management, marketing, and finance.
- *International Business Economics* explores the economic drivers and policy challenges in the major emerging markets and focuses on how these markets are impacting the world economy.
- *Environmental & Resource Economics* concentrates on issues related to the use of resources and environmental quality.
- *Agribusiness Economics* focuses on the economic and policy aspects of the production and marketing of foods and fibers.

Major Advisor

Contact Managerial Economics Student Services at manecon@primal.ucdavis.edu (<https://catalog.ucdavis.edu/>

[departments-programs-degrees/agricultural-resource-economics/managerial-economics-bs/Example_-_Catalog_Annual_Timeline_Leapfrog_2021.pdf](https://catalog.ucdavis.edu/departments-programs-degrees/agricultural-resource-economics/managerial-economics-bs/Example_-_Catalog_Annual_Timeline_Leapfrog_2021.pdf)) or 530-754-9536.

Internships & Career Alternatives

Internships for students in Managerial Economics provide additional career experience, information, and preparation in a variety of business enterprises and governmental agencies. For more information, see Internship & Career Center (<http://icc.ucdavis.edu/>). Managerial Economics majors have established careers in every area of business and industry, including marketing, analysis, consulting, financial services, accounting, entrepreneurship, real estate and government. Many graduates have entered advanced degree programs in business management, accounting, finance, agricultural and resource economics, economics, public policy, and law.

Study Abroad

The Agricultural & Resource Economics department encourages students to complement their Managerial Economics degree with a study abroad experience. Students must seek pre-approval from a Managerial Economics staff advisor for major-related courses. A total of two upper-division courses (maximum four units each) may be applied to major requirements. However, core courses (ARE 100A, ARE 100B, ARE 106, ARE 155, and ECN 101) are excluded. Students are expected to complete ARE 100A and STA 103 prior to taking upper-division classes abroad for the major.

Domestic Institutions

Upper-division coursework taken at other four-year institutions for credit in the major must be reviewed by the Managerial Economics Lead Faculty Advisor.

Graduate Study

Students who meet the admission requirements of Graduate Studies and the Department of Agricultural and Resource Economics may pursue studies leading to M.S. and Ph.D. degrees. For information on admission to graduate study and degree requirements, consult the Graduate Program Coordinator in the Department of Agricultural & Resource Economics (p. 57).

Code	Title	Units
Major English Requirements		
The following must be completed with minimum C- (or PASS) grades.		
Communication; choose one:		4
CMN 001	Introduction to Public Speaking	
OR		
CMN 003	Interpersonal Communication Competence	
or CMN 003Y	Interpersonal Communication Competence	
or CMN 003V	Interpersonal Communication Competence	
Business Writing; choose one:		4

or UWP 104AY	Writing in the Professions: Business Writing	
Major English Requirements Subtotal		8
Preparatory Subject Matter		
All preparatory coursework must be completed with minimum C- (or PASS) grades:		

Business Law 4

ARE 018 Business Law

Computer Science; choose one: 3-4

PLS 021 Application of Computers in Technology

or PLS 021V Application of Computers in Technology

ECS 032A Introduction to Programming

Management (Accounting) 8

MGT 011A Elementary Accounting

MGT 011B Elementary Accounting

Economics 8

ECN 001A Principles of Microeconomics

or ECN 001AV Principles of Microeconomics

ECN 001B Principles of Macroeconomics

Mathematics; choose a series: 8-10

The short calculus series, Math 016A, 016B, and 016C is recommended for Managerial Economics majors. Other combinations of calculus classes will be accepted as outlined below.

Choose 016 series:

MAT 016A Short Calculus

& MAT 016B and Short Calculus

& MAT 016C and Short Calculus

OR choose 017 series:

MAT 017A Calculus for Biology & Medicine

& MAT 017B and Calculus for Biology & Medicine

OR choose 021 Series:

MAT 021A Calculus

& MAT 021B and Calculus

OR choose 017A and 016B & 016C:

MAT 017A Calculus for Biology & Medicine

& MAT 016B and Short Calculus

& MAT 016C and Short Calculus

OR choose 021A and 016B & 016C:

MAT 021A Calculus

& MAT 016B and Short Calculus

& MAT 016C and Short Calculus

OR choose 017A and 021B:

MAT 017A Calculus for Biology & Medicine

& MAT 021B and Calculus

OR choose 021A and 017B:

MAT 021A Calculus

& MAT 017B and Calculus for Biology & Medicine

Statistics 8

STA 013 Elementary Statistics

or STA 013Y Elementary Statistics

STA 103 Applied Statistics for Business & Economics

Preparatory Subject Matter Subtotal 39-42**Depth Subject Matter****Core Courses** 20

All core courses must be taken for a letter grade. It is recommended that students complete core courses during their third year.

ARE 100A Intermediate Microeconomics: Theory of Production & Consumption (Must be completed with a minimum grade of C-) ³ARE 100B Intermediate Microeconomics: Imperfect Competition, Markets & Welfare Economics ⁴

ARE 106 Econometric Theory & Applications

ARE 155 Operations Research & Management Science

ECN 101 Intermediate Macro Theory

Restricted Electives; choose at least one of the emphases, below: 32

Business Economics (p. 59)

International Business Economics (p. 60)

Environmental & Resource Economics (p. 60)

Agribusiness Economics (p. 61)

Depth Subject Matter Subtotal 52**Total Units** 99-102¹ May also count for English Composition.² The upper-division composition exam will not satisfy this requirement.³ **Note:** ECN 100A is not accepted.⁴ **Note:** ECN 100B is not accepted.

Exceptions to All Emphases

The following courses do not apply toward any emphasis:

Code	Title	Units
ARE 113	Fundamentals of Marketing Management	4
ARE 135	Agribusiness Marketing Plan Development	2
ARE 142	Personal Finance	3
ARE 147	Resource & Environment Policy Analysis	3
ARE 147M	Resource & Environmental Policy Analysis	2
ECN 102	Analysis of Economic Data	4
ECN 134	Financial Economics	4
ECN 140	Econometrics	4
ECN 151A	Economics of the Labor Market	4
ECN 162	International Economic Relations	4

Completing More Than One Emphasis

Courses may overlap between emphases. Requirements must be fulfilled as outlined in each emphasis with a minimum of 32 units.

Major GPA

Students must attain a major GPA of at least a C average (2.000) in courses taken for depth subject matter (core and restricted electives).

These courses must be taken for a letter grade. All restricted elective courses taken will be calculated as part of the major GPA, including courses with F grades that have not been repeated.

American Studies

College of Letters & Science

Grace Wang, Ph.D., Chair of the Department; July 1, 2019-June 30, 2022

Department Office

1200 Hart Hall; 530-752-6429; American Studies (<http://ams.ucdavis.edu/>); Faculty (<http://ams.ucdavis.edu/faculty/>)

The Department

The Department of American Studies approaches the "American" in our field's name as an important and complicated idea that comes with a range of feelings (from joy to fear to pride to sadness). American Studies explores the cultures of the United States, as well as their transnational

exchanges and impact. In American Studies classes, students let their curiosities guide them through the process of analyzing pieces of American culture, including food, nature, childhood, and more, through the lenses of race, class, gender, and disability. American Studies is a place for students who want to know why things are the way they are and how they could be.

American Studies takes an interdisciplinary approach, answering research questions with tools from history, sociology, anthropology, literary criticism, media studies, and science and technology studies. American Studies majors are good critical thinkers, develop excellent writing and communication skills, and most importantly, “learn how to learn”—that is, they learn to figure out what intellectual tools and specialized knowledge they will need to perform a task or solve a problem.

- American Studies, Bachelor of Arts (p. 62)
- American Studies, Minor (p. 63)

American Studies, Bachelor of Arts

College of Letters & Science

The Major

American Studies majors create an emphasis devoted to the close study of social and cultural issues crucial to the practice of American Studies. Advanced work in at least two other departments or programs allows each student to study areas tailored to their own individual education goals. Sample emphases include Youth Education, Social Justice and Social Movements; Popular Culture; Comparative Racial and Ethnic Studies; Nature, Culture and the Environment; Militarism and Incarceration; Queer and Trans Studies; Disability, Health, and Illness; and Food and Culture. Students have the option of writing a senior thesis or completing a creative capstone project, are encouraged to study abroad or participate in other forms of global education, and are encouraged to explore new career possibilities through internships—all of which can count toward the major units with permission of the advisor.

Career Alternatives

As an interdisciplinary major, American Studies offers students the choice of a variety of subject matter and approaches. This flexibility means that graduates are prepared to move into a broad range of career settings. Our alumni have become lawyers, teachers, social workers, urban planners, software engineers, filmmakers, professors, professional writers and comedians, marketing and communications professionals, librarians, museum curators, community organizers, and non-profit staff and leaders.

Global Education & Study Abroad

Majors are encouraged to study abroad or engage in domestic opportunities off-campus (such as the Washington Program, internships, and many other opportunities.). Major requirements can be fulfilled with up to eight units from study abroad or other domestic off-campus opportunities with permission of the undergraduate advisor.

- Animal Behavior, Master of Science (p. 63)
- Animal Behavior, Doctor of Philosophy (p. 63)

Animal Behavior, Master of Science

College of Biological Sciences

Graduate Study

The Ph.D. program in Animal Behavior is an interdepartmental program focusing on the mechanisms underlying behavior, the evolution of behavior, and the applications of behavior to current problems in conservation biology and animal welfare. The program trains students for teaching and research in a variety of areas, including anthropology, animal science, ecology, entomology, neurobiology, psychology, physiology, veterinary science, wildlife biology, and zoology. Resources available to students, in addition to various departmental facilities, include those of the California National Primate Research Center, Bodega Marine Laboratory, and the UC Natural Reserve System.

The Master of Science degree is offered only en route to the Ph.D.

Graduate Advisor

Consult the Animal Behavior Graduate Group office or website.

Animal Biology, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The Graduate Group in Animal Biology offers programs of study and research leading to M.S. and Ph.D. degrees. The Animal Biology Graduate Group focuses on integrated animal biology. Each student individually tailors his/her program of study to meet individual needs. The Animal Biology Graduate Group is unique in encouraging a multidisciplinary or interdisciplinary approach involving physiology, nutrition, genetics, ecology and/or behavior within the context of organismal animal biology.

Preparation

Applicants should have undergraduate preparation in a field appropriate to the course of study selected, including upper division coursework in most of the following subjects: biochemistry, genetics, nutrition, physiology, and integrative animal biology such as animal management.

Graduate Advisors

R.C. Hovey, J. Larsen, E.A. Maga, M. Pitesky, K. Horback, A. Todgham, K. Horback, F. Lima

- Animal Science, Minor (p. 72)
- Avian Sciences, Minor (p. 73)

Agricultural & Environmental Education, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

The major serves those interested in teaching agricultural and environmental sciences in K-12 classrooms or in nonformal settings such as food production and distribution systems, nature preserves, environmental camps, or other venues. This major prepares graduates to direct programs in the agricultural and environmental sciences as well as provides them with a skill set necessary to work within social science careers related to these fields. This program of study meets state and federal requirements for entry into teacher preparation in agriculture and science, as well as requirements in Career Technical Education (CTE).

The Program

The program is designed to provide students with a broad background in various agricultural and environmental science disciplines, e.g., animal science, environmental science, plant and soil science, agricultural engineering, business management, agro ecology, and horticulture. The program also focuses on the social sciences related to human resource development. The program provides students with practical experiences through fieldwork, school, and non-formal learning sites placements, or placement in sites related to a student's focus of study. Through this major students will have the opportunity to explore and then incorporate agricultural and environmental issues into educational and development settings.

Career Alternatives

The need for scientists, technicians, and educators to assist in domestic and international agricultural development and environmental programs has created a continuing demand for qualified instructors and supervisory personnel. This major also provides general preparation for positions in banking, sales and service, rural recreation, related agricultural and environmental sectors. Students interested in obtaining breadth in both agricultural and environmental sciences will appreciate the scope and flexibility the major provides.

Animal Science & Management, Bachelor of Science

College of Agricultural & Environmental Sciences

Anne Todgham, Ph.D., Chairperson of the Department

The Major Program

The Animal Science & Management major combines a thorough education in the basic biology of domestic animal species with a strong background in agricultural economics. Graduates of this interdisciplinary major will be well positioned to adjust to our rapidly changing world and job market.

The Program

The interdisciplinary program in Animal Science and Management combines a fundamental background in the natural sciences (chemistry, biology, physiology, nutrition, genetics, mathematics, and behavior), with an understanding of economics and humanities. After completing preparatory courses, students focus on both the animal species that interest them (horses, cattle, sheep, companion animals, goats, fish, crustaceans or mollusks, among others) and principles of managerial economics (marketing, finance, business organization, or systems analysis). Students preparing for medical or veterinary school can meet professional entrance requirements with those of this major if they plan ahead.

Career Alternatives

Job opportunities for successful graduates are plentiful and include positions with banking and financial institutions, agribusiness, Peace Corps, and farms of all scales. Most Animal Science and Management graduates are well prepared for professional study (medical, law, veterinary, and graduate business schools) as well as graduate research programs leading to the M.S. or Ph.D. degrees. Advanced degrees open doors to work as extension specialists, farm advisors, and teachers, and prepare students for international service.

Individualized Specialization

Students may, with prior approval of their advisor and the Master Advisor, design their own individualized specialization within the major. The specialization will consist of four to six courses with one of the courses being ANS 148. The other courses will include an introduction, care and management, and processing and/or marketing aspects of the animal of interest.

Animal Science, Bachelor of Science

College of Agricultural & Environmental Sciences

Anne Todgham, Ph.D., Chairperson of the Department

The Major Program

The Animal Science major is devoted to the sciences central to understanding biological function of domestic and captive animals, their care, management, and utilization by people for food, fiber, companionship, work, and recreation. Advances in science and technology, and an ever-growing human population, have increased the complexity of issues surrounding the care and management of animals. Specializations within the major allow students to develop a scientific appreciation of animals and their relationship to their environment. Graduates in Animal Science are able to advance the science and technology of animal care and management in an objective and effective manner for the betterment of animals and society.

The Program

The curriculum provides depth in the biological and physiological sciences and allows students to specialize within the broad field of applied animal science. Study begins with introductory courses in animal science, biology, chemistry, mathematics, and statistics. Students undertake advanced courses in animal behavior, biochemistry, genetics, nutrition, and physiology and the integration of these sciences to animal growth, production, and performance. Students complete the curriculum by choosing a specialization in either an animal science discipline (behavior, biochemistry, genetics, nutrition, or physiology) or in the sciences particular to a class of animals (aquatic, avian, companion and captive, equine, laboratory, livestock and dairy, or poultry).

Career Alternatives

A wide range of career opportunities are available to graduates. The primary goal of the major is to prepare students for graduate study leading to the M.S. and Ph.D. degrees; for continued study in a professional school such as veterinary medicine, human medicine, or dentistry; for careers in research, agricultural production, farm and ranch management, or positions in business, sales, financial services, health care, agricultural extension, consulting services, teaching, journalism, or laboratory technology.

Graduate Study

The Animal Biology Graduate Group offers a program of study and research leading to M.S. or Ph.D. degrees in Animal Biology. See Animal Biology (Graduate Group) (p. 63); see also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Animal Science, Minor

Anne Todgham, Ph.D., Chairperson of the Department

The Program

The Department of Animal Science offers five minor programs open to students majoring in other disciplines who wish to complement their study programs with a minor in Animal Science. Some courses have required prerequisites not included as part of the minor, and students should plan accordingly.

Advising for the minor and course offerings is located in the Animal Science Advising Center (<https://animalscience.ucdavis.edu/academics/undergrad/advising/>) in 1202 Meyer Hall; 530-754-7915.

Minor Advisor

Choose ANS 015 & 042 or 041 & 041L or 021 & 041:		4-7
ANS 015 & ANS 042	Introductory Horse Husbandry and Introductory Companion Animal Biology	
ANS 041 & 041L	Domestic Animal Production and Domestic Animal Production Laboratory	
ANS 021 & ANS 041	Livestock & Dairy Cattle Judging and Domestic Animal Production	
<i>Animal Genetics</i>		9
ANG 107	Genetics & Animal Breeding	
ANG 111	Molecular Biology Laboratory Techniques	
<i>Additional Upper Division Courses</i>		
Choose additional units to complete the 20-unit total: ¹		7-8
Upper Division Animal Science (ANS) courses.		
Animal Genetics (ANG) courses.		
AVS 103	Avian Development & Genomics	
NPB 121	Physiology of Reproduction	
NPB 121L	Physiology of Reproduction Laboratory	
NUT 115	Animal Nutrition	
NUT 122	Ruminant Nutrition & Digestive Physiology	
NUT 123	Comparative Animal Nutrition	
NUT 123L	Comparative Animal Nutrition Laboratory	
Total Units		20-24

¹ Variable unit courses (092, 099, 192, 197T, 198, 199) are not allowed for the completion of this requirement.

Animal Science—Aquaculture

Code	Title	Units
ANS 018	Introductory Aquaculture	4
ANS 118	Fish Production	4
ANS 119	Invertebrate Aquaculture	4
Additional upper division courses.		8
Choose additional units to complete the 20-unit total: ¹		
Upper division Animal Science (ANS) courses.		
Animal Genetics (ANG) courses.		
ABT 161	Water Quality Management for Aquaculture	
NUT 124	Nutrition & Feeding of Finfishes	
WFC 121	Physiology of Fishes	
Total Units		20

¹ Variable unit courses (092, 099, 192, 197T, 198, 199) are not allowed for the completion of this requirement.

Animal Science—Dairy/Livestock

Code	Title	Units
Choose ANS 041 & 041L or 021:		2-4
ANS 041 & 041L	Domestic Animal Production and Domestic Animal Production Laboratory	
ANS 021	Livestock & Dairy Cattle Judging	
ANS 104	Principles & Applications of Domestic Animal Behavior	4
Additional upper division courses.		12
Choose 4 or 8 units:		4-8
ANS 143	Pig & Poultry Care & Management	
ANS 144	Beef Cattle & Sheep Production	
ANS 146	Dairy Cattle Production	
Choose additional units to complete the 20 unit total: ¹		
Upper division Animal Science (ANS) courses.		
Animal Genetics (ANG) courses.		
NPB 121	Physiology of Reproduction	
NPB 121L	Physiology of Reproduction Laboratory	
NUT 115	Animal Nutrition	
NUT 122	Ruminant Nutrition & Digestive Physiology	
NUT 123	Comparative Animal Nutrition	
NUT 123L	Comparative Animal Nutrition Laboratory	
Total Units		22-28

¹ Variable unit courses (092, 099, 192, 197T, 198, 199) are not allowed for the completion of this requirement.

Animal Science—Equine

Code	Title	Units
ANS 015	Introductory Horse Husbandry	3
ANS 103 or ANS 104	Animal Welfare Principles & Applications of Domestic Animal Behavior	4
ANS 115	Advanced Horse Production	4
ANS 141	Equine Enterprise Management	4
ANS 125 or ANS 126	Equine Exercise Physiology Equine Nutrition	3
Choose additional units to complete the 20 unit total: ¹		2-3
Upper division Animal Science (ANS) courses.		
Animal Genetics (ANG) courses.		
NPB 121	Physiology of Reproduction	
NPB 121L	Physiology of Reproduction Laboratory	
NUT 115	Animal Nutrition	
NUT 122	Ruminant Nutrition & Digestive Physiology	
NUT 123	Comparative Animal Nutrition	
NUT 123L	Comparative Animal Nutrition Laboratory	
Total Units		20-21

¹ Variable unit courses (092, 099, 192, 197T, 198, 199) are not allowed for the completion of this requirement.

Avian Sciences, Minor

College of Agricultural & Environmental Sciences

Anne Todgham, Ph.D., Chairperson of the Department

The Program

The flexibility of the program and the close personal interaction between students, faculty, and specialists in the field give students a large role in selecting and designing their own course work. Due to the infrequency of course offerings, students must meet with a Staff Advisor in the Animal Science Advising Center to pursue this minor.

Internships & Career Alternatives

Independent study, undergraduate research, and internships are emphasized in the Avian Sciences program. Birds for laboratory or special study are housed within the main building as well as at the research farm and the experimental aviary.

Advising for the minor and course offerings is located in the Animal Science Advising Center (<https://animalscience.ucdavis.edu/academics/undergrad/advising/>) in 1202 Meyer Hall; 530-754-7915.

Minor Advisor

E.J. DePeters, Ph.D.

Code	Title	Units
Choose one:		2-3
AVS 011	Introduction to Poultry Science	
AVS 013	Birds, Humans & the Environment	
AVS 014L	Management of Captive Birds	
AVS 015L	Captive Raptor Management	
Choose remaining units from:		15-16
AVS 100	Avian Biology	
AVS 103	Avian Development & Genomics	
AVS 115	Raptor Biology	
AVS 121	Avian Reproduction	
AVS 123	Management of Birds

- Anthropology, Doctor of Philosophy (p. 83)

Anthropology, Bachelor of Arts

College of Letters & Science

The A.B. Major

Anthropology is the systematic study of humans. The student of anthropology learns about human biology, ecology, and social life—past and present—and gains a broad understanding of humans and societies. It is a diverse field, and the courses, faculty, and degree programs at UC Davis are subdivided into two wings—*Evolutionary* and *Sociocultural*.

Evolutionary A.B.

Evolutionary anthropologists are united by their common application of science and evolutionary theory to understand the behavior, ecology, history, and evolution of humans & non-human primates, as individuals and as societies. These topics may be approached through archaeology, human behavioral ecology, paleoanthropology, primatology, genetics, and conservation biology. *Archaeology* is the study of history or prehistory by analysis of a people's artifacts, or their material culture, with the goal of reconstructing culture history and human behavior. *Human behavioral ecology* is the study of how variation in ecology and social organization can help us understand variation in human behavior. *Paleoanthropology* is the study of human evolution through the fossil and archaeological records, drawing on relevant studies in biological anthropology, Paleolithic archaeology, genetics, and geology. *Primatology* is the study of the behavior, ecology, and morphology of primates to address questions about the evolution and function of behavioral and morphological patterns in nonhuman primates and to test models of the origins of human morphology and behavior. *Genetic anthropology* uses DNA to address anthropological questions about population histories, migrations, mixing, and adaptations to local contexts. *Conservation biology* explores the causes of loss of biological diversity—in this department, it focuses on threatened non-human primates and the conservation of natural resources by our rapidly growing human population. A Bachelor of Arts degree provides broad training that includes all subfields of Anthropology.

Sociocultural A.B.

Sociocultural anthropologists study the varied ways in which people around the world organize their lives and interpret the circumstances in which they operate. Their main method is extended field research, which combines attention to global issues with the close study of human

relations and culture. Among the themes addressed in the department's undergraduate courses are globalization and transnationalism; human ecology and environmental change; cultures of healing, health & medicine, the anthropology of law & global legal processes, the study of resistance, rebellion, & social control, the global spread of media & technology; migration, multiculturalism and urban life; colonialism and neocolonialism development and post-development; race, class & gender; politics & the political; cultures of everyday life; language use & discourse; and self, identity and family. Sociocultural anthropology thus offers a rich set of resources for understanding and engaging pressing issues in a globalizing world characterized by new forms of international culture and community as well as by increasing material inequality and political volatility.

General A.B.

The General emphasis in the Bachelor of Arts in Anthropology provides an interdisciplinary approach that integrates elements of both evolutionary and sociocultural anthropology into one curriculum. This emphasis allows students to take courses covering the spectrum of anthropological subdisciplines. This emphasis will develop students' abilities to apply both evolutionary and cultural concepts within anthropology as well as providing a solid theoretical foundation for both approaches. Based on the broad anthropological education covered in this emphasis, students will gain transferable skills to be better equipped for a variety of careers; e.g., international development, cultural resource management, primate conservation, etc.

The Program

The Bachelor of Arts program is divided into three emphasis areas: the *Evolutionary*, *Sociocultural*, and *General* emphases. The Evolutionary and Sociocultural emphases parallel the two wings described above while the General emphasis allows students to select courses from both wings. Students interested in the study of recent and contemporary human societies should follow the Sociocultural emphasis. To obtain an A.B. degree in sociocultural anthropology, each student is required to complete courses that provide: (1) foundational skills, (2) language & cultural skills, (3) comprehensive skills, and (4) specialized skills. Students interested in the study of archaeology, primate studies, or human biology, ecology or origins should follow the Evolutionary Track. The A.B. degree offered by the Evolutionary emphasis provides general training in anthropology from an evolutionary perspective. The A.B. degree offered by the General emphasis provides interdisciplinary training in anthropology from both an evolutionary and sociocultural perspective. The Evolutionary Track also offers a B.S. degree that requires lower division coursework in math and science and upper division coursework in biological anthropology and closely related disciplines. Students planning on pursuing jobs in medical and other health-related fields after graduation may be especially interested in the B.S. degree.

Students in both tracks are encouraged to gain practical experience through courses taken while studying abroad (under the administration of the Global Learning Hub (<https://globallearning.ucdavis.edu/>)) and through undergraduate research or internships performed for credit (under ANT 192, ANT 198, or ANT 199 units provided by the advising office). Students showing exceptional ability are welcome to seek permission from instructors to participate in graduate seminars offered by the department.

Career Opportunities

A Bachelor of Arts degree in Anthropology is suited for students seeking a solid liberal arts education. With its broad goal to facilitate understanding across lines of cultural difference, sociocultural

anthropology prepares students for lives that are influenced by increasingly pervasive cultural exchange, as well as cultural conflict, around the world. The program serves as excellent preparation for careers in which inter-cultural skills are increasingly needed, including social & environmental activism, business, diplomacy & social administration, journalism, law, education & international relations. Students who focus on evolutionary processes will be well prepared to enter fields such as medical or health anthropology, museum studies, cultural resource management, and wildlife conservation. A degree in anthropology with appropriate courses in education is good preparation for high school teaching in social, biological, and physical sciences. It also provides the foundation for advanced study leading to careers in college-level teaching and research.

Major Advisor

Connect with our advising office (<https://anthropology.ucdavis.edu/undergraduate/advising/advising-office/>).

Honors Program

Candidates for high or highest honors in Anthropology must write a senior thesis under the direction of a faculty member. The thesis project will have a minimum duration of two quarters. Honors candidates must take at least 6 units of Anthropology ANT 194H. Only students who, at the end of their junior year (135 units), have attained a cumulative grade point average of 3.500 in Anthropology courses will be eligible for the honors program. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation. To learn more about participating in the ANT honors program, see Honors Program (<https://anthropology.ucdavis.edu/undergraduate/opportunities/honors-program/>).

Teaching Credential Subject Representative

See the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

Graduate Study

The Department offers a program of study leading to the M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department website and at Graduate Studies (<https://grad.ucdavis.edu/>).

A.B. Anthropology—Evolutionary Emphasis

Code	Title	Units
Preparatory Subject Matter		
ANT 001	Human Evolutionary Biology	4
ANT 002	Cultural Anthropology	5
ANT 003	Introduction to Archaeology	4
Choose one:		4-5
ANT 015	From Birth to Death: The Evolution of the Human Life Cycle	
ANT 023	Introduction to World Prehistory	
ANT 024	Ancient Crops & People	
ANT 054	Introduction to Primatology	
Choose one:		4-5

Choose 28 additional units from any upper division Evolutionary track ANT courses:		Depth Subject Matter Subtotal	42-46
ANT/ESP 101	Ecology, Nature, & Society	Total Units	63-69
ANT 103	Indigenous Peoples & Natural Resource Conservation		
ANT 122A	Economic Anthropology		
ANT 128A	Kinship & Social Organization: From Clans to Countries		
ANT 141C	People of the Arctic: Contemporary & Historic Cultures of the Circumpolar Region		

¹ Must be taken concurrently with ANT 154CL.

² Must be taken concurrently with ANT 154C.

A.B. Anthropology—Sociocultural Emphasis

Code	Title	Units
Preparatory Subject Matter		
ANT 002	Cultural Anthropology	5
Choose two:		8
ANT 001	Human Evolutionary Biology	
ANT 003	Introduction to Archaeology	

ANT 004	Introduction to Anthropological Linguistics	
Choose one of the following two options:		0-10
(1) Complete the equivalent to five quarters of course work in foreign language or provide proof of proficiency.		
(2) Choose two lower division sociocultural courses:		
ANT 020	Comparative Cultures	
ANT 030	Sexualities	
ANT 032	Drugs, Science & Culture	
ANT 034	Cultures of Consumerism	
ANT 036	Star Trek as Social Theory	
Preparatory Subject Matter Subtotal		13-23
Depth Subject Matter		
ANT 100	Theory in Social-Cultural Anthropology	4
Choose two upper division area-focus sociocultural track courses:		8
ANT 133	Anthropology of Ocean Worlds	
ANT 140A	Cultures & Societies of West & Central Africa	
ANT 140B	Cultures & Societies of East & South Africa	
ANT 141C	People of the Arctic: Contemporary & Historic Cultures of the Circumpolar Region	
ANT 142	Peoples of the Middle East	
ANT 143A	Ethnology of Southeast Asia	
ANT 144	Contemporary Societies & Cultures of Latin America	
ANT 145	Performance, Embodiment, & Space in South Asia	
ANT 146N	Topics in the Anthropology of Europe	
ANT 147/ MSA 131B/ CTS 146B	Modern South Asia Cinema	
ANT 148A	Culture & Political Economy in Contemporary China	
Choose one of the following two options; see list below identifying upper division sociocultural courses; see list above identifying evolutionary track courses:		32
(1) Eight additional upper division anthropology courses ¹		
(2) Eight additional upper division courses that may combine six sociocultural track courses and either 8 units of Study Abroad credit or two related courses in a single academic discipline; including but not limited to: AAS, AMS, ART, AHI, AAS, CHI, CMN, CRD, DES, ECN, EAS, HIS, LIN, MSA, MUS, NAS, NAC, PHI, POL, PSC, RST, STS, SOC, TXC, WMS.		
<i>Sociocultural Track Upper Division Courses</i>		
Note: Sociocultural track courses at the upper division level are those with numbers from 100 to 148A, with the exception of 101, 103, and 128A. Area-focus sociocultural track courses are those that refer in their titles to one or more peoples or regions of the world.		
ANT 100	Theory in Social-Cultural Anthropology	
ANT 104N	Cultural Politics of the Environment	
ANT 107	Law, Power, Violence	
ANT 109	Visualization in Science: A Critical Introduction

Anthropology, Bachelor of Science

College of Letters & Science

The B.S. Major

Anthropology is the systematic study of humans. The student of anthropology learns about human biology, ecology, and social life—past & present—and gains a broad understanding of humans and societies. *The Bachelor of Science degree in Anthropology* is interdisciplinary in nature since it requires lower division coursework in math & science and upper division coursework in biological anthropology and closely related disciplines.

The Program

Evolutionary anthropologists are united by their common application of science and evolutionary theory to understand the behavior, ecology, history, and evolution of humans & non-human primates, as individuals and as societies. These topics may be approached through archaeology, human behavioral ecology, paleoanthropology, primatology, genetics, and conservation biology. *Archaeology* is the study of history or prehistory by analysis of a people's artifacts, or their material culture, with the goal of reconstructing culture history and human behavior. *Human behavioral ecology* is the study of how variation in ecology and social organization can help us understand variation in human behavior. *Paleoanthropology* is the study of human evolution through the fossil and archaeological records, drawing on relevant studies in biological anthropology, Paleolithic archaeology, genetics, and geology. *Primatology* is the study of behavior, ecology, and morphology of primates to address questions about the evolution and function of behavioral & morphological patterns in nonhuman primates and to test models of the origins of human morphology and behavior. *Genetic anthropology* uses DNA to address anthropological questions about population histories, migrations, mixing, and adaptations to local contexts. *Conservation biology* explores the causes of loss of biological diversity—in this department, it focuses on threatened non-human primates and the conservation of natural resources by a rapidly growing population. A Bachelor of Science degree, in addition to core evolutionary anthropology courses, includes the introductory sequences of biology, chemistry, organic chemistry, and calculus, as well as genetics and ecology.

Students are encouraged to gain practical experience through undergraduate research or internships performed for credit (under ANT 192, ANT 198, or ANT 199 units provided by the advising office). Students showing exceptional ability are welcome to seek permission from instructors to participate in graduate seminars offered by the department.

Career Opportunities

A Bachelor of Science degree in Anthropology combines a solid liberal arts education with training in the life and physical sciences. Through its interdisciplinary nature, a Bachelor of Science degree in Anthropology provides the educational background for careers in the biological sciences and a variety of health professions including pre-medical, pre-dental, and pre-veterinary, fields which increasingly need professionals with training in the social and behavioral sciences. In addition, students will be well prepared to enter fields such as medical or health anthropology, forensic sciences, museum studies, cultural resource management, and wildlife conservation. A Bachelor of Science degree in Anthropology with appropriate courses in education is good preparation for high school teaching in social, biological, and physical

sciences. It also provides the foundation for advanced study leading to careers in college-level teaching and research.

Major Advisor

Connect with our advising office (<https://anthropology.ucdavis.edu/undergraduate/advising/advising-office/>).

Honors Program

Candidates for high or highest honors in Anthropology must write a senior thesis under the direction of a faculty member. The thesis project will have a minimum duration of two quarters. Honors candidates must take at least 6 units of Anthropology ANT 194H. Only students who, at the end of their junior year (135 units), have attained a cumulative grade point average of 3.500 in Anthropology courses will be eligible for the honors program. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

Teaching Credential Subject Representative

See the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

Graduate Study

The Department offers a program of study leading to the M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies (<https://grad.ucdavis.edu/>).

Total Units 20

Anthropology, Master of Arts

College of Letters & Science

Graduate Study

The Department offers a program of study leading to M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies (<https://grad.ucdavis.edu/>).

Anthropology, Doctor of Philosophy

College of Letters & Science

Graduate Study

The Department offers a program of study leading to M.A. and Ph.D. degrees in Anthropology. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies (<https://grad.ucdavis.edu/>).

Applied Mathematics (Graduate Group)

College of Letters & Science

Group Office

1130 Mathematical Sciences Bldg.; 530-754-0823; gradadvisor (gradadvisor@math.ucdavis.edu)@math.ucdavis.edu (studentservices@math.ucdavis.edu); Applied Mathematics Graduate Group (<http://appliedmath.ucdavis.edu/>)

Faculty

The Group includes approximately 90 faculty members, of whom about one-third are in the Department of Mathematics. Membership comprises chemists, biologists, physicists, geologists, statisticians, computer scientists, and engineers. Research interests include biology, atmospheric sciences, mechanics, solid and fluid dynamics, optimization and control, theoretical chemistry, computer and engineering sciences, mathematical physics, signal and image processing, harmonic analysis, numerical analysis and nonlinear partial differential equations. A complete list of faculty and their research areas are available at Applied Mathematics People (<http://appliedmath.ucdavis.edu/people/>).

- Applied Mathematics, Master of Science (p. 84)
- Applied Mathematics, Doctor of Philosophy (p. 84)

Applied Mathematics, Master of Science

College of Letters & Science

Graduate Study

Students prepare for careers where mathematics is applied to problems in the physical and life sciences, engineering, and management. The degree requirements consist of rigorous training in applied mathematics, including course work and a research dissertation under the direction of a member of the Graduate Group in Applied Mathematics. The M.S. degree provides preparation for further study in applied mathematics or an application area, or for a career in industry or public service. The Ph.D. degree provides preparation for a career in research and/or teaching, or in industrial or national research laboratories. For further information, please contact gradadvisor (gradadvisor@math.ucdavis.edu)@math.ucdavis.edu (studentservices@math.ucdavis.edu) or 530-754-0823.

New applicants are admitted to the fall quarter only.

Preparation

The program admits qualified students with a bachelor's degree in mathematics, physics, chemistry, engineering, economics, the life sciences and related fields. General and Subject GRE scores are required, and applicants should display evidence of strong quantitative skills. Undergraduate courses should include calculus (including vector calculus), linear algebra, and ordinary differential equations. Advanced calculus (introduction to real analysis) is strongly recommended. Additional background in probability, partial differential equations, and/or numerical analysis is a plus. The ability to program in a high-level computer programming language (e.g., C, MATLAB, Python, R, etc.) is assumed.

Graduate Advisor

Contact the Student Services Office at 530-754-0823 or gradadvisor@math.ucdavis.edu.

Courses

For a list of the courses in applied mathematics and mathematics, see Mathematics (p. 291).

Art History, Bachelor of Arts

College of Letters & Science

The Major Program

Art History studies the changing visual expression of values, beliefs and experiences across diverse cultures and over time. It provides training in historical, social and aesthetic understanding, critical thinking, scholarly research, and lucid, thoughtful analysis and writing. More than any other discipline art history sharpens its students' visual acuity and deepens their visual literacy. In so doing, it prepares them to face the increasingly complex visual world we find ourselves in today.

The Program

The major begins with a series of courses that surveys major landmarks in the history of visual culture, art and architecture in Asia, Europe, and the United States. More advanced lecture courses and seminars focus on particularly important periods and issues. Students are encouraged to personalize their training with internships, independent study, and focused upper division study. Top students considering graduate study are encouraged to engage in more advance study by pursuing a senior honors thesis.

Career Options

A major in Art History develops critical thinking and the integration of research, interpretation and understanding. It provides an excellent liberal arts basis for professions as far ranging as advertising, law, medicine, politics and business. The major prepares students for advanced study in Art History, Architecture, Museum Studies and Cultural Studies. It also serves as the foundation for careers in teaching, arts, administration, museums, galleries, historic preservation, art libraries, publishing, journalism, advertising, art conservation, and art investment. As the world becomes increasingly flooded with images, the critical visual literacy gained through the study of art history becomes more important for a wide variety of careers.

Honors Program

The Honors Program in Art History is encouraged for Art History majors who are considering attending graduate school. To be eligible for the program, a student must have a grade point average of 3.600 in the major or consent of both the prospective thesis advisor, who must be a member of the Art History faculty and the major advisor. In addition to meeting the standard major requirements, the honors student completes one additional undergraduate seminar (course 100 or 190A-L), researches and writes an honors thesis (courses 194HA and 194HB), supervised by the prospective thesis advisor. Students participating in this Program are candidates for Departmental recommendation for graduation with High or Highest Honors. See Academic Information, Letters & Science honors section (<https://catalog.ucdavis.edu/academic-information/>), and consult Art History (<http://arthistory.ucdavis.edu/>).

Teaching Credential Subject Representative

Department Chairperson; see the Teacher Education program (<https://education.ucdavis.edu/teaching-credentialma/>).

Graduate Study

The Program in Art History offers studies leading to the Master of Arts degree in History of Art as preparation for further graduate study or professional work. For more information, contact the Graduate Staff Advisor at 530-752-8710, or see Art History (<http://arthistory.ucdavis.edu/>).

AHI 188B	Architecture of the United States	

Total Units **24**

Fulfilling the undergraduate seminar requirement (AHI 192) through an architectural topic is highly recommended.

Emphasis in Museum Studies

The Emphasis in Museum Studies consists of five upper-division courses (20 units) incorporated into the 60-unit major in Art History. Two core courses for the Emphasis in Museum Studies (8 units) take the place of upper-division electives in the major. Three additional electives (12 units) are chosen to complete the Emphasis. Beyond these requirements, one or more internships (AHI 192) are highly recommended.

Art History, Minor

College of Letters & Science

Art History studies the changing visual expression of values, beliefs and experiences across diverse cultures and over time. It provides training in historical, social and aesthetic understanding, critical thinking, scholarly research, and lucid, thoughtful analysis and writing. More than any other discipline art history sharpens its students' visual acuity and deepens their visual literacy. In so doing, it prepares them to face the increasingly complex visual world we find ourselves in today.

Art History, Master of Arts

College of Letters & Science

The Program in Art History offers studies leading to the Master of Arts degree in History of Art as preparation for further graduate study or professional work. For more information, contact the Graduate Staff Advisor at 530-752-8710, or see Art History (<http://arthistory.ucdavis.edu>).

Art Studio, Bachelor of Arts

College of Letters & Science

The Major Program

The Art Studio major provides the studio experience necessary for a broad understanding of the practice and interpretation of the visual arts.

The Program

The Art Studio program is designed to deliver a broad range of hands-on studio practices to the art major. Areas of focus include painting, sculpture, drawing, photography, ceramics, printmaking, and time-based media. Course choices/sequences are determined by the student according to major distribution requirements. Students are encouraged to explore a broad range of disciplines and are expected to take advantage of beginning classes which provide a critical introduction to the research possibilities within the major, across disciplines. In addition to studio classes, students are encouraged to participate in a distinguished visiting artist lecture series, professional practice seminars, student exhibitions/competitions, internships, and benefit from exposure to cultural events and exhibitions in Davis, Sacramento, and the Greater Bay Area.

Major Advisor

Information on the current Academic Advisor can be obtained by contacting the Art Department main office at 530-752-0105 or Arts Group

Advising Center (<http://arts.ucdavis.edu/arts-group-undergraduate-advising/>).

Portfolio

While portfolios are not required for admission to the art major, students at all levels are expected to maintain current portfolios of completed work in order to qualify and compete for the numerous internships, fellowships, grants, awards, and exhibitions the program has to offer, as well as to better prepare for the rigors of graduate school and/or an independent studio practice.

Career Options

Graduates of the Art Studio Program attend prestigious post-baccalaureate and graduate programs in studio art. Alumni often go on to develop professional studio practices. Commitment to the development of one's studio work leads to exhibition opportunities as well as accomplishments in the realm of fellowships, commissions, collaborations, and a host of other professional projects and opportunities. For the student wishing to explore additional arts-related trajectories, in the private or public sector, a studio arts education provides a strong foundation for careers and/or graduate work in K-12 art education, art therapy, arts administration, curatorial studies, set design, architecture, culinary arts, design, film, animation, art criticism/journalism among others.

Art Studio, Minor

College of Letters & Science

The Minor Program

The Art Studio program delivers a broad range of hands-on studio practices to the art minor. Areas of focus include painting, sculpture, drawing, photography, ceramics, printmaking, and time-based media. Course choices/sequences are determined by the student according to minor requirements. Students are encouraged to explore different areas of focus and are expected to take advantage of beginning classes which provide a critical introduction to the research possibilities within studio art. In addition to studio classes, students are encouraged to participate in the department's distinguished visiting artist lecture series, professional practice seminars, student exhibitions/competitions, internships, and benefit from exposure to cultural events and exhibitions in Davis, Sacramento, and the Greater Bay Area.

Prerequisite courses must be taken prior to enrollment in upper division courses. Independent study courses are not applicable.

Art Studio, Master of Fine Arts

College of Letters & Science

Graduate Study

The Department of Art offers programs of study and research leading to the M.F.A. degree in the practice of art. For more information contact the Graduate Staff Advisor at 530-752-8710 or see Art Studio Graduate Program (<http://arts.ucdavis.edu/art-studio-graduate-program/>).

Museum Studies, Minor

College of Letters & Science

The Minor in Museum Studies combines study of the history of collecting and museum theory with practical training in curatorship, interpretive writing, and exhibition development. The minor introduces students to the historical development and current practices of all types of museums, including museums of natural history, science, anthropology, art, and heritage sites. Students develop an understanding of issues shared by all types of museums: organization and interpretation of exhibitions, audience engagement, the ethics of display and conservation, the political position of museums in their communities and the role of museums as shapers of culture. Students gain practical skills related to careers in museums, galleries, and other cultural institutions. Students take three electives from a list of twelve choices. The electives divide into roughly five areas representing different aspects of museum work, (1) practices of contemporary museums, (2) issues of cultural property and heritage, (3) public relations and marketing, (4) writing skills relevant to museum work, (5) skills related to exhibition planning, design, and installation.

Asian American Studies

College of Letters & Science

Susette Min, Ph.D., Interim Chairperson of the Department; July 1, 2021-June 30, 2022

Department Office

3102 Hart Hall; 530-752-2069; Asian American Studies (<https://asa.ucdavis.edu/>); Facebook (<https://www.facebook.com/UCDavisAsianAmericanStudies/>); Faculty (<https://asa.ucdavis.edu/faculty/>)

Department Background

Born out of social and global justice movements of the late 1960s, the Department of Asian American Studies at UC Davis is one of the very first programs in Asian American studies established nationally. The Department provides unique learning opportunities about the historical and contemporary experiences of Asian Americans in local and global contexts. We seek to develop and advance knowledge about the diversity of Asian American populations as immigrants and refugees, as ethnic minorities, and as a racial group in U.S. society. In examining the complexity of Asian American experiences, we foster critical thinking and comprehensive analyses of formations of race, ethnicity, class, gender, religion, and sexuality that are manifested not only in the United States but also in other regions and nations across the globe.

A distinct feature of our department is our emphasis on applied knowledge. Our curriculum, for instance, encourages students to work in close collaboration with community groups that advance social justice and transformative social change. Many of our faculty are community-engaged scholars who work closely with Asian American and Pacific Islander (API) organizations and help to facilitate linkages between students and the broader API community. Moreover, the faculty and staff in our department are consistently recognized for their strong mentorship and close engagement with students' academic and personal growth. Our faculty and courses also focus on diverse Asian American populations as we seek to be inclusive of underrepresented Asian American groups and highlight cutting-edge research. Finally, our department has close relationships with its alumni who also help to support students and the overall curriculum.

The Department houses the George Kagiwada Library and Digital Media Lab. This unique library holds a vast collection of scholarly texts in Asian American studies as well as an archive of Asian American community newspapers and other primary source publications not found elsewhere. The Digital Media Lab helps to support course-based as well as individual students' independent projects such as podcasts, videos and the like.

Asian American Studies also offers research opportunities in Filipinx and Vietnamese Studies through the Bulosan Center for Filipinx Studies and the New Vietnam Studies Initiative (NVSJ).

- Asian American Studies, Minor (p. 91)
- Social, Ethnic & Gender Relations, Minor (p. 92)

Asian American Studies, Bachelor of Arts

College of Letters & Science

The Major Program

Offering both an undergraduate major and minor, our curriculum emphasizes multidisciplinary, comparative, transnational, and intersectional perspectives; original empirically-based scholarship; cultural production and analyses; and community engagement.

In consultation with our faculty and staff advisors, students in the major have the exciting opportunity to select an emphasis or specialty organized around our faculty's core areas of intellectual focus including—Immigration, Labor, and Transnationalism; Visual, Literary, and Cultural Studies; and Public/Community-Engaged Scholarship. The department is also developing an emphasis on Health through its emerging partnerships. Each emphasis incorporates a diverse array of thematic, theoretical, disciplinary, and methodological approaches—as well as a focus on a broad range of Asian American communities—allowing students to choose a course of study that aligns with their particular academic and career interests.

In order to enhance students' intellectual development and postgraduate preparation, our curriculum also requires that all majors complete an off-campus community internship. This requirement seeks to ensure students experience a deeper and more comprehensive liberal arts education that connects classroom education to real life contexts that foster the development of new forms of knowledge and practical skills. The Department also offers an optional two-quarter thesis writing seminar for students in the major and minor that progresses through each stage of designing and completing an individualized undergraduate thesis project based on original research, which helps prepare students interested in applying for graduate school.

Career Alternatives

With the multidisciplinary emphasis of our program, an Asian American studies major provides excellent preparation for a diverse range of careers. Our alumni have established successful careers in the arts, community-based and non-profit organizations, government and politics, human rights, journalism, international relations, law, K-12 education, public health, public policy, social work, and student affairs in higher education. Others have gone on to pursue postgraduate degrees in a wide variety of fields that include education, ethnic studies, fine arts, feminist & queer studies, history, law, literature, political science, public policy, sociology, and social work. Our department has fostered close

relationships with our alumni who are committed to supporting our majors with their career plans.

General Education Requirements

A large number of the courses offered by the Department fulfill a wide range of general education topical breadth and core literacy requirements that include:

Topical Breadth

- Arts & Humanities
- Social Sciences

Core Literacy

Literacy with Words & Images

- Writing Experience
- Oral Skills
- Visual Literacy

Civic & Cultural Literacy

- American Cultures, Governance, & History
- Domestic Diversity
- World Cultures

Major Advisor

Joe Nguyen (jovnguyen@ucdavis.edu), Student Academic Advisor (SAA); 530-752-8617.

Substitutions for disciplinary track courses will be considered by the Department Chair on a case-by-case basis. Likewise, any substitutions of Major/Minor criteria will be considered by the Department Chair.

Direct questions pertaining to the following courses to the instructor or to the Department of Asian American Studies in 3102 Hart Hall; 530-752-2069. Also find relevant contact information at Asian American Studies (<https://asa.ucdavis.edu/>).

ASA 194 & ASA 195	Asian American Studies Capstone Course and Asian American Studies Senior Thesis Seminar ²
ASA 198	Directed Group Study ³
ASA 199	Special Study for Advanced Undergraduates ³

At least two upper division elective courses from other departments or programs that relate to chosen emphasis. 8

Two courses (of up to 8 units) from Study Abroad can be substituted for major requirements upon approval from the SAO or faculty advisor. 0-8

Substitutions for disciplinary track courses will be considered by the Department Chair on a case by case basis. Likewise, any substitutions of Major/Minor criteria will be considered by the Department Chair.

Depth Subject Matter Subtotal 36-44

Total Required Units: 68

Total Units 68-76

¹ ASA 192 Required.
² ASA 194 and ASA 195 is a series of courses that is taken consecutively in two quarters. Students enrolling in ASA 194 must also enroll in ASA 195 the following quarter to complete the series.
³ Up to 6 units in ASA 198 and/or ASA 199 can be used to satisfy the Asian American Studies upper division course requirements.

Asian American Studies, Minor

College of Letters & Science

Department Background

Our curriculum emphasizes multidisciplinary, comparative, transnational, and intersectional perspectives; original empirically-based scholarship; cultural production and analyses; and community engagement.

In consultation with our faculty and staff advisors, students in the minor have the exciting opportunity to select an emphasis or specialty organized around our faculty’s areas of intellectual focus including –Immigration, Labor, & Transnationalism; Visual, Literary, & Cultural Studies; and Public/Community-Engaged Scholarship. The department is also developing an emphasis on Health through its emerging partnerships. Each emphasis incorporates a diverse array of thematic, theoretical, disciplinary, and methodological approaches—as well as a focus on a broad range of Asian American communities—allowing students to choose a course of study that aligns with their particular academic and career interests. The minor in Asian American studies can complement a range of majors. In the past and currently our minors have majored in areas of academic study that range across the social sciences

and humanities (Sociology, Anthropology, History, English and others) as well as the STEM (Science, Technology, Engineering & Mathematics) fields.

Career Alternatives

With the multidisciplinary emphasis of our program, an Asian American studies minor provides excellent preparation for a diverse range of careers. Our alumni have established successful careers in the arts, community-based and non-profit organizations, government and politics, human rights, journalism, international relations, law, K-12 education, public health, public policy, social work, and student affairs in higher education. Others have gone on to pursue postgraduate degrees in a wide variety of fields that include education, ethnic studies, fine arts, feminist & queer studies, history, law, literature, political science, public policy, sociology, and social work. Our department has fostered close relationships with our alumni who are committed to supporting our minors with their career plans.

Social, Ethnic & Gender Relations, Minor

College of Letters & Science

The interdisciplinary minor in Social, Ethnic & Gender Relations explores the racial, ethnic, class, and gender aspects of human relations in the modern world. Students study human societies and cultures from a multi-ethnic perspective and across established academic departmental lines. The minor is jointly sponsored by African American & African Studies, American Studies, Asian American Studies, Chicana/o Studies, Native American Studies, and Gender, Sexuality & Women's Studies.

Advising

Katherine Ampaw-Matthei; kampaw@ucdavis.edu

Code	Title	Units
Choose one upper division course from five of the following six groups to total 20 units:		20
(1)	African American & African Studies	
(2)	Asian American Studies	
(3)	Chicana/o Studies	
(4)	Gender, Sexuality & Women's Studies	
(5)	Native American Studies	
(6)	American Studies; with Domestic Diversity GE designation	
<i>Restriction</i>		
No more than one course applied toward the satisfaction of a major may be offered in satisfaction of the minor.		
Total Units		20

Atmospheric Science (Graduate Group)

College of Agricultural & Environmental Sciences

Paul Ullrich, Ph.D., Chairperson of the Group; 530-400-9817

Group Office

1152 Plant & Environmental Sciences Building; 530-752-1669; Atmospheric Science (<http://atm.ucdavis.edu>); Faculty (<http://atm.ucdavis.edu/people/faculty/>)

- Atmospheric Science, Master of Science (p. 93)
- Atmospheric Science, Doctor of Philosophy (p. 93)

Atmospheric Science, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The Graduate Group in Atmospheric Science offers both M.S. and Ph.D. degree programs. A student may place emphasis on graduate work in one or more of the following fields: air quality meteorology, atmospheric chemistry, cloud physical processes, biometeorology, micrometeorology, numerical weather prediction, remote sensing, climate dynamics, large-scale dynamics, meso-scale and boundary-layer meteorology, computational geosciences, extreme weather, and climate change impacts. The diverse and extensive backgrounds of the faculty allow opportunities for interdisciplinary training and research.

Preparation

The Group encourages applications from all interested students with backgrounds in the physical or natural sciences. Basic qualifications for students entering the Atmospheric Science graduate program include mathematics to the level of vector calculus and partial differential equations, and one year of college-level physics. Flexibility may be allowed for students with high academic potential, but it is expected that deficiencies in preparatory material and in key undergraduate atmospheric science courses be completed within the first year of graduate study.

Graduate Advisor

Erwan Monier, Ph.D.

Graduate Admissions Officer

Matthew R. Igel, Ph.D.

Atmospheric Science, Doctor of Philosophy

College of Agricultural & Environmental Sciences

Graduate Study

The Graduate Group in Atmospheric Science offers both M.S. and Ph.D. degree programs. Avian Sciences (Graduate Group)

College of Agricultural & Environmental Sciences

Annie King, Ph.D., Chairperson of the Group

Group Office

1249 Meyer Hall; 530-752-2382; Avian Sciences (<https://aviansciences.ucdavis.edu/>); Faculty (<http://aviansciences.ucdavis.edu/people/faculty.html>)

- Avian Sciences, Master of Science (p. 94)

Avian Sciences, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The Graduate Group in Avian Sciences offers the M.S. degree program to students who wish to pursue specialized advanced work on avian species. Specializations students may choose include behavior, nutrition, physiology, reproduction, pathology, immunology, toxicology, food chemistry, management, ecology, genetics, comparative incubation, environmental physiology, and cellular and developmental studies using wild and domestic birds as experimental animals. Both master's degree plans, thesis and comprehensive examination, are available.

Preparation

Applicants should have undergraduate preparation in a field appropriate to the course of study selected, including courses in most of the following subjects: general biology, general and organic chemistry, biochemistry, avian biology, genetics, nutrition, physiology, and statistics.

Graduate Advisors

A.J. King, R.A. Blatchford

Biochemistry, Molecular, Cellular & Developmental Biology (Graduate Group)

Graduate Studies

Ben Montpetit, Ph.D., Chairperson of the Group;

Group Office

227D Life Sciences; 530-752-9091; Biochemistry, Molecular, Cellular & Developmental Biology (<http://bmcdb.ucdavis.edu/>); Faculty (<http://bmcdb.ucdavis.edu/faculty/>)

- Biochemistry, Molecular, Cellular & Developmental Biology, Master of Science (p. 94)
- Biochemistry, Molecular, Cellular & Developmental Biology, Doctor of Philosophy (p. 94)

Biochemistry, Molecular, Cellular & Developmental Biology, Master of Science

Graduate Studies

Graduate Study

The Graduate Group in Biochemistry, Molecular, Cellular & Developmental Biology offers programs of study and research leading to M.S. and Ph.D. degrees. While an M.S. may be obtained while pursuing a Ph.D., only Ph.D. applications will be accepted. Biochemistry, Molecular, Cellular & Developmental Biology is a broad, interdepartmental program.

Master's degree offered only en route to Ph.D.

Preparation

Appropriate preparation is an undergraduate degree in a biological or physical science. Preparation should include a year of calculus, physics, general chemistry and organic chemistry, and courses in statistics, biochemistry, genetics and cell biology.

Graduate Advisors

E. Baldwin (Molecular & Cellular Biology), K. Carraway (Med: Biochemistry & Molecular Medicine), E. Diaz (Med: Pharmacology), B. Draper (Molecular & Cellular Biology), J. Engebrecht (Molecular & Cellular Biology), C. Fraser (Molecular & Cellular Biology), D. Genetos (Vet: Anatomy, Physiology & Cell Biology), P. Ghosh (Med: Urologic Surgery), Q. Gong (Med: Cell Biology & Human Anatomy), M. Huising (Neurobiology, Physiology & Behavior), P. Knoepfler (Med: Cell Biology & Human Anatomy), J. Sack (Med: Physiology & Membrane Biology), M. Singer (Microbiology & Molecular Genetics), D. Starr (Molecular & Cellular Biology)

Biochemistry, Molecular, Cellular & Developmental Biology, Doctor of Philosophy

Major Programs & Graduate Study

For the Bachelor of Science program, see the major in Biological Systems Engineering (p. 99); for graduate study, see also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Minor Programs

The Department of Biological & Agricultural Engineering offers two minors through the College of Agricultural & Environmental Sciences: Geographic Information Systems (p. 108) and Precision Agriculture (p. 108).

The minor in Geographic Information Systems (p. 108) is open to all majors, including those in engineering. This minor is for students interested in information processing of spatial data related to remote sensing for geographical and environmental planning and related areas.

The minor in Precision Agriculture (p. 108) is open to all majors, including those in engineering, and acquaints students with recent developments and their applications to agriculture, in geographic information systems, global positioning systems, and variable rate technologies.

The Department of Biological & Agricultural Engineering also administers three minors through the College of Engineering in Energy Science & Technology (p. 107), Energy Efficiency (p. 106), and Energy Policy (p. 107).

Courses

Courses are listed under Applied Biological Systems Technology (p. 518) and Biological Systems Engineering (p. 561).

- Agricultural & Environmental Technology, Bachelor of Science (p. 95)
- Biological Systems Engineering, Bachelor of Science (p. 99)
- Biological Systems Engineering, Bachelor of Science/Master of Science Integrated (p. 104)
- Biological Systems Engineering, Master of Engineering (p. 104)
- Biological Systems Engineering, Master of Science (p. 105)
- Biological Systems Engineering, Doctor of Engineering (p. 105)
- Biological Systems Engineering, Doctor of Philosophy (p. 106)
- Energy Efficiency, Minor (p. 106)
- Energy Policy, Minor (p. 107)
- Energy Science & Technology, Minor (p. 107)
- Geographic Information Systems, Minor (p. 108)
- Precision Agriculture, Minor (p. 108)

Agricultural & Environmental Technology, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

The technological transformation of agriculture that began more than a century ago continues with recent advances made in sensing, data management, information processing, communications, control, modeling and simulation, gene manipulation, automation, artificial intelligence, and robotics that can radically alter resource demand and improve environmental, social and economic sustainability when appropriately implemented.

The Agricultural & Environmental Technology (AET) major aims to bridge the disciplines of agriculture, management, technology, and applied engineering, and to train students in integrating technology, leadership and design in solving complex problems in the agricultural and environmental sciences.

A key aspect of the major is to help students develop an understanding of how the next generation of technologies (including cyber#physical and knowledge#based) interact with animals, plants, and their environments, and technologies for the production and management of bio#based products and sustainable food, feed, fiber, and energy.

The Program

Learn how to integrate the next generation of technologies such as big data, robotics, digital technology, AI and machine learning for more advanced, efficient and sustainable food, fiber and energy production.

Students specialize within the major through selection of a track. Tracks are regularly reviewed and updated by program faculty to ensure relevancy to current societal needs. As of the 2022-23 academic year, we offer tracks in **Digital Agriculture, Bioproducts and Wearable Technologies, Energy and Environment**. Students choose one of the three tracks, and in the **Digital Agriculture** track, they also choose an area of emphasis.

As a new major, courses are still in the process of being approved. These are notated as "Pending" in the requirements. Please contact the staff advisor for more information.

Career Alternatives

Graduates of the AET major will gain technical skills and experience in technology systems management, bio#based product innovation, environmental quality, energy efficiency, power systems, the next generation of smart agricultural machinery, GIS/GPS remote sensing and geo#informatics#based control, irrigation and water control, precision agriculture and other features of the diverse developing technologies in agriculture.

Opportunities for employment include **managers and entrepreneurs** to bridge between science, engineering and application, **skilled operators** to interface with smart machines and smart technologies, and **scholars and educators** to help train others.

Graduate study for the AET student may lead to M.S. or Ph.D. degrees in agricultural technology, data science, agriculture and life sciences, and related fields such as bioproducts, plant science, environmental science and policy, agricultural chemistry, and biochemistry.

Advising

Staff Advisor. The Advising Center (<https://www.bftv.ucdavis.edu/functional-area/advising/>) for the AET major is located in 1204 Robert Mondavi Institute (RMI), South Building; bftvadvising@ucdavis.edu

Master Faculty Advisor. Ali Moghimi, Ph.D. (<https://bae.ucdavis.edu/people/ali-moghimi/>)

Department Chair. Fadi Fathallah, Professor & Department Chair (<https://bae.ucdavis.edu/people/fadi-fathallah/>)

Biological Systems Engineering, Bachelor of Science

College of Engineering

The Biological Systems Engineering Undergraduate Program

Biological Systems Engineering is an engineering major that uses life sciences as its main scientific base. With rapid advances in biology and biotechnology, engineers are needed to work side by side with life scientists to bring laboratory developments into commercial production or field application. Industries in food and fiber production, bioenergy, bioprocessing, biotechnology, food processing, agriculture, forestry, aquaculture, plant and animal production, natural resource management, and waste reduction all need engineers with strong training in biology. In the first two years, the Biological Systems Engineering major requires sequences of courses in mathematics, physics, chemistry, engineering science, and humanities, similar to all accredited engineering programs. In addition to these courses, the major also includes courses in the life sciences and the application to engineering. Exclusive of General Education units, the Biological Systems Engineering major requires a minimum of 163 units (86 units in the lower division; 77 units in the upper division).

Biological Systems Engineering graduates take jobs in biotechnology, energy, food, and medical industries, work for federal, state and local

agencies, and pursue graduate work. Students can also use the program as a pathway to professional schools in medicine, veterinary medicine, education, law, or business.

The Biological Systems Engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Lower Division Required Courses

See the Degree Requirements section.

Upper Division Requirements

If your career objective is a professional degree in the health sciences (e.g., medicine, veterinary medicine, nursing, or dentistry), you should consult with advisors from the appropriate school to plan for successful admission and to ensure that you take specific courses that may be required and that you have the necessary experience. Advisors in the Office of Health Professions Advising can also assist students planning to pursue degrees in these areas.

Areas of Specialization

Biological Systems Engineering is a broad major with many possible areas of specialization, with some examples below. Each area of specialization includes recommended electives for planning purposes. Students in the major are NOT required to select or follow an area of specialization. Following the recommended electives for a specialization does not result in specialization or concentration notation on a student's transcript or diploma.

- Biotechnical Engineering.
- Agricultural & Natural Resources Engineering.
- Food Engineering.

Required Courses

Lower Division Required Courses

Code	Title	Units
Mathematics		
MAT 021A	Calculus	4
MAT 021B	Calculus	4
MAT 021C	Calculus	4
MAT 021D	Vector Analysis	4
MAT 022A	Linear Algebra	3
MAT 022B	Differential Equations	3
Physics		
PHY 009A	Classical Physics	5
PHY 009B	Classical Physics	5
PHY 009C	Classical Physics	5
Chemistry		
CHE 002A	General Chemistry	5
CHE 002B	General Chemistry	5
CHE 008A	Organic Chemistry: Brief Course	2-4
or CHE 118A	Organic Chemistry for Health & Life Sciences	
CHE 008B	Organic Chemistry: Brief Course	4
or CHE 118B	Organic Chemistry for Health & Life Sciences	

Biological Science

BIS 002A	Introduction to Biology: Essentials of Life on Earth	5

EBS 127	Mass Transfer & Kinetics in Biological Systems (Fall only)	4
EBS 130	Modeling of Dynamic Processes in Biological Systems (Winter only)	4
EBS 165	Bioinstrumentation & Control (Fall only)	4
EBS 170A	Engineering Design & Professional Responsibilities (Fall only)	3
EBS 170B	Engineering Projects: Design (Winter only)	2
EBS 170BL	Engineering Projects: Design Laboratory (Winter only)	1
EBS 170C	Engineering Projects: Design Evaluation (Spring only)	1
EBS 170CL	Engineering Projects: Design Evaluation (Spring only)	2
Statistics		
STA 100	Applied Statistics for Biological Sciences	4

Biological Systems Engineering Electives

Choose a minimum of 4 units from all upper division Biological Systems Engineering courses not otherwise required, with the exception of:

EBS 189 series

EBS 199 Special Study for Advanced Undergraduates

Engineering Electives

Choose a minimum of 8 units; all upper division courses offered by the College of Engineering may be taken as engineering electives with the exception of the following:

ECI 123 Urban Systems & Sustainability

ECS 188 Ethics in an Age of Technology

ENG 103 Fluid Mechanics

ENG/PHY 160 Environmental Physics & Society

All courses 190-197, 199; except ENG 190, may be taken for 2 units of engineering elective credit

Biological Science Electives

All upper division courses in the College of Biological Sciences may be used as biological science electives; with the exception of:

EVE 175 Computational Genetics

EXB 102 Introduction to Motor Learning & the Psychology of Sport & Exercise

EXB 112 Clinical Exercise Physiology

EXB 115 Biomechanical Bases of Movement

EXB 121 Advanced Sport Psychology

EXB 124 Physiology of Maximal Human Performance

EXB 125 Neuromuscular & Behavioral Aspects of Motor Control

EXB 148 Theory & Practice of Exercise Testing

All 190-199

May also be taken as biological science electives:

ABT 161 Water Quality Management for Aquaculture

ANS 118 Fish Production

ANS 143 Pig & Poultry Care & Management

ANS 144 Beef Cattle & Sheep Production

ANS 146 Dairy Cattle Production

ATM 133 Biometeorology

AVS 100 Avian Biology

BIS 002B Introduction to Biology: Principles of Ecology & Evolution

BIS 002C Introduction to Biology: Biodiversity & the Tree of Life

CHA 101/EXB 106 Human Gross Anatomy

CHA 101L/EXB 106L Human Gross Anatomy Laboratory

ENT 100 General Entomology

ENH 102 Physiological Principles in Environmental Horticulture

ESM 120 Global Environmental Interactions

ESP 100 General Ecology

ESP 110 Principles of Environmental Science

ESP 155 Wetland Ecology

ETX 101 Principles of Environmental Toxicology

ETX 131 Environmental Toxicology of Air Pollutants

FST 102A Malting & Brewing Science

FST 104L Food Microbiology Laboratory

FST 119 Chemistry & Technology of Milk & Dairy Products

FST/ETX 128 Food Toxicology

FST 159 New Food Product Ideas

IDI 141 Infectious Diseases of Humans

SSC 100 Principles of Soil Science

WFC 121 Physiology of Fishes

Students may choose other upper division courses with substantial biological content offered by the College of Agricultural & Environmental Sciences; consultation with a faculty advisor and approval by petition is required.

Upper Division Composition Requirement

Choose one; a grade of C- or better is required: 4

UWP 101 Advanced Composition

UWP 102B Writing in the Disciplines: Biology

UWP 102E Writing in the Disciplines: Engineering

UWP 102F Writing in the Disciplines: Food Science & Technology

UWP 102G Writing in the Disciplines: Environmental Writing

UWP 104A Writing in the Professions: Business Writing

UWP 104E Writing in the Professions: Science

UWP 104F Writing in the Professions: Health

UWP 104T Writing in the Professions: Technical Writing

The Upper Division Composition Exam administered by the College of Letters & Sciences cannot be used to satisfy the upper division composition requirement for students in the Biological Systems Engineering program.

Total Units

77

Total Units: 163-165

Areas of Specialization

Biotechnical Engineering

Biotechnology involves the handling and manipulation of living organisms or their components to produce useful products. Students specializing in biotechnical engineering integrate analysis and design with applied biology to solve problems in renewable energy production, bioprocessing, control of biological systems, and production of biomaterials and bioproducts.

Students may focus on the mechanisms and processes for the sustainable production and use of energy from renewable biological sources. Students may also focus on the challenges in scaling up laboratory developments to industrial production, including production, packaging, and application of biocontrol agents for plant pests and diseases; genetically altered plants; plant materials and food products; and microbial production of biological products, tissue culture, and bioremediation. Students may also focus on the development of biosensors to detect microorganisms and specific substances useful

in the development of products based on biological processes and materials.

Biotechnical engineers work in the biotech industries on process design and operation, scale-up, and instrumentation, sensing, automation, and control.

Agricultural & Natural Resources Engineering

With the world population continuing to grow over the next several decades, grand challenges exist in food security and social, economic, and environmental sustainability. Meeting the needs of agriculture and

the effective use of natural resources will require continuing innovation. Students specializing in agricultural and natural resources engineering combine analysis and design with applied biology to solve problems in producing, transporting, and processing biological products to provide food, fiber, energy, pharmaceuticals, and other human needs.

Students may focus on automation and control of field operations and engineered systems, robotics, and the biomechanics of humans and animals. They may also focus on engineering issues related to the sustainable use of natural resources, particularly energy and water, but also land and air.

Agricultural and natural resources engineers are employed as practicing professionals and managers with agricultural producers, equipment manufacturers, irrigation districts, food processors, consulting engineering firms, start-up companies, and government agencies. Graduates with interest in biomechanics work in industry on the design, evaluation, and application of human-centered devices and systems, as well as on improving worker health and safety.

ENG 180	Engineering Analysis	4

Additional Recommended Electives (Do not count towards major requirements)

Code	Title	Units
ABT 150	Introduction to Geographic Information Systems	4
ABT 161	Water Quality Management for Aquaculture	3
ABT 163	Aquaculture Systems Engineering	3
ABT 165	Irrigation Practices for an Urban Environment	3

Suggested Advisors

A. Daccache, I. Donis-Gonzalez, M. Earles, F. Fathallah, J. Fernandez-Bayo, T-C. Hung, B. Jenkins, F. Khorsandi, I. Kisekka, K. Kornbluth, P. Larbi, A. Pourreza, D. Slaughter, S. Vougioukas

Food Engineering

Producing the food we eat every day constitutes the largest industrial sector of the U.S. economy, and this production involves the work of engineers in a wide variety of food industries, both at home and around the world. Students specializing in food engineering design food processes and operate equipment and facilities for production of high quality, safe, and nutritious food with minimal impact of these operations on the environment.

Students learn to apply engineering principles and concepts to handle, store, process, package, and distribute food and related products. In addition to engineering principles, the food engineering specialization provides an understanding of the chemical, biochemical, microbiological, and physical characteristics of food. Students study concepts of food refrigeration, freezing, thermal processing, drying, and other food operations, food digestion, and health and nutrition in food system design.

Food engineers work as practicing engineers, scientists, and managers in the food industry.

Master Undergraduate Advisor

S. Vougioukas

Students graduating with a B.S. degree in Biological Systems Engineering from UC Davis are prepared to:

- Apply life sciences in engineering at the biochemical, cellular, organism, and macro levels.
- Solve biological systems engineering problems while employed in the private or public sector.
- Consider the environmental, economic, and social consequences of their engineering activities.
- Communicate effectively with professional colleagues and public constituencies.
- Act in an ethical manner.
- Continue their education to adapt and thrive in a changing professional world.

Biological Systems Engineering, Bachelor of Science/Master of Science Integrated

College of Engineering

The Graduate Program in Biological Systems Engineering

Integrated B.S./M.S., M.S., M.Engr., D.Engr., and Ph.D. in Biological
Systems Engineering

Designated Ph.D. emphasis available in Biotechnology

Graduate students in Biological Systems Engineering focus on finding economically and environmentally sustainable solutions to many of the most important global issues of our time—the safety, security and abundance of our food, detection of pathogens, development of bioenergy and other sustainable energy systems, control of insect-borne disease and damage, as well as the preservation of our land, air and water resources.

We enjoy the strategic advantage of being located in California, the national leader in agricultural production and crop diversity, and a major center for biotechnology. With the unique status of belonging to both the College of Engineering and the College of Agricultural & Environmental Sciences, the program benefits from a wide diversity of collaborations across multiple disciplines. We interact with colleagues in both engineering and the life sciences to create multidisciplinary approaches to our teaching and research. Students benefit from this dynamic environment that combines the strengths of nationally ranked engineering, agricultural and environmental programs.

Financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

Research Highlights

- Automation & Control
- Bioenvironmental engineering
- Renewable energy
- Industrial biotechnology
- Food safety
- Biosensors
- Bioprocess engineering
- Bioinstrumentation
- Ergonomics, health & safety
- Aquacultural engineering
- Ecological systems engineering
- Food engineering
- Forest & fiber engineering
- Postharvest engineering
- Remote sensing
- Robotics & autonomous systems
- Soil and water engineering
- Machine systems and precision agriculture

Research Facilities & Partnerships

- Agricultural Ergonomics Research Center
- Fish Conservation & Culture Laboratory
- GIS Visualization Lab
- Energy & Efficiency Institute
- Bodega Marine Lab
- Western Center for Agricultural Equipment

Complete information is available on the departmental website (<https://bae.ucdavis.edu/>).

Energy Efficiency, Minor

College of Engineering

Energy Minor Programs

There is an urgent need to develop and commercialize technologies for the sustainable conversion and use of energy. The goal of these minors is to prepare students for careers that require training in energy science and technology, efficiency, and policy. Clean technologies and green technologies including energy are some of the fastest-growing markets for new investments. Well-trained individuals in all related fields are needed to provide the level of expertise required to advance technology and policy and to satisfy national and global objectives for greater energy sustainability. The minors are designed to accommodate persons of diverse backgrounds with educational interests in areas that may include engineering, science, policy, economics, planning, and management.

Energy Efficiency Minor

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA in the required minor courses of 2.000 or better. Only one course overlap is allowed between major and minor.

Minor Faculty Advisors

F. Loge (Civil & Environmental Engineering), D. Sperling (Institute of Transportation Studies), M. Modera (Western Cooling Efficiency Center)

Minor Staff Advising

The Biological & Agricultural Engineering staff advisor is available to help students create academic plans for this minor and submit minor declarations. More information can be found on the departmental website (<https://bae.ucdavis.edu/undergraduate/undergraduate-advising/>).

Energy Science & Technology, Minor

College of Engineering

Energy Minor Programs

There is an urgent need to develop and commercialize technologies for the sustainable conversion and use of energy. This minor prepares students for careers that require training in energy science and technology, efficiency, and policy. Clean technologies and green technologies including energy are some of the fastest-growing markets for new investments. Well-trained individuals in all related fields are needed to provide the level of expertise required to advance technology and policy and to satisfy national and global objectives for greater energy sustainability. The minor accommodates persons of diverse backgrounds with educational interests in areas that may include engineering, science, policy, economics, planning, and management.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements with an overall GPA in the required minor courses of 2.000 or better. Only one course overlap is allowed between major and minor.

Minor Faculty Advisors

B. Jenkins (Department of Biological & Agricultural Engineering), K. McDonald (Department of Chemical Engineering)

Minor Staff Advising

The Biological & Agricultural Engineering staff advisor is available to help students create academic plans for this minor and submit minor declarations. More information can be found on the departmental website (<https://bae.ucdavis.edu/undergraduate/undergraduate-advising/>).

Code	Title	Units

ESP 167	Energy Policy
Total Units	20

Geographic Information Systems, Minor

College of Agricultural & Environmental Sciences

The Department of Biological & Agricultural Engineering offers a minor in Geographic Information Systems with an emphasis on spatial analysis. This minor is ideal for students interested in information processing of spatial data related to remote sensing, land information systems, marine cartography, thematic mapping, surface modeling, environmental modeling resources management, public utility planning, emergency response, geomarketing, geotechnics, precision agriculture, archaeology, military exercises, and computer-aided design. Prerequisites include MAT 016A-MAT 016B and PHY 007A-PHY 007C or PHY 009A-PHY 009B. Some electives may have additional prerequisites.

All core courses (ABT 150/LDA 150, ESM 186, and ABT 181N or ABT 182) must be taken for a letter grade. Up to one elective course may be taken P/NP.

Minor Advisors

ABT/HYD 182	Environmental Analysis Using GIS	4
or ABT 181N	Concepts & Methods in Geographic Information Systems	
Choose an additional five elective units:		5
ABT 181N	Concepts & Methods in Geographic Information Systems (If not chosen above.)	
ABT 182	Environmental Analysis Using GIS (If not chosen above.)	
ESM 108	Environmental Monitoring	
ESM 185	Aerial Photo Interpretation & Remote Sensing	
ESP 168A	Methods of Environmental Policy Analysis	

ESP 168B	Methods of Environmental Policy Evaluation
ESP 171	Urban & Regional Planning
ESP 179	Environmental Impact Assessment
PLS 120	Applied Statistics in Agricultural Sciences
STA 100	Applied Statistics for Biological Sciences
Total Units	18

Precision Agriculture, Minor

College of Agricultural & Environmental Sciences

The Department of Biological & Agricultural Engineering (p. 95) offers the minor in Precision Agriculture, the latest farming concept that optimizes fertilizer, pesticide and water use, while minimizing environmental concerns.

This minor acquaints students with recent developments and their applications to agriculture, in Geographic Information Systems (GIS), Global Positioning Systems (GPS), Variable Rate Technologies (VRT), crop & soil sensors, and remote sensing. The minor prepares students for challenging positions in site-specific crop management as we enter the "information age" in agriculture.

All core courses (ABT 150/LDA 150 and ESM 186) must be taken for a letter grade. Up to one elective course may be taken P/NP.

Biological Sciences, Bachelor of Arts

College of Biological Sciences

The Biological Sciences Major

Departments of Evolution & Ecology; Microbiology & Molecular Genetics; Molecular & Cellular Biology; Neurobiology, Physiology, & Behavior; and Plant Biology

The Program

The Biological Sciences major is broad in concept, spanning the numerous core disciplines of biology. The Bachelor of Arts (A.B.) program includes preparatory work in mathematics, general and organic chemistry, physics, and introductory level biology, as well as upper division core classes emphasizing the breadth of biological sciences. Students in the Bachelor of Arts (A.B.) program can pursue upper division coursework outside of the biological sciences. Research and internships are encouraged.

Career Alternatives

The degree program prepares students for admission to graduate schools or professional schools, leading to either a variety of professional health careers or further study in basic and applied areas of biology. They provide suitable preparation for careers in teaching, biological and biotechnological research with various governmental agencies or private companies, government regulatory agencies, environmental consulting, biological illustration and writing, pharmaceutical sales, biological/environmental law, and biomedical engineering.

Biological Sciences, Minor

College of Biological Sciences

The Biological Sciences minor provides an opportunity for students in programs outside of the College of Biological Sciences to complement their studies with a concentration in biology. Student in the minor experience the breadth of biology by taking courses in five core areas: molecular biology/biochemistry, animal biology, plant biology, microbiology and ecology/evolution.

Departments of Evolution & Ecology; Microbiology & Molecular Genetics; Molecular & Cellular Biology; Neurobiology, Physiology, & Behavior; and Plant Biology

Faculty Advisor

Lesilee Rose, Ph.D.

Advising

Information on the Biological Sciences major or minor can be obtained at the Biology Academic Success Center (BASC) (<http://basc.ucdavis.edu/>) in 1023 Sciences Laboratory Building; 530-752-0410.

Restrictions

A course can only be used once to fulfill minor requirements if it can be used to fulfill more than one group.

Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

Code	Title	Units
Complete at least 3 units from each of the five numbered groups to total at least 18 units. Appropriate alternative courses may be used with approval of the faculty advisor.		18
1) Genetics, Molecular Biology or Biochemistry		
BIS 101	Genes & Gene Expression	
BIS 102	Structure & Function of Biomolecules	
BIS 105	Biomolecules & Metabolism	
2) Animal Physiology, Behavior or Development		
EVE 107	Animal Communication	
MCB 150	Developmental Biology	
NPB 100	Neurobiology	
NPB 101	Systemic Physiology	
NPB 102	Animal Behavior	
NPB 107	Cell Signaling in Health & Disease	
NPB 117	Avian Physiology	
NPB 123	Comparative Vertebrate Organology	
NPB 141	Physiological Adaptation of Marine Organisms	
3) Microbiology		
MIC 102	Introductory Microbiology	
MIC 162	General Virology	
MIC 170	Yeast Molecular Genetics	
PLP 148	Introductory Mycology	
4) Plant Biology		
PLB 105	Developmental Plant Anatomy	
PLB 111	Plant Physiology	

PLB 112	Plant Growth & Development
PLB 113	Molecular & Cellular Biology of Plants
PLB 116	Plant Morphology & Evolution
PLB 126	Plant Biochemistry
5) Evolution & Ecology	
BIS 122	Population Biology & Ecology
ESP 100	General Ecology
EVE 100	Introduction to Evolution
EVE 101	Introduction to Ecology
EVE 105	Phylogenetic Analysis of Vertebrate Structure
EVE 112	Biology of Invertebrates
EVE 115	Marine Ecology
EVE 131	Human Genetic Variation & Evolution
EVE 138	Ecology of Tropical Latitudes
EVE 140	Paleobotany
EVE 147	Biogeography
PLB 102	California Floristics
PLB/EVE 108	Systematics & Evolution of Angiosperms
PLB/EVE 117	Plant Ecology
PLB/EVE 119	Population Biology of Invasive Plants & Weeds
PLB 143	Evolution of Crop Plants
PLB 148	Introductory Mycology
Additional courses (if necessary) from above numbered groups to reach 18 units.	

Total Units **18**

Quantitative Biology & Bioinformatics, Minor

College of Biological Sciences

The interdisciplinary minor in Quantitative Biology & Bioinformatics is an integrative program that introduces students to the quantitative and computational approaches that are redefining all disciplines in the biological sciences, from molecular and cell biology, through genetics and physiology, to ecology and evolutionary biology. Students in this minor will learn research tools that apply mathematical and computational methods, increase their insight into the strengths and limitations of quantitative approaches, and develop the interdisciplinary perspective that is now the foundation of modern biological research and training.

The minor in Quantitative Biology & Bioinformatics is open to all undergraduates regardless of major and is sponsored by the College of Biological Sciences.

Faculty Advisor

Mark Goldman, Ph.D.

Advising

Biology Academic Success Center (BASC) (<https://basc.biology.ucdavis.edu/>) in 1023 Sciences Laboratory Building; 530-752-0410.

Only one course used to satisfy a requirement for the minor may be applied toward a student's major.

Code	Title	Units
Core Courses		
<i>Programming</i>		
Choose one:		0-4
ECS 032A	Introduction to Programming	
ECS 036A	Programming & Problem Solving	
Or the equivalent. The programming requirement may be satisfied by previous experience and therefore may not entail college course credit. Please see your minor advisor for this determination and its possible impact on your unit requirements for the minor.		
<i>Quantitative Biology</i>		
BIS/MAT 107	Probability & Stochastic Processes with Applications to Biology ¹	4
or MAT 124	Mathematical Biology	
NOTE: BIS 107 (same as MAT 107) has a prerequisite of BIS/MAT 027A (preferred) or MAT 022A. MAT 124 has a prerequisite of MAT 027A & 027B (preferred) or MAT 022A & 022B.		
<i>Bioinformatics</i>		
ECS 124	Theory & Practice of Bioinformatics	4
or ECS 129	Computational Structural Bioinformatics	
Core Courses Subtotal		8-12

Biomedical Engineering, Bachelor of Science

College of Engineering

The Biomedical Engineering Undergraduate Major

The Biomedical Engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Biomedical engineering is an interdisciplinary field of study that integrates knowledge of engineering principles with the biomedical sciences. It is a very diverse field with biomedical engineers working in areas ranging from medical imaging to regenerative medicine. Some major contributions of Biomedical Engineering include the left ventricular assist device (LVAD), artificial joints, hemodialysis, bioengineered skin, coronary stents, computed tomography (CT), and flexible endoscopes.

Students who choose biomedical engineering are interested in contributing to human health and quality of life, but do not routinely interact directly with patients, as do physicians. Due to the need to complete additional coursework beyond BME degree requirements, this major is not a primary route for pre-medical studies.

The mission of the BS degree program of the Department of Biomedical Engineering is to combine exceptional teaching with state-of-the-art research for the advancement of technologies and computational techniques that meet medical and societal challenges.

The educational objectives of our program are that a B.S. degree in Biomedical Engineering should prepare students to:

- Be successfully engaged in their chosen career through engineering practice, academic or clinical research, healthcare, education, service, or related activities, or through the pursuit of graduate or professional degrees; and
- Contribute effectively to society through responsible professional practice, fostering of cross-disciplinary collaboration, generation of innovative solutions to problems, and continuous pursuit of knowledge for personal and technological advancement.

The biomedical engineering curriculum is designed to provide a solid interdisciplinary foundation in life and physical sciences, mathematics and engineering, while allowing for sufficient flexibility in the upper division requirements to encourage students to explore specializations within the field. Our instructional program is designed to impart knowledge of contemporary issues at the forefront of biomedical engineering research. Employment opportunities exist in industry, hospitals, academic research and teaching institutions, national laboratories, and government regulatory agencies. The major also provides excellent grounding in the skills necessary for graduate-level studies in engineering disciplines and biological sciences, as well as for professional studies in health (medicine, dentistry, optometry, prosthetics), business and law. Exclusive of General Education units, the minimum number of units required for the Biomedical Engineering degree is 158.

For information about graduate degree options, see Biomedical Engineering (Graduate Group). (<https://bmegg.ucdavis.edu/>)

Areas of Specialization

As Biomedical engineering is a broad field, specializing in a subfield of engineering can provide more in-depth expertise in a focus area. Through the judicious selection of upper division engineering and science electives, students can create this depth in one of our suggested areas of specialization or in an area of the student's choosing. One of the strengths of the UC Davis program is the flexibility to design one's own emphasis of study. These specializations are neither required nor degree-notated.

Biomechanics

This is a broad subfield that includes orthopedic/rehabilitation engineering and the study of mechanical forces produced by biological

systems. This subfield helps us understand the fluid dynamics of blood flow and the forces acting on tissue in the artery allowing us to design better cardiovascular interventional devices. This field involves a more intensive study of mechanics, dynamics and thermodynamics.

Cellular & Tissue

The cellular and tissue specialization applies biomedical engineering principles to control behavior at the gene, protein, cell, and tissue level. Engineers in this area work with cellular therapies, protein production, gene therapy, tissue engineering and regeneration, and biomaterials development. This subfield draws heavily from the chemical and biological sciences and can involve studying biomedical transport, natural or synthetic biomaterials, pharmacokinetics and pharmacodynamics.

Imaging

Visualizing anatomical structure, physiological processes, metabolic activity and molecular expression in living tissues is essential for the diagnosis of disease, development of new therapeutics, evaluation of the response to therapeutics, and guidance of interventional procedures. An imaging biomedical engineer can develop instruments for imaging, create algorithms for three-dimensional reconstruction of imaging data, and generate new contrast agents to enhance image quality. Our program has a particular strength in molecular imaging, which involves detecting molecular-scale events within living systems. Depending upon your area of interest, the imaging specialization can require further study in electronics, signal processing, chemistry or computer programming.

Medical Devices

Biomedical engineers can develop devices, instruments and implants ranging from the nano- to macro-scale that can be used in the diagnosis, treatment or prevention of disease. This involves combining technologies like pharmaceuticals, electronics and mechanical devices to develop combination medical treatments.

Systems & Synthetic Biology

In systems and synthetic biology, students apply engineering principles to better understand, design and build biological systems at the cellular level. They integrate cellular, biochemical, genetic, electromechanical and computational approaches in their work, which can be applied to health and other applications. Systems and synthetic biology specialists can build engineered or artificial cells for fighting cancer or antibiotic resistance, improve tissue engineering and drug production approaches and study how complex and dynamic molecular systems control cellular behavior.

Pre-Medical Student

As engineering is playing an increasing role in the practice of medicine, students can focus on the intersection of engineering and medicine for future careers as physician-scientists. Please note that to meet admission requirements for medical school, students must complete extra coursework in addition to the listed Department of Biomedical Engineering Curriculum Requirements.

The Graduate Program in Biomedical Engineering

Doctoral and master's degrees in Biomedical Engineering are offered through the interdisciplinary Graduate Group in Biomedical Engineering; see Biomedical Engineering (<https://bme.ucdavis.edu/>) & Biomedical Engineering Graduate Group. (<https://bmegg.ucdavis.edu/>)

Code	Title	Units

Lower Division Required Courses

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Mathematics

MAT 021A	Calculus	4
MAT 021B	Calculus	4
MAT 021C	Calculus	4
MAT 021D	Vector Analysis	4
MAT 022A	Linear Algebra	3-4
or MAT 027A	Linear Algebra with Applications to Biology	
MAT 022B	Differential Equations	3-4
or MAT 027B	Differential Equations with Applications to Biology	

Physics

PHY 009A	Classical Physics	5
or PHY 009HA	Honors Physics	
PHY 009B	Classical Physics	5
PHY 009C	Classical Physics	5

Chemistry

CHE 002A & CHE 002B & CHE 002C	General Chemistry and General Chemistry and General Chemistry	15
CHE 008A	Organic Chemistry: Brief Course	2-4
or CHE 118A	Organic Chemistry for Health & Life Sciences	
CHE 008B	Organic Chemistry: Brief Course	4
or CHE 118B	Organic Chemistry for Health & Life Sciences	

Engineering

ENG 006	Engineering Problem Solving	4
ENG 017	Circuits I	4

Biological Science

BIS 002A	Introduction to Biology: Essentials of Life on Earth	5
----------	--	---

Biomedical Engineering

BIM 001	Introduction to Biomedical Engineering	2
BIM 020	Fundamentals of Bioengineering	4
BIM 020L	Graphics Design for BME	2
Choose one; a grade of C- or better is required:		4

UWP 001	Introduction to Academic Literacies	
UWP 001Y	Introduction to Academic Literacies	
ENL 003	Introduction to Literature	
COM 001	Major Works of the Ancient World	
COM 002	Major Works of the Medieval & Early Modern World	
COM 003	Major Works of the Modern World	
COM 004	Major Works of the Contemporary World	
NAS 005	Introduction to Native American Literature	

Lower Division Required Courses Subtotal 83-87

Upper Division Required Courses*Engineering*

ENG 100	Electronic Circuits & Systems	3-5
or EEC 100	Circuits II	
ENG 105	Thermodynamics	4

ENG 190	Professional Responsibilities of Engineers	3

BIM 107	Manufacturing Processes for BME	2
BIM 108	Biomedical Signals & Control	4
BIM 109	Biomaterials	4
BIM 110A	Biomedical Engineering Senior Design Experience	3
BIM 110B	Biomedical Engineering Senior Design Experience	3
BIM 110C	Biomedical Engineering Senior Design Experience	3
BIM 111	Biomedical Instrumentation Laboratory	6

Science & Engineering Electives are to be selected in consultation with a staff or faculty advisor.

Science Electives

To be chosen according to specialization: 7

BIS 002B	Introduction to Biology: Principles of Ecology & Evolution	
BIS 002C	Introduction to Biology: Biodiversity & the Tree of Life	
ECS 032A	Introduction to Programming	
ECS 032B	Introduction to Data Structures	
PHY 009D	Modern Physics	
BIM 102	Cellular Dynamics	
BIM 161A	Biomolecular Engineering	
BIM 161L	Biomolecular Engineering Laboratory	
BIM 161S	Biomolecular Engineering: Brief Course	
Any letter graded upper division course in the Biological Sciences, Chemistry or Physics that is designated as Science & Engineering topical breadth.		
With the approval of the Biomedical Engineering Undergraduate Committee; 4 units:		
BIM 192	Internship in Biomedical Engineering	
or BIM 199	Special Study for Advanced Undergraduates	

Engineering Electives

Any letter graded upper division Biomedical Engineering course; 20 except:

BIM 102	Cellular Dynamics	
BIM 161A	Biomolecular Engineering	
BIM 161L	Biomolecular Engineering Laboratory	
BIM 161S	Biomolecular Engineering: Brief Course	
With the approval of the Biomedical Engineering Undergraduate Committee; 4 units:		
BIM 192	Internship in Biomedical Engineering	
or BIM 199	Special Study for Advanced Undergraduates	
No more than 4 units allowed from lower division coursework.		
ENG 035	Statics	
ENG 045	Properties of Materials	
or ENG 045Y	Properties of Materials	

ENG 102	Dynamics
ENG 103	Fluid Mechanics
ENG 104	Mechanics of Materials
ENG 104L	Mechanics of Materials Laboratory
ENG 106	Engineering Economics
EEC 110A	Electronic Circuits I
EEC 110B	Electronic Circuits II
EEC 118	Digital Integrated Circuits
EEC 130A	Electromagnetics I
EEC 130B	Introductory Electromagnetics II
EEC 140A	Principles of Device Physics I
EEC 140B	Principles of Device Physics II
EEC 150	Introduction to Signals & Systems
EEC 151	Digital Signals & Systems
EEC 157A	Control Systems
EEC 157B	Control Systems
EEC 160	Signal Analysis & Communications
EBS 128	Biomechanics & Ergonomics
EBS 130	Modeling of Dynamic Processes in Biological Systems
EBS 165	Bioinstrumentation & Control
EBS 175	Rheology of Biological Materials
ECH 141	Fluid Mechanics for Biochemical & Chemical Engineers
ECH 144	Rheology & Polymer Processing
ECH 145A	Chemical Engineering Thermodynamics Laboratory
ECH 145B	Chemical Engineering Transport Lab
ECH 155	Chemical Engineering Kinetics & Reactor Design Laboratory
ECH 160	Fundamentals of Biomanufacturing
ECH 161A	Biochemical Engineering Fundamentals
ECH 161B	Bioseparations
ECH 161L	Bioprocess Engineering Laboratory
ECH 170	Introduction to Colloid & Surface Phenomena
ECS 124	Theory & Practice of Bioinformatics
EMS 147/FPS 100	Principles of Polymer Materials Science
EMS 160	Thermodynamics of Materials
EMS 162	Structure & Characterization of Engineering Materials
EMS 162L	Structure & Characterization of Materials Laboratory
EMS 164	Kinetics of Materials
EMS 172	Smart Materials
EMS 172L	Smart Materials Laboratory
EMS 174	Mechanical Behavior of Materials
EMS 174L	Mechanical Behavior Laboratory
EMS 180	Materials in Engineering Design
EMS 181	Manufacturing of 3D & Composite Materials
EMS 182	Failure Analysis
EME 150A	Mechanical Design

EME 150B	Mechanical Design
EME 151	Statistical Methods in Design & Manufacturing
EME 152	Computer-Aided Mechanism Design
EME 154	Mechatronics
EME 165	Heat Transfer
EME 171	Analysis, Simulation & Design of Mechatronic Systems
EME 172	Automatic Control of Engineering Systems
<i>Additional Elective Policies</i> ¹	
<i>Upper Division Composition Requirement</i>	
Choose one; grade of C- or better is required:	0-4
UWP 101	Advanced Composition
UWP 101Y	Advanced Composition
UWP 102B	Writing in the Disciplines: Biology
UWP 102E	Writing in the Disciplines: Engineering
UWP 104A	Writing in the Professions: Business Writing
UWP 104AY	Writing in the Professions: Business Writing
UWP 104E	Writing in the Professions: Science
UWP 104F	Writing in the Professions: Health
UWP 104FY	Writing in the Professions: Health
UWP 104I	Writing in the Professions: Internships
UWP 104T	Writing in the Professions: Technical Writing
Passing the Upper Division Composition Exam offered by the College of Letters & Science.	
Upper Division Required Courses Subtotal	75-81
Total Units	158-162

¹ 2 units from CHE 118A may be applied towards Science Electives if CHE 118A is also used to satisfy lower division subject credit. 2 units from EEC 100 may be applied towards Engineering Electives if EEC 100 is taken to satisfy upper division subject credit. 1 unit from MAT 027A/BIS 027A and 1 unit from MAT 027B/BIS 027B may be applied to Science Electives.

Biomedical Engineering, Minor

College of Engineering

The minor in Biomedical Engineering is restricted to enrolled College of Engineering students. The intent is to build upon the existing core strengths in other engineering majors by adding expertise in biomedical applications. This additional training makes students more attractive to employers in the medical device industry, and positions students for graduate training in health related applications of engineering.

The minor requires two life sciences courses not typically required for engineering students, one at the cellular level (BIM 102) and the other at the physiological level (NPB 101 or BIM 116). The remaining 12 units are to be selected in consultation with an advisor from this list of upper division Biomedical Engineering courses. Students will be advised to select courses that complement their existing curricula.

Minor Advisors

Rosalind Christian, Dr. Jennifer Choi

Successful completion of the minor requires the following:

- Completing 21 units of minor coursework; all courses must be taken for a letter grade.
- Minimum overall GPA of 2.000 and no grade lower than a C- for coursework completed in the minor.
- No more than one course can be counted towards both the student's major and the minor.

Code	Title	Units
<i>Required Courses</i>		
NPB 101 or BIM 116	Systemic Physiology Physiology for Biomedical Engineers	5

College of Engineering

Graduate Study

The Biomedical Engineering Graduate Group (BMEGG) offers programs of study and research leading to the M.S. and Ph.D. degrees. The programs of study prepare students for professional work in the effective integration of engineering with medical and biological sciences. Research strengths lie in the areas of: bioelectricity & neuroengineering; biomaterials & devices; biomechanics & mechanobiology; bioimaging & biophotonics; computational & synthetic biology; and molecular, cellular & tissue engineering. Each student, together with an advisor, defines a specific course of study suited to individual goals.

Preparation

The BMEGG curriculum requires strong competence in mathematics, engineering, and biology for successful completion of study. Prior course work in these areas is emphasized in the evaluation of applications, though some undergraduate training can be acquired after admission to the BMEGG.

Courses

See Biomedical Engineering (p. 463).

Advising

See BMEGG Advising & Administration (<https://bmegg.ucdavis.edu/advising-administration/>).

Biophysics, Doctor of Philosophy

Graduate Studies

Graduate Study

The Biophysics Graduate Group offers a program leading to a Ph.D. degree in biophysics. The interdisciplinary program prepares students to conduct independent research at the interface of physics, chemistry, and biology. Students employ advanced quantitative research methods and models to explore biophysical mechanisms in living systems. Faculty members have particular research interests in physical biology of the cell, structural biology, computational biology, membrane mechanics, systems and synthetic biology, mechanisms of catalysis and energy transduction, neuroscience, and imaging. Students choose from the broad biophysics research venues a research laboratory that matches their interests and career goals

The Master of Sciences degree is offered only en route to the Ph.D.

- Biostatistics, Master of Science (p. 120)
- Biostatistics, Doctor of Philosophy (p. 120)

Biostatistics, Master of Science

Graduate Studies

Graduate Study

Biostatistics is a field of science that uses quantitative methods to study life sciences related problems that arise in a broad array of fields. The program provides students with, first, solid training in the biostatistical core disciplines and theory; second, with state-of-the-art knowledge and skills for biostatistical data analysis; third, substantial exposure to the biological and epidemiological sciences; and fourth, with a strong background in theoretical modeling, statistical techniques and quantitative as well as computational methods. Programs of study and research are offered leading to M.S. and Ph.D. degrees. The program prepares students for interdisciplinary careers ranging from bioinformatics, environmental toxicology and stochastic modeling in biology and medicine to clinical trials, drug development, epidemiological and medical statistics. The program draws on the strengths of the Biostatistics faculty at UC Davis.

Preparation

Students should have one year of calculus; a course in linear algebra or one year of biological course work; facility with a programming language; and upper division work in at least one of Mathematics, Statistics and Biology.

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering (p. 123) and Biochemical Engineering (p. 121).

Mission Statement

To advance through teaching and research programs, the frontiers of chemical engineering and biochemical engineering; to educate students with a sense of professionalism and community; and to serve the public of California through outreach efforts.

Our faculty forms the cornerstone of this education and research mission, preparing students for careers in fields that have tremendous impact on key areas of modern life: energy, biotechnology and nanotechnology.

College of Engineering

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering (p. 123) and Biochemical Engineering (p. 121).

Biochemical Engineering Undergraduate Program

The Biochemical Engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

As the biotechnology industry expands and matures, there is an increasing need for engineers who can move products from the research stage to large-scale manufacturing. As they fill this need, engineers

must also understand the production, purification, and regulatory issues surrounding biopharmaceutical manufacturing.

Biochemical engineers—with their strong foundations in chemistry, biological sciences, and chemical process engineering—are in a unique position to tackle these problems. Biochemical engineers apply the principles of cell and molecular biology, biochemistry, and engineering to develop, design, scale up, optimize, and operate processes that use living cells, organisms, or biological molecules for the production and purification of products (such as monoclonal antibodies, vaccines, therapeutic proteins, antibiotics, and industrial enzymes); for health and/or environmental monitoring (such as diagnostic kits, microarrays, biosensors); or for environmental improvement (such as bioremediation). An understanding of biological processes is also becoming increasingly important in the industries that traditionally employ chemical engineers, including the industries that process materials, chemicals, foods, energy, fuels, and semiconductors.

Objectives

We educate students in the fundamentals of chemical and biochemical engineering, balanced with the application of these principles to practical problems; educate students as independent, critical thinkers who can also function effectively in a team; prepare students with a sense of community, ethical responsibility, and professionalism; prepare students for careers in industry, government, and academia; teach students the necessity for continuing education and self-learning; and foster proficiency in written and oral communications.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Biochemical Engineering major is 161.

Honors Program

An Honors Program is available to qualified students in the Chemical Engineering & Biochemical Engineering majors. It is a two-year program designed to challenge the most talented students in these majors. Students are invited to participate in their sophomore year. In the upper division coursework, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

¹ Acceptable science courses must carry one of the following subject designations: BIS, BIT, FST, MIC, MCB, NPB, PLB, PLS, STA, and VEN.

² With the exception for ECH 198.

Chemical Engineering, Bachelor of Science

College of Engineering

The Department of Chemical Engineering offers two undergraduate programs: Chemical Engineering (p. 123) and Biochemical Engineering (p. 121).

Chemical Engineering Undergraduate Program

The Chemical Engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Chemical engineers apply the principles of chemistry and engineering to produce useful commodities, ranging from fuels to polymers. Chemical engineers are increasingly concerned with chemical and engineering processes related to the environment and food production. They work in diverse areas ranging from integrated circuits to integrated waste management. Preparation for a career in chemical engineering requires an understanding of both engineering and chemical principles to develop proficiency in conceiving, designing, and operating new processes.

The chemical engineering curriculum has been planned to provide a sound knowledge of engineering and chemical sciences so that you may achieve competence in addressing current and future technical problems.

Objectives

The objectives of the program in Chemical Engineering are to educate students in the fundamentals of chemical engineering, balanced with the application of these principles to practical problems; to train them as independent, critical thinkers who can also function effectively in teams; to foster a sense of community, ethical responsibility, and professionalism; to prepare them for careers in industry, government, and academia; to illustrate the necessity for continuing education and self-learning; and to help students to learn to communicate proficiently in written and oral form.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Chemical Engineering major is 156.

Options for Junior & Senior Year

The focus in the junior year is on fundamentals such as thermodynamics, fluid mechanics, energy transfer, and mass transfer phenomena. In the senior year, students draw these fundamentals together and apply them in a study of kinetics, process design, and process dynamics and control. The program's requirement of eight chemical engineering elective units allow students to strengthen specific areas in chemical engineering, explore new areas, or pursue new areas of specialization.

Honors Program

An Honors Program is available to qualified students in the Chemical Engineering & Biochemical Engineering majors. It is a two-year program designed to challenge the most talented students in these majors. Students are invited to participate in their sophomore year. In the upper division coursework, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

Chemical Engineering, Master of Engineering

College of Engineering

Graduate Program in the Department of Chemical Engineering

The Department of Chemical Engineering is home to a top ranked graduate program in Chemical Engineering. We offer a unique environment for graduate studies- we are large enough to boast world-renowned faculty and state-of-the-art-research facilities, yet small enough to give every graduate student personal attention.

The Graduate Program in Chemical Engineering

M. Engr, M.S. and Ph.D.

Chemical Engineering Graduate Program (<https://che.engineering.ucdavis.edu/graduate/>); 530-752-7952

Ph.D. designated emphases are available as specializations in biotechnology, biophysics, and nuclear science.

The Chemical Engineering Graduate Program provides students with a strong grounding in the fundamentals and explores critical applications in a wide range of process systems.

Doctoral students are typically offered competitive four-year financial offers of fellowships and research/teaching assistantships which include tuition, fees, and a stipend. Financial offers are subject to satisfactory progress towards completion of degree requirements.

Major research areas include Energy, Environment, Synthetic Biology and Biotechnology.

Applied Chemistry, Bachelor of Science

College of Letters & Science

The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

The Program

The Department of Chemistry offers two Bachelor of Science degree emphases under the heading of Applied Chemistry: Environmental Chemistry and Forensic Chemistry. The B.S. emphasis in Applied

Chemistry fall outside of the classical chemistry degree and instead draw on significant course material from areas relevant to their particular fields. The Environmental Chemistry program provides students with tools to understand the processes governing chemical transformations in soil, air, and water, analyze for key substances in the environment, and make meaningful predictions about the fates of these chemicals. The Forensic Chemistry program involves the identification and quantitation of scientific evidence both in the natural environment and in urban settings, including substances sometimes available in only trace amounts.

Career Alternatives

Environmental chemistry graduates with the bachelor's degree will be able to pursue advanced degrees in areas such as atmospheric chemistry, geochemistry, toxicology, and environmental science. They will also have access to a range of scientific careers including regulatory agencies, environmental consulting firms, and industries concerned with the environmental impacts and fates of their products. Forensic chemistry graduates will be able to pursue careers in private forensic labs as well as law enforcement and regulatory agencies at many levels, including police and sheriff's departments, district attorney crime labs, and laboratories of federal agencies including the FBI, DEA, FDA, and many others.

Major Advisor

To contact a major advisor in the Department of Chemistry, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

Honors & Honors Program

The student must take CHE 194HA, CHE 194HB, & CHE 194HC, and complete a capstone project; typically a written honors thesis.

Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Chemistry, Bachelor of Arts

College of Letters & Science

The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

The Program

We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

The curriculum leading to the A.B. degree offers a substantive program in chemistry while allowing students the freedom to take more courses in other disciplines and pursue a broad liberal arts education. Students with a deeper interest in chemistry should choose one of the several programs leading to the B.S. degree.

Career Alternatives

Chemistry graduates with bachelor's degrees are employed extensively throughout various industries in quality control, research & development, production supervision, technical marketing, and other areas. The types of industries employing these graduates include chemical, energy, pharmaceutical, genetic engineering, biotechnology, food & beverage, petroleum & petrochemical, paper & textile, electronics & computer, and environmental & regulatory agencies. The bachelor's programs also provide chemistry graduates with the rigorous preparation needed for an advanced degree in chemistry and various professional schools in the health sciences.

Major Advisor

To contact a major advisor in the Department of Chemistry, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

Honors & Honors Program

The student must take courses CHE 194HA, CHE 194HB, and CHE 194HC, and complete a capstone project (typically a written honors thesis).

Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Chemistry, Bachelor of Science

College of Letters & Science

The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

The Program

We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

The general B.S. degree in Chemistry is the one chemistry program offered by our department that is certified by the American Chemical Society (<http://www.acs.org/content/acs/en.html>) (ACS). Students in this program pursue a strong foundation in math and physics, in addition to chemistry, taking the higher-level sequences of all course options. This degree provides a strong foundation in experimental processes, instrumentation, and quantitative analysis. Students will be well-prepared to apply their chemistry knowledge to a wide array of applications, including environmental, pharmaceutical, materials, and industrial chemistry.

Career Alternatives

Graduates will be able to successfully pursue their career objectives in advanced education in professional and/or graduate schools, a scientific career in government or industry, a teaching career in the school systems or other related career tracks.

Major Advisor

To contact a major advisor in the Department of Chemistry, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

Honors & Honors Program

The student must take courses CHE 194HA, CHE 194HB, and CHE 194HC, and complete a capstone project (typically a written honors thesis).

Graduate Study

The Department of Chemistry offers programs of study and research leading to the M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Chemistry & Chemical Biology, Master of Science

College of Letters & Science

Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate

Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

The Master of Sciences degree is offered only in route to the Ph.D.

Chemistry & Chemical Biology, Doctor of Philosophy

College of Letters & Science

Graduate Study

The Department of Chemistry offers programs of study and research leading to M.S. and Ph.D. degrees in Chemistry. Detailed information regarding graduate study may be obtained by contacting the Graduate Advisor, Department of Chemistry. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

The Master of Sciences degree is offered only in route to the Ph.D.

Chemical Physics, Bachelor of Science

College of Letters & Science

The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

The Program

We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see Academic Advising.

The B.S. degree in Chemical Physics provides students with an in-depth understanding of the fundamentals of chemistry, focusing on areas at the interface of chemistry and physics. These include, for example, the experimental measurement and theoretical calculation of the detailed properties and behavior of atoms and molecules. An important experimental tool in chemical physics is spectroscopy, which uses conventional or laser light to probe the atomic and molecular properties of matter.

Career Alternatives

Graduates in Chemical Physics will be prepared for employment in technology, energy, laser science, material science, solid-state chemistry and other fields requiring a strong background in both chemistry and physics. They will also be well-suited for graduate study in a range of areas including chemistry, chemical physics, computational chemistry, material science, nanomaterials and laser science.

Major Advisor

To contact a major advisor in the Department of Chemistry, see Academic Advising.

Honors & Honors Program

The student must take courses CHE 194HA, CHE 194HB, and CHE 194HC, and complete a capstone project (typically a written honors thesis).

Graduate Study

Pharmaceutical Chemistry, Bachelor of Science

College of Letters & Science

The Major Programs

Chemistry studies the composition of matter, its structure, and the means by which it is converted from one form to another.

The Program

We offer several degree programs leading to the Bachelor of Arts (A.B.) and the Bachelor of Science (B.S.). To meet and discuss these programs with our staff advisors, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

The B.S. in Pharmaceutical Chemistry is strongly focused on basic science while providing students with a greater understanding of the experimental and computational processes and societal issues that surround the synthesis, discovery and design of modern pharmaceuticals. Important relevant topics include potential drug targets, physical principles of drug action, drug synthesis & screening, computational drug design, drug delivery and ethical concerns. The demand for pharmaceutical chemists is high and anticipated to grow, as modern chemistry allows a wide range of choices for drug synthesis and our growing knowledge of biological processes presents challenging targets for novel therapeutics.

Career Alternatives

Graduates in Pharmaceutical Chemistry will be able to successfully pursue their career objectives in advanced education in professional and/or graduate schools and in a range of scientific careers in academia, government or industry including the pharmaceutical, medicinal & biological sciences, medicine, pharmacy, pharmacology and biotechnology.

Major Advisor

To contact a major advisor in the Department of Chemistry, see Academic Advising (<https://chemistry.ucdavis.edu/undergraduate/academic-advising/>).

Honors & Honors Program

The student must take courses CHE 194HA, CHE 194HB, and CHE 194HC, and complete a capstone project (typically a written honors thesis).

Chicana/Chicano Studies, Bachelor of Arts

College of Letters & Science

The Major Program

The Department of Chicana/Chicano Studies offers an interdisciplinary curriculum focusing on the Chicana/Chicano/Chicanx experience through an analysis of class, race, ethnicity, gender and sexuality, and cultural expression. The department offers a major leading to the Bachelor of Arts degree and a minor that can satisfy breadth requirements for the College of Letters and Science. Both the major and minor frame an analysis within the historical and contemporary experiences of Chicanx in the Americas.

The Program

At the lower division level, the major curriculum provides an interdisciplinary overview of various topics. Students are advised to take courses that serve as prerequisites for certain upper division courses. At the upper division level, majors pursue advanced interdisciplinary course work in both the humanities/arts and the social sciences. At this level, students will find courses in Chicana/Chicano history, theory, health and several courses taught from a variety of disciplinary perspectives.

Career Alternatives

A degree in Chicana/o Studies provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including work in cross-cultural education, cultural/art centers, community development, public policy and social welfare. The

interdisciplinary structure of the Bachelor of Arts degree in Chicana/o Studies also provides excellent preparation for graduate study in a variety of fields.

Child Development, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The Graduate Group in Child Development offers a multidisciplinary program leading to an M.S. degree. The program provides students with an opportunity to pursue a coordinated course of graduate study in the field of child development, which cuts across departmental boundaries. Students may complete a practicum working with children and families in the community, as well as the University's Center for Child & Family Studies. Recipients of the degree gain sufficient background to engage in professions that directly (e.g., preschool, 4-H) or indirectly (e.g., social policy) involve children and families, obtain positions in teaching or research settings, or pursue further study leading to a doctorate in child development, human development, clinical psychology, or related fields.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority December 15 deadline. The final admissions deadline is March 1. For more details, see Human Development Graduate Group (<http://humandevlopment.ucdavis.edu/>).

- Film Studies, Minor (p. 137)

Cinema & Digital Media, Bachelor of Arts

College of Letters & Science

The Cinema & Digital Media Major Program

The Cinema & Digital Media (CDM) program combines the study of audio-visual and digital media, theories about such media, and the relevant modes of artistic practice and production. CDM integrates the analysis of audio-visual and digital texts with their theoretical underpinnings and their methods of production. The program also addresses the particular impact that technology has on culture in its many forms and fields.

CDM faculty teach and research on various histories, theories, and practices of media. Current fields for teaching and research in cinema and digital media include the history and analysis of film and video, film and video production, electronic music, digital content creation and design, the digital arts, community media and activism, computer graphics, animation, and gaming—as well as the theories and politics of these various areas.

The Program

Preparatory course work involves a solid introduction to the history, ideas and current trends in cinema and digital media. For depth subject matter, students in the major select a combination of critical studies and creative production courses. Two courses will be selected from the production/programming distribution, two from the theory/history distribution and four will be elected by the student, allowing them to take up to six production courses or six studies/theory classes, should they so choose.

Major Advisor

Information on the current Academic Advisors can be obtained at the Arts Group Advising Center (<http://arts.ucdavis.edu/arts-group-undergraduate-advising/>) at 530-752-0616.

Career Alternatives

Cinema & Digital Media is designed to prepare graduates to be highly adaptable analytical thinkers, collaborative, multi-skilled and current with the latest developments in media and technology. Perhaps most importantly is self-motivation: students do best when fueled by their own passions and plot their own directions, while held to very high standards. We feel this is the best education for living and working in a complex, rapidly changing world. Final research papers and creative production portfolios will provide graduate school admissions committees, employers or clients with tangible evidence of Cinema & Digital Media graduates' track records and talents.

Course Changes

Cinema & Digital Media is working on updating all of the existing FMS, TCS, and CTS courses to the CDM course subject code. If you have any questions regarding the course subject code changes and equivalent major requirements, please contact the Arts Group Advising Center (<http://arts.ucdavis.edu/arts-group-undergraduate-advising/>) at 530-752-0616.

Code	Title	Units

- Civil & Environmental Engineering, Doctor of Philosophy (p. 140)
- Construction Engineering & Management, Minor (p. 141)
- Environmental Engineering, Bachelor of Science (p. 142)
- Sustainability in the Built Environment, Minor (p. 143)

Civil Engineering, Bachelor of Science

College of Engineering

The civil engineering profession is responsible for designing, building, operating and maintaining the physical infrastructure and protecting the natural environment that together support human society in an economically and environmentally sustainable manner. The need to predict and mitigate the impact of complex human- and nature-induced stresses on large-scale, geographically-distributed systems has never been more evident than now. These challenges and inevitable societal

changes result in a need to develop and adopt new technologies and improved efficiency into the infrastructure.

The Civil Engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed. Exclusive of General Education units, the minimum number of units required for the Civil Engineering major is 154.

Areas of Specialization

Environmental Engineering

Environmental Engineering focuses on understanding and management of physical, chemical, and biological processes in natural and engineered systems. Areas of emphasis include improvement of air, land, and water quality in the face of increasing population, expanding industrialization, and global climate change. Examples of environmental engineering include innovative analysis and design of air, water, wastewater, and solid waste treatment systems; mathematical modeling of natural and engineered systems; life cycle analysis; sampling, analysis, transport and transformation of natural and anthropogenic pollutants; and modeling of air pollutant emissions.

Suggested Advisors

H.N. Bischel, C.E. Bronner, C. D. Cappa, R. Corsi, J.L. Darby, A. Kendall, M.J. Kleeman, F.J. Loge, J.R. Lund, J. Pena, S.G. Schladow, T.M. Young

Geotechnical Engineering

Geotechnical Engineering encompasses civil infrastructure and environmental problems that require characterization and utilization of geologic materials (soils and rocks) to develop, design, analyze and model engineered solutions. This includes, but is not limited to, foundations for buildings and bridges retaining structures, earthwork (e.g. dams, tunnels, highways), pavements, effects of earthquakes and other natural hazards (e.g. ground motions, liquefaction, soil-structure interaction, landslides, tsunamis), ground improvement methods (e.g. compaction, cement mixing), and geo-environmental problems (e.g. groundwater flow, subsurface contaminant transport and remediation).

Suggested Advisors

R.W. Boulanger, J.T. DeJong, J.T. Harvey, B. Jeremic, A. Martinez, K. Ziotopoulou

Structural Engineering & Structural Mechanics

Structural Engineering addresses the conception, design, analysis, construction, retrofit and modeling of all types of civil infrastructure, including buildings and bridges, dams, ports, highways, and industrial facilities subject to loadings ranging from gravity and earthquakes, to extreme environmental events, with consideration of safe, serviceable, and sustainable outcomes over the entire life-cycle. Structural Mechanics encompasses theories for solids and structures, and the associated methods of analysis, computation and materials characterization used in the practice of Structural Engineering. For both disciplines, materials of particular interest include steel, concrete, timber, advanced composites and particulate media.

Suggested Advisors

M. Barbato, J.E. Bolander, Y.H. Chai, L. Cheng, J.T. Harvey, B. Jeremic, A.M. Kanvinde, S.K. Kunnath, S.A. Miller, M.M. Rashid, N. Sukumar

Transportation Planning & Engineering

Transportation Engineering deals with the movement of people and goods in a manner consistent with society's environmental and socio-economic goals. Transportation engineering applies engineering, physical and mathematical sciences, economics, and behavioral social science principles to plan, analyze, design, and operate resilient and sustainable transportation systems, such as highways, transit, airfields and ports. Transportation planning involves the formulation and analysis of transportation policy, program, and project alternatives. Societal goals, budgetary constraints, socio-economic (such as safety, equity and mobility) and environmental (such as air and water quality, climate change, and clean energy) objectives, and technological feasibilities (such as vehicle, infrastructure, and information technologies) are considered.

Suggested Advisors

Y. Fan, J.T. Harvey, M.A. Jaller, A. Kendall, S. Nassiri, D. Sperling, H.M. Zhang

Water Resources Engineering

Water Resources Engineering includes hydrology, hydraulics, fluid mechanics, and water resources systems planning and design. Hydrology deals with quantifying and understanding all aspects of the hydrologic cycle, including the relationships between precipitation, runoff, groundwater, and surface water. Water quality and contaminant transport issues are linked to hydrologic conditions. Hydraulics and fluid mechanics deal with flows in pipes, open-channel water-distribution systems, and natural systems, such as lakes and estuaries. Water resources systems planning and design deals with the comprehensive development of water resources to meet the multiple needs of industry, agriculture, municipalities, recreation, and other activities.

Suggested Advisors

F.A. Bombardelli, J.L. Darby, A.L. Forrest, J.D. Herman, M.L. Kavvas, J.R. Lund, V.L. Morales, H.J. Oldroyd, S.G. Schladow, B.A. Younis

Additional information on areas of specialization and potential faculty advisors can be obtained from the departmental website.

UWP 104T	Writing in the Professions: Technical Writing	
Passing the Upper Division Composition Exam.		
Upper Division Requirements Subtotal		80-90
Total Units		150-164

¹ ECI 003 is designed for lower division students and is not open to upper division students; students who do not take this course will substitute 4 units of additional letter graded upper division Civil & Environmental Engineering (ECI) coursework; see Civil & Environmental Engineering Electives.

² May include ENG 102 or ENG 105. If both ENG 102 and ENG 105 are completed, 4 units will be considered towards the ECI electives. Also can include, but not exceed, a combination of 6 units from ECI 198 and ECI 199. A maximum of 4 units of upper-division coursework outside of Civil & Environmental Engineering may be considered on a petition basis. Please consult with the undergraduate staff advisor.

³ If ECI 003 was not completed in the Lower Division requirements, 20 units of electives are required.

Civil & Environmental Engineering, Master of Science

College of Engineering

M.S.

Civil & Environmental Engineering (<https://cee.engineering.ucdavis.edu/graduate/>); 530-752-1441

With over forty faculty members, over \$20 million in annual research expenditures and over 200 graduate students, the Department of Civil & Environmental Engineering integrates research, education and professional service in areas related to civil infrastructure and the environment. Graduate students benefit from close working relationships with professors who are the leading international experts in their field. Students pursuing their M.S. degrees have the opportunity to follow a more coursework-focused track or research-focused track.

Graduate students pursuing their M.S. will specialize in one of five core areas: environmental, geotechnical, structural/structural mechanics, transportation or water resources engineering. Our graduates go on to serve the profession and academia by advancing the leading edge of fundamental knowledge, as well as engineering practice.

Financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid. Over 80% of the graduate students in our program are either fully or partially supported through one or more of these paths.

Research Area Highlights

- Alternative fuel transportation infrastructure
- Earthquake engineering
- Environmental engineering
- Environmental planning and management
- Geotechnical engineering
- Hydraulics and fluid mechanics
- Hydrology
- Structural engineering
- Structural health monitoring
- Structural mechanics
- Systems planning and design
- Transportation engineering
- Transportation planning and design
- Water resources engineering

Research Facilities & Partnerships

- Air Quality Research Center
- Center for Bio-mediated & Bio-inspired Geotechnics
- Center for Geotechnical Modeling
- Center for Watershed Sciences
- Center for Water-Energy Efficiency
- Institute of Transportation Studies
- J. Amorochio Hydraulics Laboratory (JAHL)

Civil & Environmental Engineering, Doctor of Philosophy

College of Engineering

Ph.D.; Designated Ph.D. emphasis available in Biotechnology

Civil & Environmental Engineering (<https://cee.engineering.ucdavis.edu/graduate/>); 530-752-1441

With over forty faculty members, over \$20 million in annual research expenditures and over 200 graduate students, the Department of Civil & Environmental Engineering integrates research, education and professional service in areas related to civil infrastructure and the

environment. Graduate students benefit from close working relationships with professors who are the leading international experts in their field. They are supported in their study and research by robust funding, and they have access to state-of-the-art research facilities within the program and in interdisciplinary CEE faculty-led centers across campus. Our graduates go on to serve the profession and academia by advancing the leading edge of fundamental knowledge, as well as engineering practice.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid. Nearly all Ph.D. students are fully supported through one or more of these paths, or through external fellowships.

Research Area Highlights

- Alternative fuel transportation infrastructure
- Earthquake engineering
- Environmental engineering
- Environmental planning and management
- Geotechnical engineering
- Hydraulics and fluid mechanics

Construction Engineering & Management, Minor

College of Engineering

California's construction industry continues to experience high growth as it continues to accommodate an increasing population and as it faces renewal of much of the infrastructure built by previous generations. At the same time, the construction industry faces challenges of scarce materials, a need for decreased environmental impact in terms of the construction process itself and operation of the completed project, and a

more complex operational, regulatory and social context in which it must do its work.

The purpose of this minor is to better prepare professional civil and environmental engineers to thrive in this challenging industry and to improve the efficiency of delivery and sustainability of the civil infrastructure in the state through their future efforts.

It is expected that engineering students will enroll in this minor program, including Civil, Mechanical, Chemical, and Materials Science majors. Students from other colleges can also complete this minor, but it is recommended that they review the requirements with one of the advisors before enrolling. Students who are interested in the construction of infrastructure in their discipline can make use of the skills that will be learned through the completion of this minor.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements, with an overall GPA of 2.000 or better. All prerequisites for courses must have been taken for a letter grade; no grade lower than a C- will be accepted in any prerequisite course. Students must complete ENG 106 with a C- or better.

Course Overlap

Please refer to your college's policies regarding overlap rules.

The online Minor Declaration form is available via the Online Advising Student Information System (OASIS) (<https://students.ucdavis.edu/>). For more information, contact the undergraduate advisors (civiladvising@ucdavis.edu) in the Department of Civil & Environmental Engineering.

Transcript notation must be requested no later than the quarter preceding graduation, and will appear as a minor in Construction Engineering & Management.

Environmental Engineering, Bachelor of Science

College of Engineering

Environmental engineers are responsible for designing processes and infrastructure to ensure society has access to safe water, clean air, and healthy ecosystems. Environmental engineers apply knowledge from physics, chemistry, biology and the social sciences to problems in a variety of areas including water & wastewater treatment and ecosystem remediation, analysis of chemical fate and transport in the natural environment, and modeling of hydrologic & atmospheric flows. As climate change creates new challenges, such as in the form of droughts and intense weather events, the field of environmental engineering evolves to meet society's needs. As an environmental engineering student at UC Davis, you will gain skills that enable you to design sustainable solutions for society.

The Environmental Engineering major started in 2017 and will undergo accreditation review in the 2021-2022 academic year. Therefore, students who are interested in majoring in environmental engineering are encouraged to consider a double major in civil engineering.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed. Exclusive of General Education units, the minimum number of units required for the Environmental Engineering major is 133 (70-75 units in lower division and 63-72 units in upper division).

Upper Division Required Courses Subtotal		64-72
Total Units		138-142

¹ ECI 003 is designed for lower division students and is not open to upper division students; students who do not take this course will substitute 4 units of additional letter graded upper division Civil & Environmental Engineering (ECI) coursework; see Civil & Environmental Engineering.

² If ECI 003 was not completed in the Lower Division requirements.

³ Up to 4 units.

Sustainability in the Built Environment, Minor

College of Engineering

The built environment plays an integral role in meeting society's most basic needs of shelter, security, mobility, community, and water & waste treatment, but it also contributes significantly to the sustainability challenges of climate change, pollution, resource consumption, and land use. As society and government policy increase pressure to reduce the environmental impacts of our everyday activities, individuals must increasingly understand how the built environment they design and maintain fits into the complex environmental and human system in which we live. The minor provides a guiding framework for educating individuals who will design and maintain our future built environment in the challenges and potential solutions for improved sustainability.

The minor is designed to develop students' awareness in the three core themes of sustainability: Engineering & Science, Social Context, and Policy & Economics. The aim is both to foster the social context of engineering and to attract students from a range of departments and programs across campus to grow trans-disciplinary interactions. Students are required to take ECI 123, as well as electives as specified in the three core themes.

The minor is designed to attract students from a range of departments and programs across campus, including, Environmental Science & Policy, Plant Sciences, Landscape Architecture, Design, Engineering, Community & Regional Development, Anthropology, Agriculture & Resource Economics, Atmospheric Science, Environmental Toxicology, Applied Biological Systems Technology, Geology, Hydrology and all disciplines of Engineering. Students enrolled in the minor will acquire fundamental skills and knowledge of the elements and integrated processes necessary for a sustainable built environment.

To complete this minor a student is required to:

1. Take ECI 123 (4 units); and
2. Take one additional course, of at least 3 units each, in each of three core thematic areas of the minor: Engineering & Science, Social Context, and Policy & Economics; and
3. Take at least one additional course in any of the three core thematic areas of the minor (can be any number of units); and
4. Complete at least 14 units of coursework from the core thematic areas of the minor. May include 1-3 units of ECI 198 sustainable design project, by approval of advisor.

Successful completion of the minor requires both a minimum overall UC GPA of 2.000 and a minimum 2.000 GPA for the coursework completed for the minor, with no grade lower than a C- for any course used for the minor. All courses must be taken for a letter grade. Up to 4 units can be lower division, all other units must be upper division. Substitute courses in the thematic areas may be proposed by students for the minor and are considered on a case-by-case basis.

Please refer to your college's policies regarding course overlap rules.

The Minor Declaration form is available via the Online Advising Student Information System (OASIS) (<https://students.ucdavis.edu/>). For more information, please email the undergraduate advisors (civiladvising@ucdavis.edu) in the Department of Civil & Environmental Engineering.

Transcript notation must be requested no later than the quarter preceding graduation and will appear as a minor in Sustainability in the Built Environment.

Classics

College of Letters & Science

Program Director

Carey Seal, Ph.D.

Department Office

Classics Program; 211 Sproul Hall; 530-752-4999; Classics (<http://classics.ucdavis.edu>); Faculty (<https://classics.ucdavis.edu/faculty/>)

The Classics department offers a Classical Civilization A.B. (p. 144) and minors in Classical Civilization (p. 147), Greek (p. 147), and Latin (p. 148).

- Classical Civilization, Bachelor of Arts (p. 144)
- Classical Civilization, Minor (p. 147)
- Greek, Minor (p. 147)
- Latin, Minor (p. 148)

Classical Civilization, Bachelor of Arts

College of Letters & Science

The Major Program

Classical Civilization is an interdisciplinary major that examines the ancient Mediterranean cultures of Greece, Rome and the Near East, with courses offered on the languages, history, literature, religions, myths, art and archaeology of these societies, their achievements in rhetoric and philosophy, and their political and social institutions. Minor programs in Classical Civilization, Greek, and Latin, and many General Education courses are also offered.

The Program

The major has two tracks: (1) Classical & Mediterranean Civilizations, and (2) Classical Languages & Literatures. The core of both major tracks consists of two years of Latin or Greek, the introductory sequence on the ancient Mediterranean world (CLA 001, CLA 002, CLA 003 or CLA 004), the advanced seminar (CLA 190), and a number of electives. The Classical & Mediterranean Civilization track allows students to choose their electives from a broadly balanced program in history, art and archaeology, literature, philosophy and rhetoric. The Classical Languages & Literatures track focuses more intensively on language and literature, requiring the study of two languages and allowing fewer electives. Students planning to go on to graduate work in Classics should take Track 2 and study as much Latin and Greek as possible. They should make a point of talking to an advisor early in their undergraduate program. They are also advised to acquire a reading knowledge of French or German.

Career Opportunities

A degree in Classical Civilization represents a solid liberal arts education that provides an excellent foundation for a wide variety of careers. In the last twenty-five years, many majors have applied to law or medical schools and nearly all have been accepted. Additional career options include library and museum work, teaching, journalism, and graduate study in Classics, art, archaeology, history, literature, philosophy, and religion.

Major Advisors

Consult the department office.

Honors Program

Candidates for high or highest honors in Classical Civilization must write a senior honors thesis under the direction of a faculty member in Classics. Potential candidates for the honors program must enroll

in Classics CLA 194HA and CLA 194HB, normally during the first two quarters of the senior year. Enrollment is limited to upper division students with a minimum of 135 units, and a 3.500 grade point average in courses in the Classical Civilization major. For further information, students should consult with the major advisor or program director. The requirements for the honors program are in addition to the regular requirements for the major in Classical Civilization.

Graduate Study

The Department offers a master's degree in Classics with emphasis on either Greek or Latin; however, admission into the graduate program has been suspended.

Prerequisite Credit

Credit will not normally be given for a lower division course in Latin or Greek if it is the prerequisite of a course already successfully completed. Exceptions can be made by the Program Director only.

Clinical Research, Master of Advanced Studies

School of Medicine

Graduate Study

The Graduate Group in Clinical Research (GGCR) is an interdisciplinary graduate group in clinical and translational research offering a Master of Advanced Study degree in Clinical Research. The GGCR provides a solid clinical/translational, patient-oriented research foundation for junior faculty, clinical and post-doctoral fellows, medical students, and other health professionals interested in clinical research. The program centers around three core elements: didactic instruction, mentored research, and the capstone project.

The M.A.S. degree requirements include a core intensive curriculum and depends on a cohesive cohort model that provides access to collaborate with researchers across multiple disciplines. Students graduate with the skills necessary to design, conduct, and analyze translational research studies, and to interpret, apply and disseminate research findings. Instruction begins with two summer courses which are followed by a one- or two-year core curriculum plan. Electives can be tailored to best meet each scholar's career development needs.

- Cognitive Science, Bachelor of Arts (p. 148)
- Cognitive Science, Bachelor of Science (p. 150)

Cognitive Science, Bachelor of Arts

College of Letters & Science

The Major Programs

The Cognitive Science major is designed to provide a broad interdisciplinary approach to the study of mind that includes courses from different departments and attracts students with a variety of interests. It emphasizes a multifaceted approach to the study of the mind integrating concepts and techniques from psychology, artificial intelligence, linguistics, neurology, philosophy and other relevant fields.

For students interested in the liberal arts the Cognitive Science major can be pursued as a Bachelor of Arts (A.B.) program. Alternatively, it can be pursued as a Bachelor of Science (B.S.) program for students with a stronger interest in the mathematical, neurological and computational foundations of the discipline. The main objective of both programs is to give the student a broad grounding in the integrated sciences of the mind and to connect approaches from different fields. Students must complete a number of core courses for the degree, as well as a number of specialty courses on such wide-ranging topics as logic for artificial intelligence, computational linguistics, cognitive neuroscience, animal cognition and the psychology of music.

Career Alternatives

A degree in Cognitive Science provides broad intellectual foundations useful for careers in a variety of areas, including teaching, business, social work/counseling and the information technology industry. Undergraduate education in cognitive science also prepares the student for graduate study in appropriate subfields of psychology, linguistics, philosophy and informatics. It is also suitable training for pre-medicine, pre-law, and pre-management students.

Cognitive Science, Bachelor of Science

College of Letters & Science

The Major Programs

The Cognitive Science major is designed to provide a broad interdisciplinary approach to the study of mind that includes courses from different departments and attracts students with a variety of interests. It emphasizes a multifaceted approach to the study of mind that integrates concepts and techniques from psychology, artificial intelligence, linguistics, neurology, philosophy and other relevant fields.

For students interested in the liberal arts the Cognitive Science major can be pursued as a Bachelor of Arts (A.B.) program. Alternatively, it can be pursued as a Bachelor of Science (B.S.) program for students with a stronger interest in the mathematical, neurological and computational foundations of the discipline. The main objective of both programs is to give the student a broad grounding in the integrated sciences of the mind and to connect approaches from different fields. Students must complete a number of core courses for the degree, as well as a number of specialty courses on such wide-ranging topics as logic for artificial intelligence, computational linguistics, cognitive neuroscience, animal cognition and the psychology of music.

Career Alternatives

A degree in Cognitive Science provides broad intellectual foundations useful for careers in a variety of areas, including teaching, business, social work/counseling and the information technology industry. Undergraduate education in cognitive science also prepares the student for graduate study in appropriate subfields of psychology, linguistics, philosophy and informatics. It is also suitable training for pre-medicine, pre-law, and premanagement students.

Bachelor of Science (B.S.) program students select to pursue either the Computational Emphasis (Emphasis 1) or the Neuroscience Emphasis (Emphasis 2).

Major Advisors

Staff advisors are located in Young Hall; cogsciadvising@ucdavis.edu; 530 752 5104. For more information on how to make an appointment or join Drop-In Advising, see Yellow Cluster Undergraduate Advising Center (<https://yellowcluster.ucdavis.edu/advising/undergraduate/>).

Communication, Bachelor of Arts

College of Letters & Science

The Major Program

The major in communication focuses upon human symbolic behavior in interpersonal and mediated contexts.

The Program

The program of study in communication examines communication processes at several different levels of analysis. Courses dealing with communication at the individual, interpersonal, organizational and societal levels of analysis are offered. The emphasis in the program reflects the changing focus in the discipline and society toward computer-mediated communication, quantitative behavioral science and cognitive science. Classes addressing such topics as communication and cognition, message systems, interpersonal communication, nonverbal communication, persuasion, organizational communication, mass media effects, computer-mediated communication and public communication campaigns explore communication at these levels of analysis. Related social science courses are also part of the major.

Major Advisors

Contact department.

Career Alternatives

Communication graduates have found careers in such fields as broadcast and print journalism, administration, sales, management, politics and government, education, social work, social media, and public relations. A communication degree is also excellent preparation for law school or other graduate programs.

Grading Recommendation

Although not required, it is recommended that all courses offered in satisfaction of the major, except variable-unit courses, be taken for a letter grade.

Graduate Study

The Department of Communication offers programs of study and research leading to M.A. and Ph.D. degrees in Communication. Detailed information may be obtained from the Graduate Advisor, Department of Communication.

Comparative Literature, Bachelor of Arts

College of Letters & Science

The Major Program

Comparative Literature is a dynamic major whose own self-definition is constantly shifting. Once mostly limited to the study of western European literature and its Greco-Roman classical past, today Comparative

Literature has become a global interdisciplinary study of literature in original languages and other media (including cinema, television, fine arts, and opera, for example). Thus, we can define Comparative Literature as the study of literature and culture across national boundaries and throughout historical time.

The Program

Both the major and the minor programs in Comparative Literature allow students to combine courses in one or more national literature departments with courses in Comparative Literature. The introductory course sequence (COM 001-COM 004) provides both an overview of ancient to contemporary literature and film and offers intensive practice in analytical thought. In addition, any one of the courses in the sequence satisfies the university composition requirement. All readings in undergraduate Comparative Literature courses are in English, but majors take upper division courses in at least one foreign literature in the original language.

Students majoring in Comparative Literature choose a first and second literature of concentration, one of which may be English. After the introductory sequence, each student's major course work is divided between courses in the two literatures of concentration and Comparative Literature courses. These Comparative Literature courses encourage students to take a broad view of a historical period, a theme, a genre, or a literary movement. The wide variety of options in the program permits great flexibility and encourages interdisciplinary connections among literature and philosophy, psychology, history, and the arts. Each student's plan of study must be approved by the major advisor at the beginning and end of each calendar year.

Advising

All Comparative Literature majors and minors must consult with their advisor, individually, at least once at the beginning and once at the end of each academic year.

Major Advisor

Consult the Department office.

Career Alternatives

A Comparative Literature major offers an excellent enhancement to pre-professional training, preparing students for graduate study in medicine, dentistry, veterinary medicine, and other science fields as well as law and business, besides of course journalism and publishing, teaching, or graduate study in literature.

Honors & Honors Program

Students, who meet the grade point requirement for graduation with honors and complete the requirements established by the College of Letters and Science, may be recommended by the department for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major and in the honors project in particular. Entrance into the honors program requires that a student have completed at least 135 units with a minimum grade point average of 3.500 in courses counted toward the major.

Candidates must write a senior thesis under the direction of a faculty member approved by the major advisor. For this purpose, in addition to fulfilling all other major requirements, honors candidates must enroll in 6 units of COM 194H during the first two quarters of the senior year.

Teaching Credential Subject Representative

See the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

Education Abroad Options

The department of Comparative Literature encourages students to study abroad, in the Summer Abroad program, the Quarter Abroad Program, or the Education Abroad Program. With the approval of a major advisor, applicable courses taken abroad may be accepted in the major or minor programs.

Graduate Study

The Comparative Literature Program offers the Ph.D. degree with a strong emphasis on individual research under the supervision of a faculty member. Candidates for the Ph.D., in addition to research of a comparative nature, study three literatures (one of which may be English and/or American) in the original languages, acquiring an extensive knowledge of the overall development of one. Students may choose to focus on a special topic instead of on a third literary tradition.

Within this framework, each student's program will be tailored to individual interests, and may center on a major historical period, such as the Renaissance or the modern age; a genre, such as lyric poetry, epic, drama, or the novel; or any other special emphasis approved by the Graduate Advisor.

Preparation

For admission to the Ph.D. Program candidates should have an undergraduate major in literature and reading ability in three foreign languages. The Group requires three letters of recommendation and a sample of recent written work, and it is recommended that students submit their GRE scores.

Code	Title	Units
Preparatory Subject Matter		
COM 001	Major Works of the Ancient World	4
or COM 002	Major Works of the Medieval & Early Modern World	
COM 003	Major Works of the Modern World	4
or COM 004	Major Works of the Contemporary World	
Two other lower division courses in Comparative Literature; selected from 001-053C excluding the 010 series; cannot include the two required courses in the 001-004 series:		8
COM 005	Fairy Tales, Fables, & Parables	
COM 006	Myths & Legends	
COM 007	Literature of Fantasy & the Supernatural	
COM 008	Utopias & Their Transformations	
COM 009	The Short Story & Novella	
COM/GER 011	Travel & the Modern World

Comparative Literature, Master of Arts

College of Letters & Science

Graduate Study

Thesis-Based MA Program in Comparative Literature

The thesis-based M.A. program in Comparative Literature prepares students for doctoral research or professional employment. Our graduate students are supported by a large group of core and affiliated faculty in Comparative Literature. Our faculty hold cross-appointments with the departments of East Asian Languages & Cultures, English, French & Italian, German & Russian, Middle East/South Asian Languages, and Religious Studies. We welcome applications from students with a strong humanities background who wish to strengthen their expertise in comparative literature and criticism.

The program combines core courses on the theory and practice of comparison with broad opportunities for work in specific languages and literatures. Students will write a Masters thesis with the support of a thesis committee and a collaborative thesis-writing group.

Preparation

Consideration for program admission requires evidence of the following:

- A strong undergraduate record in any humanities major.
- Fluent reading, writing, and speaking knowledge in one language that is not the student's native language.
- A clear commitment to the study of a second language that is not the student's native language.

Please see Comparative Literature Graduate Admissions (<https://complit.ucdavis.edu/graduate-admissions/>) for deadlines and application requirements.

Graduate Advisor

Consult the graduate advising office.

Comparative Literature, Doctor of Philosophy

College of Letters & Science

Graduate Study

The Comparative Literature Program offers the Ph.D. degree with a strong emphasis on individual research under the supervision of a faculty member. Candidates for the Ph.D., in addition to research of a comparative nature, study three literatures (one of which may be English and/or American) in the original languages, acquiring an extensive knowledge of the overall development of one. Students may choose to focus on a special topic instead of on a third literary tradition.

Within this framework, each student's program is tailored to individual interests, and may center on a major historical period, such as the Renaissance or the modern age; a genre, such as lyric poetry, epic, drama, or the novel; or any other special emphasis approved by the Graduate Advisor.

Preparation

For admission to the Ph.D. Program candidates should have an undergraduate major in literature and reading ability in three foreign languages. The Group requires three letters of recommendation and a sample of recent written work, and it is recommended that students submit their GRE scores.

Graduate Advisor

Matthew Farrens, Ph.D., Chairperson of the Department

Department Office

2063 Kemper Hall; 530-752-7004; Computer Science (<http://www.cs.ucdavis.edu>); Faculty (<http://www.cs.ucdavis.edu/people/faculty/>)

The Computer Science & Engineering Program

The Department of Computer Science administers two curricula: Computer Science & Engineering in the College of Engineering, and Computer Science in the College of Letters & Science. It also administers two minors: Computer Science in the College of Letters & Science, and Computational Biology in the College of Engineering. For information on the Computer Science curriculum and minor; see Computer Science.

Mission

The University of California, Davis, is, first and foremost, an institution of learning and teaching, committed to serving the needs of society. The Department of Computer Science contributes to the mission in three ways. First, its undergraduate and graduate education programs seek to educate students in the fundamental principles of computer science and the skills needed to solve the complex technological problems of modern society. The breadth of coursework provides a framework for life-long learning and an appreciation for multidisciplinary activities. Second, through its research programs, the department contributes to the development and progress of computer science, and software and information technology, to provide innovative, creative solutions for societal needs. Finally, the department disseminates its research to enhance collaborations with the public sector, further interdisciplinary interests that benefit society, and educate the public through publications, public service, and professional activities.

Department Objectives

Teaching—We seek to provide undergraduate students with a thorough understanding of the key principles and practices of computing, which include a strong theoretical background in mathematics, basic sciences, and engineering fundamentals and an ability to apply this knowledge to practical problems. We endeavor to provide students with

sufficient breadth to work creatively and productively in multidisciplinary work teams; this breadth, in its broadest context, will form the basis for an appreciation and interest in life-long learning. We provide students with the opportunities to design and conduct experiments, and to collect and analyze data in core, as well as more specialized, areas of computer science. We provide students with breadth in the humanities and social sciences so they learn to communicate effectively, understand professional and ethical issues in society, and appreciate the interrelatedness between computing and society. We educate graduate students to be our next generation of teachers or leaders in industry, or to pursue meaningful, creative research in industry, government, or academia.

Research—We develop and maintain research programs that produce fundamental scientific advances, as well as useful technological innovations, while simultaneously training the next generation of researchers and leaders in the field of computer science.

Objectives

We train graduates to practice computer science and engineering in a broad range of industries; we prepare interested graduates for graduate education or other professional degrees; we give students an understanding of computer software and hardware systems, and both theoretical and experimental approaches to problem-solving; we ready graduates for lifelong learning; and we encourage graduates to contribute to their profession and society.

- Computational Biology, Minor (p. 157)
- Computer Science & Engineering, Bachelor of Science (p. 157)
- Computer Science, Bachelor of Science (p. 159)
- Computer Science, Minor (p. 160)

Computational Biology, Minor

College of Engineering

The minor in Computational Biology will provide to students with engineering, physical science or biological science majors the foundations necessary to build efficient computational models and algorithms, use state-of-the-art techniques for scientific analysis and create scalable infrastructure environments for biological and biotechnological applications.

Minor Advisors

V. Filkov, D. Gusfield, P. Koehl, K. Gage, J. Sison, I. Tagkopoulos

Students must take a total of 19-24 upper division units, with two required courses and 11-12 units of upper division electives, as specified below. A minimum GPA of 2.000 is required for coursework in the minor. Students should note that most of the courses listed below have lower division prerequisites. In particular, required course ECS 122A has a prerequisite chain of ECS 020, ECS 036A, ECS 036B, and ECS 036C. No more than one course of upper division work will be permitted for overlap between any major and the minor.

Code	Title	Units
Required Courses		
ECS 122A	Algorithm Design & Analysis	4
ECS 124	Theory & Practice of Bioinformatics	4
Electives		

Choose 12-15 units: 12-15

Choose at least one biology course; 4 units minimum:	
MCB 121	Advanced Molecular Biology
MCB 124	Macromolecular Structure & Function
MCB 182	Principles of Genomics
EVE 100	Introduction to Evolution
EVE 101	Introduction to Ecology
EVE 102	Population & Quantitative Genetics
EVE 103	Phylogeny, Speciation & Macroevolution
EVE 131	Human Genetic Variation & Evolution
BIS 101	Genes & Gene Expression
BIS 104	Cell Biology
BIS 122	Population Biology & Ecology
Choose at least one computational or statistics course:	
ECS 130	Scientific Computation
ECS 132	Probability & Statistical Modeling for Computer Science
ECS 140A	Programming Languages
ECS 145	Scripting Languages & Their Applications
ECS 158	Programming on Parallel Architectures
ECS 160	Software Engineering
ECS 165A	Database Systems
ECS 170	Introduction to Artificial Intelligence
ECS 171	Machine Learning
ECS 177	Scientific Visualization
STA 130A	Mathematical Statistics: Brief Course
STA 141A	Fundamentals of Statistical Data Science
STA 141B	Data & Web Technologies for Data Analysis
STA 141C	Big Data & High Performance Statistical Computing
BIT 150	Applied Bioinformatics
BIS 132	(Discontinued)
Choose at least one computational biology and bioinformatics course:	
ECS 129	Computational Structural Bioinformatics
BIS 132	(Discontinued)
BIM 117	Modeling Strategies for Biomedical Engineering
BIT 150	Applied Bioinformatics

Total Units

20-23

Computer Science & Engineering, Bachelor of Science

College of Engineering

The Computer Science Engineering major prepares students to do further work in hardware, software, theory, or electronics, either in industry or in postgraduate study.

The primary differences between the Computer Science Engineering and the Computer Science majors are the extent of course work covering hardware and the flexibility of the curriculum. The Computer Science Engineering major develops a solid understanding of the entire machine, including hands-on experience with its hardware components. The

Computer Science major has some course work on hardware, at the digital-design level, on simulators. The Computer Science Engineering major has fewer free electives. The CS major's more generous electives make it easier to complete a minor or double major.

A key theme of the Computer Science Engineering curriculum is the hardware/software interaction, a theme reflected in the courses required and the orientation of the courses themselves.

The Computer Science & Engineering major provides students with a solid background in mathematics, physics, chemistry, and electronic circuits and systems, all supporting the computer hardware and computer software courses that constitute the focus of the curriculum.

Computer Science & Engineering Undergraduate Program

The Computer Science & Engineering program is accredited by the Engineering Accreditation Commission and the Computing Accreditation Commission of ABET (<http://www.abet.org>).

Exclusive of General Education units, the minimum number of units for the Computer Science & Engineering major is 144.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

College of Engineering

Graduate Study

The Graduate Group in Computer Science offers programs of study leading to M.S. and Ph.D. degrees in Computer Science. The diverse expertise of the faculty brings a wide variety of research interests to the program. Research strengths lie in algorithms, artificial intelligence, computational biology, computer architecture, computer graphics and visualization, computer vision, computer science education, computer security and cryptography, computer networks, data science, database systems, machine learning, molecular computing, nanotechnology, natural language processing, network science, parallel and distributed systems, program specifications and verification, programming languages and compilers, quantum computing, scientific computation, social and ethical issues of computing, and software engineering. Interdisciplinary research in computer science is encouraged.

Preparation

Normal preparation for the program is a bachelor's degree in either computer science or in a closely related field (such as electrical engineering or mathematics, with substantial course work in computer science). Applications are also considered from students with outstanding records in other disciplines. Ph.D. students must pass a qualifying oral examination and complete a dissertation demonstrating original research in an area approved by the Graduate Group.

Cultural Studies, Master of Arts

College of Letters & Science

Graduate Study

The Graduate Group in Cultural Studies at UC Davis offers an interdisciplinary approach to the study of culture and society that highlights how sexuality, race, ability, citizenship, gender, nationality, class, and language organize embodied identities, social relations, and cultural objects. With the close guidance and supervision of a faculty committee, students in the program pursue interdisciplinary research in areas including studies of comparative and critical race, ecocriticism, fashion, queer theory, media and popular cultural representation, science

and technology, Marxist theory, travel, and tourism, food, physical and cognitive abilities, cultural geography, transnational culture and politics, globalization, religion, rhetoric, performance, and critical theory. Although both the Ph.D. and M.A. are offered, applications are only accepted for the Ph.D. program, and the M.A. is available as a terminal degree in route to the Ph.D.

Preparation

Normal preparation for the program is a bachelor's degree in a related field. Terminal M.A. students must pass an examination. Ph.D. students must pass a qualifying examination, a comprehensive examination, and complete a dissertation demonstrating original research in an area approved by the Graduate Group. In addition to the standard UC Davis graduate application (which requires a statement of purpose), we also require three letters of recommendation, transcripts, GRE scores, writing sample (ten-page minimum, not exceeding twenty pages), and a fellowship application.

Graduate Advisors

Design, Bachelor of Arts

College of Letters & Science

The Major Program

The Department of Design offers a creative, challenging, and flexible approach to the study of design with emphasis on socially responsible, human centered, and sustainable practice.

The Program

Foundation courses: Introduction to Design; Design Drawing or Drafting and Perspective, Form & Color, and Graphic Design & Computer Technology; and one class in Design History/Theory/Criticism from the DES 040 series; are required of all design majors. Additional coursework in the student's area of interest is required for the Preparatory Subject Matter. Depth Subject Matter courses provide: (1) further exploration of design principles and conceptual, formal and technical issues; (2) conceptual and critical development through a series of history and theory classes; (3) in-depth studio experience with projects that demonstrate a research-based, iterative design process. Optional capstone class. A more detailed explanation is available through the Design Advising office in 101 Art Building; 530-752-0890.

Portfolios

Portfolios are not required for admission to the major. However, it is highly recommended that design students maintain an updated portfolio of visual work for faculty and professional evaluation and consideration for enrollment in specialized courses, including independent study, group study and internship.

Internships, Careers, & Study Abroad

Design students are encouraged to supplement their coursework with internships in design firms, museums, and design-related businesses. Design graduates go directly from this program into further graduate study, or professional work including exhibition, fashion, information, interior architecture & product (lighting & furniture), textiles, visual communications (digital, environmental & print), and sustainable design. In addition, students have become entrepreneurs through freelance and commissioned work in many related areas. The Department of Design encourages students to experience design education abroad through a variety of sponsored programs.

Total Units	72

Design, Master of Fine Arts

College of Letters & Science

The M.F.A. in Design at UC Davis is a two-year program that encourages interdisciplinary approaches through research and practice aligning with social and environmental responsibility. We offer graduate students a unique opportunity to work with faculty in the Department of Design and across departments in one of the nation's top public research universities. Design faculty expertise includes design theory, exhibition, fashion, history, information, interactivity, interior architecture, immersion, lighting, product, textiles, time-based, visual communication, wearables, and more. Students are encouraged to build connections across campus to expand perspectives and deepen understandings. Students' progress through core courses alongside their cohort members while advancing

their individual research. Core courses are augmented by graduate-level independent and group studies and upper-division undergraduate level electives. The M.F.A. program culminates in a written- and project-based thesis publicized in a major graduate exhibition. The program is committed to equity, diversity, inclusion and public engagement.

For more information, see MFA in Design (<http://arts.ucdavis.edu/design-graduate-program/>).

Program Contact

Melany Miners (mjminers@ucdavis.edu), Graduate Program Coordinator (Art History, Art Studio, Design, & Dramatic Art); 530-752-8710.

Designated Emphasis, Ph.D

Graduate Studies

This is a partial list. For more information, see Designated Emphases (<https://grad.ucdavis.edu/designated-emphases/>).

- Biotechnology, Designated Emphasis (p. 164)
- Computational Social Science, Designated Emphasis (p. 164)
- Critical Theory, Designated Emphasis (p. 164)
- Feminist Theory & Research, Designated Emphasis (p. 164)
- Global Nutrition, Designated Emphasis (p. 165)

Biotechnology, Designated Emphasis

College of Agricultural & Environmental Sciences

(Office of Research)

Abhaya Dandekar, Ph.D., Chairperson

Department Office

302 Green Hall; 530-752-1048; Designated Emphasis in Biotechnology (<https://deb.ucdavis.edu/>); Faculty (<https://deb.ucdavis.edu/current-deb-faculty/>)

The Designated Emphasis in Biotechnology (DEB) is an inter-graduate group program that allows Ph.D. students to receive and be credited for training in the area of biotechnology. Currently, there are 29 STEM graduate programs affiliated with the DEB. Coursework and program activities provide a basic understanding of the “business of biotech” and common platform technologies, develop transferable professional skills informed by interactions with industry partners, and prepare students for a diverse range of biotech-related careers. The UC Davis Biotechnology Program (<https://biotech.ucdavis.edu/>) is the administrative home for this program.

Computational Social Science, Designated Emphasis

College of Letters & Science

Martin Hilbert, Ph.D., Chairperson of the Program

Program Office

Communication; 370 Kerr Hall; 530-752-3464; Computational Social Science (<http://css.ucdavis.edu>); Faculty (<https://css.ucdavis.edu/people.html>)

Graduate Study

Computational social science provides scholars with the tools to deepen the understanding of long-standing questions in the social sciences, as well as explore new ones. The DE in Computational Social Science is both interdisciplinary in terms of requiring foundations in computational methods, data analysis, and social science theory, and it is multidisciplinary in terms of blurring the traditional boundaries between disciplines in the social sciences. This DE allows students with computational and mathematical skills to deepen their understanding of social science theory and to study unanswered social science research questions; and it allows students from the social sciences to improve their analytical skills in areas like big data analysis, computer simulations, network analysis and machine learning.

Graduate Advisor

Consult Communication Program office.

Critical Theory, Designated Emphasis

College of Letters & Science

Kathleen Frederickson, Ph.D., Chairperson of the Program

Program Office

207 Sproul Hall; 530-752-2115; Critical Theory (<http://crittheory.ucdavis.edu>)

Committee in Charge

Executive Committee (<https://crittheory.ucdavis.edu/people/>); Faculty (<http://crittheory.ucdavis.edu/people/>)

Graduate Study

The program in Critical Theory offers study and research leading to the Ph.D. with a designated emphasis in Critical Theory. The program provides theoretical emphasis and interdisciplinary perspective to students already preparing for the Ph.D. in one of 14 participating graduate programs (Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, History, Music, Psychology, Sociology, Spanish, Study of Religion, and Performance Studies). Students complete all requirements for the Ph.D., including the dissertation, in one of the participating departments. Minimum coursework for the Critical Theory Designated Emphasis consists of four courses. The first three of these, CRI 200A, CRI 200B, and CRI 200C are taught by affiliated faculty, with CRI 200A normally being taken first. For the fourth course, students have the option of taking another section of CRI 200B or an approved course from any affiliated department.

Graduate Advisor

Consult Critical Theory Program (<http://crittheory.ucdavis.edu>) office.

Feminist Theory & Research, Designated Emphasis

College of Letters & Science

Rana Jaleel, Ph.D., Advisor

Program Office

1200 Hart Hall; 530-752-6429; Gender, Sexuality & Women's Studies (<http://gsws.ucdavis.edu/welcome/>)

Graduate Study

The Gender, Sexuality and Women's Studies Program at UC Davis offers a Designated Emphasis in Feminist Theory & Research. Currently, graduate students in the following sixteen affiliated Ph.D. programs are eligible to participate: Anthropology, Comparative Literature, Cultural Studies, Education, English, French, German, Geography, History, Native American Studies, Nursing, Performance Studies, Psychology, Sociology, Spanish, and the Study of Religion.

The Designated Emphasis in Feminist Theory & Research affords graduate students in affiliated programs the opportunity to augment their Ph.D. in a given discipline with a specialization in Feminist Theory & Research. Typically a doctoral student in good standing may seek admission to the Designated Emphasis in Feminist Theory & Research and enroll in Designated Emphasis in Feminist Theory & Research courses. Those students in affiliated Ph.D. programs who complete the requirements of the Designated Emphasis will have this noted on their transcripts and their Ph.D. diploma will note the "Special Emphasis in Feminist Theory & Research."

Students must complete all the requirements for the Ph.D. in their home department. The requirements for the Designated Emphasis in Feminist Theory & Research are the successful completion of the two core courses, Women's Studies WMS 200A & WMS 200B, and two additional courses focusing on gender, sexuality and women's studies; one in the student's home department and one outside their home department. A member of the DE affiliated faculty must be a member of the student's qualifying examination. As with the Qualifying Exam, one member of the candidate's dissertation committee must be a member of the DE. Analysis of gender or sexuality is expected to be a central component of both the student's qualifying examination and doctoral research.

Students should consult with the Chair of the Designated Emphasis in Feminist Theory & Research before enrolling in a graduate course for which they wish to receive credit to ensure that it will count toward fulfilling the requirements of the Designated Emphasis. If possible, please bring a copy of the syllabus or an expanded course description to your meeting.

Graduate Advisor

Rana Jaleel (rmjaleel@ucdavis.edu); 1200 Hart Hall; 530-752-6429

Global Nutrition, Designated Emphasis

Reina Engle-Stone, Ph.D., Chair

Program Office

3253 Meyer Hall; 530-752-1992; Global Nutrition DE (https://globalnutrition.ucdavis.edu/academics/designated_emphasis/); Faculty (<https://globalnutrition.ucdavis.edu/people/faculty/>)

Graduate Study

The Institute for Global Nutrition coordinates specialized course work and research leading to the Designated Emphasis in Global Nutrition for students in various graduate programs. The program focuses on both theoretical and practical issues concerning the identification, treatment, and prevention of human nutritional problems in low-income countries and in disadvantaged groups in the United States. Students enrolled in the Designated Emphasis are expected to (1) complete the course requirements already established by their respective graduate programs,

(2) participate in a weekly advanced seminar in international and community nutrition, (3) complete additional core courses in international nutrition (NUT 219A, NUT 219B, NUT 258) and selected courses in the related disciplines of epidemiology, statistics, and social and behavioral sciences, and (4) conduct their dissertation research on a relevant topic under the supervision of a professor who is a member of the Institute for Global Nutrition.

Students accepted into the following doctoral programs are automatically eligible to participate in the Designated Emphasis: Nutrition, Agricultural & Resource Economics, Epidemiology, Anthropology, Geography, and Human Development. Students from other programs may also be accepted by special request to the Chair. Upon graduation, students receive a Ph.D. in their major field, with specific recognition for the Designated Emphasis in Global Nutrition.

Environmental Geology, Minor

College of Letters & Science

The minor in Environmental Geology examines the multidisciplinary factors of geology and related earth science fields, and planning and resources-oriented programs. Students in the minor are encouraged to participate in internship programs that assist them in solidifying the Environmental Geology minor with their Geology major or other major field areas that include geologic components.

Students majoring in **Geology** may elect to complete a minor in Geophysics, Environmental Geology, or Oceanography. They may not complete a minor in Geology.

Students majoring in **Marine & Coastal Science** may elect to complete a minor in Geology, Geophysics, or Environmental Geology. They may not complete a minor in Oceanography.

The minor is sponsored by the Department of Earth & Planetary Sciences (p. 165).

Advising

Geology, Bachelor of Arts

College of Letters & Science

"Civilization exists by geological consent—subject to change without notice." — Will Durant

Geology is the study of the Earth, and in particular its history, structure, and the processes that have molded our planet and its biosphere. Geology involves the origin of continents & ocean basins, earthquakes & volcanoes, variations in global climate, and how these physical changes impact the evolution of life. All of these planetary processes are viewed through the prism of "deep time," a perspective unique to geologists and one that distinguishes geology from most of the other physical sciences.

A significant component of geology is oriented toward the interaction between humans and the Earth. This aspect includes the study of resources such as minerals, oil, and water; identification & mitigation of Earth hazards such as earthquakes, landslides, floods, and volcanic eruptions; identification & mitigation of polluted ground water; land use planning; and the study of ancient & modern climate change.

The Program

Students interested in becoming professional geologists or continuing their geological studies at the graduate level should choose the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into pre-college teaching. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and in-depth program of study.

Undergraduate Research

The geosciences span many disciplines at UC Davis, and students have opportunities to participate in undergraduate research (<https://eps.ucdavis.edu/students/undergrad/gel/internships/>) in a variety of interest areas. Many students choose to complete a senior thesis to develop their research and writing skills during their senior year.

Internships & Careers

A degree in Geology provides students with knowledge and practical experience needed to pursue careers (<https://eps.ucdavis.edu/students/>)

careers/) in the geosciences (government, private sector, research, teaching). The major program includes flexibility to participate in research, internships, and fieldwork to help prepare students for these career paths.

Graduate Study

The coursework, research and internship opportunities, and fieldwork requirements in the Geology major help prepare students to enter graduate programs (<https://eps.ucdavis.edu/students/careers/gradschool/>) to continue their studies and prepare for their career. Students should meet with advisors and faculty to build a strong application for graduate school through additional independent research or other co-curricular involvements.

Global Learning in Geology

Consider studying or interning abroad through programs available through the Global Learning Hub (<https://eps.ucdavis.edu/students/undergrad/gel/studyabroad/>).

Get Involved

Find your community (<https://eps.ucdavis.edu/students/undergrad/gel/involved/>) through clubs, events, seminars, and workshops relating to geoscience.

Advising

Visit the staff major advisor (<https://eps.ucdavis.edu/students/undergrad/advising/>) for help navigating minor requirements and planning for your degree. Visit the faculty major advisors (<https://eps.ucdavis.edu/students/undergrad/advising/>) for additional advice on courses, careers, and graduate school.

Geology, Bachelor of Science

College of Letters & Science

"Civilization exists by geological consent—subject to change without notice." — Will Durant

Geology is the study of the Earth, and in particular its history, structure, and the processes that have molded our planet and its biosphere. Geology involves the origin of continents & ocean basins, earthquakes & volcanoes, variations in global climate, and how these physical changes impact the evolution of life. All of these planetary processes are viewed through the prism of "deep time," a perspective unique to geologists and one that distinguishes geology from most of the other physical sciences.

A significant component of geology is oriented toward the interaction between humans and the Earth. This aspect includes the study of resources such as minerals, oil, and water; identification & mitigation of Earth hazards such as earthquakes, landslides, floods, and volcanic eruptions; identification & mitigation of polluted ground water; land use planning; and the study of ancient & modern climate change.

The Program

Students interested in becoming professional geologists or continuing their geological studies at the graduate level should choose the Bachelor of Science degree program. The Bachelor of Arts program is for students interested in an interdisciplinary program of study, or who plan to go into pre-college teaching. The upper division electives are not restricted to geology courses but must be chosen to provide a relevant, coherent, and in-depth program of study.

Undergraduate Research

The geosciences span many disciplines at UC Davis, and students have opportunities to participate in undergraduate research (<https://eps.ucdavis.edu/students/undergrad/gel/internships/>) in a variety of interest areas. Many students choose to complete a senior thesis to develop their research and writing skills during their senior year.

Internships & Careers

A degree in Geology provides students with knowledge and practical experience needed to pursue careers (<https://eps.ucdavis.edu/students/careers/>) in the geosciences (government, private sector, research, teaching). The major program includes flexibility to participate in research, internships, and fieldwork to help prepare students for these career paths. The requirements for a B.S. in Geology satisfy the coursework required for the Professional Geologist licensing process in the State of California.

Graduate Study

The coursework, research and internship opportunities, and fieldwork requirements in the Geology major help prepare students to enter graduate programs (<https://eps.ucdavis.edu/students/careers/gradschool/>) to continue their studies and prepare for their career. Students should meet with advisors and faculty to build a strong application for graduate school through additional independent research or other co-curricular involvements.

WFC 102	Field Studies in Fish Biology

Capstone

Choose two summer field courses. A senior thesis may only be substituted for one of the summer field courses with the consent of the thesis advisor and an undergraduate advisor. The decision to undertake a thesis in lieu of a summer field course must be declared by the end of the spring term of a student's junior year. 8-10

Choose two:

GEL 110A	Summer Field Geology: Structures & Neotectonics
GEL 110B	Summer Field Geology: Volcanology
GEL 110C	Summer Field Geology: Special Projects
GEL 194A & GEL 194B	Senior Thesis and Senior Thesis
or GEL 194HA & GEL 194HB	Senior Honors Project and Senior Honors Project

Depth Subject Matter Subtotal 52-54

Total Units 104-109

Geology, Minor

College of Letters & Science

The minor in Geology offers students a chance to emphasize in one of four areas: General Geology, Engineering Geology, Geochemistry, or Paleobiology.

Students majoring in **Geology** may elect to complete a minor in Geophysics, Environmental Geology, or Oceanography. They may not complete a minor in Geology.

Students majoring in **Marine & Coastal Science** may elect to complete a minor in Geology, Geophysics, or Environmental Geology. They may not complete a minor in Oceanography.

The minor is sponsored by the Department of Earth & Planetary Sciences (p. 165).

Advising

Visit the staff major advisor (<https://eps.ucdavis.edu/students/undergrad/advising/>) for help navigating minor requirements and planning for your degree. Visit the faculty major advisors (<https://eps.ucdavis.edu/students/undergrad/advising/>) for additional advice on courses, careers, and graduate school.

Faculty Advisors: Same as Geology Major Faculty Advisors (p. 168); except Paleobiology emphasis: R. Motani, G. Vermeij.

Code	Title	Units
Choose one of four emphases:		
	General Geology Emphasis (p. 170)	19-24
	Engineering Geology Emphasis (p. 170)	
	Geochemistry Emphasis (p. 171)	
	Paleobiology Emphasis (p. 171)	
Total Units		19-24

General Geology Emphasis

Code	Title	Units
GEL 001	The Earth	3-4
or GEL 050	Physical Geology	
GEL 050L	Physical Geology Laboratory	2

GEL 108	Earth History: Paleoclimates	3
GEL 109	Earth History: Sediments & Strata	3
GEL/ESP 116N	Oceanography	3
or GEL 134	Environmental Geology & Land Use Planning	
Total Units		20-21

Engineering Geology Emphasis

Code	Title	Units
GEL 050 & 050L	Physical Geology and Physical Geology Laboratory	5
ECI 171 & 171L	Soil Mechanics and Soil Mechanics Laboratory	5

Choose three: 9-14

GEL 134	Environmental Geology & Land Use Planning
GEL 161	Geophysical Field Methods
GEL 162	Geophysics of the Solid Earth
HYD 103N/ EBS 103	Fluid Mechanics Fundamentals
HYD/EBS 144	Groundwater Hydrology
HYD 146/GEL 156	Hydrogeology & Contaminant Transport
SSC 118	Soils in Land Use & the Environment
SSC 120	Soil Genesis, Morphology, & Classification

Total Units **19-24**

Geochemistry Emphasis

Code	Title	Units
GEL 060	Earth Materials: Introduction	4
GEL 146	Radiogenic Isotope Geochemistry & Cosmochemistry	3
or GEL 148	Stable Isotopes & Geochemical Tracers	
CHE 110A	Physical Chemistry: Introduction to Quantum Mechanics	4
CHE 110B	Physical Chemistry: Properties of Atoms & Molecules ¹	4
Choose two electives:		6-9
CHE 110C	Physical Chemistry: Thermodynamics, Equilibria & Kinetics	
GEL 108	Earth History: Paleoclimates	
GEL 146	Radiogenic Isotope Geochemistry & Cosmochemistry	
GEL 148	Stable Isotopes & Geochemical Tracers	
HYD 134	Aqueous Geochemistry	
SSC 102	Environmental Soil Chemistry	

Total Units **21-24**

¹ Chemistry majors may substitute one of the elective courses for Chemistry CHE 110B.

Paleobiology Emphasis

Code	Title	Units
GEL 107	Earth History: Paleobiology	3
GEL 107L	Earth History: Paleobiology Laboratory	2
GEL 108	Earth History: Paleoclimates	3
GEL 141	Evolutionary History of Vertebrates	3
or GEL 144	Historical Ecology	
Choose at least 9 additional units:		9
ANT 151	Primate Evolution	
ANT 152	Human Evolution	
EVE 100	Introduction to Evolution	
EVE 101	Introduction to Ecology	
EVE 102	Population & Quantitative Genetics	
EVE 105	Phylogenetic Analysis of Vertebrate Structure	
EVE 112	Biology of Invertebrates	
EVE 112L	Biology of Invertebrates Laboratory	

EVE 140	Paleobotany
EVE 149	Evolution of Ecological Systems
GEL 109	Earth History: Sediments & Strata
GEL/ESP 150C	Biological Oceanography

Total Units **20**

Geophysics, Minor

College of Letters & Science

Geophysics is the study of the physical properties and processes within and surrounding the Earth and other planets. Many problems in the Earth and Planetary Sciences require geophysical techniques for study. The minor in geophysics is designed for those Geology majors and non-Geology majors, who are interested in pursuing a graduate or professional career in geophysics, and/or those who desire a career in petroleum or civil engineering or environmental industries. The minor in geophysics may be particularly useful to those in related technical fields such as mathematics, physics, material science and engineering, who wish to apply their skills to problems in Earth science.

Students majoring in **Geology** may elect to complete a minor in Geophysics, Environmental Geology, or Oceanography. They may not complete a minor in Geology.

Students majoring in **Marine & Coastal Science** may elect to complete a minor in Geology, Geophysics, or Environmental Geology. They may not complete a minor in Oceanography.

The minor is sponsored by the Department of Earth & Planetary Sciences (p. 165).

Advising

Marine & Coastal Science, Bachelor of Science

College of Agricultural & Environmental Sciences

The major in Marine & Coastal Science focuses on the interdisciplinary nature of marine sciences by exposing students to core, breadth, and focus area courses in the discipline, in addition to a strong foundation of science preparatory material. The major builds upon UC Davis strengths in marine and coastal sciences, including field-based courses offered at Bodega Marine Laboratory to provide students a unique, interdisciplinary, "hands on" education. Advising is provided by the Department of Earth & Planetary Sciences for interested students.

The Program

The major begins with introductory courses in mathematics, chemistry, physics, biology, and earth sciences. These are followed by core courses in Marine Science. The major requirements provide focus and breadth, so that each student gains mastery in one area and broad exposure to many facets of Marine & Coastal Science. Focus areas are: (i) Coastal Environmental Processes, (ii) Marine Ecology & Organismal Biology, (iii) Marine Environmental Chemistry, and (iv) Oceans & the Earth System.

In this major, students will be exposed to the foundation disciplines within marine science (biology, chemistry, geology, physics) as well as modern issues facing marine and coastal environments; e.g., climate change, pollution, carbon cycling, and conservation. The major requires field experience, independent research or internship, and concludes with a capstone course featuring current research in marine science. These integrative experiences will require students to synthesize the interdisciplinary topics that they have encountered through this degree program. The mastery achieved provides a strong foundation for future careers in academic science, government, policy, and the private sector. For more information, see Marine & Coastal Science (<https://eps.ucdavis.edu/mcs/>).

Focus Areas

The student's chosen Focus Area will determine the college into which the student is admitted, the college where the degree is awarded, and the associated department:

- **Coastal Environmental Processes.** College of Agricultural & Environmental Sciences; Environmental Science & Policy
- **Marine Ecology & Organismal Biology.** College of Biological Sciences; Evolution & Ecology
- **Marine Environmental Chemistry.** College of Agricultural & Environmental Sciences; Environmental Toxicology
- **Oceans & the Earth System.** College of Letters & Science; Earth & Planetary Sciences

Undergraduate Research

The marine sciences span many departments and colleges at UC Davis, and so students have opportunities to participate in undergraduate research (<https://eps.ucdavis.edu/students/undergrad/mcsci/research/>) in many disciplines.

Internships & Careers

A B.S. in Marine & Coastal Science provides students with knowledge and practical experience needed to pursue careers (<https://eps.ucdavis.edu/students/undergrad/mcsci/careers/>) in marine science (government, private sector, research). The major program includes research and internship experiences as well as field experience to help prepare students for these career paths.

Graduate Study

The coursework, research opportunities, and fieldwork requirements in the Marine & Coastal Science major help prepare students to enter graduate programs to continue their studies and prepare for their career in the marine sciences. Students should meet with advisors and faculty to build a strong application for graduate school through additional independent research or other co-curricular involvements.

Bodega Marine Laboratory

Students in the Marine & Coastal Science major are required to complete some of their coursework at the Bodega Marine Laboratory (<https://marinescience.ucdavis.edu/bml/about/>) on the California Coast.

Global Learning in Marine & Coastal Science

Consider studying or interning abroad through programs available through the Global Learning Hub (<https://eps.ucdavis.edu/students/undergrad/mcsci/studyabroad/>).

Get Involved

Find your community (<https://eps.ucdavis.edu/students/undergrad/mcsci/involved/>) through clubs, events, seminars, and workshops relating to marine science.

Advising

Visit the staff major advisor (<https://eps.ucdavis.edu/students/undergrad/advising/>) for help navigating minor requirements and planning for your degree. Visit the faculty major advisors (<https://eps.ucdavis.edu/students/undergrad/advising/>) for additional advice on courses, careers, and graduate school.

Faculty advisors include: Tessa Hill (College of Letters & Science), Anne Todgham & John Largier (College of Agricultural & Environmental Sciences), Brian Gaylord (College of Biological Sciences).

Courses cannot be utilized to fulfill multiple requirements, with the exception that any Bodega Marine Laboratory course simultaneously fulfills the field requirement below and ETX 127/NUT 127 may satisfy both a course and the Research Requirement.

Focus Area

Complete at least four courses from one category below, totaling at least 12 units. 12

Coastal Environmental Processes; College of Agricultural & Environmental Sciences; Environmental Science & Policy (p. 174)

Marine Ecology & Organismal Biology; College of Biological Sciences; Evolution & Ecology (p. 174)

Marine Environmental Chemistry; College of Agricultural & Environmental Sciences; Environmental Toxicology (p. 175)

Oceans & the Earth System; College of Letters & Science; Earth & Planetary Sciences (p. 175)

Focus Area Requirement Subtotal 12

Breadth Requirement

Complete one course from each category below, that is not the student's chosen Focus Area, totaling at least 8 units. 8

Coastal Environmental Processes (p. 175)

Marine Ecology & Organismal Biology (p. 175)

Marine Environmental Chemistry (p. 175)

Oceans & the Earth System (p. 176)

Breadth Requirement Subtotal 8

Field Requirement

Fulfill the Field Requirement 0-14

The Field Requirement provides exposure to field techniques, experimental design, and the marine environment itself. It is highly recommended that students fulfill this requirement by residence at Bodega Marine Laboratory for one or more courses. Bodega Marine Laboratory courses may simultaneously fulfill an additional requirement in categories above

OR

Alternatively, students may fulfill the Field Requirement by taking two of the following courses; these courses cannot fulfill multiple requirements:

ESP 123	Introduction to Field & Laboratory Methods in Ecology	
ESP 151L	Limnology Laboratory	
EVE 112L	Biology of Invertebrates Laboratory	
EVE 115	Marine Ecology	
GEL 109L	Earth History: Sediments & Strata Laboratory	
GEL 182	Field Studies in Marine Geochemistry	
WFC 100	Field Methods in Wildlife, Fish, & Conservation Biology	
WFC 102L	Field Studies in Fish Biology: Laboratory	
WFC 157	Coastal Ecosystems	
Field Requirement Subtotal		0-14
Internship/Research		
Choose three units:		3
ETX/NUT 127	Environmental Stress & Development in Marine Organisms (may satisfy both a course above and the Internship/Research Requirement.)	
BIS 124	Coastal Marine Research	
ESP 192	Internship	
EVE 192	Internship	
EVE 199	Special Study for Advanced Undergraduates	
GEL 192	Internship in Geology	
GEL 199	Special Study for Advanced Undergraduates (or the equivalent)	
Internship/Research Subtotal		3

Total Units **95-144**

¹ With BASC advisor approval, these combinations also satisfy the Chemistry requirement: CHE 004A-CHE 002A (3 units w/no lab)-CHE 002B-CHE 002C; CHE 004A-CHE 004B-CHE 002C.

² With BASC advisor approval, these combinations also satisfy the Organic Chemistry requirement: CHE 118A-CHE 008B; CHE 128A-CHE 128B-CHE 008B; CHE 128A-CHE 118B-CHE 118C; CHE 128A-CHE 128B-CHE 129A-CHE 118C; CHE 118A-CHE 128B-CHE 128C-CHE 129A-CHE 129B; CHE 118A-CHE 118B-CHE 128C-CHE 129B.

³ With BASC advisor approval, these combinations also satisfy the Mathematics requirement: MAT 021A-MAT 017B-MAT 017C; MAT 017A-MAT 021B.

⁴ Students may be able to complete their Physics requirement by blending the PHY 007 & PHY 009 series. For more details about how to do so and course placement, students will need to follow up with the

PHY department. Students in the College of Biological Sciences will also need to follow up with a BASC advisor to discuss their plans.

Focus Area Requirement

Complete at least four courses from one category below, totaling at least 12 units.

Coastal Environmental Processes

Emphasis on processes and environments of the coastal zone, and the strong physical-biological connection that exists here. Courses highlight the critical terrestrial marine interface and fundamental physical processes in the coastal zone.

The focus area requirement can be fulfilled using:

Code	Title	Units
ATM 121A	Atmospheric Dynamics	4
ATM 121B	Atmospheric Dynamics	4
ATM 158	Boundary-Layer Meteorology	4
ETX 102A	Environmental Fate of Toxicants	4
ESP 152	Coastal Oceanography	3
ESP 155	Wetland Ecology	4
ESP 155L	Wetland Ecology Laboratory	3
ESP 166	Ocean & Coastal Policy	3
GEL 156/HYD 146	Hydrogeology & Contaminant Transport	5
GEL 182	Field Studies in Marine Geochemistry	2-8
HYD 103N/EBS 103	Fluid Mechanics Fundamentals	4
HYD 134	Aqueous Geochemistry	6
HYD 143	Ecohydrology	4
HYD/EBS 144	Groundwater Hydrology	4
WFC 157	Coastal Ecosystems	4

Marine Ecology & Organismal Biology

Focus on physiological adaptations to the marine environment, and the biology of marine species from the molecular to population levels. Courses include emphasis on the ecological processes that determine the distribution and abundance of marine organisms, and the patterns and mechanisms of evolution in the ocean.

The focus area requirement can be fulfilled using:

Code	Title	Units
ANS 131	Reproduction & Early Development in Aquatic Animals	4
BIS 122	Population Biology & Ecology	3
BIS 122P	Population Biology & Ecology/Advanced Laboratory Topics	5
BIS 124	Coastal Marine Research	6
ESP 100	General Ecology	4
ESP 121	Population Ecology	4
ESP 124	Marine & Coastal Field Ecology	3
ESP 155	Wetland Ecology	4
ESP 155L	Wetland Ecology Laboratory	3
EVE 100	Introduction to Evolution	4
EVE 101	Introduction to Ecology	4
EVE 106	Mechanical Design in Organisms	3

EVE 112	Biology of Invertebrates	3
EVE 112L	Biology of Invertebrates Laboratory	2
EVE 114	Experimental Invertebrate Biology	3
EVE 115	Marine Ecology	4
EVE 120	Global Change Ecology	3
ETX/NUT 127	Environmental Stress & Development in Marine Organisms	10
NPB 141	Physiological Adaptation of Marine Organisms	3
NPB 141P	Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics	5
WFC 120	Biology & Conservation of Fishes	3
WFC 120L	Laboratory in Biology & Conservation of Fishes	2
WFC 121	Physiology of Fishes	4
WFC 122	Population Dynamics & Estimation	4
WFC 130	Physiological Ecology of Wildlife	4

Marine Environmental Chemistry

Emphasis on major themes in marine chemistry, geochemistry, the carbon cycle, and contaminant fate and transport.

The focus area requirement can be fulfilled using:

Code	Title	Units
CHE 100	Environmental Water Chemistry	3
ECI 140A	Environmental Analysis of Aqueous Systems (Not open for credit to students who have taken CHE 100)	4
ETX 101	Principles of Environmental Toxicology	4
ETX 102A	Environmental Fate of Toxicants	4
ETX 120	Perspectives in Aquatic Toxicology	4
ETX/NUT 127	Environmental Stress & Development in Marine Organisms	10
GEL 148	Stable Isotopes & Geochemical Tracers	3
GEL 182	Field Studies in Marine Geochemistry	2-8
HYD 134	Aqueous Geochemistry	6
HYD 141	Physical Hydrology	4
WFC 153	Wildlife Ecotoxicology	4

Oceans & the Earth System

A study of our changing oceans in the context of earth system history, including climate change, paleoceanography, ecological shifts, conservation, and marine policy.

The focus area requirement can be fulfilled using:

Code	Title	Units
ATM 116	Modern Climate Change	3
ESM 120	Global Environmental Interactions	4
ESM 121	Water Science & Management	3
ESP 110	Principles of Environmental Science	4
ESP 161	Environmental Law	4
ESP 162	Environmental Policy	4
ESP 166	Ocean & Coastal Policy	3
ESP 169	Water Policy & Politics	3

EVE 120	Global Change Ecology	3
GEL 107	Earth History: Paleobiology	3
GEL 107L	Earth History: Paleobiology Laboratory	2
GEL 108	Earth History: Paleoclimates	3
GEL 109	Earth History: Sediments & Strata	3
GEL 109L	Earth History: Sediments & Strata Laboratory	2
GEL 144	Historical Ecology	3
SAS 120	Science & Contemporary Societal Issues	3
WFC 144	Marine Conservation Science	4
WFC 154	Conservation Biology	4

Breadth Requirement

Complete one course from each category below, that is not the student's chosen Focus Area, totaling at least 8 units.

Coastal Environmental Processes

The breadth requirement can be fulfilled using the following courses:

Code	Title	Units
ATM 158	Boundary-Layer Meteorology	4
ECI 140B	Chemical Principles for Environmental Engineers	4
ESP 110	Principles of Environmental Science	4
ESP 152	Coastal Oceanography	3
ESP 155	Wetland Ecology	4
GEL 182	Field Studies in Marine Geochemistry	2-8
WFC 157	Coastal Ecosystems	4

Marine Ecology & Organismal Biology

The breadth requirement can be fulfilled using the following courses:

Code	Title	Units
BIS 124	Coastal Marine Research	6
ESP 124	Marine & Coastal Field Ecology	3
ESP 155	Wetland Ecology	4
EVE 106	Mechanical Design in Organisms	3
EVE 114	Experimental Invertebrate Biology	3
EVE 115	Marine Ecology	4
EVE 120	Global Change Ecology	3
ETX/NUT 127	Environmental Stress & Development in Marine Organisms	10
NPB 141	Physiological Adaptation of Marine Organisms	3
NPB 141P	Physiological Adaptation of Marine Organisms/Advanced Laboratory Topics	5

Marine Environmental Chemistry

The breadth requirement can be fulfilled using the following courses:

Code	Title	Units
CHE 100	Environmental Water Chemistry	3
ECI 140B	Chemical Principles for Environmental Engineers	4
ETX 120	Perspectives in Aquatic Toxicology	4

ETX/NUT 127	Environmental Stress & Development in Marine Organisms	10
GEL 182	Field Studies in Marine Geochemistry	2-8
HYD 134	Aqueous Geochemistry	6
HYD 141	Physical Hydrology	4

Oceans & the Earth System

The breadth requirement can be fulfilled using the following courses:

Code	Title	Units
ATM 116	Modern Climate Change	3
ESP 166	Ocean & Coastal Policy	3
EVE 120	Global Change Ecology	3
GEL 107	Earth History: Paleobiology	3
GEL 108	Earth History: Paleoclimates	3
WFC 144	Marine Conservation Science	4
WFC 154	Conservation Biology	4

Total Units for the Major by Chosen Focus Area

Focus Area	Units
Oceans & the Earth System (Letters & Science)	95-118
Marine Ecology & Organismal Biology (Biological Sciences)	110-144
Marine Environmental Chemistry (Agricultural & Environmental Sciences)	95-118
Coastal Environmental Processes (Agricultural & Environmental Sciences)	95-118

Oceanography, Minor

College of Letters & Science

Oceanography is the study of the earth's oceans, investigating connections between geological, biological, chemical and physical processes in the marine realm, and the interactions between the Earth's ocean/atmosphere system. The interdisciplinary minor in oceanography is for students with backgrounds in any of these fields, as well as those interested in marine policy and conservation. The curriculum reflects the integrative nature of oceanography, with core courses covering the major disciplines in oceanography and elective courses that allow students to cater the minor to their interests. The oceanography minor includes courses taught at the Davis campus and courses offered at Bodega Marine Laboratory.

Students majoring in **Geology** may elect to complete a minor in Geophysics, Environmental Geology, or Oceanography. They may not complete a minor in Geology. Students majoring in **Marine and Coastal Science** may elect to complete a minor in Geology, Geophysics, or Environmental Geology. They may not complete a minor in Oceanography.

The minor is sponsored by the Department of Earth & Planetary Sciences (p. 165).

East Asian Languages & Cultures

College of Letters & Science

Department Office

211 Sproul Hall; 530-752-4999; East Asian Languages & Cultures (<https://ealc.ucdavis.edu/>); Faculty (<https://ealc.ucdavis.edu/people/>)

The Major Program

The department offers a core language program in both Chinese (p. 177) and Japanese (p. 179), and courses in literature and culture. The core language program in Chinese has two tracks: one for students who have no Chinese-language background whatsoever and one for students with prior background.

- Chinese, Bachelor of Arts (p. 177)
- Chinese, Minor (p. 179)
- Japanese, Bachelor of Arts (p. 179)
- Japanese, Minor (p. 181)

Chinese, Bachelor of Arts

College of Letters & Science

The Major Program

The department offers a core language program in Chinese, and courses in literature and culture. The core language program has two tracks: one for students who have no Chinese-language background whatsoever and one for students with prior background.

The Program

Practical language skills are taught using contemporary methods and materials, so that upon entering the upper division a student will have attained substantial fluency in the spoken language (listening and speaking) and the written language (reading and writing). Upper division courses balance the need to further develop language skills with the need to understand and appreciate the richness and diversity of Chinese culture. All students are encouraged to combine their study of language and literature with courses in related fields, and to study abroad through the Global Learning Hub (<https://globallearning.ucdavis.edu/>) or through internships in China or Taiwan.

Career Opportunities

UC Davis graduates have learned that a major in Chinese is a meaningful, earned distinction that facilitates entrance to graduate programs and professional schools. In addition, job opportunities abound in virtually all career paths, especially for graduates who have completed study abroad.

Honors Program

To be eligible to receive high or highest honors in the Chinese major, students must complete a senior thesis project. A student interested in pursuing a senior thesis project must enroll in CHN 194H and complete a scholarly paper or similar research project under the direction of a senate faculty member. The thesis project will have a minimum duration of two quarters and carry a minimum of 6 units of credit. Up to 4 CHN 194H units earned can be counted toward the major requirements. To qualify to undertake the senior thesis project, a student must have completed at least 135 units with a minimum GPA of 3.500 in courses counted toward the major. Interested students should consult with faculty in their field of interest by the quarter before they hope to commence work on the project (in most cases this will be the Spring Quarter of their junior year). Students who complete the senior thesis project and have an overall GPA that qualifies them for honors may be recommended by the faculty for honors, high honors, or highest honors at graduation.

Education Abroad Program

The university maintains study abroad programs in China, Hong Kong, and Taiwan. They offer excellent opportunities for students to polish their language skills and experience Asian cultures firsthand. Students are encouraged to participate. Appropriate courses taken abroad can be applied toward the major or the minor. For details, see the department's undergraduate advisor or the Global Learning Hub (<https://globallearning.ucdavis.edu/>).

Related Courses

See East Asian Studies (EAS) (p. 463) course list.

Prerequisite Credit

No student may repeat a course if that course is a prerequisite for a course that has already been completed with a grade of C– or better.

Placement

Chinese CHN 001 is intended for beginning students with no prior knowledge of the Chinese language. Students who do have some knowledge but wish to improve their skills should meet with an advisor to discuss appropriate placement. Students must follow departmental guidelines for placement in all language courses and instructor approval is required for enrollment.

Backtracking

Satisfactory completion of a language course is evidence that a student's language skills are beyond the level of those expected in its prerequisite courses. Accordingly, students who have completed a language course cannot go back and take its prerequisites. If the prerequisite courses are required for the major, students may substitute other courses. Students who are not sure how this requirement applies to them should speak to the undergraduate advisor.

Waived Language Courses

Students with exceptional language ability may waive required language courses. If lower division courses have been waived, students will not have to take courses in their place. If upper division courses have been waived, students can use other appropriate courses to earn the units they need to complete the major. Consult the undergraduate advisor regarding the selection of appropriate courses.

East Asian Studies, Bachelor of Arts

College of Letters & Science

The Major Program

The East Asian Studies major gives the student an understanding of East Asia and Southeast Asia through interdisciplinary studies, including courses on East Asian countries within the humanities and social sciences. Students are encouraged to pursue study abroad opportunities, as well as other guided studies pertaining to East and Southeast Asia.

The Program

The program offers core courses in East Asian humanities and social sciences, including history, comparative literature, languages, philosophy and religion, political science, sociology, as well as courses focused on Southeast Asia. Science courses that closely engage the student of East and/or Southeast Asia are also eligible to count towards the major.

Along with taking the lower division and upper division depth subject courses; the student may choose additional courses that concentrate on a special field of interest, such as anthropology or history, or special courses such as honor thesis, independent study, internships, and study abroad.

Programs, Internships, & Career Alternatives

To enhance the student's understanding of East and Southeast Asia, our majors are strongly encouraged to participate in UC Davis's Study Abroad Program, which gives students the opportunity to live and experience culture within East or Southeast Asia. Our majors are also encouraged to work with UC Davis's Internship and Career Center, which provides customized assistance for EAS students to obtain legislative, legal, and business internships and careers. Likewise, the UC Davis Sacramento and Washington Centers arrange internships and run full-credit academic programs in Sacramento and Washington D.C., with a wide range of opportunities for our majors. Graduating EAS majors are prepared for employment in government agencies (such as Foreign Service), state agencies, international or non-governmental organizations (NGO, such as the United Nations), foundations, journalism, teaching, counseling, and companies with international business interests, trade, or finance. The broad-based and multidisciplinary components of this major program enhance career prospects in jobs that demand knowledge of the cultures of East and Southeast Asia.

¹ Approved courses: EAS 190, EAS 192, EAS 194H, EAS 196A-EAS 196B, EAS 198—maximum 12 units from this list

East Asian Studies, Minor

College of Letters & Science

Courses taken for the minor are expected to reflect a predominant interest in East Asia or Southeast Asia. All upper division courses counting towards the East Asian Studies major, may be used to fulfill the requirements for the minor program, as long as they deal predominantly with East Asia or Southeast Asia.

Code	Title	Units
Choose any five upper division courses from the Depth Subject Matter list for the major, or from the following list:		20
Any CHN or JPN upper division course		

Any EAS special course; approved courses:

EAS 190	East Asian Studies Seminar
EAS 192	East Asian Studies Seminar
EAS 194H	Special Study for Honors Students
EAS 196A	Honors Seminar
EAS 196B	Honors Seminar
EAS 198	Directed Group Study
Upper division Education Abroad course focusing on East Asia or Southeast Asia	

Total Units **20**

Ecology (Graduate Group)

College of Agricultural & Environmental Sciences

Janet Foley, Ph.D., Chairperson of the Group

Group Office

1005 Wickson Hall; 530-752-6752; Ecology Graduate Group (<http://ecology.ucdavis.edu>); Faculty (<https://ecology.ucdavis.edu/gge-faculty/>)

- Ecology, Master of Science (p. 183)
- Ecology, Doctor of Philosophy (p. 184)
- Ecology, Doctor of Philosophy (Joint Doctorate with SDSU) (p. 184)

Ecology, Master of Science

College of Agricultural & Environmental Sciences

Janet Foley, Ph.D., Chairperson of the Group

Graduate Study

The Graduate Group in Ecology offers M.S. and Ph.D. degrees. Ecology is a science that integrates numerous fields of study to attain deep understanding of natural and societal influences on the distribution, abundances, behaviors, traits, and ecosystem functions of organisms. In order to accommodate varied student interests, the Group has developed several 'areas of emphasis' with specialized programs of study: agricultural ecology, conservation ecology, ecological genomics and genetics, ecosystems and landscape ecology, ecotoxicology and physiological ecology, environmental policy and human ecology, integrative ecology, marine ecology, and restoration ecology. For further details, contact the Group office.

Preparation

Appropriate preparation is undergraduate work in any of the biological, social or behavioral, and physical sciences, mathematics or engineering. Applicants will normally be expected to have completed the following courses during the undergraduate years or shortly after matriculating: one course each in introductory biology, general chemistry, physical science, calculus, statistics; and an upper division introduction to ecology course and an upper division introduction to evolution class. Students that choose the environmental policy and human ecology area of emphasis may also substitute one quantitative course in social science such as micro- or macro-economics for one chemistry or physics requirement.

Ecology, Doctor of Philosophy

College of Agricultural & Environmental Sciences

Janet Foley, Ph.D., Chairperson of the Group

Graduate Study

The Graduate Group in Ecology offers M.S. and Ph.D. degrees. Ecology is a science that integrates numerous fields of study to attain deep understanding of natural and societal influences on the distribution, abundances, behaviors, traits, and ecosystem functions of organisms. In order to accommodate varied student interests, the Group has developed several 'areas of emphasis' with specialized programs of study: agricultural ecology, conservation ecology, ecological genomics and genetics, ecosystems and landscape ecology, ecotoxicology and physiological ecology, environmental policy and human ecology, integrative ecology, marine ecology, and restoration ecology. For further details, contact the Group office.

Preparation

Appropriate preparation is undergraduate work in any of the biological, social or behavioral, and physical sciences, mathematics or engineering. Applicants will normally be expected to have completed the following courses during the undergraduate years or shortly after matriculating: one course each in introductory biology, general chemistry, physical science, calculus, statistics; and an upper division introduction to ecology course and an upper division introduction to evolution class. Students that choose the environmental policy and human ecology area of emphasis may also substitute one quantitative course in social science such as micro- or macro-economics for one chemistry or physics requirement.

Ecology, Doctor of Philosophy (Joint Doctorate with SDSU)

College of Agricultural & Environmental Sciences

Walt Oechel, Ph.D., Chairperson of the JDPE Program

Graduate Study

The JDPE is a doctoral degree that is run jointly by the Ecology Program at San Diego State University and the Ecology Graduate Group at UC Davis. The joint nature of the doctoral program offers two primary advantages. First, students benefit from contact and expertise in and outside of the classroom with faculty members of two strong ecology programs. Second, across the two campuses, students have the opportunity to access facilities and field sites in nearly all the major biomes of California. JDPE students spend their first year at San Diego State University with their advisor to begin the preparation of a thesis proposal. The student then moves to UC Davis for additional course work and for the Qualifying Examination. On return to San Diego State University, the thesis research is completed, and the dissertation is prepared and defended. The Ph.D. degree is awarded jointly by San Diego State University and UC Davis.

Preparation

Appropriate preparation is undergraduate work in any of the biological, social or behavioral, and physical sciences, mathematics or engineering. Applicants will normally be expected to have completed the following courses during the undergraduate years or shortly after matriculating:

one course each in introductory biology, general chemistry, physical science, calculus, statistics; and an upper division introduction to ecology course and an upper division introduction to evolution class. Students that choose the environmental policy and human ecology area of emphasis may also substitute one quantitative course in social science such as micro- or macro-economics for one chemistry or physics requirement.

Economics

College of Letters & Science

Deborah Swenson, Ph.D., Chairperson of the Department

Department Office

2216 Social Sciences & Humanities Building; 530-752-9241; Economics (<http://www.econ.ucdavis.edu>); Faculty (<http://www.econ.ucdavis.edu/directory-of-people/econ-faculty/>)

- Economics, Minor (p. 190)
- Economics, Master of Arts (p. 190)
- Economics, Doctor of Philosophy (p. 190)

Economics, Bachelor of Arts

College of Letters & Science

The Major Program

Economics is the study of how individuals, organizations, and societies choose among alternative uses of resources and how these resources are turned into the things people want.

The Program

Economics majors complete an introductory course sequence in economics, in addition to several courses in quantitative methods. Intermediate theory and economic history are taken on the upper division level and then students are free to concentrate the remainder of their units in various areas of interest, including more courses in economic theory or history, international economics, labor, industry, alternative economic systems, economic development, public finance, econometrics, or mathematical economics.

Major Advisors

Contact Department office at theadvisingcenter@ucdavis.edu or 530-752-9142.

Internships & Career Alternatives. Internships for economics majors have been arranged at banks, brokerages, other business enterprises, and governmental units. The internships must complement the student's course work. A degree in economics is excellent preparation for students who want to go on to law school, business school, advanced work in economics, or graduate work in international relations. It is also a good background for careers in management and positions with the government.

Course Limits

Except under extraordinary circumstances, not more than two economics courses should be taken in any one quarter. In special cases, the department will accept a limited number of related upper division courses from other departments in satisfaction of the economics upper division

course requirements. Approval from a departmental advisor is required in all such cases.

Graduation with High or Highest Honors. To be eligible for departmental recommendation for High or Highest Honors in Economics at graduation, a student must take all upper division courses in Economics for a letter grade, earn at least a 3.500 grade point average in those courses, and complete at least eight units of course work that result in the submission of an Honors project. Consult the College of Letters and Science section of this catalog and contact the Department for more information.

Study Abroad

The Economics Department wishes to accommodate students who would like to complement their economics degree with a study abroad experience. Up to 20 units of upper division credit from foreign campuses (excluding ECN 100A and ECN 101) may be used towards the completion of the degree. To ensure that foreign courses will apply towards the economics degree, students need to select courses from the pre-approved list at the UC Davis Study Abroad office or seek pre-approval in the economics department for the foreign courses they wish to complete.

Recommended

Students considering graduate study in economics are strongly urged to take MAT 021A-MAT 021B-MAT 021C and MAT 022A.

American History & Institutions

This University requirement can be satisfied by completion of ECN 111A, ECN 111B; see also under Bachelor's Degree Requirements (p. 36).

Graduate Study

Students who meet the admission requirements of Graduate Studies and the Department of Economics may pursue studies leading to the M.A. and Ph.D. degrees. Fields of emphasis for graduate study include: Microeconomic Theory, Macroeconomic Theory, Econometrics, Economic Development, Economic History, Industrial Organization, International Economics, Labor Economics and Public Economics. For information on admission to graduate study, degree requirements, and financial aid, consult the Graduate Announcement and <http://www.econ.ucdavis.edu>.

Economics, Minor

College of Letters & Science

Economics is the study of how individuals, organizations, and societies choose among alternative uses of resources and how these resources are turned into the things people want.

Course Limits

Except under extraordinary circumstances, not more than two economics courses should be taken in any one quarter. In special cases, the department will accept a limited number of related upper division courses from other departments in satisfaction of the economics upper division course requirements. Approval from a departmental advisor is required in all such cases.

Preparation

ECN 001A or ECN 001AV or ECN 001AY, ECN 001B; STA 013 or STA 013Y, STA 032; MAT 016A, MAT 016B or MAT 017A, MAT 017B or MAT 021A, MAT 021B. MAT 016A, MAT 016B or MAT 017A, MAT 017B or MAT 021A, MAT 021B should be completed before taking ECN 100A and ECN 101. Students need to complete ECN 100A and ECN 101 before taking the advanced courses.

Code	Title	Units
ECN 100A	Intermediate Micro Theory: Consumer & Producer Theory	4
ECN 101	Intermediate Macro Theory	4
Choose 8 units:		8

Total Units	20

Economics, Master of Arts

College of Letters & Science

Graduate Study

Students who meet the admission requirements of Graduate Studies and the Department of Economics may pursue studies leading to M.A. and Ph.D. degrees. Fields of emphasis for graduate study include: Microeconomic Theory, Macroeconomic Theory, Econometrics, Economic Development, Economic History, Industrial Organization, International Economics, Labor Economics and Public Economics. For information on admission to graduate study, degree requirements, and financial aid, consult the Graduate Announcement and Economics.

The Master of Arts degree is offered only in route to the Ph.D.

Graduate Advisors

Contact Department office in 2229 Social Science & Humanities Building.

Recommended

Students considering graduate study in economics are strongly urged to take MAT 021A-MAT 021B-MAT 021C and MAT 022A.

Economics, Doctor of Philosophy

College of Letters & Science

Graduate Study

Students who meet the admission requirements of Graduate Studies and the Department of Economics may pursue studies leading to M.A. and Ph.D. degrees. Fields of emphasis for graduate study include: Microeconomic Theory, Macroeconomic Theory, Econometrics, Economic Development, Economic History, Industrial Organization, International Economics, Labor Economics and Public Economics. For information on admission to graduate study, degree requirements, and financial

aid, consult the Graduate Announcement and Economics (<http://www.econ.ucdavis.edu>).

Graduate Advisors

Contact Department office in 2229 Social Science & Humanities Building.

Recommended

Students considering graduate study in economics are strongly urged to take MAT 021A-MAT 021B-MAT 021C and MAT 022A.

Program Coordinator

530-752-2367; Advising (eduadvising@ucdavis.edu)

The UC Davis School of Education is committed to developing informed citizens and advocates for equitable educational environments in a democratic society. Education courses are designed for undergraduate student from all majors.

A Minor in Education will help students:

- Develop an understanding of the issues and concerns of public and private education, especially with regard to the education of students with diverse learning needs.
- Complete prerequisites for the teaching credential program.
- Work towards a master's degree or doctoral degree in education or related field.
- Seek employment in policy, advocacy, or other education-related careers.

Courses

Students must complete 20 units the Minor program in Education. At least 12 units of the 20-unit minimum for the minor must be in Education. The remaining units for the minor may be in education or a related field as approved on the electives list. See Education, School of (p. 463).

Minor Advisors

A designated faculty member in the School of Education may advise students and give final approval on the minor. For additional information contact Student Services (<https://education.ucdavis.edu/student-services/>).

¹ EDU 181 and EDU 183-4 units or AED 100-3 units may serve as course substitutes for EDU 100; if EDU 100 is taken, EDU 181, EDU 183 and/or AED 100 may not be taken as electives.

² Internship (192, 195A or B, 195TC, 197TC), Group Study (198) and Independent Study (199), or a combination of both, may not exceed a total of 4 units. Elective courses may include only one internship.

Education, Master of Arts

School of Education

Admissions are suspended while our faculty review the program's current topical focus and requirements. We are not offering the Master of Arts General Track for this admissions cycle.

The **Master of Arts in Education** provides a course of study for examining research and theory about learners, teachers, schools, and related social institutions. The program prepares professionals to conduct research about the education of children, youth, and adults in a multicultural society. Graduates may assume leadership positions in school districts, state education agencies, and private organizations concerned with instructional research, policy and practice.

Education, Doctor of Philosophy

School of Education

Graduate Study

The Graduate Group in Education offers programs of study and research leading to the Ph.D. degree. Students may concentrate in; language, literacy and culture; learning and mind sciences; mathematics education; school organization and educational policy; or science and agriculture education. Students may also combine these fields of study with designated emphasis areas such as Critical Theory; Second Language Acquisition, Women's Studies, and Writing, Rhetoric, and Composition Studies. Detailed information regarding graduate study may be obtained by writing the Graduate Coordinator or see Education Ph.D. Program (<https://education.ucdavis.edu/phd-education/>).

Preparation

Students should have earned a Bachelor's or M.A. degree or the equivalent in a discipline relevant to their proposed emphasis program. For example, students applying for the mathematics education emphasis should have earned the B.A. or M.A. or M.A.T. degree in mathematics or mathematics education.

Graduate Advisors

Darnel Degand, Jennifer Higgs, Alexis Patterson Williams

Graduate Coordinator

Mary M. Reid

Courses

See Education, School of (p. 191).

Education Leadership, Doctorate in Education (CANDEL)

School of Education

Elizabeth Montañó, Program Chair

School of Education Building; Advising (candededd@ucdavis.edu); School of Education (<http://education.ucdavis.edu>); Faculty (<https://education.ucdavis.edu/candel-program-faculty/>)

The **Educational Leadership (CANDEL) Program** leading to a Doctor of Education (Ed.D.) degree, is intended primarily for working professionals in schools, community colleges, and related educational capacities that reside in the greater Sacramento Valley, Bay Area, Central Valley, and Northern California. Graduates of this program will be prepared to lead in educational environments that promote learning, equity and achievement

for all students. Armed with both real-world, problem-based learning, and scholarship skills, program graduates will be uniquely ready to manage the complexities of educational organizations, effect school change processes and shape the educational policies that bear on the practice of education in the public setting.

Integrated Teaching Credential, Teaching Credential, Master of Arts

School of Education

School of Education Building; 530-752-5887; Advising (educadvising@ucdavis.edu); Faculty (<https://education.ucdavis.edu/faculty-directory/>)

The **Teaching Credential with Master's Degree Program** offers an opportunity for qualified students to complete the requirements for both a Masters of Arts in Education degree and a Multiple Subject or Single Subject Credential in English, mathematics, science, social science or agriculture in a six-quarter program completed in less than two years. A Bilingual authorization in Spanish or Mandarin, is available to credential candidates in multiple subjects or the single subjects of English, mathematics, science or social science.

The Credential Program prepares students for the teaching profession by immersing them in the total environment of a public school classroom while enrolled in required coursework. The coursework incorporates a theoretical practical approach to the teaching-learning process, encouraging close interactions among teacher candidates and teacher education faculty. Students complete requirements for the M.A. degree during two part-time quarters following the credential year. This coursework introduces the integration of research into teaching practice, making teachers more informed and pro-active practitioners.

Graduate Advisor

Margarita Jimenez-Silva

Graduate Coordinator

Jana Royal

Courses

See Education, School of (p. 463).

Teaching Credential/M.A. Degree Program

Applicants are encouraged to have program prerequisites and testing requirements completed prior to submitting an application. Credential requirements are regularly revised by the State of California. To obtain the most current information, students considering a career in teaching are encouraged to see Credential/MA (<https://education.ucdavis.edu/teaching-credentialma/>) and consult with the School of Education advisors throughout their undergraduate career.

M.A. in Education Degree Programs

Applicants to the General Track M.A. must have completed an undergraduate degree with a major in a field that supports their intended area of emphasis. A minimum undergraduate GPA of 3.000 is necessary for graduate admission at the University of California, Davis. Please consult with advisors in the School of Education regarding additional

testing or supplemental information that may be required for application to a specific program.

College of Engineering

Faculty (<https://ece.ucdavis.edu/directory/>)

The Electrical & Computer Engineering Undergraduate Programs

The department administers two undergraduate curricula in the College of Engineering: (1) the Electrical Engineering curriculum and (2) the Computer Engineering curriculum.

Integrated Degree Programs (IDP)

The IDP leads to both the Bachelor of Science and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical & Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in the Electrical Engineering, Computer Engineering or Applied Physics curricula. Applicants in their junior year must apply for the IDP by March 31. For more information on IDP, see B.S./M.S. Integrated Degree Programs.

Mission

Under its land grant status, the University of California has a mission to provide the state with the trained workforce it needs and to advance knowledge and research in directions that contribute to the general welfare of the state and the nation. The Department of Electrical & Computer Engineering contributes to the mission of the University in three ways. First, its undergraduate and graduate education programs seek to provide students with an understanding of the fundamental principles of electrical and computer engineering, the skills needed to solve the complex technological problems of modern society and

the ability to continue to learn and develop throughout their careers. Second, through its research programs, the department contributes to the development and progress of electronics, communications, and computer technology. Finally, the department helps to transfer research results to industry through publication, public service and professional activities.

Objectives

Teaching—To provide undergraduate students with sufficient breadth to allow them to participate in teams, continue their own education after graduation and select a focus area intelligently; to provide undergraduate students with sufficient depth in a narrower discipline to allow them to develop the ability to solve complex engineering problems; to educate the students in the graduate program to be leaders in industry or to do meaningful research in industry, government or academia.

Research—To develop and maintain research programs that produce useful technological advances while simultaneously training the next generation of researchers and leaders; to update and/or shift the foci of these programs frequently in response to the needs of our constituency and the nation; to provide a stimulating environment that encourages our graduate students to develop their abilities as far as possible.

Computer Engineering Undergraduate Program

The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Objectives

The Electrical & Computer Engineering program educational objectives have been developed to address the needs of our constituencies. The objectives of the Electrical & Computer Engineering programs are as follow:

- Graduates will create value for their employers, demonstrating knowledge and initiative and making beneficial contributions beyond the workplace. This can also result in patents, awards, publications and presentations.
- Graduates will grow their capabilities through advanced education and professional development.
- Graduates will provide leadership and be proactive in their profession and/or communities.

Exclusive of General Education units, the minimum number of units required for the Computer Engineering undergraduate major is 138.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

⁵ Except MAT 135A, MAT 197TC.

⁶ Except PHY 116, PHY 137, PHY 160 (restricted to 1 unit of technical elective), PHY 195, PHY 197T.

⁷ Except STA 100, STA 102, STA 103, STA 104, STA 106, STA 108, STA 120, STA 130A.

Electrical & Computer Engineering, Bachelor of Science/Master of Science

College of Engineering

The Graduate Program in Electrical & Computer Engineering

M.S. and Ph.D.

Electrical & Computer Engineering (<http://www.ece.ucdavis.edu>); 530-752-8251

The Department of Electrical & Computer Engineering prepares graduate students to do meaningful research and acquire skills and insights vital to solving some of the world's most complex technological problems. Our graduate program offers a challenging and stimulating environment, covering optical, wireline and wireless communications, telecommunication networks, computer engineering, circuits, electromagnetics, physical electronics, optoelectronics, control, and signal processing. The depth of resources in the study of circuit design alone, with one of the largest faculty groups in the field in the UC system, distinguishes us from other programs, while our program in microwave communications and devices is unique.

The Electrical & Computer Engineering Graduate Program benefits from the highly interdisciplinary culture at UC Davis and attracts faculty from biomedical, chemical, electrical, computer, civil, and mechanical engineering, as well as computer science and mathematics.

Many of our graduates go on to leadership and technology management roles in industry, returning each year for our industrial affiliates meeting to network with other industry representatives, current students and faculty.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

Research Highlights

- Communications, control, networking, and signal processing
- Computer engineering
- Electronic circuits
- Optoelectronics
- RF, micro- and millimeter waves
- Physical electronics

Research Facilities and Partnerships

- Center for Information Technology in the Interest of Society
- Northern California Center for Nanotechnology
- Center on Polymer Interfaces and Macromolecular Assemblies

- Lawrence Livermore National Laboratory
- Lawrence Berkeley National Laboratory
- Los Alamos National Laboratory
- California Lighting Technology Center
- PlanetLab Consortium
- Sandia National Laboratory

Our graduate program offers a challenging and stimulating environment, covering optical, wireline and wireless communications, telecommunication networks, computer engineering, circuits, electromagnetics, physical electronics, optoelectronics, control, and signal processing. The depth of resources in the study of circuit design alone, with one of the largest faculty groups in the field in the UC system, distinguishes us from other programs, while our program in microwave communications and devices is unique.

The Electrical & Computer Engineering Graduate Program benefits from the highly interdisciplinary culture at UC Davis and attracts faculty from biomedical, chemical, electrical, computer, civil, and mechanical engineering, as well as computer science and mathematics.

Many of our graduates go on to leadership and technology management roles in industry, returning each year for our industrial affiliates meeting to network with other industry representatives, current students and faculty.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

Research Highlights

- Communications, control, networking, and signal processing
- Computer engineering
- Electronic circuits
- Optoelectronics
- RF, micro- and millimeter waves
- Physical electronics

Research Facilities and Partnerships

- Center for Information Technology in the Interest of Society
- Northern California Center for Nanotechnology
- Center on Polymer Interfaces and Macromolecular Assemblies
- Lawrence Livermore National Laboratory

- Lawrence Berkeley National Laboratory
- Los Alamos National Laboratory
- California Lighting Technology Center
- PlanetLab Consortium
- Sandia National Laboratory

Electrical & Computer Engineering, Doctor of Philosophy

College of Engineering

The Graduate Program in Electrical & Computer Engineering

M.S. and Ph.D.

Electrical & Computer Engineering (<http://www.ece.ucdavis.edu>);
530-752-8251

The Department of Electrical & Computer Engineering prepares graduate students to do meaningful research and acquire skills and insights vital to solving some of the world's most complex technological problems. Our graduate program offers a challenging and stimulating environment, covering optical, wireline and wireless communications, telecommunication networks, computer engineering, circuits, electromagnetics, physical electronics, optoelectronics, control, and signal processing. The depth of resources in the study of circuit design alone, with one of the largest faculty groups in the field in the UC system, distinguishes us from other programs, while our program in microwave communications and devices is unique.

The Electrical & Computer Engineering Graduate Program benefits from the highly interdisciplinary culture at UC Davis and attracts faculty from biomedical, chemical, electrical, computer, civil, and mechanical engineering, as well as computer science and mathematics.

Many of our graduates go on to leadership and technology management roles in industry, returning each year for our industrial affiliates meeting to network with other industry representatives, current students and faculty.

Generous financial support is available in the form of research assistantships, teaching assistantships, fellowships and financial aid.

Electrical Engineering, Bachelor of Science

College of Engineering

The Electrical & Computer Engineering Undergraduate Programs

The department administers two undergraduate curricula in the College of Engineering: (1) the Electrical Engineering curriculum and (2) the Computer Engineering curriculum.

Integrated Degree Program (IDP)

The IDP leads to both the Bachelor of Science and the Master of Science degrees. The program provides a student the opportunity to obtain superior breadth and depth of technical material. The IDP program in the Department of Electrical & Computer Engineering is available only to UC Davis undergraduates with strong academic records enrolled in the Electrical Engineering, Computer Engineering, Electronic Materials Engineering or Applied Physics curricula. Applicants in their junior year must apply for the IDP by March 31. For more information on IDP, see Electrical & Computer Engineering (<http://www.ece.ucdavis.edu>).

Mission

Under its land grant status, the University of California has a mission to provide the state with the trained workforce it needs and to advance knowledge and research in directions that contribute to the general welfare of the state and the nation. The Department of Electrical & Computer Engineering contributes to the mission of the University in three ways. First, its undergraduate and graduate education programs seek to provide students with an understanding of the fundamental principles of electrical and computer engineering, the skills needed to solve the complex technological problems of modern society and the ability to continue to learn and develop throughout their careers. Second, through its research programs, the department contributes to the development and progress of electronics, communications, and computer technology. Finally, the department helps to transfer research results to industry through publication, public service and professional activities.

Objectives

Teaching—To provide undergraduate students with sufficient breadth to allow them to participate in teams, continue their own education after graduation and select a focus area intelligently; to provide undergraduate students with sufficient depth in a narrower discipline to allow them to develop the ability to solve complex engineering problems; to educate the students in the graduate program to be leaders in industry or to do meaningful research in industry, government or academia. *Research*—To develop and maintain research programs that produce useful technological advances while simultaneously training the next generation of researchers and leaders; to update and/or shift the foci of these programs frequently in response to the needs of our constituency and the nation; to provide a stimulating environment that encourages our graduate students to develop their abilities as far as possible.

Electrical Engineering Undergraduate Program

The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Electrical engineering involves the design, analysis, and effective use of electrical systems including electronic computers. Electrical systems and computers play a central role in nearly all aspects of modern life, including communication, medicine, education, environmental protection, space exploration, defense, and home entertainment.

Students who complete the Electrical Engineering curriculum will obtain a Bachelor of Science in Electrical Engineering, one of the engineering degrees recognized in all fifty states as eligible for registration as a Professional Engineer.

Objectives

The Electrical & Computer Engineering program educational objectives have been developed to address the needs of our constituencies. The objectives of the Electrical & Computer Engineering programs are as follow:

- Graduates create value for their employers, demonstrating knowledge and initiative and making beneficial contributions beyond the workplace. This can also result in patents, awards, publications and presentations.
- Graduates grow their capabilities through advanced education and professional development.
- Graduates provide leadership and be proactive in their profession and/or communities.

Exclusive of General Education units, the minimum number of units for the Electrical Engineering major is 146.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Electrical Engineering Curriculum

Areas of Specialization

For updated recommended courses, see Electrical & Computer Engineering (<https://www.ece.ucdavis.edu/undergraduate/majors-and-minor/>).

Physical Electronics

Solid-state devices, circuits and fabrication and the theory courses supporting those subjects.

Code	Title	Units
Recommended Elective Courses		
<i>Core Electives</i>		
EEC 130B	Introductory Electromagnetics II	4
EEC 140B	Principles of Device Physics II	4
<i>Design Laboratory Electives</i>		
EEC 118 or EEC 132A	Digital Integrated Circuits RF & Microwaves in Wireless Communication	4-5
EEC 132B	RF & Microwaves in Wireless Communication	4-5

or EEC 135	Optoelectronics for High-Speed Data Networking & Computing Systems	
Select remaining upper division design electives from:		
EEC 110B	Electronic Circuits II	4
EEC 146A	Integrated Circuits Fabrication	4
EEC 146B	Advanced Integrated Circuits Fabrication	3
<i>Technical Electives</i>		
EEC 112	Communication Electronics	4
EEC 180	Digital Systems II	5

Electromagnetics

Microwave circuits and systems, and fiber optical systems.

Code	Title	Units
Recommended Elective Courses		
<i>Core Electives</i>		
EEC 130B	Introductory Electromagnetics II	4
EEC 140B	Principles of Device Physics II	4
<i>Design Laboratory Electives</i>		
EEC 132A	RF & Microwaves in Wireless Communication	5
EEC 132B	RF & Microwaves in Wireless Communication	5
EEC 134A & EEC 134B	RF/Microwave Systems Design and RF/Microwave Systems Design	6
Select remaining upper division design electives from:		
EEC 110B	Electronic Circuits II	4
EEC 132C	RF & Microwaves in Wireless Communications	5
EEC 133	Electromagnetic Radiation & Antenna Analysis	4
EEC 135	Optoelectronics for High-Speed Data Networking & Computing Systems	4
<i>Technical Electives</i>		
EEC 112	Communication Electronics	4

Analog Electronics

Transistor- and system-level analog circuit design.

Code	Title	Units
Recommended Elective Courses		
<i>Core Electives</i>		
EEC 110B	Electronic Circuits II	4
EEC 157A	Control Systems	4
EEC 160	Signal Analysis & Communications	4
<i>Design Laboratory Electives</i>		
At least two from:		
EEC 112	Communication Electronics	4
EEC 113	Power Electronic Circuits	4
EEC 136A & EEC 136B	Electronic Design Project and Electronic Design Project	6
EEC 157A	Control Systems	4
EEC 165	Statistical & Digital Communication	4
EEC 195A & EEC 195B	Autonomous Vehicle Design Project and Autonomous Vehicle Design Project	6

Select remaining upper division design electives from:

EEC 116	VLSI Design	4
EEC 118	Digital Integrated Circuits	4
EEC 132A	RF & Microwaves in Wireless Communication	5
EEC 132B	RF & Microwaves in Wireless Communication	5
EEC 132C	RF & Microwaves in Wireless Communications	5
EEC 140B	Principles of Device Physics II	4
EEC 150B		3
EEC 157B	Control Systems	4
EEC 160	Signal Analysis & Communications	4
EEC 210	MOS Analog Circuit Design	4
<i>Technical Electives</i>		
Select from:		
EEC 130B	Introductory Electromagnetics II	4
EEC 146A	Integrated Circuits Fabrication	4

Digital Electronics

Transistor- and system-level digital circuit design.

EEC 010	Introduction to Digital & Analog Systems ¹	4
Transfer and change of major students in their junior year will substitute four additional units of upper division electives.		
EEC 018	Digital Systems I	5
Choose one; a grade of a C- or better is required:		
ENL 003	Introduction to Literature	
UWP 001	Introduction to Academic Literacies	
UWP 001Y	Introduction to Academic Literacies	
UWP 001V	Introduction to Academic Literacies: Online	

COM 001	Major Works of the Ancient World
COM 002	Major Works of the Medieval & Early Modern World
COM 003	Major Works of the Modern World
COM 004	Major Works of the Contemporary World
NAS 005	Introduction to Native American Literature

Lower Division Required Courses Subtotal 76

Upper Division Required Courses

Electrical & Computer Engineering

Choose 26 units: 26

EEC 100	Circuits II
EEC 110A	Electronic Circuits I
EEC 130A	Electromagnetics I
EEC 140A	Principles of Device Physics I
EEC 150	Introduction to Signals & Systems
EEC 161	Probabilistic Analysis of Electrical & Computer Systems
EEC 196	Issues in Engineering Design

Choose one: 3-4

ENG/PHY 160	Environmental Physics & Society
ENG 190	Professional Responsibilities of Engineers
ECS 188	Ethics in an Age of Technology

Upper Division Electives

Choose at least eight courses for a minimum of 32 units: 32

After completion of the upper division elective requirement (at least 8 courses, 2 core, 2 with labs, 1 project) any units in excess of 32 will count toward the Technical Elective requirement.

Two Core Electives (p. 200)
Design Laboratory Electives (p. 200)

Technical Electives

Choose 9 units (p. 201) 9

Upper Division Composition Requirement

Choose one; a grade of C- or better is required: 0-4

UWP 101	Advanced Composition
UWP 102A	Writing in the Disciplines: Special Topics
UWP 102B	Writing in the Disciplines: Biology
UWP 102C	Writing in the Disciplines: History
UWP 102D	Writing in the Disciplines: International Relations
UWP 102E	Writing in the Disciplines: Engineering
UWP 102F	Writing in the Disciplines: Food Science & Technology
UWP 102G	Writing in the Disciplines: Environmental Writing
UWP 102H	Writing in the Disciplines: Human Development & Psychology
UWP 102I	Writing in the Disciplines: Ethnic Studies
UWP 102J	Writing in the Disciplines: Fine Arts
UWP 102K	Writing in the Disciplines: Sociology
UWP 102L	Writing in the Disciplines: Film Studies
UWP 104A	Writing in the Professions: Business Writing
UWP 104B	Writing in the Professions: Law
UWP 104C	Writing in the Professions: Journalism

UWP 104D	Writing in the Professions: Elementary & Secondary Education
UWP 104E	Writing in the Professions: Science
UWP 104F	Writing in the Professions: Health
UWP 104I	Writing in the Professions: Internships
UWP 104J	Writing in the Professions: Writing for Social Justice
UWP 104T	Writing in the Professions: Technical Writing
Passing the Upper Division Composition Exam.	
Upper Division Required Courses Subtotal	70-75

Total Units 146-151

¹ Transfer and change of major students who do not take EEC 010 will substitute 4 additional units of upper-division electives.

Two Core Electives

Code Title Units

A maximum of one course appearing on both the Core Elective list and the Design Laboratory Elective list may be counted in both categories.

EEC 110B	Electronic Circuits II	4
EEC 130B	Introductory Electromagnetics II	4
EEC 140B	Principles of Device Physics II	4
EEC 170	Introduction to Computer Architecture	4
EEC 180	Digital Systems II	5

Only one of the following may be used:

EEC 151	Digital Signals & Systems
EEC 157A	Control Systems
EEC 160	Signal Analysis & Communications

Design Laboratory Electives

Code Title Units

A maximum of one course appearing on both the Core Elective list and the Design Laboratory Elective list may be counted in both categories.

Choose at least two Design electives with lab:

EEC 110B	Electronic Circuits II
EEC 112	Communication Electronics
EEC 116	VLSI Design
EEC 118	Digital Integrated Circuits
EEC 132A	RF & Microwaves in Wireless Communication
EEC 132B	RF & Microwaves in Wireless Communication
EEC 132C	RF & Microwaves in Wireless Communications
EEC 135	Optoelectronics for High-Speed Data Networking & Computing Systems
EEC 146A	Integrated Circuits Fabrication
EEC 146B	Advanced Integrated Circuits Fabrication
EEC 152	Digital Signal Processing
EEC 157A	Control Systems
EEC 157B	Control Systems

EEC 165	Statistical & Digital Communication
EEC 172	Embedded Systems
EEC 180	Digital Systems II
EEC 183	Testing & Verification of Digital Systems

Choose at least one Design Project course:

All Design Project courses are also considered Design Laboratory electives and may be counted in both categories simultaneously. Both A and B need to be taken to receive credit for the Design Project.

EEC 119A	Integrated Circuit Design Project
EEC 119B	Integrated Circuit Design Project
EEC 134A	RF/Microwave Systems Design
EEC 134B	RF/Microwave Systems Design
EEC 136A	Electronic Design Project
EEC 136B	Electronic Design Project
EEC 181A	Digital Systems Design Project
EEC 181B	Digital Systems Design Project
EEC 193A	Senior Design Project
EEC 193B	Senior Design Project
EEC 195A	Autonomous Vehicle Design Project
EEC 195B	Autonomous Vehicle Design Project

The remaining electives may be any letter-graded upper division Electrical & Computer Engineering course not used to satisfy another major requirement or the following ECS courses:

ECS 036B	Software Development & Object-Oriented Programming in C++
ECS 150	Operating Systems & System Programming
ECS 152B	Computer Networks
ECS 163	Information Interfaces
ECS 175	Computer Graphics
ECS 177	Scientific Visualization
ECS 178	Geometric Modeling

Technical Electives

Code	Title	Units
------	-------	-------

Technical Electives

After completion of the upper division elective requirement (at least 8 courses, 2 core, 2 with labs, 1 project) any units in excess of 32 will count toward the technical elective requirement.

CHE 002B	General Chemistry ¹	5
ENG 035	Statics ²	4

A maximum of 6 units for any combination of engineering courses numbered 190C, 192, 198, and 199 may be used.

Mathematics

Any upper division course ³

Physics

Any upper division PHY course, except:

PHY 116		
PHY 137		
PHY 160	Environmental Physics & Society (restricted to 1 unit of technical elective)	
PHY 195	Senior Thesis	
PHY 197T	Tutoring in Physics & Astronomy	

Statistics

Any upper division course ⁴		
BIS 101	Genes & Gene Expression	4
BIS 101D	Genes & Gene Expression Discussion	1
BIS 102	Structure & Function of Biomolecules	3
BIS 103	Bioenergetics & Metabolism	3
BIS 104	Cell Biology	3
BIS 122	Population Biology & Ecology	3
BIS 122P	Population Biology & Ecology/Advanced Laboratory Topics	5
ECN 100A	Intermediate Micro Theory: Consumer & Producer Theory	4
ECN 100B	Intermediate Micro Theory: Imperfect Competition & Market Failure	4
ECN 101	Intermediate Macro Theory	4
ECN 102	Analysis of Economic Data	4
ECN 103	Economics of Uncertainty & Information	4
ECN 122	Theory of Games & Strategic Behavior	4
ECN 140	Econometrics	4
MGT 011A	Elementary Accounting	4
MGT 011B	Elementary Accounting	4
MGT 100	Introduction to Financial Accounting	3
MGT 120	Managing & Using Information Technology	4
MGT 140	Marketing for the Technology-Based Enterprise	4
MGT 150	Technology Management	4
MGT 160	Financing New Business Ventures	4
MGT 170	Management Accounting & Control	4
MGT 180	Supply Chain Planning & Management	4

¹ 002C and any upper division course; except CHE 195, 197.

² 045, and any upper division engineering course not used in satisfaction of core degree requirements, excluding ENG 100, 160 (restricted to 1 unit of technical elective; same as PHY 160.), 190 (restricted to 1 unit of technical elective), 198, ECS 132, 154A, 154B, & 188 (ECS 154AB courses may be used by EEEL majors who did not take EEC 170).

³ Except MAT 135A & 197TC.

⁴ Except STA 100, 102, 103, 104, 106, 108, 120, 130A.

Electrical Engineering, Minor

College of Engineering

There has been an increasing need for professionals in most engineering disciplines to understand the fundamentals of electronic circuits, electronic signals, semiconductor devices, applied electromagnetics, control systems, computer systems, and communication systems.

The objective of this minor program is to prepare students with the necessary theoretical and practical training in one or many of the above mentioned fields. The minor program curriculum is designed to allow flexibility while ensuring a solid foundation of fundamental electrical engineering concepts. The program is expected to accommodate students of diverse backgrounds.

The minor must be outside the department or program of your major and no more than one course may be counted toward both your minor and your major. The courses you take to satisfy the requirements of a minor, including those completed elsewhere, must be approved by an advisor in

the Department of Electrical & Computer Engineering. You must have a minimum overall GPA of 2.000 and satisfy the minor course requirements, listed below. To receive notation of this minor on your diploma, you must obtain a minor petition and file it no later than the deadline for filing for graduation.

Code	Title	Units
EEC 100	Circuits II	5
Choose at least one of the following combinations:		8-10
<i>Analog Circuits</i>		
EEC 110A & EEC 110B	Electronic Circuits I and Electronic Circuits II	
<i>Electromagnetics</i>		
EEC 130A & EEC 130B	Electromagnetics I and Introductory Electromagnetics II	
<i>Physical Electronics</i>		
EEC 140A & EEC 140B	Principles of Device Physics I and Principles of Device Physics II	
<i>Signals & Systems</i>		
EEC 150	Introduction to Signals & Systems	
EEC 150A	(Discontinued)	
EEC 150B	(Discontinued)	
EEC 151	Digital Signals & Systems	
<i>Communication</i>		
EEC 150	Introduction to Signals & Systems	
EEC 150A	(Discontinued)	
EEC 160	Signal Analysis & Communications	
<i>Control Systems</i>		
EEC 150	Introduction to Signals & Systems	
EEC 150A	(Discontinued)	
EEC 157A	Control Systems	
<i>Digital Systems</i>		
EEC 018 & EEC 180	Digital Systems I and Digital Systems II	
Choose at least 8 additional units of EEC courses numbered 101 or above ¹ ; If you elect to do a design project, you must be registered for both quarters.		8-10
Total Units		21-25

¹ Except EEC 190, EEC 192, EEC 196, EEC 197, EEC 198, EEC 199, EEC 298, EEC 299, EEC 390, EEC 396.

Energy Systems, Master of Science

Graduate Studies

Graduate Study

The Energy Graduate Group offers the M.S. (Plan 1—Thesis, and Plan II—Exam) and Ph.D. degrees in two tracks of study: Energy Science & Technology, and Energy Policy & Management. The program is designed to meet the world's growing needs for highly qualified, thoughtful and dedicated leaders in sustainable energy systems. Both tracks are aimed at a wide range of students, though Energy Science & Technology students are expected to come from disciplinary backgrounds in engineering or the physical sciences, while Energy Management & Policy students are expected to come from a wider range of disciplines interested in economic, policy, business and social aspects of energy systems.

Graduate Advisors

Adam Moule (Energy Science & Technology), Kevin Novan (Energy Policy & Management), Alan Meier (Admissions)

Undergraduate Study

The college has eight departments:

- Biological & Agricultural Engineering (p. 95)
- Biomedical Engineering (p. 115)
- Chemical Engineering (p. 121)
- Civil & Environmental Engineering (p. 137)
- Computer Science & Engineering (p. 156)
- Electrical & Computer Engineering (p. 193)
- Materials Science & Engineering (p. 288)
- Mechanical & Aerospace Engineering (p. 300)

Graduate Study

Graduate degrees (M.S. & Ph.D.) are offered in the following engineering disciplines:

- Biological Systems Engineering (p. 95)
- Biomedical Engineering (p. 119)
- Chemical Engineering (p. 121)
- Civil & Environmental Engineering (p. 137)
- Computer Science (p. 156)
- Electrical & Computer Engineering (p. 193)
- Materials Science & Engineering (p. 288)
- Mechanical & Aerospace Engineering (p. 300)
- Transportation Technology & Policy (p. 449)

The Major Programs

Twelve majors, leading to the B.S. degree, are open to students:

- Aerospace Science & Engineering (p. 300)
- Biochemical Engineering (p. 121)
- Biological Systems Engineering (p. 99)
- Biomedical Engineering (p. 115)
- Chemical Engineering (p. 123)
- Civil Engineering (p. 137)
- Computer Engineering (p. 193)
- Computer Science & Engineering (p. 157)
- Electrical Engineering (p. 197)
- Environmental Engineering (p. 142)
- Materials Science & Engineering (p. 288)
- Mechanical Engineering (p. 302)

Minor Programs

The College of Engineering offers nine undergraduate minors:

- Biomedical Engineering (Department of Biomedical Engineering) (p. 118)
- Computational Biology (Department of Computer Science) (p. 157)
- Construction Engineering & Management (Department of Civil & Environmental Engineering) (p. 141)

- Electrical Engineering (Department of Electrical & Computer Engineering) (p. 201)
- Energy Science & Technology (Department of Biological & Agricultural Engineering) (p. 107)
- Energy Policy (Department of Biological & Agricultural Engineering) (p. 107)
- Energy Efficiency (Department of Biological & Agricultural Engineering) (p. 106)
- Materials Science (Department of Materials Science & Engineering) (p. 290)
- Sustainability in the Built Environment (Department of Civil & Environmental Engineering) (p. 143)

Creative Writing, Master of Fine Arts

College of Letters & Science

Graduate Study

The Department of English (<http://english.ucdavis.edu/>) offers programs of study and research leading to the M.F.A. in creative writing. Detailed information may be obtained from the graduate advisor, the chairperson of the Department, or the English Department (<https://english.ucdavis.edu/mfa-creative-writing/>).

Director of Creative Writing

Katie Peterson, Ph.D.

English, Bachelor of Arts

College of Letters & Science

The Major Program

The study of English develops skills in reading analytically and perceptively and in writing clearly and effectively. Students major in English by taking courses in a wide variety of media, genres, topics, and historical periods. All students are introduced to the major by completing 20 units spread over courses in writing, any one of many topics courses, and the gateway series to the English major that covers "Literature in English" from the earliest medieval texts to the present. Students then build their own path through the major depending upon their particular interests, eventually completing 44 more units covering different historical periods, methods of theory and criticism, and thematic

focuses. After a shared set of courses, students choose to specialize either in Literary Criticism and Theory or Creative Writing. All majors have the opportunity to work with distinguished writers, critics, scholars, and teachers.

English majors learn how to:

- Write clearly and effectively.
- Think creatively and analytically.
- Organize and communicate ideas creatively and efficiently.
- Analyze and critically evaluate language and other forms of representation.
- Understand texts within their historical, political, and cultural contexts.
- Recognize and evaluate various perspectives, through creating or reading fiction, drama, and poetry.
- Evaluate how fictional and non-fictional narratives structure thought and action.
- Read long texts closely, analytically, and efficiently.
- Respond spontaneously with organized, clear statements and ideas.

Career Options

Graduates have found the major excellent pre-professional training for careers in teaching, writing, law, medicine, library work, journalism, and more. Many graduates are employed in publishing, marketing, advertising, or the tech sector. Others have worked in local, state, and federal government agencies, as well as in industry. Many have gone on to graduate study in a wide range of fields including English, education, counseling, and more.

Major Advisors

G. Bloom, S. Boluk, S. Chaganti, Z. Clemmons, J. Clover, L. Corin, G. Dobbins, F. Dolan, K. Frederickson, E. Freeman, E. Gray, P. Houston, H. Hsu, M. Jerng, D. Martín, J. Marx, T. Menely, C. Milburn, E. Miller, K. Peterson, M. Ronda, M. Stratton, M. Vernon, C. Waters, J. Wenderoth, T. Werth, M. Ziser

Major Advising

All new and prospective English majors are encouraged to see an undergraduate staff advisor, individually, once per year, at minimum.

Foreign Languages

Students who contemplate advanced study in English should prepare for foreign language requirements for higher degrees and should consult with the graduate advisor.

Undergraduate Advisor

See English (<http://english.ucdavis.edu>) or the Departmental Advising Office in 177/179 Voorhies Hall.

Honors & Honors Program

A Senior Honors Program is available to an invited group of English majors, who prepare and write a Senior Thesis (either a research paper or creative writing) in their final year. The critical honors program consists of 4 units of 194H and 4 units of 195H, normally taken during winter and spring quarters of the senior year. The creative writing honors program consists of 4 units of 100FA or 100PA, normally taken during spring quarter of the junior year, and 4 units of 195H, normally taken winter quarter of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Eligibility criteria and application

materials may be obtained at the Undergraduate Advising office in 177 Voorhies Hall or see English (<http://english.ucdavis.edu>). For more details, see Graduation Honors.

Education Abroad Options

The department strongly encourages interested students to pursue their studies abroad. It is possible for students to complete significant portions of the English major provided that the course is evaluated as at least 4 UC Davis units; the course is considered upper division by the standards set forth by UC Davis Study Abroad; and the student presents copies of the coursework, syllabus, and writing assignments to the department's advising staff.

Teaching Credential Subject Representative

A major in English qualifies students for subject matter preparation for the teaching credential.

Entry Level Writing

Students must have met the Entry Level Writing requirement before taking any course in English.

Prerequisites

ENL 003 or UWP 001 is required for admission into all preparatory courses (ENL 040, ENL 041, ENL 043, ENL 044, ENL 045, ENL 010A, ENL 010B, ENL 010C), and all upper division courses, unless otherwise stated in the course listings. COM 001, COM 002, COM 003, or COM 004 or NAS 005 may normally be substituted for ENL 003 or UWP 001.

Coursework

Up to 4 upper division units in a literature class outside of English may count toward the requirements of the major.

Code	Title	Units
Preparatory Subject Matter		
Choose one:		4
ENL 003	Introduction to Literature	
UWP 001	Introduction to Academic Literacies	
Or equivalent		
ENL 010A	Literatures in English I: To 1700	4
ENL 010B	Literatures in English II: 1700-1900	4
ENL 010C	Literatures in English III: 1900 to Present	4
Choose one:		4
ENL 040	Introductory Topics in Literature	
ENL 041	Introductory Topics in Literature & Media	
ENL 043	Introductory Topics in Drama	
ENL 044	Introductory Topics in Fiction	
ENL 045	Introductory Topics in Poetry	
Preparatory Subject Matter Subtotal		20
Depth Subject Matter		
ENL 110A	Introduction to Literary Theory	4
or ENL 110B	Introduction to Modern Literary & Critical Theory	
<i>Historical Distribution Requirements</i>		
Choose three courses focusing on literature written in English before 1800, at least one of which must be on literature written primarily before 1500:		12
Before 1500		
ENL 111	Topics in Medieval Literature	

ENL 113A	Chaucer: Troilus & the "Minor" Poems
ENL 113B	Chaucer: The Canterbury Tales
1500-1800	
ENL 115	Topics in 16th- & 17th-Century Literature
ENL 117	Shakespeare
ENL 122	Milton
ENL 123	18th-Century British Literature
ENL 142	Early American Literature
ENL 150A	British Drama to 1800
ENL 155A	18th-Century British Novel
ENL 185A	Literature by Women Before 1800

Choose one course focusing on literature written in English between 1800 and 1900: 4

ENL 130	British Romantic Literature
ENL 133	19th-Century British Literature
ENL 143	19th-Century American Literature to the Civil War
ENL 144	Post-Civil War American Literature
ENL 155B	19th-Century British Novel
ENL 158A	The American Novel to 1900
ENL 181A	African American Literature to 1900
ENL 185B	Literature by Women from 1800-1900

Choose one course focusing on literature written in English between 1900 and present: 4

ENL 125	Topics in Irish Literature
ENL 137	British Literature, 1900-1945
ENL 138	British Literature, 1945 to Present
ENL 146	American Literature 1900-1945
ENL 147	American Literature, 1945 to the Present
ENL 150B	Drama from 1800 to the Present
ENL 154	The Graphic Novel
ENL 155C	20th-Century British Novel
ENL 156	The Short Story
ENL 157	Detective Fiction
ENL 158B	The American Novel from 1900 to the Present
ENL 166	Love & Desire in Contemporary American Poetry
ENL 167	20th-Century African American Poetry
ENL 168	20th-Century American Poetry
ENL 181B	African American Literature 1900-Present
ENL 185C	Literature by Women after 1900

Non-Historical Distribution Requirements

Choose one course on literatures, race, and ethnicity: 4

ENL 139	Topics in Global Literatures & Cultures
ENL 140	Topics in Postcolonial Literatures & Cultures
ENL 141	Topics in Diasporic Literatures & Migration
ENL 167	20th-Century African American Poetry
ENL 178	Topics in Nations, Regions, & Other Cultural Geographies
ENL 179	Topics in Comparative Racial & Ethnic Literary Studies

ENL 181A	African American Literature to 1900
ENL 181B	African American Literature 1900-Present
ENL 182	Literature of California

Choose one in-depth topic course in language, media, and literature: 4

ENL 105	History of the English Language
ENL/LIN/UWP 106	English Grammar
ENL 107	Freedom of Expression
ENL 120	Law & Literature
ENL 160	Film as Narrative
ENL 162	Film Theory & Criticism
ENL/STS 164	Writing Science
ENL 171A	The Bible as Literature: The Old Testament
ENL 171B	The Bible as Literature: Prophets & New Testament
ENL/CDM/STS 172	Video Games & Culture
ENL/STS 173	Science Fiction
ENL 180	Children's Literature
ENL 183	Young Adult Literature
ENL 184	Literature & the Environment
ENL 186	Literature, Sexuality, & Gender
CDM/ENL/STS 172	Video Games & Culture
LIN/ENL/UWP 106	English Grammar
STS/CDM/ENL 172	Video Games & Culture
STS/ENL 173	Science Fiction
UWP/ENL/LIN 106	English Grammar

Please note that while some courses are identified as fulfilling more than one distribution requirement, a given course can only fulfill one such requirement.

Area of Emphasis

Choose at least one: 12

Literature, Criticism, & Theory (p. 205)
Creative Writing (p. 206)

Depth Subject Matter Subtotal 44

Total Units 64

Literature, Criticism, & Theory Emphasis

Please note that English ENL 110A or ENL 110B is a prerequisite for advanced study in the major.

Code	Title	Units
	One upper division English elective.	4
	Choose two advanced courses, one of which can be a seminar:	8
ENL 149	Topics in Literature	
ENL 153	Topics in Drama	
ENL 159	Topics in the Novel	
ENL 163	Literary Study in the British Isles	
ENL 165	Topics in Poetry	
ENL 177	Study of an Individual Author	
ENL 187A	Topics in Literature & Media	
ENL 188A	Topics in Literary & Critical Theory	

ENL 189	Seminar in Literary Studies	
ENL 194H	Seminar for Honors Students	
ENL 195H	Honors Thesis	
Total Units		12

Creative Writing Emphasis

Code	Title	Units
Please note that students must select courses in more than one genre.		
Three sections of:		12
ENL 100F	Creative Writing: Fiction	
ENL 100P	Creative Writing: Poetry	
ENL 100NF	Creative Writing: Non-Fiction	
ENL 100FA	Creative Writing Advanced Fiction	
ENL 100PA	Creative Writing Advanced Poetry	
Total Units		12

English, Minor

College of Letters & Science

The Minor Program

Pursuing a minor in English allows students to develop their abilities to read critically and to write clearly while enjoying the pleasures that great literature has to offer. To complete the minor, students take five upper division courses, at least four of which focus on literature, film, or other media. Choices within the curriculum are unlimited by historical period, and can include a course in creative writing. All minors have the opportunity to work with distinguished writers, critics, scholars, and teachers.

Career Alternatives

Graduates have found the minor to be an excellent complement to their training in other fields, helping to demonstrate their writing and critical thinking skills to employers and graduate schools.

Code	Title	Units
Five upper division (100 level) English (ENL) courses; at least four of these must be literature courses (numbered 107-186).		20
Total Units		20

English, Master of Arts

College of Letters & Science

Graduate Study

The department offers an M.A. in Literature in route to the Ph.D. Detailed information may be obtained from the graduate advisor or the Chairperson of the Department.

Graduate Director

Hsuan Hsu, Ph.D.

English, Doctor of Philosophy

College of Letters & Science

Graduate Study

The Department of English offers a program of study and research leading to the Ph.D. in literature. Detailed information may be obtained from the graduate advisor or the Chairperson of the Department.

The department's affiliation with the Critical Theory Program also provides the opportunity for Ph.D. students in English to prepare for the designated emphasis in Critical Theory (an interdisciplinary program in theories and methodologies in the humanities and social sciences). There is a range of other programs in which students may pursue a Designated Emphasis; see Designated Emphasis (<https://english.ucdavis.edu/graduate/phd-literature/designated-emphasis/>).

Graduate Director

Hsuan Hsu, Ph.D.

Entomology & Nematology

College of Agricultural & Environmental Sciences

Steve Nadler, Ph.D., Chairperson of the Department
Joanna Chiu, Ph.D., Vice Chairperson of the Department

Department Office

Total Units		20-23

Animal Biology, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major

Animal Biology Major (<https://abi.ucdavis.edu/>);
Faculty (https://entomology.ucdavis.edu/people/?first=&last=&title=&unit=&field_sf_person_type_target_id%5B0%5D=26)

The Major Program

The Animal Biology major offers students training in the biological and natural sciences as they apply to animals. The major covers basic biological sciences foundational to understanding animal evolution, systematics, ecology, physiology and molecular biology. Students in the Animal Biology major are encouraged to think beyond particular groups of animals in which they are interested and to consider science as a process and a way of learning new things about them, and of advancing society. The program emphasizes biological principles used in research and in solving societal conflicts with animals in agriculture, urban areas, or natural environments.

The Program

The major consists of core courses in the sciences that build an understanding of animal biology from the molecular to the ecological and evolutionary levels of organization. After completing these core courses, students choose an interdisciplinary practicum project from general animal biology, predicated on their ultimate career goals. They plan this emphasis of study in a required discussion-seminar course and in consultation with a mentor. The program includes a senior thesis,

which each student employs the process and principles of science to propose and carry out the practicum project they choose, integrating the disciplines of the major. The Animal Biology major emphasizes research in biological principles as opposed to animal care and husbandry.

Practicum Research & Career Alternatives

The Animal Biology program and professional research interests of each student guides him or her in Practicum and career choices. On- and off-campus Practicum research opportunities occur in research laboratories, at field situations, in zoos and public aquariums, with governmental agencies, national and state parks with private industry, and in international programs. A degree in Animal Biology prepares students for careers in research, teaching, academia, governmental regulation, health, or agriculture where these emphasize integrative biology of animals. Careers in veterinary medicine, animal husbandry and animal management remain open to Animal Biology majors as well, however, other preparation may be required. Students in the major focus on gaining research experience, and become well prepared to continue their training at the graduate or professional level in a variety of biological disciplines.

Entomology, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

The Entomology major is a general biological science program. The curriculum is designed to develop an understanding of fundamental biological concepts by studying insects. Insects offer unique opportunities to study biological systems and are model experimental animals. Many insects are either pests, or beneficial species that have great importance to the economy, environment or public health. Students may focus on specific areas of interest including agricultural entomology; insect systematics & evolution; behavior & ecology; medical entomology; and insect molecular biology, physiology & toxicology.

The Program

Students begin their study in Entomology with selected insect biology courses. After completing these courses, students may enroll in courses in their particular area of interest. The faculty encourages students to do research internships in their laboratories.

Career Alternatives

Entomology graduates find careers in many different areas of applied or basic biology. Graduates have the opportunity to continue in professional graduate programs such as veterinary or human medicine, or get advanced degrees leading to careers in biotechnology, conservation biology, or academic teaching and research. Many graduates have participated in internship programs with the California Department of Food and Agriculture and found careers in insect diagnostic laboratories, conducting insect surveys, and/or developing entomological collections. Other graduates have worked in agriculture in the area of insect pest management. Graduates are prepared for managerial and technical positions with state and federal agencies and in agricultural production and supporting industries. Some Entomology graduates pursue careers in primary, secondary, and college level science education.

- Environmental Policy & Management, Master of Science (p. 211)

Environmental Policy & Management, Master of Science

Graduate Studies

Graduate Study

The Master of Science in Environmental Policy & Management (EPM) program provides training in applying science, engineering and economics to real-world environmental policy and management issues. Graduates of this program are equipped to integrate technical and scientific expertise in a social-political-natural context to provide effective environmental policy and management solutions; for more information, see Environmental Policy & Management (<http://epm.ucdavis.edu/>).

Preparation

Before enrolling, a student should have completed a program of study equivalent to a B.A. or B.S. in a Science, Technology, Engineering & Math (STEM) field. Students without a prior degree in a STEM field are required to complete preparatory courses, or their equivalents. Students should have a minimum of two quarters of introductory science and two quarters of upper division STEM or economics coursework.

Environmental Science & Policy

College of Agricultural & Environmental Sciences

Susan Harrison, Ph.D., Chairperson of the Department

Marissa L. Baskett, Ph.D., Co-Vice Chairperson

Gwen Arnold, Ph.D., Co-Vice Chairperson

Department Office

2132 Wickson Hall; 530-752-3026; Environmental Science & Policy (<http://desp.ucdavis.edu/>); Faculty (<http://desp.ucdavis.edu/faculty/>)

The Program of Study

Environmental Science & Policy is a teaching and research department offering courses, workshops, and directed group study classes that focus on the complex trade-offs that arise from interdependencies between natural and human systems. The department offers Bachelor of Science degrees in Environmental Science & Management (p. 215) and in Environmental Policy Analysis & Planning (p. 212). Courses in Environmental Science & Policy (p. 211) also supplement major programs in a wide variety of established disciplines.

Current Information

Through its continuing contacts with many other departments and teaching divisions on the campus, the department develops a variety of special courses and workshops each year. Check with the Department office for up-to-date information about our courses and workshops.

Graduate Study

The Graduate Group in Ecology (<https://ecology.ucdavis.edu/>) offers an M.S. and Ph.D. degree program. The Environmental Policy and Management (<https://epm.ucdavis.edu/>) graduate program offers an M.S. degree program.

Environmental Policy Analysis & Planning, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

The major in Environmental Policy Analysis & Planning develops skills for designing and assessing sustainable policies for environmental quality and natural resource management.

Any student in good standing is eligible to transfer to the major; to do so, please see the staff advisor, Melissa Whaley, in 2134 Wickson Hall, or the lead faculty advisor, Prof. G. Arnold, in 2144 Wickson Hall.

The Program

This major provides students with a strong background in policy analysis, including the evaluation of policy alternatives and the study of factors affecting policy formulation and implementation. Key components of this interdisciplinary training include a general background in the natural sciences relevant to environmental policy, economics, political science, statistics, and research methodology to quantitatively analyze environmental problems and policy options. In addition, students are encouraged to develop substantive knowledge in a specific field of environmental policy, such as urban and regional planning, water policy, transportation and energy, climate policy, or conservation management.

Careers

Environmental policy analysis and planning graduates are prepared for employment in environmental, natural resource, energy, and transportation focused public agencies, consulting firms, non-governmental organizations, and businesses, or as legislative aides for elected representatives. The major is also excellent preparation for students who want to go on to graduate work in law, planning, public policy, political science, economics, or business.

Environmental Science & Management, Bachelor of Science

College of Agricultural & Environmental Sciences

The Environmental Science & Management (ESM) major is jointly coordinated by the Department of Environmental Science & Policy and the Department of Land, Air, & Water Resources.

Environmental Science & Policy

Susan Harrison, Chairperson

Land, Air, & Water Resources

William Horwath, Chairperson

Department Office

Environmental Science & Policy: 2132 Wickson Hall; 530-752-3026; Environmental Science & Policy (<http://desp.ucdavis.edu/>); Faculty (<http://desp.ucdavis.edu/faculty/>)

Land, Air & Water Resources: 1110 Plant and Environmental Sciences Building; 530-752-1130; Land, Air & Water Resources (<http://lawr.ucdavis.edu/>); Faculty (<http://www.lawr.ucdavis.edu/people/faculty/>)

The Major Program

The Environmental Science & Management (ESM) major is designed for students who are interested in solving environmental problems from an interdisciplinary perspective linking the natural and social sciences. Students who choose this major will study the interaction of physical, biological, and social components of environmental problems.

Students completing the program will understand the scientific basis for environmental decision making and the legal, economic, and political issues involved in management of the environment.

The Program

Courses in biology, chemistry, physics, economics, geology, and calculus form the lower division preparatory foundation of the curriculum. These are then tied together with Environmental Science & Policy ESP 001, which provides an inter-disciplinary analysis of several environmental problems. The upper division core consists of foundation courses in physical, biological, and social sciences, as well as applied courses in environmental monitoring, GIS, impact reporting, and statistical analysis. In their junior year, students must choose a specialized track from the following six options:

- Climate Change & Air Quality
- Ecology, Biodiversity, & Conservation
- Environmental Data Science
- Natural Resource Management
- Soils & Biogeochemistry
- Watershed Science

A capstone course is required for all seniors and serves to integrate the science, policy/management and biology aspects of the ESM major. All students gain practical experience through field courses and a required internship. Selected students may also pursue an honors thesis in their senior year.

The ESM major is jointly administered by the Departments of Environmental Science & Policy (ESP) and Land, Air & Water Resources (LAWR). Any student in good standing is eligible to transfer to the major; to do so, please see the student affairs officers in 2134 Wickson Hall or in 1150 Plant & Environmental Sciences Building.

Careers

Graduates from this program are prepared to pursue careers as practicing environmental scientists, resource analysts and planners working for public agencies and private firms specializing in environmental quality, natural resources or ecological research. The major is also excellent preparation for graduate or professional training in physical and/or biological environmental science graduate programs, as well as in environmental law, administration and environmental policy.

Major Advisors

Marissa Baskett (Environmental Science & Policy); Terrence Nathan (Land, Air & Water Resources)

Advising centers for the major, including peer advising, are located in both the Environmental Science & Policy and Land, Air & Water Resources departments. Students whose last names begin with the letters:

- A-L, see Melissa Whaley in 2134 Wickson Hall.
- M-Z, see Lacole Brooks in 1150 Plant & Environmental Sciences.

Courses appearing in more than one section can only be used to fulfill one section.

Physical Processes

Choose one: 3-5

ATM 060	Introduction to Atmospheric Science
ATM 116	Modern Climate Change
ATM 133	Biometeorology
ESM 121	Water Science & Management
ESM 131	Air as a Resource
ESP 152	Coastal Oceanography
GEL 134	Environmental Geology & Land Use Planning
HYD 143	Ecohydrology
SSC 100	Principles of Soil Science

Environmental Policy

Choose one: 3-5

ESP 161	Environmental Law
ESP 166	Ocean & Coastal Policy
ESP 168A	Methods of Environmental Policy Analysis
ESP 169	Water Policy & Politics
ESP 170	Conservation Biology Policy
ESP 171	Urban & Regional Planning
ESP 172	Public Lands Management
ESP 174	Environmental Justice Policy & Practice
ESP 179	Environmental Impact Assessment
SOC 160	Sociology of the Environment

Evolution

EVE 100	Introduction to Evolution	4
---------	---------------------------	---

Conservation Biology

Choose one: 4

WFC 154	Conservation Biology
or ESP 127	Plant Conservation Biology

Field Methods

Choose one: 3-5

ESP 123	Introduction to Field & Laboratory Methods in Ecology
ESP 124	Marine & Coastal Field Ecology
ESP 151L	Limnology Laboratory
EVE/ENT 180A	Experimental Ecology & Evolution in the Field

WFC 100	Field Methods in Wildlife, Fish, & Conservation Biology
WFC 126	Conservation in Working Landscapes
ENH 160 & 160L	Restoration Ecology and Restoration Ecology Laboratory
PLS 147 & 147L	California Plant Communities and California Plant Communities Field Study

Population Ecology

Choose one:

ESP 121	Population Ecology	4
or WFC 122	Population Dynamics & Estimation	

Community Ecology

Choose one: 3-4

EVE 104	Community Ecology
EVE 115	Marine Ecology
EVE 181	Ecology & Evolution of Animal-Plant Interactions
PLB/EVE 117	Plant Ecology
WFC 155	Wildlife Habitat Ecology & Conservation

Ecosystems

Choose one: 3-4

ENH 160	Restoration Ecology
ESP 151	Limnology
ESP 155	Wetland Ecology
EVE 147	Biogeography
HYD 143	Ecohydrology
PLS 162	Urban Ecology
PLS 163	Ecosystem & Landscape Ecology

Choose one cross-cutting ecology course 3-5

ESM 141	Role of Fire in Natural Ecosystems
ESM/PLS 144	Trees & Forests
ESP 124	Marine & Coastal Field Ecology
ESP/GEL 150C	Biological Oceanography
ESP 151	Limnology
ESP 155	Wetland Ecology
ETX 150	Evolution in Human-Altered Environments
EVE 109	Molecular Ecology
EVE 115	Marine Ecology
EVE 138	Ecology of Tropical Latitudes
PLS 130	Rangelands: Ecology, Conservation & Restoration
WFC 125	Tropical Ecology & Conservation
WFC 151	Wildlife Ecology
WFC 155	Wildlife Habitat Ecology & Conservation
WFC 168	Climate Change Ecology

Choose one organismal biology course 3-5

ENT 103	Insects Systematics
ENT 116	Freshwater Macroinvertebrates
EVE 112	Biology of Invertebrates
EVE 114	Experimental Invertebrate Biology

PLB/PLS 102	California Floristics (fulfills both the organismal lecture and lab requirements, simultaneously)	
PLB 116	Plant Morphology & Evolution (fulfills both the organismal lecture and lab requirements, simultaneously)	
PLB/EVE 119	Population Biology of Invasive Plants & Weeds (fulfills both the organismal lecture and lab requirements, simultaneously)	
WFC 110	Biology & Conservation of Wild Mammals	
WFC 111	Biology & Conservation of Wild Birds	
WFC 120	Biology & Conservation of Fishes	
WFC 134	Herpetology	
<i>Complete one lab associated with either the cross-cutting ecology or organismal biology course:</i>		0-4
ENT 116L	Aquatic Insect Collection	
ESP 151L	Limnology Laboratory	
ESP 155L	Wetland Ecology Laboratory	
EVE 112L	Biology of Invertebrates Laboratory	
EVE/ENT 180B	Experimental Ecology & Evolution in the Field	
WFC 110L	Laboratory in Biology & Conservation of Wild Mammals	
WFC 111L	Laboratory in Biology & Conservation of Wild Birds	
WFC 120L	Laboratory in Biology & Conservation of Fishes	
WFC 134L	Herpetology Laboratory	
Total Units		33-49

Environmental Data Science Track

Code	Title	Units
<i>Environmental Data Science</i>		4
ESP 106	Environmental Data Science

Choose one:		3-4
ATM 120	Atmospheric Thermodynamics & Cloud Physics	
ESP 121	Population Ecology	
HYD 143	Ecohydrology	
PLS 123	Introduction to Plant & Crop Systems Modeling	
WFC 122	Population Dynamics & Estimation	
<i>Statistical Analysis</i>		
Choose two:		8
STA 104	Applied Statistical Methods: Nonparametric Statistics	
STA 106	Applied Statistical Methods: Analysis of Variance	
STA 108	Applied Statistical Methods: Regression Analysis	
STA 130A	Mathematical Statistics: Brief Course	
STA 130B	Mathematical Statistics: Brief Course	
STA 135	Multivariate Data Analysis	
STA 137	Applied Time Series Analysis	
STA 141A	Fundamentals of Statistical Data Science	
STA 141B	Data & Web Technologies for Data Analysis	
STA 142A	Statistical Learning I	
<i>Physical Processes</i>		
Choose one:		3-5
ATM 110	Weather Observation & Analysis	
ATM 116	Modern Climate Change	
ATM 133	Biometeorology	
ESM 100	Principles of Hydrologic Science	
ESM 121	Water Science & Management	
ESM 131	Air as a Resource	
SSC 100	Principles of Soil Science	
<i>Biological Processes</i>		
Choose one:		3-5
ESP 124	Marine & Coastal Field Ecology	
ESP/GEL 150C	Biological Oceanography	
ESP 151	Limnology	
ESP 152	Coastal Oceanography	
ESP 155	Wetland Ecology	
EVE/PLB 117	Plant Ecology	
EVE 147	Biogeography	
GEL 136	Ecogeomorphology of Rivers & Streams	
PLS 101	Agriculture & the Environment	
PLS 130	Rangelands: Ecology, Conservation & Restoration	
PLS 163	Ecosystem & Landscape Ecology	
WFC 125	Tropical Ecology & Conservation	

WFC 168	Climate Change Ecology	
Total Units		36-43

Natural Resource Management Track

Code	Title	Units
------	-------	-------

Courses appearing in more than one section can only be used to fulfill one section.

Environmental Policy

Choose three: 9-13

ESP 160	The Policy Process	
ESP 165	Climate Policy	
ESP 166	Ocean & Coastal Policy	
ESP 167	Energy Policy	
ESP 168A	Methods of Environmental Policy Analysis	
ESP 169	Water Policy & Politics	
ESP 170	Conservation Biology Policy	
ESP 171	Urban & Regional Planning	
ESP 172	Public Lands Management	
ESP 174	Environmental Justice Policy & Practice	
ESP 179	Environmental Impact Assessment	
HYD 150	Water Law	
SOC 160	Sociology of the Environment	

Environmental Law

Choose one: 3-4

ESP 161	Environmental Law	
or HYD 150	Water Law	

Statistics

Choose one: 4

ARE 106	Econometric Theory & Applications	
ECN 102	Analysis of Economic Data	
STA 101	Advanced Applied Statistics for the Biological Sciences	
STA 103	Applied Statistics for Business & Economics	
STA 106	Applied Statistical Methods: Analysis of Variance	
STA 108	Applied Statistical Methods: Regression Analysis	
STA 130A	Mathematical Statistics: Brief Course	
STA 131A	Introduction to Probability Theory	
Or equivalent upper division statistics.		

Biological Processes

Choose two: 6-8

ENT 104	Behavioral Ecology of Insects	
ESM 141	Role of Fire in Natural Ecosystems	
ESM/PLS 144	Trees & Forests	
ESP 151	Limnology	
ESP 155	Wetland Ecology	
EVE 115	Marine Ecology

Environmental Toxicology

College of Agricultural & Environmental Sciences

Robert H. Rice, Ph.D., Chairperson of the Department; July 1, 2019-June 30, 2024

Department Office

4138 Meyer Hall; 530-752-1142; Environmental Toxicology (<http://etox.ucdavis.edu>); Faculty (<http://etox.ucdavis.edu/directory/faculty/>)

- Environmental Toxicology, Bachelor of Science (p. 221)
- Environmental Toxicology, Minor (p. 223)

Environmental Toxicology, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

Toxic agents in the environment include pesticides, food additives, industrial waste, and metals as well as chemicals produced by animals, plants, fungi and bacteria. Students in the Environmental Toxicology major learn how toxicants produce adverse effects by understanding their environmental fates and biological activities. They learn about monitoring concentrations and the distribution and persistence of agents found in water, soil, air and foods. Toxicity testing procedures and exposure assessments are used to help evaluate the potential for harm to humans and other species. By understanding the cellular targets and biochemical

mechanisms of perturbation by toxicants, toxicologists can better estimate adverse effects. Overall, students learn mechanisms by which toxic agents act, their origin and fate and how toxicologists evaluate the risk of adverse effects and balance them against the benefits.

The Program

Preparatory courses in biology, chemistry, mathematics, and physics are required to provide fundamental principles that underlie toxicology. Students in the major are expected to understand the environmental fates and biological activities of different classes of toxic substances, and the legislative issues that arise from chemical use. Opportunities are available to develop an in-depth understanding in areas of emphasis through a selection of electives.

Emphases

Elective course work in many disciplines can complement the required core courses. Providing a framework for selecting restricted electives, the major offers specializations in (1) Ecotoxicology & Environmental Chemistry, (2) Forensic Science & Regulatory Toxicology, and (3) Molecular & Biomedical Toxicology. The first category includes topics in chemical fate, transport and degradation, as well as ecology, wildlife, and aquatic toxicology. The second category includes forensic science, environmental policy and management, and public health. The third category includes pharmacology, biotechnology, medicine, veterinary medicine, and food toxicology. Students are encouraged to select course work from these Emphases and beyond to match their interests.

Internships & Career Alternatives

Occupations that use environmental toxicology include risk assessment, pharmaceutical development, food additive toxicity testing, managing regulatory compliance, residue or forensic analysis, pest control, monitoring and field sampling, industrial hygiene, and environmental health and safety. A substantial proportion of graduates elect to pursue advanced professional training in law, medical, pharmacy, or veterinary medical school, or in graduate programs in pharmacology, toxicology, agricultural and environmental chemistry, or public health. During undergraduate study, optional internships or research projects are recommended to provide training and work experience to help students pursue future goals.

Lead Faculty Advisor

Andrew Whitehead

Environmental Toxicology Major Advisor

Erica Cefalo

Advising Center for the major is located at 1086 Academic Surge. Contact the Environmental Toxicology major advisor at 530-754-9796.

Choose three-four courses: 12-16

Electives selected for area of Emphasis with faculty advisor's approval with 6 unit combined maximum of 190, 192, 198, and 199; see department website for details.

Depth Subject Matter Subtotal 46-55

Total Units 118-129

Environmental Toxicology, Minor

College of Agricultural & Environmental Sciences

Environmental Toxicology explores the effects of toxicants (synthetic & naturally occurring) on the normal biochemical, cellular and physiological functioning of biological systems. The minor enhances your understanding of the fate and impact of chemicals in the environment and your appreciation of the complex responses of biological systems when challenged by them.

- Epidemiology, Doctor of Philosophy (p. 224)

Epidemiology, Master of Science

Graduate Studies

¹ Preferably, the course should be taken prior to enrollment in ETX 102B & ETX 103B.

Graduate Study

The Graduate Group in Epidemiology offers programs of study and research leading to M.S. and Ph.D. degrees. Areas of interest include environmental/occupational epidemiology; infectious disease epidemiology; zoonotic & vector-borne diseases; epidemiologic methods & biostatistics; health services & health economics; nutritional epidemiology; reproductive, perinatal, developmental & pediatric epidemiology; wildlife epidemiology; social & behavioral epidemiology; and cancer epidemiology. For detailed information regarding the program, address the chairperson of the group or see the website.

Evolution & Ecology

College of Biological Sciences

John Stachowicz, Ph.D., Chairperson of the Department

Department Office

2320 Storer Hall; 530-752-1272; Evolution & Ecology (<https://eve.ucdavis.edu/>); Faculty (<https://eve.ucdavis.edu/people/>)

The department of Evolution & Ecology offers the majors and minor in Evolution, Ecology & Biodiversity.

- Evolution, Ecology & Biodiversity, Bachelor of Arts (p. 225)
- Evolution, Ecology & Biodiversity, Bachelor of Science (p. 226)
- Evolution, Ecology & Biodiversity, Minor (p. 228)

Evolution, Ecology & Biodiversity, Bachelor of Arts

College of Biological Sciences

The major in Evolution, Ecology & Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.

The Program

The program of study for the major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in biodiversity, evolution and ecology and various more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking. Evolution, Ecology & Biodiversity majors may earn either a Bachelor of Science or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

Career Alternatives

A degree in Evolution, Ecology & Biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.

Teaching Credential Subject Representative

Students planning for a teaching career should consult the School of Education in regards to preparation for certification; see the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

Evolution, Ecology & Biodiversity, Bachelor of Science

College of Biological Sciences

The major in Evolution, Ecology & Biodiversity offers the student a broad background in the theoretical and empirical basis of our understanding of the diversity and distribution of living organisms.

The Program

The program of study for the major begins with a core of introductory courses in mathematics, physical sciences, and biology. These are followed by survey courses in biodiversity, evolution and ecology and various more specialized courses that focus the student on particular disciplines or organisms, with an emphasis on problem-solving and critical thinking. Evolution, Ecology & Biodiversity majors may earn either a Bachelor of Science or a Bachelor of Arts degree. The requirements for the B.S. degree program include more science courses, such as biochemistry, whereas those for the A.B. degree program allow room for more electives within the humanities and social sciences. The A.B. degree is especially appropriate for those students who wish to combine arts or languages with evolution and ecology for career preparation in such areas as scientific writing, translating or illustration.

Career Alternatives

A degree in Evolution, Ecology & Biodiversity prepares the student for career opportunities in research, teaching, health professions, veterinary medicine, agriculture, environmental management, and industry. Many students gain some research experience while at UC Davis and choose to continue their training at the graduate level. This track offers careers in academics, government, environmental organizations, or business.

Teaching Credential Subject Representative

Students planning for a teaching career should consult the School of Education in regards to preparation for certification; see the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>)

Evolution, Ecology & Biodiversity, Minor

College of Biological Sciences

Learn about the diversity of life of Earth, including diversity in genes, physiology, shapes, sizes, and behaviors. You will learn about how this diversity emerged, as plants, animals, and microbes became adapted to the environment and to each other. You will learn to predict whether populations of interacting organisms will persist over time.

- Food Science, Bachelor of Science (p. 229)

Food Science, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

Food Science is a discipline in which biological, physical, and sensory sciences are integrated for the study of foods to ensure their safety, quality, and healthful properties. The food science curriculum encompasses food chemistry and biochemistry, food safety and microbiology, food processing and preservation, and sensory and consumer sciences.

The Program

Food Science is a multidisciplinary major that includes core competencies in food chemistry and analysis, food safety and microbiology, and food processing and engineering. After completing the preparatory course work, students focus on advanced subject courses in food chemistry and biochemistry, food processing, sensory evaluation, and food microbiology applied to improve the safety, stability, taste, nutrition, convenience, sustainability and value of foods.

Career Alternatives

Opportunities for employment include positions in the food and allied industries, government agencies, and educational and research institutions. Graduate study for the food science student may lead to the M.S. or Ph.D. degree in food science, or in related fields such as agricultural chemistry, biochemistry, microbiology, nutrition and health sciences.

Advising Center for the major is located in 1204 RMI South Building; 530-752-3250.

- Food Science, Master of Science (p. 230)
- Food Science, Doctor of Philosophy (p. 230)

Food Science, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The interdepartmental Graduate Group in Food Science offers programs of study leading to the M.S. degree. Graduate studies stress the application of the biological, chemical, physical, and behavioral sciences to processing, preservation, quality evaluation, public health aspects, and utilization of foods. Areas of specialization include chemistry-biochemistry, microbiology, engineering-technology, brewing, and sensory science. Detailed information regarding graduate study is available through the Group Chairperson or the Group office.

Graduate Advisor

- Forensic Science, Master of Science (p. 230)

Forensic Science, Master of Science

Graduate Studies

Graduate Study

The Forensic Science Graduate Group offers the degree of MS in Forensic Science. This program, offering a Plan I-Thesis option and a Plan II-Capstone Option, has two tracks, DNA or Criminalistics, enabling the student to take core courses emphasizing the physical or biological sciences. Each track requires the student to take nine core courses, totaling 26-27 units, 3 units of seminar, and the appropriate number of elective/research units for total 54 units. Students can take courses outside their specializations, but they must complete the courses required for their own track. The FOR seminar courses in the fall and winter quarters are required for new students. The FOR spring seminar may be taken in any spring quarter or students may take one additional seminar course in another department or program before graduation.

Preparation

Appropriate preparation is an undergraduate degree in physical or natural sciences, engineering or a closely related field with a GPA of 3.000 or higher. Examples include Biochemistry, Chemistry, Molecular Biology, Biology, Genetics, and Engineering. Applicants must have completed at least one year of general chemistry, two quarters of organic chemistry, one year of general physics, math through calculus and a class in statistics. Other recommended courses include general biology, biochemistry and genetics.

Graduate Advisors

Ruth Dickover (Forensic Science), You-Lo Hsieh (Division of Textiles & Clothing), Robert B. Kimsey (Entomology), Christyann Darwent

(Anthropology), Jelmer Eerkens (Anthropology), Robert Poppenga (California Animal Health & Food Safety Laboratory), Bahram Ravani (Mechanical & Aeronautical Engineering), Moshe Rosenberg (Food Science & Technology), Matt Wood (Environmental Toxicology), Glendon Parker (Environmental Toxicology), Gang Sun (Textiles & Clothing), Bart Weimar (Population Health & Reproduction), Allison Ehrlich (Environmental Toxicology), Wilson Rumbelha (Molecular Biosciences), Ben Moeller (Veterinary Medicine)

French, Bachelor of Arts

College of Letters & Science

The Major Program

The major program assures proficiency in all four language skills—speaking, listening, reading, and writing—and acquaints students with the intellectual and cultural contributions of the French-speaking world through the study of its literatures, traditions, and institutions.

The Program

The department encourages its students to work closely with the academic advisor in designing a major tailored to their needs and interests within the broad requirements prescribed by the program and to avail themselves of the guidance of an excellent teaching faculty. Each year, a substantial number of students with good preparation in French participate in the university's very popular Education Abroad Program, which maintains centers in Bordeaux, Lyon, and Paris.

Career Alternatives

Foreign language teachers, a cardiologist, a veterinarian, a naval commander at the Pentagon, a professor of Political Science, lawyers, sales representatives, journalists, a speech pathologist, a law professor, translators, a senior applications programmer, travel agents, independent business owners, a senior museum curator, nurses, financial managers, stock brokers, and an industrial attaché for a French trade commission—all graduated with an A.B. in French from UC Davis. These represent only a small fraction of the career choices documented in a survey of department graduates.

Major Advisor

Consult the department office.

Honors Program

Candidates for high or highest honors in French must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in FRE 194H (4 units) and FRE 195H (4 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in French are in addition to the regular requirements for the major in French.

Education Abroad

The department of French and Italian encourages students to study abroad in the Global Learning Hub (<https://globallearning.ucdavis.edu/>). With the approval of a major advisor, applicable courses taken abroad may be accepted in the major or minor programs.

Graduate Study

The department offers programs of study and research leading to the M.A. and Ph.D. degrees in French & Francophone Studies. Candidates for the Ph.D. have the option of enriching their degree program by preparing a designated emphasis in African American & African Studies, Classics & Classical Receptions, Critical Theory, Feminist Theory and Research, Second Language Acquisition, or Studies in Performance & Practice. Detailed information may be obtained from the graduate advisor or the department chairperson.

Graduate Advisor

French, Minor

College of Letters & Science

The Minor Program

The minor program develops proficiency in all four language skills—speaking, listening, reading, and writing—and acquaints students with the intellectual and cultural contributions of the French-speaking world through the study of its literature, traditions, and institutions.

The Program

The department encourages its students to work closely with the academic advisor in designing a minor tailored to their needs and interests within the broad requirements prescribed by the program and to avail themselves of the guidance of an excellent teaching faculty.

Minor Advisor

Consult the department office.

Education Abroad

With the approval of a minor advisor, applicable courses taken abroad may be accepted in the minor programs.

Prerequisite Credit

Credit will not normally be given for a course if it is the prerequisite of a course already successfully completed. Exceptions can be made by the department chairperson only.

Italian, Bachelor of Arts

College of Letters & Science

The Major Program

The major in Italian provides a solid language background that will enable the student to develop an appreciation for the numerous contributions Italians and Italophones have made to literature, the arts, political theory, science, and other expressions of human creativity. The major also emphasizes the influence Italian culture continues to have on our global world.

The Program

The Italian program is geared to the specific needs and interests of the students, who enjoy the advantages of a small classroom setting and the individualized mentoring of dedicated professors. While the use of Italian is stressed in language and literature courses, the program is interdisciplinary in nature. Starting at the lower division level, students collaborate closely with academic advisors in order to design a major curriculum that includes culture, film, art history, history, food science, and other courses in related fields offered on campus or in Italy. The Italian program actively participates in the UC-wide Education Abroad Program, the Quarter Abroad Program (Florence), the International Internships Program, and the Summer Abroad Program (Rome), all of which offer opportunities for travel and study in Italy.

Career Alternatives

The Italian Program provides a solid foundation for a variety of career paths by offering training in Italian language and culture and developing skills that are vital in any professional setting: critical analysis, interpersonal skills, effective written and oral communication, and cultural sensitivity. In addition to specific career paths in foreign service and education, knowledge of the Italian language and culture enhances professional opportunities in a variety of fields, such as viticulture and enology, food science, political science, medicine, architecture, and engineering.

Honors & Honors Program

Candidates for high or highest honors in Italian must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in ITA 194H (3 units) and ITA 195H (3 units). Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of the junior year (135 units), have attained a cumulative grade-point average of 3.500 in courses required for the major will be eligible for the honors program.

Education Abroad Program

The department strongly encourages students to study abroad in the Summer Abroad program (Rome), the Quarter Abroad Program (Florence), or the Education Abroad Program. Applicable courses are accepted for credit in the major program.

Prerequisite Credit

Credit will not normally be given for a course if it is a prerequisite of a course already successfully completed. Exceptions can be made only by the major advisor.

Quarter Abroad Program

The UC Davis Quarter Abroad Program and the Italian Program offer an exciting Italian Language and Culture Program in Florence, Italy. While studying abroad in Florence, students will earn 16-24 UC Davis quarter units and will experience the richness and vitality of Italian and European culture.

Participants fulfill three-quarters-worth of Italian language study, enroll in culture and film courses, integrate into the Florentine community through meaningful internships (with transcript notation), and explore electives in areas such as art history, fashion, business, and food studies.

There is no language requirement, and all registered UC Davis students with 2.000 GPA and above, good academic standing, and good disciplinary standing are eligible to apply.

For more information, please contact Professor Margherita Heyer-Caput (mheycaput@ucdavis.edu) or see Quarter Abroad Italy (<https://globallearning.ucdavis.edu/pathways/academics/studyabroad/qa/italy/>).

- Gender, Sexuality, & Women's Studies, Minor (p. 238)
- Sexuality Studies, Minor (p. 239)

Gender, Sexuality, & Women's Studies, Bachelor of Arts

College of Letters & Science

The Major Program

Gender, Sexuality & Women's Studies is an interdisciplinary major founded on the understanding that the social production of gender is inseparable from that of race, sexuality, class, nationality, ability and other categories of difference. Our curriculum places feminist concerns within a transnational context, while respecting the need for geographic and historical specificity. These frameworks inform our teaching, our research, our institutional & community practices, and the principles we bring to our classrooms. Gender, Sexuality & Women's Studies offers a wide range of classes that use the lenses of gender & sexuality studies to examine colonialism and post colonialism, globalization, history, queer & trans experiences, science & technology, literature, popular culture, feminist video production, cinema & digital media, fashion, and food. The Department offers both an undergraduate major and minor. We also work collaboratively with other units on campus to sponsor two undergraduate minors, Sexuality Studies and Social, Ethnic & Gender Relations.

The Department

One of the most exciting and challenging aspects of the Gender, Sexuality & Women's Studies Department is that students, in consultation with the peer and faculty advisors, can pursue their particular academic interests and design their course of study accordingly. In devising their major plan, students will draw on courses offered in African American & African Studies, American Studies, Anthropology, Asian American Studies, Chicana/o Studies, Comparative Literature, English, French, German & Italian Studies, History, Linguistics, Native American Studies, Political Science, Psychology, Science & Technology Studies, Sociology, Spanish, and other related disciplines.

In addition to offering a broad array of courses that deal with gender, class, race, ethnicity, and sexuality, the Gender, Sexuality & Women's Studies Department affords interested students the opportunity to earn internship credit and conduct independent research as well as take advantage of the Honors Thesis option.

Students design a program of study in consultation with an advisor that is in accordance with their individual career goals. Many Gender, Sexuality & Women's Studies majors find it advantageous to pursue a double major, or to minor in another field of study. Upon successful completion of the degree requirements, students majoring in the program will graduate with a Bachelor of Arts in Gender, Sexuality & Women's Studies.

Career Alternatives

A degree in Gender, Sexuality & Women's Studies opens many possibilities for future employment. The major introduces students to relevant social issues, fosters critical thinking, develops strong verbal, writing and research skills and encourages social advocacy.

Pre-professional students will discover that a major in Gender, Sexuality & Women's Studies offers useful preparatory training for medical or law school. It is particularly suitable for those interested in specializing in social policy, international development, social justice or gender-related work in a wide range of institutions and contexts. Students who plan to do practical work in counseling, clinical psychology, social services, education, media or politics will also find a major in Gender, Sexuality & Women's Studies provides a strong foundation. Those who wish to pursue graduate level research in such fields as anthropology, comparative literature, cultural studies, economics, education, ethnic studies, English, cinema & digital media studies, history, languages & literatures, performance studies, philosophy, political science, and sociology will also benefit from a strong Gender, Sexuality & Women's Studies background in feminist theory, social analysis, history and a sound understanding of cultural representation and narratives of difference.

Increasingly, media & cultural institutions, corporations, and personnel firms seek to hire specialists in Gender, Sexuality, & Women Studies who are trained in institutional practices that support inclusive practices in recruitment & hiring and that foster diverse workplace environments. State & federal agencies need people who have special understanding of the workplace challenges faced by women, and by all groups who are under-represented in specific industries and professions. Educational institutions and non-profit organizations across the spectrum need specialists to develop and administer gender, sexuality & women's studies programs, multi-cultural community centers, LGBTQ organizations and other organizations designed specifically to deal with gender, social diversity and inequality, and a growing range of old and new social challenges arising in the context of globalization.

Some of our alumni have developed careers other than those described above. Gender, Sexuality & Women's Studies faculty and peer advisors can provide even more ideas about possible future careers. Doing internships related to coursework enables students to integrate theory with hands-on practice and service in the community.

Graduate Study

The Gender, Sexuality & Women's Studies Department offers a designated emphasis in Feminist Theory & Research for students enrolled in the Ph.D. programs of fifteen other affiliated departments.

Sexuality Studies, Minor

College of Letters & Science

Sexuality Studies Minor (<https://gsws.ucdavis.edu/sexuality-studies-minor/>)

The interdisciplinary minor in Sexuality Studies offers students a unique opportunity to study the concept of sexuality—including sexual identities, desires, and practices—by examining its changing meanings and effects across different political, historical, and cultural landscapes. At UC Davis, Sexuality Studies pays particular attention to how gender, race, class, nation, empire, colonialism, and globalization shape popular understandings of sexuality, and how these understandings of sexuality in turn affect social, political, and economic relations of power.

The minor is sponsored by the Gender, Sexuality & Women's Studies Department (p. 236).

Advising. Gender, Sexuality & Women's Studies Advising (<https://gsws.ucdavis.edu/advising/>), 1200 Hart Hall; 530-752-6429

SOC 120	Deviance	
WMS 140	Gender & Law	
WMS 179	Literature as Aesthetics of Resistance	
Total Units		19-20

Restrictions

- Students may take no more than one lower division course to satisfy requirements for the minor.
- To satisfy the interdisciplinary component of the minor, students must either split their coursework roughly equally between two programs/departments or take coursework in at least three programs/departments.
- Students may petition the minor advisor to accept Special Topics courses and Capstone/Senior Seminars as additional courses, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.
- Students may petition the minor advisor to accept up to 4 units of registered individual study, group study or internship towards the minor program, as long as their course of study follows the minor's lower-division restriction and interdisciplinary requirements.

Geography (Graduate Group)

College of Agricultural & Environmental Sciences

Diana Davis, D.V.M., Ph.D., Chairperson of the Group

Group Office

Carrie Armstrong-Ruport (caruport@ucdavis.edu), Student Affairs Officer; 129 Hunt Hall; 530-752-4119; Geography (<http://geography.ucdavis.edu/>); Faculty (<http://geography.ucdavis.edu/people/faculty/>)

Geography, Master of Arts

College of Agricultural & Environmental Sciences

Graduate Study

The Graduate Group in Geography (GGG) offers programs of study and research leading to M.A. and Ph.D. degrees. Faculty and students share a common interest in spatial interaction between humans and the biophysical environment. The wide faculty interests attract a diverse set of students in such areas as biogeography, urban forestry and related natural science and engineering fields, as well as human geography and related social science fields. A number of faculty members use and teach geographic information systems, remote sensing, and related geographic techniques, and most have a strong field orientation. The strengths of the Davis campus and its faculty enable the program to focus on important issues including people, place and power, community and regional identity and change, people-environment interaction, agricultural sustainability, landscape architecture, environmental change, biogeography, natural resource management, and technological innovations in computing and the use of geographic information systems. Students are mentored by faculty across the many colleges of the university.

Preparation

Most students considered for admission will have an undergraduate major in geography or in a closely related field. Generally, a student without an undergraduate degree in geography will be required to complete the equivalent of a minor in geography, consisting of one course each in human geography, physical geography and geographic methods, plus any additional undergraduate coursework required as

background for the student's research emphasis, as determined by the student's guidance committee.

Graduate Advisors

Gwen Arnold (Environmental Science & Policy), Mary Cadenasso (Plant Sciences), Mark Cooper (Human Ecology), Ryan Galt (Human Ecology), Robert Hijmans (Environmental Science & Policy)

German, Bachelor of Arts

College of Letters & Science

The Major Program

The German major explores in depth the literature and language, the culture, history, politics, and commerce of the German-speaking world (primarily Germany, Austria and Switzerland). The key to the major lies in the careful balance between solid core requirements and the possibility to explore German subject areas through the lens of other disciplines, such as music, art, philosophy, history, and economics.

The Program

The department offers courses that highlight literary figures, movements and themes. These courses form the core of upper division literature electives, but we also offer courses that discuss contemporary culture, history, politics, and commerce in German-speaking countries. Regardless of emphasis, students will find maximum practice in spoken and written German as well as in listening comprehension in all upper division courses offered in German.

Career Alternatives

Completion of the major prepares students for graduate study in German or for career opportunities in international fields ranging from employment in business and government to careers in the fine arts and sciences. Also, it permits admission to professional schools such as law and medicine.

Honors & Honors Program

The honors program consists of two quarters of research (194H) terminating in an honors thesis. For details consult the undergraduate major advisor. Graduation with high or highest honors requires participation in the honors program.

Graduate Study

The Department offers programs of study and research leading to the M.A. degree and to the Ph.D. degree in German Literature. Additional degree options for a designated emphasis are available through departmental affiliations with the programs in Social Theory & Comparative History, Critical Theory, Feminist Theory & Research, and Second Language Acquisition. Detailed information may be obtained by writing to the Department Chairperson or the Graduate Advisor.

Graduate Advisor

Jaimey Fisher

Prerequisite Credit

Credit normally will not be given on the lower division level for a course that is the prerequisite of a course already successfully completed.

Graduate Advisor

Jaimey Fisher

Russian, Bachelor of Arts

College of Letters & Science

The Major Program

The Russian major introduces students to a culture rich in art, music, theater, film, language, and literature. The major offers an opportunity to learn skills needed to enter the fields of foreign affairs, world politics, and international trade, or to begin graduate work in literature, history, cultural studies and international relations.

The Program

The major program instructs students in speaking, understanding, reading, and writing the Russian language. The program also acquaints students with the intellectual and cultural contributions of the Russian world through the study of its literature, traditions, and institutions.

Internships & Career Alternatives

Russian majors may participate in internships where they can serve as translators and interpreters for schools and business firms throughout Northern California. Upon graduation, many Russian majors enter the business world or enter graduate programs in Slavic studies and international relations. The program encourages students to supplement their Russian studies with courses in related fields such as international relations, political science, computer science, cultural studies, or economics in order to maximize their career possibilities.

Honors & Honors Program

The honors program comprises at least one quarter of study under course 194H, which will include a research paper. For details, consult the major advisor.

Study Abroad

Students who have completed one or two years of Russian language study can participate in the Education Abroad Program (EAP) in Moscow. Many of our students also participate in summer, semester, and yearlong programs sponsored by CIEE and ACTR in St. Petersburg and Moscow.

Prerequisite Credit

Credit normally will not be given for a course if that course is the prerequisite for a course already completed.

Course Placement

Students who have learned Russian at home must consult the department for placement instructions. Students with two years of Russian in high school normally continue in RUS 002; those with three years, RUS 003; those with four years, RUS 004.

Global Learning Hub

College of Letters & Science

Aliki Dragona, Ph.D., Faculty Director, Academic Programs
Zachary Frieders, Executive Director

Global Learning Hub

International Center, Suite 1120
530-752-5763; Fax 530-752-4151; globallearning@ucdavis.edu; Global Learning Hub (<http://globallearning.ucdavis.edu/>)

Through the Global Learning Hub, each and every UC Davis student can find global learning opportunities available on campus, in the region, virtually and internationally. The Hub offers global learning programs, workshops, and resources that enhance all UC Davis students' academic and career pursuits through four broad areas of opportunities: Community Engagement, Global Skills & Leadership, Internships & Research, and Study Abroad. UC Davis is committed to preparing the next generation of global problem-solvers and change-makers. As such, we aim to prepare our undergraduate, graduate, and professional students to solve global challenges collaboratively, equitably and sustainably.

The Global Learning Hub helps students navigate global learning opportunities that fit their academic, personal, and professional interests, including fit with academic schedules and requirements. Additionally, the Hub provides students with programmatic and funding resources, including two online search tools and financial aid workshops. The Global Learning Hub also administers the Global Studies (GS) minor.

Community Engagement

Through community-engaged global learning programs, students develop skills to work with communities in person or remotely to deepen their understanding of a local context, history, and complexities of local challenges that have a global impact. The communities and local leaders are the drivers of the projects. Students work with and learn from the local community and help develop long-term sustainable solutions. These programs stand-alone or can be found within study abroad, internship, and research opportunities.

Global Skills & Leadership

Global skills and leadership programs provide students with the opportunity to develop professional skills and career readiness important for students' post-academic endeavors. Intercultural learning is also weaved throughout these opportunities, offering students a chance to self-reflect on their own identities and individual experiences.

Internships & Research

The internship and research programs offered through the Global Learning Hub provide students with the opportunity to apply global concepts learned through experience and help students develop career enhancement skills they can apply on a resume, LinkedIn profile, and during interviews. In addition to for-credit and funded internships and research, the Global Learning Hub provides resources and support for students to continue global engagement after graduation.

Study Abroad

UC Davis Study Abroad integrates global opportunities into the academic experience, supporting 1,300 students each year in studying across 30 countries, exploring the world, and gaining valuable skills and competencies. In the quest for Global Education for All, Study Abroad goes beyond traditional programs to meet the academic, personal and professional needs of UC Davis' diverse and driven student body.

Financial aid and scholarships apply. Applicants must have a 2.000 GPA, be in good academic and disciplinary standing, and must fulfill any prerequisites specific to the program courses.

Types of Study Abroad Programs

UC Davis Quarter Abroad

Academic Focus

Students can earn 12-28 UC Davis quarter units through 3-6 courses taught abroad or away. Academic focus varies by program and may include subject area courses, language learning, lab work, internship/field work, and/or practical training experience. Programs range in length from 10 to 16 weeks. UC Davis faculty leaders teach one or more of the courses of the program, while other courses may be taught or co-taught by adjunct faculty of the host country, under supervision by UC Davis faculty. Students may be able to apply earned units towards their major, minor, language, or general education requirements.

UC Davis Summer Abroad

Academic Focus

Students earn 8 UC Davis quarter units through two courses taught abroad or away. All courses are taught by UC Davis faculty, sometimes with select supplemental lectures provided by local experts, or by local faculty in Partnership programs. Planned group activities and field trips enhance classroom instruction. Students may be able to apply earned units towards their major, minor, or general education requirements. Programs allow students to complete coursework in English in a wide variety of non-English-speaking locations.

UC Davis Internships Abroad

Academic Focus

Students earn 6 or more UC Davis units for internship hours and supplemental instruction. Internship programs are structured around thematic areas of study such as Global Health, Engineering, Business and Communication, and many others. Placements are a collaboration between international organizations, the Global Learning Hub, and the UC Davis Internship and Career Center to ensure the internships meet requirements for credit and relevance to the subject area. In addition to internship hours worked, students will take an online course taught by UC Davis faculty that places their internship in a broader social and cultural context. Planned group activities and field trips enhance the formal internship work. Students may be able to apply earned units towards their major, minor, or general education requirements. Most placements are in English-speaking environments; some programs require language proficiency.

UC Davis Summer Virtual Internships

Academic Focus

Students earn 6 or more UC Davis units for internship hours and supplemental instruction. Virtual internship programs are structured around thematic areas of study such as Business and Communication, Engineering and Computer Science, Environment, Green Tech, and Sustainability, and many others. Virtual internships allow students to earn UC Davis internship credit while also gaining cross-cultural and professional work experience in diverse fields without the need to travel. In addition to internship hours worked, students will take an online course taught by UC Davis faculty that places their internship in a broader social and cultural context. Students may be able to apply earned units towards their major, minor, or general education requirements. Most placements are in English-speaking environments.

UC Davis Seminars Abroad

Academic Focus

Students earn 2-6 UC Davis quarter units through one or more courses taught abroad or away. These short courses are taught by UC Davis faculty and may be offered as stand-alone programs or as an international component to a course taught during a regular term on campus. A heavy focus on field trips, onsite projects and group activities

enhances classroom instruction. Students may be able to apply earned units toward their major, minor, or general education requirements. Programs are typically offered in September, June, or during the winter break.

UC Davis Exchanges

Academic Focus

UC Davis Exchanges are department-based undergraduate exchanges that leverage new or preexisting working/research relationships among faculty to promote student mobility between institutions. UC Davis faculty and departments identify courses at the partner institution that are taught in English and can be converted into course equivalents at UC Davis. Students enroll in at least 12-15 units of advisor-approved course equivalents for each quarter they are on UC Davis Exchanges. Exchanges may be for 1, 2, or 3 academic quarters and are built around a specific thematic academic program.

UC Education Abroad Program (UCEAP)

Aliki Dragona, Ph.D., Faculty Director

Global Learning Hub

International Center, Suite 1120; 530-752-5763; Fax 530-752-4151

The UC Education Abroad Program (UCEAP) is one of the premier study abroad programs in the nation. UCEAP offers international study programs in association with nearly 140 host universities and institutions in some 32 countries around the world. Participating students remain registered at UC while studying abroad and receive full academic credit for their work. UCEAP students maintain their financial aid and scholarship eligibility while abroad. UCEAP has study abroad opportunities for undergraduates at all class levels as well as for qualified graduate students who have completed at least one full year of graduate work and have the support of their graduate program and graduate dean.

UCEAP offers year, semester, quarter and summer programs for all majors. Over 50% of the programs are offered in English, while several programs allow students to learn a language while experiencing the culture first hand. Some programs include the possibility of internships or field research. In most cases, students attend courses taught by the faculty of the host institution.

UC faculty members serve as directors at most Study Centers abroad, providing in-country academic advising to students during their program. Full UC credit is granted for courses satisfactorily completed, and courses and grades are recorded on official UC transcripts. With careful planning, most UCEAP students make normal progress toward their UC degrees, even those students who study abroad for a full year. With approval of their major or college advisors, students may earn credit towards their major, minor and general education requirements.

Graduation Requirements: UCEAP prospective applicants, particularly students who intend to study abroad during their senior year, should carefully plan their course programs for Davis and abroad in order to satisfy university, college, and major/minor requirements for their degree.

Although units and grade points earned while studying abroad through UCEAP are incorporated into the University transcript and GPA, departments and majors retain the right to determine which UCEAP courses will be accepted in satisfaction of major and minor requirements.

All degree candidates must meet the University residence requirement. Recognizing the special value of study abroad, the faculty have approved two exceptions to the usual residence requirement for students participating on UCEAP.

- Students planning to graduate immediately upon completion of their UCEAP program may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus preceding entry into UCEAP,
or
- Students should consult with their college Dean's office early during the UCEAP planning process for information on the university residence requirement.

Students may satisfy GE requirements while on UCEAP, but should consult with the Global Learning Hub and their college Dean's office prior to departure for information on the certification process.

Participants may only return to campus from UCEAP to complete any outstanding degree requirements. Participants who satisfy all degree requirements while abroad and expect to graduate upon completion of the term abroad should file for candidacy to receive their degree the term following program participation; candidacy filing dates are established by the Office of the University Registrar. In most cases, transcripts from abroad may not be received in time to be posted on the students' Davis transcript for UCEAP returnees to be included on the degree list for the term they are abroad. Such returning students may register to participate in the commencement ceremony; however, their graduation date will be listed as the following term.

- Global Studies, Minor (p. 245)

Global Studies, Minor

College of Letters & Science

The minor is overseen by the Global Studies Minor Committee. For more information, see Global Studies Minor (<https://globallearning.ucdavis.edu/resources/gs/>).

The interdisciplinary minor in Global Studies (20-24 units) will enable students across disciplinary areas to learn about global issues as well as to gain first-hand experience both locally and internationally through academic coursework and experiential learning. The minor can be completed with or without international travel. A combination of coursework and experiential learning will allow students to develop capacities in three areas: global awareness, global diversity, and global action. As they develop global awareness, students will examine actions and relationships that influence global systems from multiple perspectives, analyzing how complex systems impact self and others. To engage global diversity, they will explore complex dimensions of diversity, equity, and inclusion around the world, including language, culture, and identity. To translate knowledge into global action, they will learn to create strategies to apply knowledge, skills, and abilities to collaboratively and equitably foster global well-being and resilience.

Students will be expected to work closely with an academic advisor in developing an intellectually coherent global learning program. Each student's program must be approved by the student's advisor and by the Faculty Director of the Global Learning Hub (<https://globallearning.ucdavis.edu/>).

Students must meet with a Global Studies Minor advisor and complete a Global Learning Cluster Worksheet to demonstrate subject interrelatedness. The advisor must approve all courses and credited experiential learning to be counted toward the minor. If it is not feasible for a student to complete the gateway course, the advisor can approve an appropriate substitution. Students will work with the advisor to create a

digital portfolio that documents their global learning, which can be shared when pursuing postgraduate employment and/or education.

Restrictions

No more than two courses from a single UC Davis Department may satisfy the minor requirements. This will guarantee an interdisciplinary program of study. All courses used towards the minor other than the Gateway Course, EAP 001, must be upper division.

Foreign and/or Heritage Language Study

Students are strongly encouraged to study a foreign and/or heritage language. As specified above, only upper-division coursework in languages may be used to fulfill the minor.

Students will work with the advisor to create a digital portfolio that documents their global learning, which can be shared when pursuing postgraduate employment and/or education.

Code	Title	Units
<i>Gateway Course</i>		
EAP 001	Global Thinking	4
<i>Global Learning Cluster</i>		
Choose one:		12-16
	Thematic (Global Theme)	
or		
	Regional (Area of the World)	
One of the above courses can be replaced by a course in the study of an upper-division foreign language and/or heritage language that relates to the chosen thematic or regional focus. Up to 8 units can be substituted by for-credit experiential learning and/or internship with a global dimension. One of the above courses can be replaced by a course in the study of an upper-division foreign language and/or heritage language that relates to the chosen thematic or regional focus.		
Up to 8 units can be substituted by for-credit experiential learning and/or internship with a global dimension.		
Note: A minimum of 8 units of classroom-based courses will satisfy Requirement 2 when combined with 4-8 units of experiential learning or internships. The variation in experiential or internship units intentionally accounts for variability in units when students pursue internships or other forms of experiential global learning. The Global Studies Minor advisor guides students and approves variable units. When no experiential learning option is pursued, a minimum of 12 classroom units will satisfy the Global Learning Cluster.		
<i>Capstone Experience</i>		
Choose an Option:		4
	Option 1: 4 units of experiential or internship learning with a global dimension.	
	Option 2: A globally-focused seminar from UC Davis offerings.	
Total Units		20-24

Health Informatics (Graduate Group)

Health Informatics, Master of Science

Graduate Studies

Graduate Study

The Master's degree program seeks to train the next generation of researchers, clinicians and leaders to advance the science of Health Informatics. Successful applicants have backgrounds in health, biology, technology, computer or information science, and are enthused to develop new knowledge, systems and models that can improve health and be translated into practice.

The program of study provides research-oriented applied and theoretical training that spans the use of computer systems and information organization in medicine today, including methods for clinical data acquisition, data modeling, and interoperability, to design and evaluation of representations of clinical and personal data in hospital and consumer environments. The program emphasizes the development and application of new methods that leverage the electronic medical record and advance computer-aided decision support. A research project and thesis are mandatory degree requirements.

Preparation

The Group encourages applications from clinicians, healthcare IT professionals, recent graduates and researchers who have had experience and interest in the access, linkage and knowledge generation from healthcare data.

Clinical Professionals

Demonstrated through a completed baccalaureate or higher-level coursework, work experience, or clinical focus:

- Successful completion of Clinical Education
- Working experience in digital health technology, ideally through computer or information science and programming.

Healthcare Information Technology Professionals

Demonstrated through completed baccalaureate, or higher-level coursework, and aligned professional experience:

- Working experience in Healthcare IT, biotechnology, public health or similar experience.
- Knowledge and enthusiasm in the study of Human health, ideally with disease or system-specific expertise.
- Knowledge of clinical or medical systems or data representations

Recent Graduates

Demonstrated through a completed baccalaureate or higher-level coursework:

- Knowledge and expertise in biology, pre-health studies, socio-technology studies, information science and/or computer science.

Researchers

Demonstrated through completed coursework, baccalaureate or higher degrees, personal research experience:

- Applied background in computer science, information science, data science, biology or related field.
- Domain experience in health information or biology research.

Latin American & Hemispheric Studies, Minor

College of Letters & Science

The minor in Latin American and Hemispheric Studies offers students the opportunity to explore connection throughout the Western Hemisphere from an array of perspectives across multiple academic fields.

The minor is made up of six courses, arranged in three tiers: Basic (one lower division course on the history of Latin America); Core (two introductory upper division courses chosen from a designated list of fields other than History); and Elective (three additional upper division courses from a designated list of courses that focus primarily on Latin American and/or Hemispheric issues). Students are strongly encouraged to develop proficiency in Spanish or Portuguese, either through course work (such as completion of SPA 024 or SPA 033), or through life experience such as study abroad.

- Jewish Studies, Minor (p. 253)

History, Bachelor of Arts

College of Letters & Science

The History major develops critical intelligence and fosters an understanding of ourselves and our world through the study of the past—both the “deep past” and the more recent past.

The Program

A student electing a major in History will receive a broad education in histories of several geographic areas. Students preferring more active engagement in research and writing are encouraged to complete history seminars and/or the honors program.

Career Alternatives

A degree in history is excellent preparation for a professional career such as teaching, law, journalism, public administration, or business management. Professional schools in these and related fields (including the health professions) are looking for students who can weigh conflicting evidence, evaluate alternative courses of action or divergent points of view, and express conclusions logically in everyday language. These analytical skills are stressed in history classes, and their mastery

gives the history student a solid preparation for subsequent training in a specialized career.

History of Science, Medicine, & Technology

Students can create a concentration in the History of Science, Medicine, & Technology upon consultation with a faculty advisor. They may draw upon the relevant History courses (History HIS 002, HIS 016, HIS 085, HIS 107, HIS 135A, HIS 135B, HIS 136, HIS 139A, HIS 139B, HIS 185A, and HIS 185B) as well as History and Philosophy of Science offerings.

History & Philosophy of Science

Courses from the History & Philosophy of Science minor may count toward the History major. STS 130A, STS 130B, STS 150, and STS 180 fulfill upper division requirements in either the U.S. or Europe concentration.

For a more detailed description of course offerings, see History & Philosophy of Science (p. 419).

Honors & Honors Program

A student becomes eligible for graduation with honors by meeting the minimum GPA (usually 3.500) and course requirements established by the College of Letters and Science. To qualify for high or highest honors, students must also complete the History Department honors program with a GPA of 3.500 or above and write a thesis that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project, interviews, and faculty recommendations. Students admitted into the program must complete the HIS 104A, HIS 104B, HIS 104C sequence of honors courses, which requires the completion of a senior honors thesis. Students who anticipate seeking admission to the honors program are urged to complete at least one HIS 102 (undergraduate seminar) before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year. Students may substitute HIS 104B and 104C for any courses in their program other than HIS 102.

Students who anticipate pursuing graduate work in history or a teaching credential, and who do not wish to opt for the research emphasis embodied in the honors program, are encouraged to select Plan II of the major.

Study Abroad & the History Major

The department strongly encourages interested students to pursue their studies abroad. While there are no specific required courses or prerequisites, students are urged to take at least one history course that touches upon the geographic area where they plan to study abroad before departing. To receive a history degree from UC Davis, students must complete at least 18 upper division units in the history major at UC Davis (which can also include HIS 101, HIS 102, HIS 103). The remaining major requirements can be fulfilled abroad provided that (a) the course should be evaluated as at least four UC Davis units, (b) the course should be considered upper division by the standards set forth by the UC Davis Study Abroad Program, and (c) the course should be in the field of History. Students may present copies of the course work, syllabus, and writing assignments to the department's liaison person with the Global Learning Hub (<http://globallearning.ucdavis.edu/>) office for approval.

Teaching Credential Subject Representative

See the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

Preparing for Careers in Teaching History majors can pursue rewarding careers in teaching. To ensure your undergraduate coursework prepares you for a subject matter competency test, please contact the History Project (<http://historyproject.ucdavis.edu/>).

Major Advisors

History Undergraduate Advisor (theadvisingcenter@ucdavis.edu) or see History (<http://history.ucdavis.edu/>) for updated information.

Graduate Study

The Department of History offers programs of study and research leading to the M.A. and Ph.D. degrees in history. Detailed information may be obtained by contacting the Graduate Advisor.

Graduate Advisor

See the department's website for updated information.

American History & Institutions

This University requirement can be satisfied by passing any one of the following HIS courses:

History, Minor

College of Letters & Science

The minor in History consists of five upper division courses chosen so that at least three courses are in one field and at least one course is in another field. The two fields shall be chosen from among those defined in the catalog for the major. However, students may also, in consultation with and with the authorization of a faculty advisor, define other thematic fields.

Minor Advisor

For updated information, contact the History Undergraduate Advisor (hisugadvisor@ucdavis.edu) or History (<http://history.ucdavis.edu/>).

Jewish Studies, Minor

College of Letters & Science

Minor

Eva Mroczek, Ph.D., Program Director

Department Office

2216 Social Sciences & Humanities Building; 530-752-9241; Jewish Studies (<http://jewishstudies.ucdavis.edu>); Faculty (<https://jewishstudies.ucdavis.edu/core-faculty/>)

The Program in Jewish Studies offers students the opportunity to explore Jewish history, communities, literature, religion, and culture in a comparative perspective and multicultural framework. Courses include Hebrew language instruction as well as the study of classical and modern Jewish texts in translation.

The interdisciplinary minor in Jewish Studies provides an introduction to the study of Jewish culture, thought, history, and literature. Students learn a broad range of methodologies and critical concepts in these areas and gain insight into the relationship between Jewish identities, histories, and representations and those of the cultures in which Jews throughout the world have lived.

The Program in Jewish Studies will be of special interest to students in History, Religious Studies, Comparative Literature and Sociology as well as other fields in the Humanities & Social Sciences.

Horticulture & Agronomy, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The Graduate Group in Horticulture & Agronomy offers programs of study leading to M.S. and Ph.D. degrees for students interested in the science and management of agricultural crops, including their ecology, physiology, genetics, and post-harvest management, as well as the interaction of agricultural crops with the environment. The M.S. program is designed to focus on a cropping system, such as agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science. Within that cropping system, the student can specialize in one of a number of areas, including agroecology, biotechnology, breeding and crop improvement, crop physiology, crop production, floriculture, landscape horticulture, mineral nutrition, modeling, nursery production, pest management, plant growth and development, postharvest physiology, revegetation/restoration, and water relations. Research may be conducted within these areas with an applied or basic focus, but in association with a cropping system.

Preparation

For both M.S. and Ph.D. programs, a level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, organic chemistry, physics, statistics, genetics, plant physiology, and soil science. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail on the group's website. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

Graduate Advisors

Consult the Group office.

Horticulture & Agronomy, Doctor of Philosophy

College of Agricultural & Environmental Sciences

Graduate Study

The Graduate Group in Horticulture & Agronomy offers programs of study leading to the M.S. and Ph.D. degrees for students interested in the science and management of agricultural crops, including their ecology, physiology, genetics, and post-harvest management, as well as the interaction of agricultural crops with the environment. In the Ph.D. program, students focus on one of five areas of emphasis: agroecology, crop improvement/plant breeding, crop production systems, plant physiology, and post-harvest biology/physiology. Research may be conducted within these areas with an applied or basic focus, but in association with a cropping system such as agronomy, environmental horticulture, pomology, vegetable crops, viticulture and weed science.

Preparation

For both the M.S. and Ph.D. programs, a level of competence equivalent to that of a sound undergraduate program in Plant Science is required. This includes coursework in general biology, chemistry, organic chemistry, physics, statistics, genetics, plant physiology, and soil science. A few limited deficiencies in any of these areas can be made up after admission to the graduate program. Specific requirements are outlined in detail on the group's website. The graduate advisor, the major professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

Human Development, Doctor of Philosophy

College of Agricultural & Environmental Sciences

Graduate Study

The interdisciplinary and interdepartmental Graduate Group in Human Development offers a program of study leading to the Ph.D. degree. The program provides education and training in lifespan study of human development, with a balance of emphasis on biological, cognitive, and socio-emotional development in context. Recipients of the degree will be prepared to teach, conduct research, and actively engage in public service in the field of human development.

Applicants seeking admissions and fellowships consideration must submit all materials by our priority deadline of December 15. The final admissions deadline is March 1. For more details, see Human Development Graduate Group (<http://humandevlopment.ucdavis.edu/>).

Community & Regional Development, Bachelor of Science

College of Agricultural & Environmental Sciences

Faculty (<http://humanecology.ucdavis.edu/crd-faculty/>)

The Major Program

The Community & Regional Development major aims to provide a broad comparative understanding of theories, methodologies, and issues relevant to the study of communities and the people in them. The program focuses on the ways that economic, political and socio-cultural forces are transforming the world, countries, regions, and local communities, and it considers how knowledge can be used to improve the quality of community life.

The Program

Principal subjects of study within the major are community, regional, and organizational development; social change processes; community and regional research methodologies; the role of class, ethnicity, gender, and race in shaping social life; the impacts of innovation and technology on communities, and the effects of social, economic and political systems on regions. The major is organized to allow students to develop fields of concentration that meet their career goals.

Major Advisor

M. Anne Visser (mavisser@ucdavis.edu)

Internships & Career Alternatives

Community & Regional Development students are required to complete an internship in their field before graduation. Internships have been arranged with local, county, and state planning units, health departments, schools, housing offices, businesses, and education programs, among others. Community and Regional Development graduates are prepared for occupations in community development, social research, program evaluation, organizational and educational consulting, city and regional planning, and for-profit organizations. The major also provides effective preparation for graduate or professional study in the social and behavioral sciences or for professional degrees.

Honors Program

An Honors Program is available to Human & Community Development majors who have demonstrated excellence in their field of study. Entrance into the honors program requires that a student completes at least 135 units with a minimum grade point average of 3.500 in upper division courses counted toward the major. The program consists of a project whose specific nature is determined in consultation with the student's Honors Advisor. It may involve completing a research project, a scholarly paper, a senior thesis, or some comparable assignment. The project will have a minimum duration of two quarters and will be noted on the student's record by a variable unit course number or special honors course designation. Successful completion of the honors program requires that a minimum of 8 units of credit be earned in course work for the project. It is expected that a student participating in the Honors Program of the Community & Regional Development major will participate in the Undergraduate Research, Scholarship and Creative Activities Conference. Additionally, students participating in the Honors Program will be required to give a public presentation of their work in a departmental seminar program.

Community Development, Master of Science

College of Agricultural & Environmental Sciences

Stephen Wheeler, Ph.D., Chairperson of the Group
(smwheeler@ucdavis.edu)

Group Office

129 Hunt (Community Development Graduate Group);
530-752-4119; Carrie Armstrong-Ruport (caruport@ucdavis.edu),
Student Affairs Officer; Community Development Graduate Group (<http://communitydevelopment.ucdavis.edu>).

Faculty

The Group contains more than 40 faculty from 15 departments on campus; see Community Development Graduate Group People (<http://communitydevelopment.ucdavis.edu/people/faculty.php>)

Graduate Study

The Community Development Graduate Group (CDGG) offers an interdisciplinary program of study which leads to the M.S. degree. The program emphasizes interdisciplinary, collaborative, and project-

based learning, as well as community-engaged scholarship. The CDGG challenges students to integrate theory and practice, to develop constructive solutions to contemporary problems, and to lead in building a healthy, sustainable, and equitable society. Graduate study in the CDGG prepares individuals to work within government, for-profit and non-profit community development organizations in the realm of social and economic change, or to prepare them for further doctoral studies in related programs. Particular strengths of the program include: community economic development; community organizing and organizations in under-served communities; environmental justice and planning; education; ethnic studies; local impacts of globalization and trans-nationalism; rural and urban political development and change; sustainable agriculture and food systems; and women and gender studies.

Preparation

Applicants to this program can prepare themselves by enrolling for upper division courses in the social or behavioral sciences, e.g., anthropology, economics, sociology, psychology, geography, urban studies or political science, and courses in community studies.

Graduate Advisors

Amanda Crump (acrump@ucdavis.edu), Natalia Deeb Sossa (ndeebssossa@ucdavis.edu), N. Claire Napawan (ncnapawan@ucdavis.edu), Stephen Wheeler (smwheeler@ucdavis.edu)

Geographic Studies, Minor

College of Agricultural & Environmental Sciences

Minor

The minor in Geographic Studies is defined by its concern with place. Geographers strive to answer spatial questions regarding the Earth's surface; to describe and explain the character of regions; to ascertain the ways in which historical and contemporary humans have used and shaped the Earth's surface; and to understand the interactions of physical, biotic, and human systems within our global environment. The minor is compatible with a variety of environmental majors in the college.

The minor is sponsored by the Department of Human Ecology, Landscape Architecture & Environmental Design Program (p. 263).

Minor Advisor

S. E. Greco; see staff advisor Sharla Cheney (scheney@ucdavis.edu), 135 Hunt Hall.

Human Development, Bachelor of Science

College of Agricultural & Environmental Sciences

Faculty (<http://humanecology.ucdavis.edu/hdfs-faculty/>)

The Major Program

Human development explores the developmental process in humans throughout the life cycle. Biological, psychological, social, and contextual processes on development are studied. Students can choose emphases in Health and Well being across the Lifespan, or Children and Families across the Lifespan.

The Program

Human development majors complete a group of preparatory courses in anthropology, biology, philosophy, psychology, and statistics. Upper division students can design their programs to specialize in one of two track areas. For instance, students can study either Health and Well being, or Children and Families, both of these tracks emphasize a lifespan developmental approach. Students can also pursue the general

Human Development track which broadly exposes students to multiple influences on individual development and family processes.

Internships & Career Alternatives

At least one practicum course is required. A second practicum or supervised internship can be used to fulfill the restricted elective requirement for the major. In addition, students can intern in schools, early childhood education or senior centers, hospitals, rehabilitation centers, probation offices, group foster homes, mental health clinics, or as tutors for handicapped or bilingual students. Human development graduates fill a wide variety of positions in preschools, elementary and special educational settings, programs designed for parents, families, and the elderly, as well as governmental jobs related to social services for people of all ages. Students who choose the Health & Well being track can apply to medical school or pursue training for positions in the health sciences. Human development prepares students to pursue advanced degrees in behavioral and social sciences, education, social work, family law, or health sciences.

Preparatory Requirements

UC Davis students who wish to change their major to Human Development must be in good academic standing. Students must complete the following courses with a combined grade point average of at least 2.500. All of the following courses must be taken for a letter grade:

Code	Title	Units
PSC 001	General Psychology	4
Choose one:		4
STA 013	Elementary Statistics	
PSC 041	Research Methods in Psychology	
Choose one:		4-5
ANT 001	Human Evolutionary Biology	
ANT 002	Cultural Anthropology	
ANT 015	From Birth to Death: The Evolution of the Human Life Cycle	
Choose one:		5-3
BIS 002A	Introduction to Biology: Essentials of Life on Earth	
BIS 010	Everyday Biology	
MIC 010	Natural History of Infectious Diseases	
MCB 010	Introduction to Human Heredity	
NPB 010	Elementary Human Physiology	
NPB 012	The Human Brain & Disease	
NPB 101	Systemic Physiology	
PSC 101	Introduction to Biological Psychology	

Students must have achieved a 2.000 GPA in any required upper division courses taken prior to declaring the major.

All courses satisfying the Preparatory Subject Matter, Depth Subject Matter, Restricted Electives and Human Development Major English Coursework Requirement must be taken for a letter grade.

Major Advisor

Johnna Swartz

Graduate Study

Graduate study is available through a Master of Science degree in child development, and a Ph.D. degree in human development. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Total Units 20

Landscape Architecture, Bachelor of Science

College of Agricultural & Environmental Sciences

Department Office

Department of Human Ecology; 131 Hunt Hall; 530-752-3907; Landscape Architecture (<https://humanecology.ucdavis.edu/landscape->

architecture-major/); Faculty (https://humanecology.ucdavis.edu/people/?first=&last=&title=&unit=Landscape%20Architecture%20%2B%20Environmental%20Design&field_sf_person_type_target_id%5B0%5D=26)

Landscape architecture is the planning and design of land areas where human use requires adaptation or conservation of the environment. Students who study landscape architecture are concerned about the welfare of the environment and the people who use and shape it. They are capable of solving physical problems and are able to visualize and think in terms of spaces and three-dimensional concepts. The program is fully accredited by the Landscape Architecture Accreditation Board (LAAB) which is the only organization professionally sanctioned to grant landscape architectural accreditations in the United States. The program was last reviewed in 2018.

The Program

The curriculum balances creativity and visual and spatial skills with technological expertise and a thorough background in physical, natural, and social sciences. Students develop proficiency at problem solving relating to design of parks, public spaces, energy-efficient neighborhoods, land reclamation projects, city and regional planning, and landscape planning for wilderness and scenic regions, coastal and riparian environments, and other sensitive land areas. The program stresses a process-oriented approach to design and emphasizes environmental and community values.

Preparatory Requirements

Students are admitted to the landscape architecture major only after submitting a portfolio for review and selection by the faculty; see Application Process (<https://humanecology.ucdavis.edu/portfolio-application-process/>).

Career Alternatives

Graduates may find jobs in private landscape architectural firms or public agencies, non-profit organizations, and corporations employing landscape architects. The landscape architecture major provides the student with excellent preparation for graduate school or career development in a wide range of environmental and design-related fields.

Graduate Study

Graduate-level landscape architecture courses are available to students pursuing graduate programs compatible with or directed toward landscape management, planning, and design issues. A Graduate Academic Certificate in Landscape Architecture & Environmental Design is an option for any graduate student; see Graduate Academic Certificates (<https://gradstudies.ucdavis.edu/programs/graduate-academic-certificates/>). Program faculty are active members of various graduate groups: Community Development, Geography, Transportation Technology & Policy, and Ecology. Faculty members have expertise in many areas, including landscape history, social theory, practice of public space design, historic landscape preservation, city and regional planning, community participation in urban landscape design, landscape ecology, conservation planning, resource management, bioregionalism, and regenerative landscape systems. Graduate students pursue more focused interests, expanding their professional expertise and/or conducting advanced research in landscape architecture correlated disciplines.

Sustainable Environmental Design, Bachelor of Science

College of Agricultural & Environmental Sciences

Program Office

131 Hunt Hall; 530-752-3907; Sustainable Environmental Design (http://humanecology.ucdavis.edu/lda/academic_programs/sed/); Faculty (https://humanecology.ucdavis.edu/people/?first=&last=&title=&unit=Landscape%20Architecture%20%2B%20Environmental%20Design&field_sf_person_type_target_id%5B0%5D=26)

The Major Program

The Sustainable Environmental Design major is intended to build student understanding and skills related to creation of sustainable communities and landscapes. Coursework emphasizes urban and environmental design, sustainable development theory & practice, green building, local government planning & decision-making, community dynamics & organizations, and written, graphic, and oral presentation of sustainability strategies.

The Program

The Sustainable Environmental Design major is particularly suited for students who are interested in the physical form & design of communities and related public & private processes. It is focused on the physical environment of communities and the process of designing, planning for, and regulating the built landscape and the place-making considerations involved in creating sustainable communities.

Human Rights Studies

College of Letters & Science

Keith Watenpaugh, Ph.D., Program Director

Program Office

215 Sproul Hall; 530-752-1219; Human Rights Studies (<http://human-rights.ucdavis.edu>); Faculty (<https://human-rights.ucdavis.edu/faculty/>)

Human Rights Studies is the newest interdisciplinary program at UC Davis and the first of its kind in the University of California system. Our new century has brought with it a host of complex, unprecedented, and daunting challenges to basic human rights; courage, creativity, and a commitment to sustained and innovative interdisciplinary collaboration are necessary to understand, address and solve these challenges. Human Rights Studies is a place for incubating, supporting, coordinating, and promoting faculty and student research, teaching, learning, service, and engagement across the campus on Human Rights and its attendant fields: humanitarianism, environmental justice, genocide, mass sexual and gender-based violence, refugee studies, memory studies, and post-conflict transitional justice. Undergraduate Human Rights students go on to join the Peace Corps, attend graduate school in the humanities and social sciences, and pursue professional programs and careers in public policy, law, education, nursing, and medicine.

- Human Right Studies, Minor (p. 266)

Human Right Studies, Minor

College of Letters & Science

Human Rights Minor (<https://human-rights.ucdavis.edu/human-rights-minor/>)

The Human Rights Minor provides students with an opportunity to explore human rights as a critical element of our contemporary world.

Courses in the minor approach human rights as a problem for humanity, policy, advocacy and humanitarian action, as well as a subject for historical, ethical, social scientific and cultural study. Students will examine moments of terrible human rights abuse: genocide, slavery, colonialism, Apartheid, and sexual and gender-based violence. They will also learn about movements to protect and promote human rights, including the elaboration of the contemporary human rights régime, efforts by international and local non-governmental human rights organizations, and artistic and literary responses to human rights challenges.

The minor is administered by the Human Rights Studies Program (<https://human-rights.ucdavis.edu/>).

Program Objectives

In addition to completing HMR 134, students must take three additional Core Courses and one course from the Elective Course list.

Advising

Consult the department office.

Code	Title	Units
HMR 134	Human Rights	4
Core Courses (12 Units)		
Choose three from the following:		12
HMR/AHI 120A	Art, Architecture, & Human Rights	
HMR 130	Special Topics in Human Rights	
HMR 131	Genocide	
HMR 136	Human Rights in the Middle East	
HMR 138	Human Rights, Gender, & Sexuality	
HMR 140A	Human Rights & the Popular Imagination	
HMR 140B	Art & Politics of Memory: Truth, Justice, Reconciliation & Human Rights	
HMR/HIS 161	Human Rights in Latin America	
HMR 162Y/ HIS 126Y	The History of Human Rights in Europe	
HMR 190	Seminar	
In addition to the courses listed above, any HMR course between 100-199 will count towards the core course requirement.		
Human Rights Studies Subtotal		16
Elective Courses (4 Units)		
Choose one from the following or seek the approval of the program advisor for an unlisted course that treats a human rights related topic:		4
Suggested Electives		
AAS 180	Race & Ethnicity in Latin America	
AMS 156	Race, Culture & Society in the United States	
ANT 126A	Anthropology of Development	
HIS 115E	Slavery, Africa, & the Atlantic World	
HIS 142A	History of the Holocaust	
HIS 142B	The Memory of the Holocaust	
HIS 159	Women & Gender in Latin American History	
HIS 165	Latin American Social Revolutions	

HIS 184	History of Sexuality in America
NAS 120	Ethnopolitics of South American Indians
POL 124	The Politics of Global Inequality
SOC/IRE 104	The Political Economy of International Migration
<i>Other Electives</i>	
ANT 126B	Women & Development
ANT 130A	Cultural Dimensions of Globalization
CHI 130	United States-Mexican Border Relations
HIS 115D	Postcolonial Africa
HIS 172	American Environmental History
HIS 177B	History of Black People & American Race Relations: 1860-Present
MSA 150/ WMS 185	Women & Islamic Discourses
NAS 180	Native American Women
POL 126	Ethnic Self-Determination & International Conflict
POL 142B	Comparative Development: Politics & Inequality
POL 146B	Politics of Africa: Development in Africa
POL 152	The Constitutional Politics of the Equality
POL 166	Women in Politics
POL 168	Chicano Politics
POL 176	Racial Politics
SOC 130	Race Relations
SOC 160	Sociology of the Environment
WMS 140	Gender & Law
WMS 145	Women's Movements in Transnational Perspective
WMS 148	Science, Gender, & Social Justice
WMS 170	Queer Studies
WMS 175	Gender & Experience of Race
WMS 182	Globalization, Gender & Culture
WMS 184	Gender in the Arab World

Program Office

211 Sproul; 530-752-4999; Humanities (<http://humanities.ucdavis.edu>); Faculty (<http://humanities.ucdavis.edu/people/>)

The Program of Study

The Humanities program is an undergraduate and graduate curriculum emphasizing innovative approaches to ideas that matter. Courses offered through the program are interdisciplinary in scope and aim to develop critical thinking and writing skills in three principal areas: major figures, works, and ideas in world cultures; major themes in world literatures

and societies; and relationships between history, society, language, and culture.

Hydrologic Sciences (Graduate Group)

College of Agricultural & Environmental Sciences

- Hydrologic Sciences, Master of Science (p. 267)
- Hydrologic Sciences, Doctor of Philosophy (p. 268)

Hydrologic Sciences, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The Hydrologic Sciences Graduate Group offers M.S. and Ph.D. degrees. Hydrologic Sciences integrates numerous and diverse fields of sciences to deepen the understanding of the physical and biogeochemical dynamics of water and water resources below, on, and above the land surface. It considers the interactions between water, the natural environment, agriculture, urban areas, ecosystems, climate, and societal systems. And it investigates water management, regulations, water law, and societal conflicts around water. Students have the ability to take advantage of the breadth of earth, environmental, agricultural, and social sciences and engineering resources on campus that are related to water in the natural and built environment. Students deepen their understanding, advance their critical thinking and analysis skills, and gain in-depth knowledge of innovative, leading hydrologic science tools and techniques to employ for problem-solving.

Specialization

To accommodate the diversity of preparation and interests among students, the program offers five specializations from which the student selects one for their M.S.: physical hydrology, water policy and management, hydrochemistry, hydrobiology, and earth surface processes. Two options—Plan I, a thesis option and Plan II, a comprehensive exam option—are available for obtaining the Master of Science.

Preparation

Applicants to the program are expected to have completed or to be completing an undergraduate degree in environmental, physical, chemical, or biological sciences, mathematics, engineering, or related degrees. Undergraduate study must include one year of calculus and one course each in probability/statistics, computer programming, physical geology, and introductory hydrology. Additional undergraduate preparation, expected to be completed before entering the program, depend on the choice of specialization: physical hydrology and earth surface processes require one course each in linear algebra, differential equations, and fluid mechanics, one year of general physics, and two courses of general chemistry. Water policy and management requires

one course each in microeconomics and in public policy. Hydrochemistry requires one year each in general biology and general chemistry, and one course in aqueous chemistry. Hydrobiology requires one year each in general biology and general chemistry, and one course in introductory ecology.

Immunology, Master of Science

Graduate Studies

Graduate Study

The Graduate Group in Immunology offers an interdisciplinary program of study in an exciting field of biology and medicine leading to the M.S. and Ph.D. degrees. Participating faculty from various UC Davis Schools and Departments provide research opportunities in diverse areas of applied immunology. Areas of focus include infection and immunity (including host response regulation to parasites, viruses and bacteria), nutrition and immunity, autoimmunity, immune regulation, neuroimmunology, cancer therapy and immune mediators and their uses for diagnosis and treatment.

Preparation

Applicants for candidacy to these programs should have completed undergraduate preparation in mathematics, physics, chemistry, biochemistry, molecular and cellular biology or related biological and medical sciences.

For work leading to the Ph.D. degree, the requirements include cell biology, chemical immunology, cellular immunology, immunohematology, and advanced immunology. In addition to these general requirements, more specialized preparation in at least one of the following is required: (a) microbiological specialties (bacteriology, virology, parasitology, medical microbiology); (b) zoological specialties (cell biology, endocrinology, embryology, proto-zoology, histology, cytology, physiology); (c) medical specialties (pathology, anatomy, pharmacology, clinical pathology, reproduction, hematology, epidemiology); (d) biochemistry/biophysics specialties (biologically active molecules, control mechanisms); (e) genetic specialties (developmental genetics, population genetics, cytogenetics, molecular genetics).

Individual Major

College of Agricultural & Environmental Sciences

Each college has differing rules and requirements for their Individual Majors; see:

- A&ES, Bachelor of Science, Individual (p. 269)
- Biological Sciences, Bachelor of Arts, Individual (p. 269)
- Biological Sciences, Bachelor of Science, Individual (p. 270)
- L&S, Bachelor of Arts, Individual (p. 270)
- L&S, Bachelor of Science, Individual (p. 271)

Agricultural & Environmental Sciences, Bachelor of Science, Individual

College of Agricultural & Environmental Sciences

The Individual Major in this College has been suspended indefinitely.

Program Office

150 Mrak Hall; 530-752-0108; Advising (<http://www.caes.ucdavis.edu/students/current/advising/>)

Student Proposal

An Individual Major may be organized by a student having a specific academic interest not represented by an established major. Each student wishing an Individual Major should submit a proposal to the Dean's Office, prior to reaching 120 units, for review by the Student Actions & Individual Major Subcommittee. This proposal must include: (1) an essay describing the special educational aims of the student, including a statement indicating why the educational objectives cannot be met by existing majors; (2) a list of planned courses; and (3) faculty advisor recommendations. It is critical that students contact a college counselor in the Dean's Office for consultation and development of the proposal.

College of Biological Sciences

Program Office

Biology Academic Success Center (<https://basc.biology.ucdavis.edu/>); 1023 Sciences Laboratory Building; 530-752-0410.

The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines. It is designed by the student and is subject to approval by an advisor and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

Student Proposal

A student who wishes to propose an individual major must submit the proposal to the Committee on Undergraduate Curriculum & Educational Policy (CUCPEP) prior to reaching 120 units. It is important for the student to make arrangements to speak with an advisor in the Biology Academic Success Center early in the development of their major as no individual major will be approved after a student has completed 120 units.

Faculty Advisor (Selected By Student)

A faculty member in a department or program in the College of Biological Sciences.

The Major Program

The Individual Major, an integrated program composed of courses from two or more disciplines, is designed by the student and is subject to approval by the faculty advisor and appropriate college committees. This major enables a student to pursue a specific interest that cannot be accommodated within the framework of an existing major. It must clearly and specifically meet the student's educational goals as well as meet university and college academic standards.

Student Proposal

Prior to submission of proposal, student must meet the following criteria: minimum overall GPA or 3.0 as well as a minimum GPA of 3.0 in all preparatory courses for the selected major. A student who wishes to propose an individual major must submit the proposal to the Faculty Committee on Individual Majors in the College of Letters & Science prior to reaching 120 units. The proposal must be submitted by the end of the fourth week of the quarter. This proposal will consist of (1) an essay, identifying the specific educational and professional objectives, including an indication of why the objectives cannot be met within existing majors, (2) a list of courses planned to complete the major, and (3) faculty advisor recommendations. The proposal will be reviewed and a decision provided the quarter of submittal. It is important that you carefully review the information in the Individual Major Handbook (https://lettersandscience.ucdavis.edu/sites/g/files/dgvnsk10716/files/page/individual-major-handbook_0.pdf).

Honors Program

By the fourth week of the last quarter of the junior year, students potentially eligible for high or highest honors at graduation (see Dean's Honors List and Graduation with Honors (<https://lettersandscience.ucdavis.edu/deans-honors-list-and-graduation-honors/>)), may petition the Individual Majors Committee for tentative acceptance into an honors program.

Final admission will depend upon the Committee's approval of a senior thesis prospectus that has been agreed upon by the student and faculty advisor. The prospectus must be presented to the Committee by the end

of the fourth full week of instruction of the first quarter of the senior year. Graduation with high or highest honors will be conditional upon both the maintenance of the required grade point average and the satisfactory completion of the senior thesis project. Students who anticipate doing a senior honors thesis should allow up to 3 units of independent study in the program during each of two quarters in the senior year as course options.

Major Advisor (Selected By Student)

Principal Advisor: a faculty member in a teaching department or program in the College of Letters & Science in the major field of emphasis.

Secondary Advisor: a faculty member from a secondary area of interest.

Integrative Pathobiology, Master of Science

School of Veterinary Medicine

Graduate Study

The Graduate Group in Integrative Pathobiology (GGIP) is the core UC Davis graduate program for students interested in disease processes and biomedical research. The diverse faculty members in the group come from the School of Veterinary Medicine, the School of Medicine, the College of Agricultural and Environmental Sciences, the College of Engineering, and the College of Biological Sciences. This diversity of faculty offers students a wide range of opportunities and expertise from the UC Davis biomedical research community.

GGIP is designed for students interested in gaining advanced knowledge of the causes and nature of disease processes in animals and humans at the global, organismal, cellular, or molecular level.

Preparation

This program is primarily for applicants with a strong background in basic biomedical sciences. Admission requires an undergraduate degree (B.S. or B.A.) in a biological science, which should include prerequisite coursework in statistics, physics, general chemistry, organic chemistry, and cellular biology. Upper division courses in molecular biology, biochemistry, and genetics are encouraged.

Graduate Advisors

Jeffrey Stott (Pathology, Microbiology, & Immunology), Su Hao Lo (Biochemistry & Molecular Medicine), Nam Tran (Pathology & Laboratory Medicine), Renée Tsolis (Medical Microbiology & Immunology), Joie Watson (Medicine & Epidemiology), Lark Coffey (Pathology, Microbiology, & Immunology), Woutrina Smith (Medicine & Epidemiology), Kevin Keel (Pathology, Microbiology, & Immunology), Lisa Miller (Anatomy, Physiology, & Cell Biology), Natalia Vapniarsky-Arzi (Pathology, Microbiology, & Immunology), Kevin Woolard (Pathology, Microbiology, & Immunology), Carrie Finno (Population, Health & Reproduction), Xinbin Chen (Surgical & Radiological Sciences), Joshua Stern (Medicine & Epidemiology)

Integrative Pathobiology, Doctor of Philosophy

School of Veterinary Medicine

Graduate Study

The Graduate Group in Integrative Pathobiology (GGIP) is the core UC Davis graduate program for students interested in disease processes and biomedical research. The diverse faculty members in the group come from the School of Veterinary Medicine, the School of Medicine,

the College of Agricultural and Environmental Sciences, the College of Engineering, and the College of Biological Sciences. This diversity of faculty offers students a wide range of opportunities and expertise from the UC Davis biomedical research community.

GGIP is designed for students interested in gaining advanced knowledge of the causes and nature of disease processes in animals and humans at the global, organismal, cellular, or molecular level.

Preparation

Students applying to this program have varied backgrounds. Some hold professional degrees (e.g., D.V.M., M.D., or D.D.S.) while others apply after completion of an undergraduate degree. Students without a professional degree are admitted if they have exceptionally strong interests and backgrounds in basic biomedical sciences.

International Agricultural Development, Master of Science

Graduate Studies

Graduate Study

The International Agricultural Development M.S. degree program prepares students for careers in global agricultural and rural development, especially, but not exclusively, of developing and less-industrialized regions. This is an interdisciplinary program designed to provide students with knowledge and skills that will enable them to implement, facilitate, and manage programs that enhance agricultural development, resource management, and rural life.

Students are prepared to realize biological and technological improvement in agricultural and natural systems to facilitate social

innovation. Training in International Agricultural Development includes both breadth and depth components. Breadth components, required of all M.S. students, aim to establish an understanding of the issues in international development as they relate to agriculture and the environment. These include the history and philosophy of development, leadership and management techniques, fundamentals of farming systems, and agricultural economics. Students acquire depth in their own areas of specialization within the agricultural and social sciences. The areas include agricultural and resource economics, agricultural engineering, agronomy, animal science, anthropology, aquaculture, avian science, community development, ecology, economics, entomology, environmental design, environmental toxicology, food science, gender, geography, horticulture, nutrition, plant pathology, plant biology, plant protection and pest management, political science, preventive veterinary medicine, range science, sociology, soil science, sustainable agriculture, vegetable crops, viticulture, and water science.

Practical and on-site experience with development issues is encouraged and facilitated by guidance from the group's faculty members, who possess a wide range of experience in international development.

Land, Air, & Water Resources

College of Agricultural & Environmental Sciences

Will Horwath, Chairperson

Department Office

1110 Plant & Environmental Sciences Building; 530-752-1130; Land, Air, & Water Resources (<http://lawr.ucdavis.edu>)

Land, Air & Water Resources is a multidisciplinary department with faculty who specialize in atmospheric science, plant science, soils and biogeochemistry, hydrology, and water engineering. Teaching, research, and outreach efforts focus on agricultural and environmental aspects of these disciplines. The faculty also contributes to numerous other undergraduate and graduate programs in the Colleges of Agricultural & Environmental Sciences, Letters & Science, and Engineering.

Major Programs

Undergraduate programs in Atmospheric Science (p. 274), Hydrology (p. 275), Environmental Science & Management (p. 215), and Sustainable Agriculture & Food Systems (p. 278) are centered in the department; see Undergrad Programs (<https://lawr.ucdavis.edu/students/undergrad-programs/>).

Undergraduate Advising Center is located in 1150 Plant & Environmental Sciences Building; 530-752-1603.

Courses

See courses listed under Atmospheric Science (ATM) (p. 463), Hydrologic Sciences (HYD) (p. 463), Hydrology (HYD) (p. 463), Environmental Science & Management (ESM) (p. 463), and Soil Science (SSC) (p. 463). See also the websites listed above.

Graduate Study

Graduate programs, offering both M.S. and Ph.D. degrees, in Atmospheric Science (p. 274), Soils & Biogeochemistry (p. 433), and Hydrologic

Sciences (p. 267) are administered in the department; see Grad Programs (http://lawr.ucdavis.edu/academic_programs.htm).

Graduate Advising Center is located in 1152 Plant & Environmental Sciences Building; 530-752-1669.

- Atmospheric Science, Bachelor of Science (p. 274)
- Atmospheric Science, Minor (p. 275)
- Hydrology, Bachelor of Science (p. 275)

- Sustainable Agriculture & Food Systems, Bachelor of Science (p. 278)
- Watershed Science, Minor (p. 282)

Atmospheric Science, Bachelor of Science

College of Agricultural & Environmental Sciences

Faculty (<http://lawr.ucdavis.edu/people/faculty/atmospheric-science/>)

The Major Program

Atmospheric science is the study of the air that surrounds the planet. It includes all weather phenomena and climate including global and regional climate change, the chemistry of trace constituents and cloud and particle formation, interactions between ecosystems and the atmosphere, as well as quantitative studies of climate extremes and severe weather, including droughts, floods, hurricanes and tornadoes. The study of the impacts of human and other biotic activity on the quality of the air we breathe are important topics in the major.

The Program

Modern atmospheric science is a quantitative science that is reflected in the major's curriculum. In addition to the study of daily weather events, the program deals with fundamental dynamical and physical processes that involve the general circulation of the atmosphere; turbulent mass and energy transfer at the planetary surface as well as within the free atmosphere; the transfer of solar and terrestrial radiation throughout the atmosphere; atmospheric interaction with the biosphere; climate variations; and developments in remote sensing using satellites with modern meteorological instrumentation. In addition, the program has significant expertise in the areas of air quality and its related atmospheric chemistry. As well as providing a broad background in meteorology, the major includes an informal minor area to be chosen from mathematics, computer science, environmental studies, resource management or a physical or biological science. For more information, see Atmospheric Science (<http://atm.ucdavis.edu>).

Internships & Career Opportunities

Atmospheric science students have participated in internships with the California Air Resources Board, various county Air Pollution Control Districts, the National Weather Service, and performing research. Job opportunities include: national weather services, weather forecasting for broadcast media or private forecasting firms, environmental consulting firms (such as environmental impact reports, wind farm siting), government agencies at all levels from local (air quality districts, planning departments, etc.) to state (Air Resources Board) to national (NOAA), and companies whose operations are impacted by weather (such

as airlines, futures markets). About half of our graduates continue their education by seeking an M.S. or Ph.D. degree in atmospheric science or related areas.

Note

Alternative options for students who are interested in atmospheric science are to minor in ATM, to major in ESM and choose the climate change and air quality track, or to major in applied physics with a concentration in atmospheric physics. However, the ATM minor, the ESM climate change and air quality track, and the applied physics major do not meet the Federal civil service requirements for meteorologists.

Graduate Study

You can specialize in particular areas of atmospheric science through graduate study and research leading to the M.S. and Ph.D. degrees. For details, see Atmospheric Science (Graduate Group) (p. 93) & Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Atmospheric Science, Minor

College of Agricultural & Environmental Sciences

Faculty (<http://lawr.ucdavis.edu/people/faculty/atmospheric-science/>)

Minor Program

The minor in Atmospheric Science provides a broad treatment of weather and climate, with the option to focus on such topics as climate change, meteorological instrumentation, and satellite remote sensing. Students undertaking the minor should have completed minimum preparatory course work in calculus and physics (MAT 016A, MAT 016B, and PHY 007A). Some upper division courses in Atmospheric Science have additional prerequisites in calculus and physics (MAT 021A, MAT 021B, MAT 021C, MAT 021D, MAT 022A, and MAT 022B, and PHY 009A, PHY 009B, PHY 009C, and PHY 009D).

Hydrology, Bachelor of Science

College of Agricultural & Environmental Sciences

Faculty (<http://lawr.ucdavis.edu/people/faculty/hydrology/>)

The Major Program

Hydrology is the study of the occurrence, distribution, circulation, and behavior of water and water-borne materials in the environment of Earth. It includes practical measurement and technical analysis of water phenomena underground, on the Earth's surface, and in the atmosphere.

Contemporary hydrologic problems include environmental restoration, sustainability of groundwater and surface water resources, water pollution, and natural disasters such as floods, droughts, landslides, avalanches, and land subsidence. The management of these problems demands hydrologic scientists with the comprehensive, interdisciplinary education embodied in this program. Beyond its societal utility, hydrology can be an exciting science for the curious-minded. Hydrologists explore natural phenomena such as climate change, waterfalls, health of coral reefs, biogeochemical cycles, and aquifers.

The Program

A hydrologist needs a strong background across the basic sciences of physics, mathematics, chemistry, and biology. Breadth of understanding comes from exposure to ecology, geology, engineering, policy, and law. Depth of experience is provided by core hydrology courses, internship opportunities, and practical outdoor training. Students choose electives to match their interests and career goals. Transfer students should have completed as much as possible of the preparatory subject matter listed below.

Internships and Career Alternatives

Job opportunities in hydrology exceed the available supply of trained hydrologists. Students commonly obtain internships and jobs with state and federal agencies, private consulting firms, environmental interest groups, irrigation districts, and utility companies. Federal agencies hiring hydrologists include the U.S. Geological Survey, U.S. Department of Agriculture (Fish & Wildlife, Agricultural Research, Forest Service, and National Resource Conservation Service), Environmental Protection Agency, and national research laboratories (Lawrence Livermore National Laboratory, Lawrence Berkeley National Laboratory). State and local agency employers include California's Departments of Water Resources, Conservation, Fish & Game, and Toxic Substances as well as the Water Resources Control Board and Regional Water Quality Control Boards. To obtain higher levels of responsibility and salary, hydrologists often seek advanced degrees, and the hydrology major is designed to provide students with a highly competitive education to get into graduate school.

Hydrology, Minor

College of Agricultural & Environmental Sciences

Faculty (<http://lawr.ucdavis.edu/people/faculty/hydrology/>)

The Hydrology Section of the Department of Land, Air & Water Resources offers a minor in Hydrology for environmental or natural science students who have an interest in water/environmental issues. The interested student should have completed preparatory course work in calculus (MAT 016B), chemistry (CHE 002A; CHE 002B recommended), physics (PHY 007A), and biology (BIS 002A). Course work in the minor provides fundamental skills and knowledge of the hydrologic sciences. The program is sufficiently flexible for students to pursue particular water issues or problems of interest to them.

International Science Studies, Minor

College of Agricultural & Environmental Sciences

Minor

This interdisciplinary minor in International Science Studies will introduce College of Agricultural & Environmental Sciences students to global issues, which affect their major disciplines in the current world, and also provide an opportunity to gain first-hand experience abroad when appropriate. The goal of this minor is to enable our college students to develop greater international competence and to enhance their employability.

The minor assumes that the student will have a major in the sciences and that classes taken under one of the three tracks in the minor will contribute depth to the existing major or establish depth in a selected additional field of study. Students will be expected to work closely with an academic advisor in developing an intellectually coherent program of the study. A minimum of 18 units of upper division work is required. Only a single course can be counted toward both major and minor and no course can be used to satisfy the requirements of more than one minor.

Lead Faculty Advisor

Shu-Hua Chen (shachen@ucdavis.edu) (Land, Air, & Water Resources); 530-752-1822.

Code	Title	Units
Global Issue Course Requirement		
7-8		
Focusing on broad range of global issues and their impacts on ecological and environmental resources and biodiversity, in addition to international policy and economics. Beyond the courses taken under each track, choose two out of the three courses listed below:		
ATM 116	Modern Climate Change	
PLS 150	Sustainability & Agroecosystem Management	
ARE 115B	Economic Development	
Choose one of the following tracks:		16-17
Education Abroad Program courses taught overseas and relevant international internship activities will count towards the minor requirement with advisor's approval. For each track, students can take a maximum of 3 units from EAP courses, with a valid transcript, and 3 units from relevant international internship activities. The international internship activities would require a pre-approved study plan with the academic advisor before the maximum of 3 units can be awarded. Language and culture related courses are encouraged, but not required for the minor.

Soil Science, Minor

College of Agricultural & Environmental Sciences

Faculty (<http://lawr.ucdavis.edu/people/faculty/>)

The Department of Land, Air & Water Resources, Soils & Biogeochemistry Program, offers a minor program in soil science. The minor is especially geared toward students in the environmental sciences including Hydrologic Science, Environmental Science & Management, Environmental Toxicology, Ecological Management & Restoration, International Agricultural Development, Crop Science & Management, Environmental Horticulture & Urban Forestry, Geology, and Plant Biology.

Major Programs

See the Soils & Biogeochemistry track in Environmental Science & Management (p. 215).

Graduate Study

Programs of study leading to the M.S. and Ph.D. degrees in Soils & Biogeochemistry (p. 433) are available. Information regarding these programs can be obtained from the graduate advisor, at Advising Information (<http://soils.ucdavis.edu/resource-guide/advising-information/>) and in the Graduate Announcement. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Sustainable Agriculture & Food Systems, Bachelor of Science

College of Agricultural & Environmental Sciences

Sustainable Agriculture & Food Systems is an interdisciplinary major hosted by the Department of Land, Air, & Water Resources (<http://lawr.ucdavis.edu>).

William Horwath, Ph.D., Master Advisor

Program Office

1150 PES; 530-752-1603; Sustainable Agriculture & Food Systems (<https://www.lawr.ucdavis.edu/students/undergrad-programs/sustainable-agriculture-and-food-systems/>)

The Major Program

The Sustainable Agriculture & Food Systems (SA&FS) major serves students interested in improving the sustainability of agriculture and food systems. This major prepares graduates to understand the interdisciplinary and systems-based aspects of sustainability and provides them with the knowledge, leadership skills and experiences required to excel in agricultural and food systems professions.

The Program

This program is designed to develop students' competencies for addressing the environmental, social, and economic challenges and opportunities associated with agricultural and food systems sustainability. The program emphasizes an experiential learning approach to sustainability education, allowing students to choose between three tracks within the major. Students in the Agriculture & Ecology track focus on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits. Students in the Food & Society track focus on issues related to the social, cultural, political and community development aspects of agriculture and food systems. Students in the Economics & Policy track focus on issues related to agricultural and resource economics, policy and management. The program provides students with practical experiences through courses with on- and off-campus fieldwork and through internship placements at sites related to students' interests and focus of study.

Lead Faculty Advisor

Lead Faculty Advisor & Track I Advisor. W. Horwath (Land, Air & Water Resources); Track II Advisor. R. Galt (Human Ecology); Track III Advisor. T. Tomich (Environmental Science & Policy).

Advising Center for the major is located in 1150 PES; 530-752-1603.

Internships & Career Alternatives

Sustainable Agriculture & Food Systems students are required to complete an internship in the field before graduation. Internships have been arranged with local, county, & state agricultural agencies, production farms and commercial processors & retailers, domestic & international non-governmental organizations, and rural & urban community development programs. Graduates are prepared to pursue a broad range of careers related to agricultural production & food system management, rural & urban community services, education & development, and agricultural & environmental sciences, as well as careers in agricultural, environmental, and economic policy & analysis. Positions may be in private industry, government and public service agencies and in the non-profit sector, nationally and internationally. The major also prepares students for graduate studies in a wide range of fields related to agriculture and food systems.

Track II: Food & Society (p. 280)		
Track III: Economics & Policy (p. 281)		

Tracks Subtotal	94-110
Total Units	135-158

¹ Must include CMN 001.

Track I: Agriculture & Ecology

Focuses on crop and animal production systems, ecology, and practices that mitigate negative impacts while producing environmental and social benefits.

Watershed Science, Minor

College of Agricultural & Environmental Sciences

Will Horwath, Chairperson
Susan Ustin, Vice Chairperson

Faculty (<http://lawr.ucdavis.edu/people/faculty/hydrology/>)

The Hydrology Program of the Department of Land, Air & Water Resources offers the minor in Watershed Science. This minor is intended for environmental, natural, or social science students who have an interest in the interfaces between hydrology, ecology, policy and management. The interested student should have completed preparatory course work in calculus (MAT 016B), chemistry (CHE 002A; CHE 002B recommended), physics (PHY 007A), and biology (BIS 002A). Course work in the minor provides fundamental skills and knowledge on the science and management of watersheds in the context of current water resources and ecological problems.

- Doctor of Jurisprudence (p. 283)

Master of Laws

School of Law

Master of Laws (LL.M.) Program (<https://law.ucdavis.edu/llm/>); 530-752-6081; Fax 530-752-4704; Master of Laws (llm@ucdavis.edu)

The Law School LL.M. (Master of Laws) program integrates American and foreign law students at all levels of study. For foreign law graduates, the program provides an opportunity to gain a basic knowledge of the United States legal system. United States law school graduates and selected foreign LL.M. candidates may also seek admission on a thesis rather than a course basis. Other opportunities available to all graduate law students include developing special expertise in a particular area and doing special projects and original research under the direction of a faculty member.

Each LL.M. candidate must successfully complete a minimum of 20 semester units of work, usually 10 units each semester. Foreign LL.M. students must enroll in the 2-unit course LAW 200A and the 1-unit course LAW 207A. They earn the remainder of their required course credit in elective J.D. courses. Each foreign student must also complete an intellectually rigorous legal research and writing project, constituting at least 2 units of credit.

All LL.M. candidates begin their year of study with a complete orientation in the academic and social life of the law school, the UC Davis campus, and the city of Davis. LL.M. students are encouraged to enroll in the School of Law's Orientation in U.S.A. Law Program, given during the summer before the fall semester of LL.M. begins.

Doctor of Jurisprudence

School of Law

The University of California Davis School of Law offers a three-year professional curriculum leading to the degree of Juris Doctor. Within a uniquely supportive atmosphere, law students have access to a comprehensive modern law school curriculum taught by a nationally and internationally distinguished faculty. The School offers a full range of traditional law courses, opportunities for practical experience through clinical programs, and in-depth study of an area of law in an individualized program of classroom work, research, writing, or experience in the community. It further provides professional skills training in interviewing and counseling, negotiation and dispute resolution and trial practice. The School of Law seeks to promote critical evaluation of law and legal institutions in a broad perspective, integrating non-legal disciplines with professional legal education.

UC Davis Law School is fully accredited by the American Bar Association, is a member of the Association of American Law Schools, and has a chapter of the Order of the Coif.

Program of Study

The professional curriculum requires six semesters for completion and extends over a period of three years. It is for full-time students only; no part-time or evening program is offered. New students are admitted only at the beginning of the fall semester.

After satisfactorily completing the professional curriculum of 88 semester units and the required period of resident study, you will receive the degree of Juris Doctor (J.D.). Students who fail to attain satisfactory

grades may be required to withdraw from the School at the end of any academic year.

The first year's work is prescribed and provides the essential foundation for subsequent legal study. Satisfactory completion of the first-year courses is, in all cases, prerequisite to second- and third-year courses.

Combined Degree Programs

Individual students may find a combined degree involving law and another discipline such as economics, business, sociology, or science advantageous. To support this kind of study, the School, in conjunction with other schools and university departments, has established Combined Degree Programs. Under these programs, a student may work toward a J.D. degree and a master's degree in another discipline at the same time. Students working toward a combined degree are required to spend their first year at the law school.

Normally, a Combined Degree Program will take at least four years. You will usually be able to earn up to 10 semester-hours of law school credit for work in the related discipline and normally can complete the combined degrees in less time than it would take to earn the two degrees separately. The first year of the Combined Degree Program must be taken entirely in the School of Law. During the remaining years, course work may be divided between the law school and the related discipline. You must satisfy the admission requirements for both programs and file applications with both units.

Students have pursued degree programs in combination with UC Davis departments for the M.A. degree in economics, philosophy, computer science, and sociology, and with the School of Management for the M.B.A. degree. The law school will attempt to work out an additional program if you are interested in other disciplines. You may enroll in the Combined Degree Program any time before the beginning of your third year in law school. If you are interested in pursuing a Combined Degree Program, and have made a separate application to another school or department, you should notify the School of Law if that application is accepted.

Linguistics

College of Letters & Science

Raul Aranovich, Ph.D., Chairperson of the Department

- Linguistics for Language Teachers, Minor (p. 285)

General Linguistics, Minor

College of Letters & Science

Minor

Linguistics offers two minor programs:

- *General Linguistics*, which provides the student with basic knowledge of language structure and linguistic analysis.
- *Linguistics for Language Teachers* (p. 285), which especially complements the major in English with the Teaching Area of emphasis; it is also of relevance to students interested in teaching foreign languages.

Total Units		24

Linguistics, Bachelor of Arts

College of Letters & Science

The Major Program

Linguistics is the systematic study of human language. It focuses on theories of language structure, variation, and use, description of contemporary languages, and the examination of language change through time. Because of the pervasive influence of language in our everyday lives, work in linguistics interacts in important ways with studies carried out in many other fields, including psychology, anthropology, neuroscience, philosophy, computer science, sociology, literature, language teaching, communication and education.

The Program

An introductory lower division course provides students with basic concepts and some of the methods needed to analyze language in a systematic way. Upper division courses probe more deeply into specific aspects of language structure, language use, and the relationship of language to other realms of human activity.

Career Alternatives

Majors in linguistics find practical outlets for their linguistic training in a variety of fields: the computer science industry (software development); teaching English as a second language; foreign language teaching; elementary and secondary level bilingual-bicultural programs; language-oriented missionary work; bilingual-bicultural curriculum development (e.g., for publishing houses); legal work; speech therapy; lexicography (preparation of dictionaries). All of these types of employment share an

interest in persons skilled in the analysis of language, spoken and/or written. Linguistics equips students with just such skills.

Grading Recommendation

Though not required, it is recommended that all courses offered in satisfaction of the Linguistics major be taken for a letter grade.

Faculty Advisor

Julia Menard-Warwick

Honors & Honors Program

The honors program consists of 6 units of 194H credit normally taken in the fall and winter quarters of the senior year. Completion of the program is a prerequisite for High or Highest Honors at graduation. Specific eligibility criteria may be obtained from the major advisor. For general information regarding graduation with honors and Dean's Honors Lists, please see Academic Information.

Graduate Study

The Department of Linguistics offers a program of study leading to M.A. and Ph.D. degrees. More detailed information may be obtained from the Graduate Advisor or from the Chairperson of the Linguistics Department.

Accounting, Minor

Graduate School of Management

School Office

Gallagher Hall; 530-752-7658; Graduate School of Management (<http://gsm.ucdavis.edu/>)

The UC Davis Graduate School of Management's Undergraduate Accounting Minor gives you the opportunity to enhance your accounting knowledge with a carefully crafted series of five upper division courses. These courses are designed to prepare you for accounting-related careers or advanced study in accounting. All five courses, 20 units total, must be completed to receive the minor certification.

The Accounting minor courses are open to all undergraduate and graduate majors at UC Davis.

The five courses required for the Accounting minor are offered by the Graduate School of Management. No substitutions (e.g., transfer courses, study abroad courses, or other UC Davis courses) are allowed. No course overlap is allowed with other minors. No more than one course can be counted towards both the student's major and the minor.

MGT 011A & MGT 011B are prerequisites for the Accounting minor. Please plan accordingly.

Code	Title	Units
MGT 101	Sources & Uses of Accounting Information	4
MGT 103	Intermediate Financial Accounting I	4
MGT 105	Intermediate Financial Accounting II	4
MGT 107	Intermediate Financial Accounting III	4
MGT 170	Management Accounting & Control ¹	4

To complete the minor, students must complete the 20 units of coursework with a GPA of 2.000 or better. Courses may be taken P/NP as long as at least one course is taken for a letter grade and minor GPA is at least 2.000.

For the OASIS minor declaration form to be approved, one course must be successfully completed and minor GPA at least 2.000.

Total Units **20**

¹ Please note that there is substantial overlap between MGT 170 & ARE 119. Students pursuing the accounting minor must complete MGT 170.

Business Analytics, Master of Science

Graduate School of Management

The Graduate School of Management Master of Science in Business Analytics program will allow you to build competencies in analytics, data, business and practice and prepare you to be an innovative leader in this data-driven era. Advance your career by acquiring expertise in one of the most coveted skillsets in today's, modern business environment—business analytics.

Core Competencies

Business

Build your business skills for achieving organizational impact through leadership, strategic thinking, communication and project management.

Data

Build your data skills as you learn core methods for acquiring, storing, handling and representing data.

Analytics

Analytics is the discovery, interpretation and communication of meaningful patterns of data. Build your skills in core statistical and computational techniques such as data modeling, databases, regression, data mining, machine learning and operations research methods.

Practice

Our program will give you hands-on experience working with and implementing analytic projects in a business environment. Under the direction of program faculty and in small student teams, you will learn analytics by navigating the complete project lifecycle on business problems drawn from real industry data.

Program of Study

The hallmark of the UC Davis Master of Business Administration (MBA) program is its flexibility. Students are required to take nine core courses comprising 27 units, and 45 units of elective/capstone coursework for the 72 units required for the degree. The required core curriculum is designed to provide students foundation in the functional areas of business-accounting, economics, finance, marketing, organizational behavior, statistics, and strategy. These management disciplines are examined through the use of case studies, lectures and the analysis of a few select companies on which to base illustrations and spark discussions. As early as the first year of study, students are able to integrate elective courses into their personal curriculum.

Elective courses at the Graduate School of Management place an emphasis on real-world application of management principles through the use of executive guest speakers who present “live” case study analyses and actual “client” businesses for student projects. Many courses require team projects and emphasize managing by innovation and entrepreneurial thinking. These team projects develop your independent research abilities and hone your presentation skills. With a wide variety of electives offered every year, students can build their own MBA curriculum based on their goals. Most students choose functional concentrations such as:

- Business Analytics and Technologies
- Entrepreneurship
- Finance/Accounting
- Marketing
- Management
- Strategy

Master of Business Administration Online

Graduate School of Management

Offering first-of-its-kind access to a nationally ranked University of California management school, MBA@UCDavis provides a top-quality, transformational experience—your opportunity to earn a UC Davis graduate business degree from anywhere in the world.

Through a close-knit online community and in-person residential experiences, we empower you to collaborate with a group of diverse, highly motivated, caring professionals who will challenge you to be your best.

We'll connect you with our global alumni network and corporate partners across Northern California. You'll benefit from the strong relationships we've built in Silicon Valley.

Our STEM-designated program reflects UC Davis' nationally recognized leadership in the STEM fields. Our rigorous curriculum emphasizes quantitative analysis and data-driven decision-making, which will prepare you for leadership roles in STEM fields.

Innovative application of data in business decision making has become a highly valued skill demanded by employers—especially here in Northern California and Silicon Valley.

The centerpiece of the MBA@UCDavis online experience is the live online classes where you will participate in spirited, face-to-face conversations with your peers and our world-class faculty through our state-of-the-art technology platform.

Technology Management, Minor

Graduate School of Management

School Office

Gallagher Hall; 530-752-7658; Graduate School of Management (<http://gsm.ucdavis.edu/>)

The UC Davis Graduate School of Management offers a minor in Technology Management to undergraduate students. This minor complements students' undergraduate studies with courses in the ways in which engineering and science-based industrial enterprises manage and use knowledge from science, engineering and technology. The minor also provides students with business and management skills that should

enable them to use their education more effectively in a technology environment.

The Technology Management minor courses are open to all undergraduate and graduate majors at UC Davis.

The courses that count for the Technology Management minor are offered by the Graduate School of Management. No substitutions (e.g., transfer courses, study abroad courses, or other UC Davis courses) are allowed for the upper division coursework.

No course overlap is allowed with other minors. No more than one course can be counted towards both the student's major and the minor.

Prerequisites for minor courses are required (e.g., MGT 011A and STA 013 for MGT 160; MGT 011A and MGT 011B for MGT 170). Please plan accordingly.

Code	Title	Units
Required preparatory course:		4
MGT 011A	Elementary Accounting	
Choose five:		20
MGT 120	Managing & Using Information Technology	
MGT 140	Marketing for the Technology-Based Enterprise	
MGT 150	Technology Management	
MGT 151		
MGT 160	Financing New Business Ventures	
MGT 170	Management Accounting & Control	
MGT 180	Supply Chain Planning & Management	

To complete the minor, students must complete the 24 units of coursework with a GPA of 2.000 or better. Courses may be taken P/NP as long as at least one course is taken for a letter grade and minor GPA is at least 2.000.

For the OASIS minor declaration form to be approved, one course must be successfully completed and minor GPA at least 2.000.

Important: Only one course may overlap between major and minor requirements. If MGT 011A is used for completing a major requirement, then further minor coursework cannot be counted toward major requirements.

3001 Ghausi Hall; 530-752-0400; Fax 530-752-1031; Materials Science & Engineering (<http://mse.engineering.ucdavis.edu>); Faculty (<https://mse.engineering.ucdavis.edu/people/faculty/>)

The Department of Materials Science & Engineering offers one undergraduate program in Materials Science & Engineering (p. 288) and a minor in Materials Science (p. 288).

Mission Statement

The mission of the Department of Materials Science & Engineering is to provide the highest quality of education and prepare a diverse group of students for successful careers by building a strong base of technical knowledge and professional ethics while advancing the frontiers of materials science and engineering through teaching, research, and outreach.

Graduate Programs in the Department of Materials Science & Engineering

The Department of Materials Science & Engineering is home to a top-ranked graduate program in Materials Science & Engineering. We offer a unique interdisciplinary environment for graduate studies, with renowned faculty and state-of-the-art research facilities.

- Materials Science & Engineering, Bachelor of Science (p. 288)
- Materials Science, Minor (p. 290)
- Materials Science & Engineering, Master of Engineering (p. 290)
- Materials Science & Engineering, Master of Science (p. 291)
- Materials Science & Engineering, Doctor of Philosophy (p. 291)

Materials Science & Engineering, Bachelor of Science

College of Engineering

Materials Science & Engineering Undergraduate Program

The Materials Science & Engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Materials science and engineering is directed toward an understanding of the structure, properties, and processing of materials. Society demands new and improved materials with capabilities far superior to common metals, polymers, and ceramics. New materials are needed for high-speed transportation systems, surgical and dental implants, new generations of power plants, renewable energy sources, and solid-state electronic and photonic devices in computer and communication technology. Both the development of new materials and the understanding of present-day materials demand a thorough knowledge of basic engineering and scientific principles, including crystal structure, elastic and plastic behavior, thermodynamics, phase equilibria and reaction rates, and structural and physical and chemical behavior of engineering materials.

Materials engineers study phenomena found in many different engineering operations, from fracture behavior in automobiles to fatigue behavior in aircraft frames, from corrosion behavior in petro-chemical refineries to radiation-induced damage in nuclear power plants, and from the fabrication of steel to the design of semiconductors. Materials engineers are also increasingly involved in developing the new materials needed to attain higher efficiencies in existing and proposed energy conversion schemes and will play a central role in the development of new technologies based on composites and high-temperature superconductivity.

The undergraduate materials science and engineering program provides the background for activities in research, processing, and the design of materials. The curriculum is based on a common core of courses basic

to engineering; courses taken during your first two years provide a strong foundation in fundamental engineering concepts.

Objectives

We educate students in the fundamentals of materials science and engineering, balanced with the application of these principles to practical problems; educate students as independent, critical thinkers who can also function effectively in a team; educate students with a sense of community, ethical responsibility, and professionalism; educate students for careers in industry, government, and academia; teach students the necessity for continuing education and self-learning; and foster proficiency in written and oral communications.

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Materials Science & Engineering major is 157.

Honors Program

An Honors Program is available to qualified students in Materials Science & Engineering. It is a two-year program designed to challenge the most talented students in these majors. Students are invited to participate in their sophomore year. In the upper division coursework, students will complete either an honors thesis or a project that might involve local industry. Students must maintain a grade point average of 3.500 to continue in the program. Successful completion of the Honors Program will be acknowledged on the student's transcript.

Focused Electives

Courses used to satisfy degree requirements are not eligible to be used to satisfy the elective requirement. 12

Students may elect to choose up to 5 units from the following lower division courses:

BIS 002A	Introduction to Biology: Essentials of Life on Earth
EBS 075	Properties of Materials in Biological Systems
BIM 020	Fundamentals of Bioengineering
ENG 017	Circuits I
ENG 035	Statics

Remaining units must be satisfied by the following:

BIM 106	Biotransport Phenomena
BIM 109	Biomaterials
ECI 130	Structural Analysis
ECI 132	Structural Design: Metallic Elements
EEC 140A	Principles of Device Physics I
EEC 140B	Principles of Device Physics II
EEC 146A	Integrated Circuits Fabrication
ENG 100	Electronic Circuits & Systems
ENG 102	Dynamics
ENG 103	Fluid Mechanics
ENG 104	Mechanics of Materials

OR

Any upper division courses in Materials Science & Engineering (EMS); a maximum of 4 units combined in Materials Science & Engineering (EMS) courses numbered 190-197 or 199 can be used to satisfy focused electives requirement.

Choose one; grade of C- or better is required: 0-4

UWP 102E	Writing in the Disciplines: Engineering
UWP 102F	Writing in the Disciplines: Food Science & Technology
UWP 104A	Writing in the Professions: Business Writing
UWP 104E	Writing in the Professions: Science
UWP 104T	Writing in the Professions: Technical Writing

Passing the Upper Division Composition Exam.

Materials Science, Minor

College of Engineering

Minor

There is a constant need for professionals with more knowledge and experience in understanding the behavior of materials from which products such as electronics, sensors, biological implants, transportation vehicles, medical devices and infrastructure are made. The goal of this minor is to prepare students for careers that require training in materials science, including the fundamentals of thermodynamics and kinetics and their effects on phase composition and structure, as well as the complex relationships between composition, structure, processing and behavior/performance. Topics covered include material thermodynamics and kinetics, materials structural analysis, and structure-property relationships for electronic, optical, magnetic and mechanical behavior. The minor is expected to accommodate persons of diverse backgrounds, such as those majoring in engineering, physical sciences, biological sciences, and mathematics.

All courses must be taken for a letter grade. A grade of C- or better is required for all courses used to satisfy minor requirements, with an overall GPA in minor requirement courses of 2.000 or better.

Materials Science & Engineering, Master of Science

College of Engineering

The Master of Science Degree in Materials Science & Engineering

The Master of Science (M.S.) degree is aimed at preparing students for careers in research and development, or for further study in the field. Like the doctoral degree, the M.S. degree combines coursework and research, but with a more limited scope of the research project and thesis to reflect the shorter time-to-degree. After graduation, the majority of our M.S. degree graduates find jobs in industry.

Students in this degree track must complete a master's thesis consisting of a scholarly piece of computational, experimental, or theoretical research that is rigorous in terms of design, methodology, and analysis. When students have completed the majority of their coursework, they should advance to candidacy. When advancing to candidacy, students should prepare an outline of their thesis, which should include a critical evaluation of the methods and limitations of the research project and a full description of the experimental design, protocols, and data analysis.

Materials Science & Engineering, Doctor of Philosophy

College of Engineering

The Doctoral (Ph.D.) Degree in Materials Science & Engineering

The doctoral degree in Materials Science & Engineering prepares students to solve complex, long-term research problems. Students can

expect to graduate in four to five years and to work on a large research project, culminating in a dissertation. The majority of our doctoral graduates end up in industry careers, usually in research and product development positions. Others go on to careers in academia, either as a postdoctoral researcher or an assistant professor. Students enrolled in the doctoral degree have the option to complete a designated emphasis in biophotonics and bioimaging, biotechnology, and/or nuclear science.

Doctoral students complete two examinations en route to their degrees, the preliminary exam and the qualifying examination, in addition to coursework and a dissertation.

The Major Programs

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

The Program

After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability,

modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

Career Alternatives

A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

Major Advisors

For a current list of faculty and staff advisors, see Math Department Advising or contact the Student Services office (studentservices@math.ucdavis.edu).

Mathematics Placement Requirement

Students who wish to enroll in MAT 012, MAT 016A, MAT 017A, MAT 021A, MAT 021AH, and MAT 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see Math Placement Requirement (MPR), well in advance of enrolling.

Department Honors

Students who meet the minimum GPA requirement for honors at graduation from the College of Letters & Science and who complete a senior project as part of MAT 194 or MAT 199 units in consultation with their faculty advisor may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see Honors & Awards (<https://www.math.ucdavis.edu/research/honors/>).

Graduate Study

The Department offers programs of study and research leading to the M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting Graduate Information (<https://www.math.ucdavis.edu/grad/>), and by email (studentservices@math.ucdavis.edu).

Mathematics, Bachelor of Science

College of Letters & Science

The Major Programs

Mathematics is the study of abstract structures, space, change, and the interrelations of these concepts. It also is the language of the exact sciences.

The Program

Students majoring in mathematics may follow a program leading to either the Bachelor of Arts or the Bachelor of Science degree. After completing basic introductory courses such as calculus and linear algebra, students plan an upper division program in consultation with a faculty advisor. Upper division courses include real analysis, probability, modern algebra, as well as a variety of other courses that allow students to further mathematical knowledge and skills that feature their research or career interests. This individualized program can lead to graduate study in pure or applied mathematics, elementary or secondary level teaching, or to other professional goals. It can also reflect a special interest such as computational and applied mathematics, computer science, or statistics, or may be combined with a major in some other field.

Career Alternatives

A degree in mathematics provides entry to many careers in industry in addition to teaching. For instance, operations research, data analysis, systems analysis, computing, actuarial work, insurance, and financial services are only a few such careers. Mathematics is also a sound basis for graduate work in a variety of fields, such as law, engineering, and economics.

Major Advisors

For a current list of faculty and staff advisors; see Math Department Advising (<https://www.math.ucdavis.edu/undergrad/advising/advisers/>) or contact Student Services (studentservices@math.ucdavis.edu).

Mathematics Placement Requirement

Students who wish to enroll in MAT 012, MAT 016A, MAT 017A, MAT 021A, MAT 021AH, and MAT 021M must satisfy the mathematics placement requirement by taking an online exam. Students who do not satisfy the requirement will be administratively dropped from these courses. For more information, including preparation tips and how to access the online exam, please see the Math Placement Requirement (MPR) (http://www.math.ucdavis.edu/undergrad/math_placement/), well in advance of enrolling.

Department Honors

Students who meet the minimum GPA requirement for honors at graduation for the College of Letters & Science and who complete a senior project as part of MAT 194 or MAT 199 units in consultation with their faculty advisor may also be recommended by the department for graduation with High Honors or Highest Honors. Recommendations will be based on evaluations of students' academic achievements in their major and the quality of their senior project. For complete details, see Honors & Awards (<https://www.math.ucdavis.edu/research/honors/>).

Teaching Credential Subject Representative

Dr. Ali Dad-del

Graduate Study

The Department offers programs of study and research leading to M.A. and Ph.D. degrees in Mathematics. Information regarding graduate study may be obtained by consulting our website or contacting Student Services (studentservices@math.ucdavis.edu).

- Mechanical & Aerospace Engineering, Doctor of Philosophy (p. 307)

Aerospace Science & Engineering, Bachelor of Science

College of Engineering

Barbara S. Linke, Dr. –Ing. Habil, Vice Chairperson for Undergraduate Studies

Mechanical & Aerospace Engineering Undergraduate Programs

The Department of Mechanical & Aerospace Engineering administers two undergraduate programs in the College of Engineering (1) Mechanical Engineering, (2) Aerospace Science & Engineering

For more information about our programs, please see Undergraduate Majors (<http://mae.ucdavis.edu/undergraduate/undergraduate-majors/>).

Mission

The Department of Mechanical & Aerospace Engineering is committed to educating future engineers so that they may contribute to the economic growth and well-being of the state, the nation, and the world, and to the advancement of knowledge in the mechanical and aerospace sciences.

Objectives

The objectives of the Mechanical Engineering and Aerospace Science & Engineering programs are to produce graduates who do one or more of the following: a. Practice mechanical engineering and/or aerospace engineering in a broad range of agencies, industries, and institutes; b. Pursue graduate education; c. Participate in research and development, and other creative and innovative efforts in science, engineering, and technology; d. Pursue entrepreneurial endeavors.

Division of Aerospace Science & Engineering

The Division of Aerospace Science & Engineering administers the Aerospace Science & Engineering Program within the Department of Mechanical & Aerospace Engineering.

Aerospace Science & Engineering Undergraduate Program

The Aerospace Science & Engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

Aerospace Science & Engineering majors learn to apply the principles of the physical sciences and engineering to the design of aerospace vehicles. Specific objectives include the design, development and manufacture of aerospace vehicles and other transportation systems through the integration of disciplines associated with aerodynamics, propulsion, structures and guidance/control.

Our Bachelor of Science degree in Aerospace Science & Engineering provides a broad background and fundamental education in mathematics, the physical sciences, and the engineering sciences. These fundamentals, when complemented by the required technical courses, prepare students for employment in government or industry, while simultaneously establishing an excellent foundation for graduate studies.

Aerodynamics & Fluid Mechanics

This field of study is based on the fundamentals of fluid mechanics and applied aircraft aerodynamics. Areas of current research include computational fluid dynamics, turbulent boundary layer flows, aeroacoustics, rotorcraft aerodynamics, wind turbine aerodynamics, active flow control, subsonic wind tunnel measurement, vortex generators, fixed-wing tip vortices, parachute drag prediction and aircraft design and optimization. Many of these projects are sponsored by government agencies and leading industrial companies, such as NASA, the U.S. Army, Sandia National Laboratory, the National Science Foundation and Boeing. Computational research is conducted using UC Davis High Performance Computing (HPC), NASA HPC, DoD HPC and DoE HPC. Experimental studies are conducted in the UC Davis Wind Tunnel Facility.

Relevant courses: EAE 126 & EAE 127.

Suggested Advisors

J. P. Delplanque, C. P. van Dam, M. Hafez, S. Lee, N. Sarigul-Klijn, S. K. Robinson

Aerospace Control

This field of study includes control theory and its application to aerospace systems. Areas of current research include adaptive control, networked system control, hybrid system control, and controller design for unmanned aerial systems, spacecraft, and other machines. Many of these projects are sponsored by government agencies and leading industrial companies, such as NASA Ames Research Center, NASA Jet Propulsion Laboratory, the National Science Foundation and Boeing.

Relevant course: EAE 129.

Suggested Advisors

S. Joshi, Z. Kong, N. Sarigul-Klijn

Aerospace Propulsion

This field of study involves air-breathing jet engines and rocket propulsion. Areas of current research include turbomachinery, computational fluid dynamics, open rotor, jet noise, turbine cooling, innovative gas-turbine cycles, rocket engine feed systems and cooling tubes, propeller design and centrifugal compressors. Many of these projects are sponsored by government agencies and leading industrial companies, such as The Wright-Patterson Air Force Research Laboratory (AFRL), Lawrence Livermore National Laboratory, Los Alamos National Laboratory, Aerojet Rocketdyne and the University of California. Computational research is conducted using UC Davis High Performance Computing (HPC), NASA HPC, DoD HPC and DoE HPC.

Relevant courses: EAE 138 & EAE 140.

Suggested Advisors

J. P. Delplanque, S. Lee, N. Sarigul-Klijn

Structures & Materials

This field of study analyzes the structures and materials used in aerospace engineering, expanding from traditional mechanics of materials in order to correctly understand the behavior of thin-walled structures under bending, torsion and axial loads. Composite materials are being used extensively in new airplanes and helicopters, space structures, as well as in wind energy, ships, transportation, infrastructure and biomedical joints. Current research in composite structures encompasses several areas of engineering, includes durability of composites due to in service load (for example, thermo-hygro-mechanical fatigue, impact, etc.) and structural health monitoring methods.

Relevant courses: EAE 133, EAE 135 & MAE 237 (graduate level/technical elective).

Suggested Advisors

V. La Saponara

Spacecraft Engineering

This field of study includes rocket propulsion, orbital mechanics, spacecraft design, human life-support in space, space environments, mission design and systems engineering. Current research in the MAE department includes spacecraft and habitat design, CubeSat design, human life-support systems and safety, space robotics, autonomous systems supported by machine learning, radiation protection, atmospheric entry and metallic additive manufacturing. A variety of federally-funded national laboratories fund this research, and research projects often result in internship and employment opportunities for students in organizations like NASA, Lawrence Livermore Lab, SpaceX, Blue Origin, Sierra Nevada, Lockheed Martin, Northrup Grumman, Aerospace Corp, Space Systems Loral and Boeing.

Relevant courses: EAE 140, EAE 142, EAE 143A, EAE 143B.

Suggested Advisors

S. Joshi, N. Sarigul-Klijn, S. K. Robinson

Aeroelasticity & Vibrations

This field of study looks at aircraft structural dynamics and aeroelasticity. Areas of current research include aerospace structures, aeroelasticity, biomechanics, flow-induced vibrations, vibroacoustics and minimum weight design with aeroelastic and acoustic constraints. Research is also done on landing recovery systems, including winged, rotor, or parachute recovery system trades and scaled flight testing and the long-duration effects of space flight on the human spine. Aerospace engineers in this research area also work to develop advanced finite element methods to solve steep gradient problems of high temperature due to aerodynamic heating or shock loading, innovative power generation systems and environmental noise control methods. Many of these projects are sponsored by government agencies and leading industrial companies.

Relevant course: EAE 133, EAE 135.

Suggested Advisors

V. La Saponara, N. Sarigul-Klijn

Students are encouraged to adhere carefully to all prerequisite requirements. The instructor is authorized to drop students from a course for which stated prerequisites have not been completed.

Exclusive of General Education units, the minimum number of units required for the Aerospace Science & Engineering major is 160.

Mechanical Engineering, Bachelor of Science

College of Engineering

Barbara S. Linke, Dr.-Ing. habil., Vice Chairperson for Undergraduate Studies; term begins July 1, 2019

The Mechanical & Aerospace Engineering Undergraduate Programs

The Department of Mechanical & Aerospace Engineering administers two undergraduate programs in the College of Engineering: (1) Mechanical Engineering, (2) Aerospace Science & Engineering.

For more information about our programs, see Undergraduate Majors (<http://mae.ucdavis.edu/undergraduate/undergraduate-majors/>).

Mission

The Department of Mechanical & Aerospace Engineering is committed to educating future engineers so that they may contribute to the economic growth and well-being of the state, the nation, and the world, and to the advancement of knowledge in the mechanical and aerospace sciences.

Objectives

The objectives of the Mechanical Engineering & Aerospace Science and Engineering programs are to produce graduates who do one or more of the following: a. Practice mechanical engineering and/or aerospace engineering in a broad range of agencies, industries, and institutes; b. Pursue graduate education; c. Participate in research and development, and other creative and innovative efforts in science, engineering, and technology; d. Pursue entrepreneurial endeavors.

Mechanical Engineering Undergraduate Program

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>).

The mechanical engineer uses basic science in the design and manufacture of complex engineering systems, requiring the application of physical and mechanical principles to the development of machines, energy conversion systems, materials, and equipment for guidance & control.

Work in this broad field of engineering requires a thorough knowledge of mathematics, physics, chemistry, material science, applied mechanics, thermodynamics, heat transfer, mass transfer, electricity, manufacturing processes, and economics.

The Mechanical Engineering program is designed to provide knowledge in mechanical engineering and associated applied sciences so that graduates may practice in a broad range of industries, pursue graduate studies, participate in research & development, and/or pursue entrepreneurial endeavors.

Areas of Interest

Students spend their third year in further study of fundamental courses, and in the fourth year they may tailor their studies to their interests by selecting courses in controls and systems analysis, fluid mechanics, heat transfer, mechanical design or thermodynamics. Students can either prepare for graduate study in mechanical engineering or obtain a broad background for entering engineering practice.

Students may select elective courses from among the areas of interest listed below.

Mechanical Design

The creation and improvement of products, processes, or systems that are mechanical in nature are the primary activities of a professional mechanical engineer. The development of a product from concept generation to detailed design, manufacturing process selection and planning, quality control and assurance, and life cycle considerations are areas of study and specialization in the area of mechanical design.

Solutions to such major social problems as environmental pollution, the lack of mass transportation, the lack of raw materials, and energy shortages, will depend heavily on the engineer's ability to create new types of machinery and mechanical systems.

The engineer-designer must have a solid and relatively broad background in the basic physical and engineering sciences and have the ability to synthesize the information from such a background in creative problem solving. In addition to having technical competence, the designer must be able to consider the socioeconomic consequences of a design and its possible impact on the environment. Product safety, reliability, and economics are other considerations.

ENG 122	Introduction to Mechanical Vibrations	4
EMS 180	Materials in Engineering Design	4
EMS 182	Failure Analysis	4
EME 121	Engineering Applications of Dynamics	4
EME 134	Vehicle Stability	4
EME 139	Stability of Flexible Dynamic Systems	4
EME 150B	Mechanical Design	4
EME 151	Statistical Methods in Design & Manufacturing	4
EME 152	Computer-Aided Mechanism Design	4
EME 154	Mechatronics	4
EME 161	Combustion & the Environment	4
EME 163	Internal Combustion Engines & Future Alternatives	4
EME 164	Introduction to Heating, Ventilation & Air Conditioning Systems	4
EME 171	Analysis, Simulation & Design of Mechatronic Systems	4

Suggested Advisors

H.H. Cheng, R.T. Farouki, M.R. Hill, B.S. Linke, B. Ravani, J. Schofield, M. Soshi

Engineering & Biomedical Fluid Mechanics

This field of study is based on the fundamentals of fluid mechanics and their broad range of applications in the biomedical and engineering areas. Areas of current research include blood circulation and its potential role in the regulation of normal physiological function and in the development of disease; groundwater and atmospheric flows and their implications for pollutant transport and environmental concerns; aerodynamic flow around transportation vehicles and its impact on vehicle performance; flow in combustion engines and other energy systems with considerations of efficiency and environmental impact; compressible flows in aircraft engine or gas turbine; and computational fluid dynamics. These areas are investigated both experimentally and computationally.

Code	Title	Units
Suggested Restricted Electives		
EAE 126	Theoretical & Computational Aerodynamics	4
EAE 127	Applied Aircraft Aerodynamics	4
EAE 138	Aircraft Propulsion	4
EME 161	Combustion & the Environment	4
EME 163	Internal Combustion Engines & Future Alternatives	4
EME 164	Introduction to Heating, Ventilation & Air Conditioning Systems	4

Suggested Advisors

R.C. Aldredge, J.P. Delplanque, M. Hafez, S. Lee, S.K. Robinson, B.D. Shaw, C.P. van Dam, A.S. Wexler

Combustion & the Environment

Combustion is widely used for energy generation, propulsion, heating, and waste disposal, as well as for many other applications. Mechanical engineers are often heavily involved with the design of combustion systems (internal combustion engines, gas turbines, furnaces, etc.) and deal with aspects of combustion ranging from increasing efficiencies to reducing pollutant emissions. This specialization is for those who would like to work in fields that use combustion, or that deal with pollution related to combustion. With the current increased emphasis on reducing pollutants while maintaining or increasing efficiency, the efforts of mechanical engineers in designing and improving combustion systems are becoming more important.

Code	Title	Units
Suggested Technical Electives		
EME 161	Combustion & the Environment	4
EME 163	Internal Combustion Engines & Future Alternatives	4

Suggested Advisors

R.C. Aldredge, P. A. Erickson, B.D. Shaw

Heat Transfer, Thermodynamics, & Energy Systems

This specialization emphasizes the fundamentals of heat transfer and thermodynamics, and their application to the design of advanced engineering systems. The objective of the program is to introduce students to the fundamental processes of heat transfer and thermodynamics in complex engineering systems so that they are able to design more efficient, cost-effective, and reliable systems with less environmental pollution and impact. An understanding of heat transfer and thermodynamics is required for the design of efficient, cost-effective systems for power generation, propulsion, heat exchangers, industrial processes, refining, and chemical processing. This area of specialization is important to many industries— aerospace, defense, automotive—as well as to the thermal design of electronic and computer packages.

Code	Title	Units
Suggested Restricted Electives		
EAE 138	Aircraft Propulsion	4
EME 161	Combustion & the Environment	4

Suggested Advisors

R.C. Aldredge, P.A. Erickson, J.K. Kissock, V. Narayanan, J.W. Park, B.D. Shaw

Manufacturing

Manufacturing is concerned with the conversion of raw materials into finished products by a variety of processes, such as machining, forming, casting, and molding. Modern manufacturing technology is increasingly dependent upon integration with computer-aided design systems and precision computer controls. State-of-the-art laboratories offer the opportunity for hands-on experience with a wide spectrum of manufacturing equipment. Manufacturing engineers must have expertise in design, materials, controls, statistical methods, computer software, and microprocessor applications.

Code	Title	Units

EMS 180	Materials in Engineering Design	4
EME 150B	Mechanical Design	4
EME 151	Statistical Methods in Design & Manufacturing	4
EME 154	Mechatronics	4

Suggested Advisors

H.H. Cheng, R.T. Farouki, B.S. Linke, D.A. Horsley, V. La Saponara, M. Soshi, B. Ravani

System Dynamics & Control

Engineers are increasingly concerned with the performance of integrated dynamics systems in which it is not possible to optimize component parts without considering the overall system.

System dynamics and control specialists are concerned with the modeling, analysis, and simulation of all types of dynamic systems and with the use of automatic control techniques to change the dynamic characteristics of systems in useful ways. The emphasis in this program is on the physical systems that are closely related to mechanical engineering, but the techniques for studying these systems apply to social, economic, and other dynamic systems.

Ongoing research includes projects on continuously variable transmissions, active and semi-active suspension systems, modeling and control of vehicle dynamics, electromechanical actuator design, electronically controlled steering, the analysis of fuel management systems, and the design of flight-control systems with humans in the loop.

Ground Vehicle Systems

An important aspect of mechanical engineering is the design of more environmentally benign surface vehicles that provide efficient individual and public transportation. Innovations in the field require competence in vehicle dynamics, control of vehicle dynamics, power sources & power transmission, lightweight structures & systems, alternatively fueled power systems, including electrical drives & fuel cells, and mechanical systems.

EME 139	Stability of Flexible Dynamic Systems	4
EME 152	Computer-Aided Mechanism Design	4
EME 171	Analysis, Simulation & Design of Mechatronic Systems	4

Suggested Advisors

F. Assadian, P. A. Erickson, M. Hill, X. Lin, J. Moore, J. Park, N. Sarigul-Klijn

Transportation Systems

As society recognizes the increasing importance of optimizing transportation systems to minimize environmental degradation and energy expenditure, engineers will need to consider major innovations in the way people and goods are moved. Such innovations will require competence in vehicle dynamics, propulsion and control, and an understanding of the problems caused by present-day modes of transportation. Vehicle control requires an understanding of sensors and actuators, and the integration of yet-to-be-proposed concepts into overall vehicular dynamics. Competence in these areas allows for the development of alternative propulsion concepts, such as electric, hybrid, and fuel cell.

¹ Students may also choose from EAE 130A, EAE 130B, EME 121, EME 139, EME 150B, EME 151, EME 154, EME 171, ENG 122 if these courses are not used in satisfaction of other degree requirements.

Mechanical & Aerospace Engineering, Master of Science

College of Engineering

The defining element of graduate study in the Mechanical & Aerospace Engineering Program is interdisciplinary design. Research within this graduate program advances design in diverse fields such as vehicles, plasma MHD propulsion, biomechanics, aerostructures, sensors, combustion, and energy systems. Graduate students acquire skills both to address fundamental issues in these areas and to design complex, multi-component systems. The highly collaborative environment fosters multidisciplinary research while drawing on the study of mathematics, experimental and space plasma science, electrical engineering, materials science, materials modeling, molecular dynamics and numerical analysis, bioengineering, space physics, and nanotechnology in addition to the core areas. Recruiters from industry are active here, knowing that, in addition to having hands-on design experience, our students are well grounded in engineering fundamentals. They study with professors who "wrote the book" on their discipline, and work on design projects with researchers who are international authorities in their field. Our graduate students are able to work closely with faculty in a friendly but demanding environment where teamwork and faculty mentoring are important, as is the cross-disciplinary, collaborative culture that is unique to UC Davis.

Research Highlights

- Aeronautics & Aerostructures
- Spacecraft Design & Operation
- Space Environmental Studies
- Remote Sensing
- Electrical Propulsion
- Flight Dynamics & Control
- Computational Fluid Dynamics
- Experimental MHD Turbulence Studies
- Dynamic Systems & Controls
- Robotics
- Materials Modeling
- Manufacturing & Mechanical Design
- Reacting Flows
- Heat Transfer
- Automotive System Dynamics
- Biosensors/Microelectromechanical Systems (MEMS)
- Molecular Self-Assembly
- Radiation Effects In Solids
- Nonlinear Dynamics & Phase-Locking
- Biofluid Mechanics
- Biosolid Mechanics
- Sports Biomechanics
- Energy Systems/Fuel Cell/Hybrid Vehicle Technology
- High Energy Density Science & Applications
- Nuclear Fusion Energy
- Wind Energy
- Solar Energy

Research Facilities & Partnerships

- Center for Computational Fluid Dynamics
- Institute of Transportation Studies
- Center for Advanced Highway Maintenance & Construction Technology
- GATE Center for Hybrid Electric Vehicles
- Western Cooling Efficiency Center
- Energy and Efficiency Institute
- HOME Space Technology Research Institute
- Aeronautical Wind Tunnel Facility

Doctor of Medicine

School of Medicine

The curriculum for the M.D. degree at the UC Davis School of Medicine is a four-year program providing comprehensive preparation for graduate medical training (internships and residencies) and the practice of medicine. It offers a highly integrated approach to basic science training and clinical experience with opportunities for research. Because the M.D. degree is implementing a substantially renewed curriculum beginning in 2021-22, please review current information available at UC Davis School of Medicine M.D. Program (<https://health.ucdavis.edu/mdprogram/>).

Medieval & Early Modern Studies, Bachelor of Arts

College of Letters & Science

The Major Program

The major in Medieval & Early Modern Studies examines the intellectual, political, and cultural forces that shaped modern European civilization during the period from the end of Ancient Rome (5th century) to the beginning of the Enlightenment (mid-18th century). An interdisciplinary and interdepartmental program, the major includes studies in history, art history, philosophy, literature, drama, music, national languages, religion, rhetoric, and political theory.

The Program

The major requires interdisciplinary work, while allowing the student to focus on the early Middle Ages, the High Middle Ages, the Renaissance, or the Baroque. The series of medieval and early modern courses in the program provides the foundation for the major and prepares students for advanced work within the individual disciplines. On the upper division level, students may choose course work in specific areas of History,

Comparative Literature, English, French, German, Italian, Spanish, and Latin, philosophy & religion, arts & language, and political thought. In addition, each student may elect to complete a senior thesis on a selected aspect of medieval and/or early modern culture.

Career Alternatives

The major in Medieval & Early Modern Studies is a liberal arts degree providing excellent preparation for the rigors of professional schools as well as careers in law, museology, journalism, and teaching.

Medieval & Early Modern Studies, Minor

College of Letters & Science

Minor Advisor

See Program office.

Code	Title	Units
	The minor in Medieval & Early Modern Studies is a coherent program of interdisciplinary study. Medieval Studies units may be taken in one or more of the traditional fields of concentration, including art, history, literature, music, national languages, philosophy, political theory, and religious studies. Courses must be upper division with at least two courses each from the medieval and early modern periods. Students may also select a minor with a thematic emphasis. Although there is no foreign language requirement for the minor, knowledge of Latin or a modern European language is recommended. The minor must be designed in consultation with the Undergraduate Advisor.	24

- Molecular & Medical Microbiology, Bachelor of Arts (p. 310)
- Molecular & Medical Microbiology, Bachelor of Science (p. 312)

Molecular & Medical Microbiology, Bachelor of Arts

College of Biological Sciences

The department of Microbiology & Molecular Genetics offers the major in Molecular & Medical Microbiology.

Molecular & Medical Microbiology A.B. The Major Program

Microbiology is the branch of biology that deals with bacteria, yeasts and other fungi, algae, protozoa, and viruses. These microorganisms are ubiquitous in nature and play a crucial role in areas such as agriculture, biotechnology, ecology, medicine, and veterinary science. The field of microbiology contributes to areas of fundamental inquiry such as biochemistry, cell biology, evolution, genetics, molecular biology, pathogenesis, and physiology. The ease and power of simultaneous genetic and biochemical analysis of microbes led to the emergence of the new disciplines of molecular biology & molecular genetics, and spawned the new industry of biotechnology.

The Program

The Molecular & Medical Microbiology Undergraduate Program offers Bachelor of Science and Bachelor of Arts degrees in the College of Biological Sciences. Both degrees are designed to provide students with quantitative skills and knowledge across the breadth of Biological Sciences, while maintaining a focus on the biology of microorganisms. The B.S. degree offers more training in mathematics, biochemistry and laboratory methodology; the A.B. degree incorporates more exposure to the liberal arts. The choice of a major program and its suitability for

particular career options should be discussed with a Biology Academic Success Center (BASC) advisor.

Career Alternatives

A bachelor's degree in Molecular & Medical Microbiology serves as the foundation for advanced study in microbiology, entry into the professional schools of all health sciences, or immediate employment in biotechnology, health care and food science industries.

Graduate Study

The Graduate Group in Microbiology offers programs of study and research leading to M.S. and Ph.D. degrees.

Strong preference is given to doctoral applicants. The group offers study in general microbiology, microbial physiology, microbial genetics, molecular mechanisms of microbial regulation, molecular mechanisms of microbial pathogenesis, immunology, virology, and recombinant DNA technology. For information on the graduate study and undergraduate preparation for the program contact a graduate advisor or the Chairperson of the Group.

Related Courses

The offerings of the Department of Microbiology & Molecular Genetics are augmented by courses in Food Science & Technology (FST) (p. 463); Medical Microbiology (MMI) (p. 463); Molecular & Cellular Biology (MCB) (p. 463); Pathology, Microbiology, & Immunology (PMI) (p. 463); Plant Pathology (PLP) (p. 463); and Soil Science (SSC) (p. 463).

Faculty of the Department of Microbiology & Molecular Genetics also teach or participate in the following courses: BIS 002A, BIS 101, BIS 104 and BIS 181.

Arab Studies, Minor

College of Letters & Science

The Arab Studies Minor is an interdisciplinary minor that allows students to learn about the pre-modern and modern history, cultures, societies, and diasporas of Arabic-speaking peoples of West Asia and North Africa as well as other users of Arabic. The Arab Studies Minor is open to undergraduates in all four colleges.

Minor Advisor

Middle East/South Asia Studies, Bachelor of Arts

College of Letters & Science

The Major Program

Are you interested in languages and culture? Do you want a global education? Middle East/South Asia Studies is a unique major where you can learn about the interconnected regions of South Asia, Central and West Asia, and North Africa. This area encompasses many countries, including Afghanistan, Algeria, Egypt, India, Iran, Iraq, Israel, Lebanon, Morocco, Pakistan, Palestine, Sudan, Syria, Turkey, the United Arab Emirates, and Yemen. Students can explore these regions through a variety of courses: anthropology, art history, art studio, Asian American Studies, cinema, classics, comparative literature, English, gender studies, history, music, political science, religious studies, and sociology. As a ME/SA major, you will be able to learn a regional language (Arabic, Hebrew, Hindi/Urdu, Persian or Punjabi). Beyond coursework, ME/SA majors also have the opportunity to get involved in research, special projects with faculty guidance, and study abroad.

The Middle East/South Asia Studies major focuses on the comparative study of these regions and their historically intertwined cultures and societies. Students will receive a strong foundation in one regional language, with two years required in Arabic, Hebrew, Hindi/Urdu, Persian, Punjabi, or another language of this area. The two required ME/SA Studies courses lay a comparative foundation, and options for remaining requirements include coursework from a wide range of departments/programs in the College of Letters and Science.

Major Advisor

Middle East/South Asia Studies, Minor

College of Letters & Science

The ME/SA Studies Minor features the interdisciplinary and comparative study of West Asia, North Africa, South Asia, and Central Asia, regions that have been linked for centuries by trade, migration, the exchange of scientific, mathematical, philosophical, and political ideas, religion, literature, and the arts. The ME/SA Studies Minor is open to undergraduates in all four colleges.

Military Science

College of Letters & Science

Alex Aquino, Major, Chairperson of the Department; July 1, 2020-June 30, 2023

Department Office

Reserve Officers' Training Corps (ROTC), Army; 125 Hickey Gymnasium; 530-752-5211; Faculty (<https://militaryscience.ucdavis.edu/people/>)

Program of Study

The Military Science Department is a classroom and hands-on leadership and management program. The program stresses the following Army Values: loyalty, duty, respect, selfless service, honor, integrity, and

personal courage. We cover the basics of the Army, including Army ranks, organizational structure, basic skills, and tactics. We also discuss current events, national and international politics, military affairs, ethics, and human relations. Military skills (such as drill and ceremony, map reading, and squad tactics) are taught to the extent necessary to create an environment where students can enter leadership positions and apply theories taught in the classroom. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The department offers two program tracks: (1) a purely academic track; (2) a pre-commissioning track for those desiring a commission as an Officer in the Active Duty U.S. Army, Army National Guard, or Army Reserves. The academic track entails no obligation to the military and is open to all students but is limited to MSC 012 and MSC 022B. Students pursuing the academic track do not wear a uniform or otherwise participate in extra-curricular activities designed as part of the pre-commissioning process.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extra-curricular activities designed to enhance their military leadership and tactical and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students must contract with ROTC to participate in the upper division pre-commissioning program and incur a military obligation. Extracurricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, a military honor society, and opportunities to participate in field training exercises.

Department Programs

Students are enrolled in Military Science under one of two programs.

Four-Year Program

There is no military obligation associated with attendance in lower division courses. Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately based on their military service experience and graduation from Basic Training, upon approval by the Department Chairperson.

During the course, all Military Science textbooks, uniforms and equipment are provided without cost. Contracted students are given leadership development experience at the ROTC Advanced Camp in Fort Knox, Kentucky, between their third and fourth years of the course. Emphasis is on military fitness, tactics, and leadership.

Two-Year Program

The two-year program is for students, including graduate students, who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends a six-week summer program, Basic Camp, which is voluntary and carries no military obligation. Basic Camp attendees are paid and transportation costs are covered. Applications are accepted at any time prior to the student's junior year; graduate students are also accepted, as long as they have two years of academics remaining.

Scholarship Program

There are three- and two-year scholarship opportunities available at the discretion of the Department Chairperson that covers full tuition and

fees and \$1200 annually for books. Cadets also receive a \$420 monthly stipend.

Army Reserve Officers' Training Corps four-year Active Duty merit scholarships are awarded to qualified high school seniors in a national competition each year. As high school seniors, students compete for the scholarship by submitting a complete application at Army ROTC (<https://www.goarmy.com/careers-and-jobs/find-your-path/army-officers/rotc.html>).

If high school seniors are not awarded the four-year National Scholarship, there are still opportunities for campus-based three and two-year scholarships.

Leadership Laboratory

During the course of the school year, two hours per week are spent conducting practical exercises. Classes emphasize adventure activities including military offense, defense and patrolling, operations, weapons familiarization, rappelling, leadership scenarios, and land navigation. All cadets are required to attend leadership laboratories for practical leadership experience and to prepare for attendance at Advanced Camp.

Academic Credit

College of Agricultural & Environmental Sciences

The Bachelor of Science degree in agriculture requires the completion of 180 units. Military Science courses are counted in the unit allowance for electives.

College of Biological Sciences

The Bachelor of Science degree requires the completion of 180 units. Military Science courses are counted in the allowance for electives.

College of Engineering

Military Science units are acceptable toward the requirements for the Bachelor of Science degree to the extent of the unrestricted elective units available in the curriculum being followed.

College of Letters & Science

The Bachelor of Arts and Bachelor of Science degrees require the completion of 180 units. Military Science courses are counted in the allowance for electives.

School of Veterinary Medicine

The number of Military Science units acceptable toward the Bachelor of Science degree in Veterinary Medicine is on an individual program basis approved by the Dean of the School. Graduates with the D.V.M. degree may apply for a direct commission in the United States Army Veterinary Corps.

Aerospace Studies (Air Force)

The Air Force Reserve Officer's Training Corps (AFROTC) is an educational program providing training in leadership, management, communications and military proficiency on college and university campuses. It also provides an opportunity to obtain a commission as a second lieutenant in the Air Force and enter the active-duty forces after you complete a bachelor's or a graduate degree. The skills you acquire will become valuable assets for any subsequent career you choose.

The program is normally four years long, but a flexible design allows students to complete the curriculum in as little as two years. Undergraduate scholarships are available, but are not necessary for participation. Until you accept a scholarship or enter your junior year of

the program, you have no obligation to join the Air Force. There are no costs for AFROTC uniforms, books, or classes.

UC Davis students have the option of taking the Air Force program on the UC Berkeley or CSU Sacramento campus.

Qualifications

Freshmen/Sophomore applicants must:

- Be full-time college students in good academic standing
- Have good moral character
- Be in strong physical condition
- Be at least 14 years old

Additionally, Juniors/Seniors/Scholarship recipients must:

- Be United States citizens or in the process of applying for citizenship
- Be 18 years old (or 17 years old with the consent of parent or guardian)
- Pass the Air Force Officer Qualifying Test
- Pass a medical examination
- Be under the age of 31 at time of graduation (may be waived)

Scholarships

Opportunities for four-year and three-year undergraduate scholarships are better than ever. Scholarships cover the full cost of tuition, books and required fees at the University of California and are available for eligible high school seniors. It also includes \$300-\$500 monthly stipend during the school year. If you are a junior or senior in high school and plan on attending a college or university in Northern California, you can write, call or visit the local AFROTC detachments for a scholarship application. Applications are also available from local Air Force recruiters or your high school guidance counselors.

All scholarships are merit-based and consider a variety of factors: cumulative GPA, class standing, SAT/ACT scores, academic awards/achievements, leadership ability, athletic involvement, extracurricular activities, community service and letters of recommendation. A personal interview with an Air Force officer is also part of the application process. Prior to activating a scholarship, students must meet AFROTC medical and physical fitness standards. All scholarships must be used at an accredited college or university that offers AFROTC on campus or through cross-registration. The program is available at more than 1,000 universities and colleges nationwide.

If you are already in college, contact our office directly and apply for enrollment into AFROTC as a cadet. Three- and two-year full-tuition scholarships are available for all academic majors, especially scientific and technical majors such as engineering, atmospheric science, math, computer science, and physics. GPA Scholarship requirements for nontechnical majors are slightly higher. Applicants are primarily evaluated on their leadership ability and academic performance.

Challenging Careers

All commissioned officers enter the Air Force as second lieutenants for a 4-year active duty service commitment. Pilots and navigators serve longer commitments, based on training requirements. Once on active duty, you'll be given instant responsibility in one of 32 primary career fields. Opportunities to fly are better than ever. Whether you are piloting the F-22 fighter, supervising 150 aircraft maintainers on the flightline, or

caring for sick personnel in the emergency room, you will be rewarded knowing that you are making a difference.

Air Force ROTC is offered through the Aerospace Studies departments at California State University Sacramento and U.C. Berkeley. Scholarships (including tuition, book allowance, and stipend) are available for qualified students. Students may enroll and attend one course per semester at the U.C. Berkeley or CSU Sacramento campus at no cost. Topics covered in AFROTC courses include Heritage and Values of the United States Air Force (1-credit), Team and Leadership Fundamentals (1-credit), Leading People and Effective Communication (3-credits), and U.S. National Security Affairs and Preparation for Active Duty (3-credits). Additional components of the AFROTC program include 2 hours per week of fitness activities, 2 hours per week of Leadership Lab, and a 2-week Summer Field Training between the sophomore and junior years. Upon completion of the program and granting of 4-year degree, students will commission as Second Lieutenants in the United States Air Force. To be eligible for AFROTC, applicants should be a full time student and meet additional fitness, GPA, testing, and other requirements. Interested students, please contact their department of choice:

- CSU Sacramento ROTC (<https://www.csus.edu/academic-affairs/air-force-rotc/>); 916-278-7315 or 916-278-7449; email (sacramento@afrotcadmissions.com)
- UC Berkeley Air Force ROTC (<http://airforceotc.berkeley.edu>); 510-642-3572; email (airforce@berkeley.edu)

Department of Naval Science

152 Hearst Gymnasium; UC Berkeley, Berkeley, CA 94720-3640; 510-642-3551; UC Berkeley Naval ROTC (<http://nrotc.berkeley.edu>)

UC Davis students may participate in the Navy and Marine Corps ROTC program at UC Berkeley. The program is 4 years long and includes courses and weekly professional development laboratories (drill) at UC Berkeley. Students normally compete for national scholarships as high school seniors, although interested students may enroll as freshmen or sophomores and compete for scholarships based on successful participation in the program. A student who satisfactorily completes an ROTC program and is awarded a degree from UC Davis receives an active duty commission as a Second Lieutenant in the U.S. Marine Corps or an Ensign in the U.S. Navy.

Navy option students take the following courses:

Freshman Year

- NS 1 Introduction to Naval Science
- NS 2 Sea Power and Maritime Affairs

Sophomore Year

- NS 3 Leadership and Management
- NS 10 Naval Ship Systems I

Junior Year

- NS 12A Navigation and Naval Operations I
- NS 12B Navigation and Naval Operations II

Senior Year

- NS 401 Naval Ship Systems II
- NS 412 Leadership and Ethics

In lieu of NS401, NS10, NS12A and NS12B, Marine Corps students participate in Marine Seminars and complete MA154, History of Littoral Warfare and MA20, Evolution of Warfare (or a designated equivalent).

Scholarship students are required to complete a number of other courses at Davis, including one year each of calculus, physics, and English, and one quarter each of computer science, and military history or national security policy.

Interested students should contact the Department of Naval Science at UC Berkeley at the address above to obtain information and apply.

Biochemistry & Molecular Biology, Bachelor of Science

College of Biological Sciences

The Biochemistry & Molecular Biology Major Program

The Biochemistry & Molecular Biology major introduces students to the chemistry of living organisms and the experimental techniques that are used to probe the structures and functions of biologically important molecules. Students who enjoy both chemistry and biology and who are comfortable with quantitative approaches to problem solving will find this major a rewarding field of study.

The Program

The upper division curriculum in the Biochemistry & Molecular Biology program begins with the four-course, upper division common curriculum that introduces the principles of biochemistry, genetics, and cell biology. Majors then take a comprehensive and rigorous laboratory course to familiarize them with the most important aspects of biochemical research. Additional upper division courses in biochemistry and molecular biology examine detailed aspects of these subjects. Students are also required to take courses in other biological sciences and a full year of physical chemistry.

Career Alternatives

The Biochemistry & Molecular Biology program provides a solid scientific background for students seeking a research, teaching, or service career in the life sciences. Positions are open to biochemists in bio-medical, biotechnological, pharmaceutical, agricultural research and some chemical industries. Also, university affiliated research laboratories, hospital laboratories, and government-sponsored research facilities provide

employment opportunities. The major provides excellent preparation for advanced study in graduate or professional schools.

Graduate Study

See Biochemistry, Molecular, Cellular, & Developmental Biology (Graduate Group) (p. 94).

Cell Biology, Bachelor of Science

College of Biological Sciences

The Cell Biology Major Program

The Cell Biology major provides students with a comprehensive understanding of the cell, the basic structural and functional unit of all living organisms.

The Program

To understand living organisms, the biologist must understand the cell. Hence, cell biology lies at the core of the biological sciences. Students taking this major gain a solid foundation in biological principles. The major emphasizes how cellular organization and function contribute to the development, maintenance, and reproduction of adult organisms. The major illustrates the ways in which principles derived from the physical sciences, genetics, biochemistry, molecular biology, and physiology are integrated in the study of living cells and emphasizes the experimental nature of the study of cell biology.

Career Alternatives

The major provides an excellent background for students wishing to enter postgraduate and professional programs in biological, health sciences or veterinary sciences; for students pursuing careers involving teaching or research in the biological sciences; for students interested in careers in the biotechnological or pharmaceutical industries; or for students interested in careers related to the administrative, legal, or commercial aspects of biomedical science.

Genetics & Genomics, Bachelor of Science

College of Biological Sciences

The Genetics & Genomics Major Program

The Genetics & Genomics major provides a broad background in the biological, mathematical, and physical sciences basic to the study of heredity, gene expression and evolution. The major is sufficiently flexible to accommodate students interested in the subject either as a basic discipline in the biological sciences or in terms of its applied aspects such as biotechnology, medicine, and agriculture.

The Program

The upper division curriculum in the Genetics & Genomics program begins with the four-course, upper division core curriculum that provides an introduction to the principles of genetics, biochemistry, and cell biology. Students then take additional upper division courses in specialized areas of modern genetics including gene expression, evolution, development, human genetics and genomics, as well as a laboratory courses in the principles of genetics and genomics. Additional upper division courses in biological sciences, as well as internship/research coursework can be chosen to fulfill required elective units.

Career Alternatives

The Genetics & Genomics degree provides suitable preparation for a wide variety of careers, including teaching, research, work with biotechnology companies, medicine, and all the health sciences. It is also an excellent background for students wishing to continue their education in a graduate program, a teacher-training program, medical school, veterinary school, or other professional schools.

Total Units 99-121

¹ With BASC advisor approval, these combinations also satisfy the Chemistry requirement: CHE 004A-CHE 002A (3 units with no lab)-CHE 002B-CHE 002C; CHE 004A-CHE 004B-CHE 002C.

² With BASC advisor approval, these combinations also satisfy the Organic Chemistry requirement: CHE 118A-CHE 008B; CHE 128A-CHE 128B-CHE 008B; CHE 128A-CHE 118B-CHE 118C; CHE 128A-CHE 128B-CHE 129A-CHE 118C; CHE 118A-CHE 128B-CHE 128C-CHE 129A-CHE 129B; CHE 118A-CHE 118B-CHE 128C-CHE 129B.

³ With BASC advisor approval, this combination also satisfies the Mathematics requirement: MAT 021A-MAT 017B-MAT 017C; MAT 017A-MAT 021B.

⁴ Students may be able to complete their Physics requirement by blending the PHY 007 & PHY 009 series. For more details about how to do so and course placement, students will need to follow up with the PHY department. Students will also need to follow up with a BASC advisor to discuss their plans.

Molecular, Cellular, & Integrative Physiology, Master of Science

Graduate Studies**Graduate Study**

The Graduate Group in Molecular, Cellular, & Integrative Physiology offers programs of study and research leading to M.S. and Ph.D. degrees and participates in joint Ph.D./M.D. and Ph.D./D.V.M. programs. The programs

emphasize broad training in the fundamental principles of cellular, molecular, and integrative physiology.

Music, Bachelor of Arts

College of Letters & Science

The Major Program

The Bachelor of Arts degree in music provides both a broad liberal arts education and the skills necessary to explore music through its history, composition, theory, and performance. Students majoring in music may choose from three tracks in the major: (1) composition, (2) music history, theory, and ethnomusicology, or (3) performance. After a common core of courses in the lower division, students pursue their chosen track with specialized courses leading to an appropriate senior project. All majors are expected to complete a substantial project (composition, research presentation, recital) in the senior year (MUS 195).

Study Abroad & the Music Major

The department encourages students to pursue a portion of their studies abroad. In close collaboration with their undergraduate advisors, students plan a course of study abroad that complements their coursework at Davis. UC Davis Music Majors have completed upper division coursework at EAP partner institutions in Australia, England, France, Germany, and Italy; Music faculty members lead summer programs in Argentina, Austria, and France.

The Program

A fundamental grounding in music theory, music history, and performance during the first two years of study leads to more specialized study of composition, music scholarship, or performance during the last two years of undergraduate work.

Career Alternatives

Students who graduate with a B.A. in music from UC Davis have gone on to careers as composers, performers, educators, scholars, and as professionals in the concert, media, and computing industries. Others have continued in medicine, law, government, and business.

Foreign Language

Students contemplating graduate study in music are advised to consider pursuing foreign language study beyond the elementary level.

Diagnostic Exams are given before admission into MUS 006A-MUS 006B-MUS 006C. MUS 003A-MUS 003B provides an optional preparation for the required theory courses. Diagnostic exams are also given for MUS 016A-MUS 016B-MUS 016C and MUS 017A-MUS 017B-MUS 017C at the beginning of each year. Transfer students should take the Music diagnostic exam given just before the start of classes. Further testing, if necessary, will place students into the appropriate theory course. In addition, incoming students are required to take MUS 002A-MUS 002B-MUS 002C (Keyboard Competence) unless they can pass out of one or more of the classes by demonstrating proficiency through a diagnostic exam given at the beginning of each quarter. Students learn (1) four-part keyboard harmony in all major and minor keys; (2) moderate fluency with figured bass at the keyboard; (3) major and minor scales with proper fingering; (4) ability to sight read simple piano music and Bach chorales.

Student Performing Activities

The Department of Music presents more than 100 concerts each year, offering performance opportunities for both majors and non-majors in more than 15 performance ensembles including the Symphony Orchestra, Chorus, Chamber Singers, Concert Band, Early Music Ensemble, Chamber Music Ensembles, Jazz Bands and Combos, Samba Ensembles, Indonesian Gamelan, Hindustani Vocal Ensemble, Afro-Cuban Ensemble, Capoeira, and Mariachi Ensemble. Most concerts are performed in the Pitzer Center or the Margrit Mondavi Center for the Performing Arts.

Professional chamber ensembles perform frequently in the weekly series of free Thursday Noon Concerts, named after Joy S. Shinkoskey. Performance groups have collaborated with the Department of Theatre and Dance in productions of musical theater and opera. Study of instruments and voice with professional performers and teachers is required of all majors. Similar opportunities exist for qualified non-majors.

Note: A maximum of 19 units in performance courses (MUS 131, MUS 140-MUS 155) apply toward the degree; see Unit Credit Guidelines, College of Letters & Science degree requirements section. Faculty of the College of Letters & Science bylaws makes it possible for students to

take more than 19 units of performance classes without those additional units counting toward the 225-unit cap on units.

Faculty & Facilities

The faculty is noted for its achievements in a variety of areas. The music scholars are active in research, writing, and performance; the music of the composers is performed and recorded nationally and internationally.

The regular faculty is joined throughout the year by visiting Artists-in-Residence, distinguished performers who give public concerts and lectures and who work with students informally.

The Emyrean Ensemble, a professional new music ensemble, is in residence at UC Davis, where it performs concerts of new music and annually premieres the work of student composers.

The department's facilities include a collection of Renaissance, Baroque, and modern instruments, along with non-western instruments including a Sundanese & Balinese gamelan, a Brazilian Capoeira & Samba bateria, and various other percussion instruments for our world music ensembles. The arts quadrangle houses the Sound lab, practice and rehearsal rooms, and a music library with well over 12,000 CDs, several hundred videos and a collection of music reference materials. Opened in 2016, the Ann E. Pitzer Center, next door to the Music Building, features a state-of-the-art 399-seat concert hall, six practice rooms, and five large teaching/rehearsal studios. Scores and music monographs are housed in the Peter J. Shields Library, adjacent to the Music Building. A partnership of campus libraries affords online access to more than 100,000 tracks of classical and world music by streaming audio.

Honors

A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters & Science. To qualify for high or highest honors, students must also complete the Music Department honors program with a GPA of 3.500 or above and write a thesis or submit a portfolio that meets the criteria for high honors or highest honors. Students apply to participate in the department honors program during the latter part of their junior year. Admission to the program is based on GPA, a thesis proposal, examples of previous writing, and the recommendation of a faculty member who is willing to sponsor the student's project. Students who anticipate seeking admission to the honors program are urged to complete at least one offering of MUS 121 or MUS 122 before the end of their junior year. Interested students are urged to consult with faculty in their field early in their junior year.

Total Units **46-48**

Music, Minor

College of Letters & Science

The music minor allows students to explore and engage with a wide range of musical styles and genres, including classical music, jazz, popular music, and many musics of the world. The minor aims to enrich student experience by integrating performance experience with diverse music department ensembles, including the University Symphony, University Chorus, University Concert Band, Jazz Band, world music ensembles (Indonesian Gamelan, Samba School, Hindustani Vocal Ensemble, Afro-Cuban Ensemble, Brazilian Capoeira Ensemble, Samba School) and numerous chamber ensembles. By providing opportunities to build musical skills and to research and write about a variety of musical traditions, the minor helps students of all backgrounds highlight their creativity, collaborative skills, careful listening and cultural awareness.

Music, Master of Arts

College of Letters & Science

Graduate Study

The Department of Music offers programs of study and research leading to the M.A. degree in composition/theory, musicology, ethnomusicology, and conducting, and the Ph.D. degree in composition/theory, musicology, and ethnomusicology. Detailed information regarding graduate study may be obtained from the Graduate Advisor.

- Native American Studies, Doctor of Philosophy (p. 339)

Native American Studies, Bachelor of Arts

College of Letters & Science

The Major Program

Native American Studies provides a multi-disciplinary introduction to the indigenous cultures of North, Central, and South America. It challenges students to consider issues of cultural diversity, sovereignty, and indigenous knowledge systems in preparation for living in a world of constantly increasing social and cultural complexity.

The Program

Students electing a major in Native American Studies may complete Plan I, Plan II, or Plan III. Plan I enables students to concentrate chiefly upon the Native experience in North America (north of Mexico). Plan II encourages interested students to focus upon Meso-America with some course work integrating Meso-America with North America and South America. Plan III focuses upon South America with some course work integrating that region with areas to the north. See Undergraduate Major Requirements (<https://nas.ucdavis.edu/undergraduate-major-requirements/>).

Major Advisor & Advising

All new and prospective Native American Studies majors are encouraged to see the Student Affairs Officer individually, once per year, at minimum.

See Native American Studies Advising (<https://nas.ucdavis.edu/contact-information/>).

Career Alternatives

Native American Studies is excellent preparation for a scholarly career or professional career such as teaching, law, human services, health, tribal administration, social work, and inter-ethnic relations. Graduate schools and agencies in these and related areas are looking for students with broad interdisciplinary preparation and who possess knowledge and sensitivity relating to ethnic issues and cultural diversity.

Study Off Campus

Majors have the option of spending one to three quarters elsewhere in the Americas or on or near a reservation as part of the fulfillment of the Area of Specialization. Each student's plan must be approved by the student's advisor and by the chairperson and may fulfill from 12 to 20 of the 28 units required for the emphasis. The courses or field internship taken elsewhere must be focused upon indigenous peoples or indigenous languages and the institution of study shall be located in an area with substantial indigenous population. Students must have upper division standing and, for Plan I, course 107 or the equivalent should have been completed; for Plan II, courses 107 and 133 should have been completed; and for Plan III, courses 107 and 120 should have been completed prior to departure. Several options may be used for receiving academic credit, including course 195. The department strongly encourages students to participate in the UC Education Abroad Program or Short-Term Programs Abroad.

Graduate Study

The Department offers a program of study leading to M.A. and Ph.D. degrees in Native American Studies, as well as a designated emphasis in Native American Studies for graduate students in approved programs. Further information regarding graduate study may be obtained at the Department office and at Graduate Studies.

Faculty

Faculty includes all members of the Departments of Neurobiology, Physiology, & Behavior, Molecular & Cellular Biology, Evolution & Ecology, Microbiology & Molecular Genetics, and Plant Biology in the College of Biological Sciences.

The Human Biology Major Program

The Human Biology major provides students with a broad biological understanding of our species, from molecules, genes, and cells to tissues, organ systems and organism/environment interactions. The curriculum includes classes on the basic principles that help us understand normal human physiology, human health, and the molecular basis of disease.

The Program

In the freshman and sophomore years, students majoring in Human Biology build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics. As juniors or seniors, students can enroll in a variety of courses focused on biological processes and diseases that affect humans.

Career Alternatives

The Human Biology major provides fundamental knowledge needed for a broad range of careers, including those in the areas of healthcare, biotechnology, public health, public policy, and education, and for

advanced study in health-related disciplines, including medicine, dentistry, nursing, physical therapy, and pharmacy.

Human Physiology, Minor

College of Biological Sciences

This minor exposes students to general and specialized courses related to human biology including courses such as exercise and aging in health and disease and exercise metabolism. Students who obtain a human physiology minor will be able to demonstrate knowledge of the physiological processes that allow animals to function in their environment. This minor provides a foundation for further training in health-related professions.

Neurobiology, Physiology, & Behavior, Bachelor of Science

College of Biological Sciences

The Neurobiology, Physiology, & Behavior Major Program

Neurobiology, Physiology, & Behavior (NPB) is a major that emphasizes the understanding of vital functions common to all animals. All animals perform certain basic functions—they grow, reproduce, move, respond to stimuli, and maintain homeostasis. The physiological mechanisms upon which these functions depend are precisely regulated and

highly integrated. Actions of the nervous and endocrine systems determine behavior and the interaction between organisms and their physical and social environments. Students in this major study functional mechanisms; the control, regulation, and integration of these mechanisms; and the behavior that relates to those mechanisms. They do so at the level of the cell, the organ system, and the organism.

The Program

In the freshman and sophomore years, students majoring in Neurobiology, Physiology, & Behavior build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics. As juniors or seniors, students can enroll in a variety of Neurobiology, Physiology, & Behavior courses and related upper division courses. The NPB major contains three tracks: the Neurobiology track, the Physiology track, and the Organism-Environmental Interactions track. If you wish to propose an alternative to these tracks for yourself, please meet with your Biology Academic Success Center (BASC) advisor who can approve such individualized plans. Students can also participate in a number of advanced laboratory courses or may design an individual, independent project guided by a member of the faculty.

Career Alternatives. Completion of the Neurobiology, Physiology, & Behavior major provides the foundation for advanced study leading to careers in high school teaching, college level teaching or research. It also serves as the basis for further training in the health professions, including but not limited to human and veterinary medicine, medical technology, physical therapy, pharmacy, nursing, dentistry, and optometry. The major is also appropriate for those intending to seek careers in biotechnology or other biologically related industries.

Graduate Study

Information on graduate study in neuroscience, physiology or behavior may be obtained by writing the Graduate Advisor, College of Biological Sciences, Graduate Academic Programs. See also the graduate course offerings listed under Animal Behavior (Graduate Group), Molecular, Cellular, & Integrative Physiology (Graduate Group), and Neuroscience. See also Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Integrative Principles Track Depth Electives

Needs to be approved by a BASC advisor. Any three courses from any of the three NPB tracks.

Neuroscience, Minor

College of Biological Sciences

This minor allows non-NPB majors to learn about the importance of the nervous system. The large breadth of neuroscience courses available includes molecular and cellular neurobiology, developmental neurobiology, neurobiology of addictive drugs and cell signaling in health and disease. Students who obtain a neuroscience minor will be able to demonstrate knowledge of the neurobiological processes in animals and humans.

Neuroscience, Doctor of Philosophy

Graduate Studies

Graduate Study

The Graduate Group in Neuroscience offers programs of study leading to the Ph.D. degree. Neuroscience is a broad, interdepartmental program with faculty interests ranging from molecular biophysics of channels to cortical organization and cognition. A major goal of the program is to prepare students for careers as research scientists. Details of the program may be obtained from the Group office.

The Master of Science degree is offered only en route to the Ph.D.

Doctor of Nursing Practice—Family Nurse Practitioner Degree Program

Kathryn Sexson, Ph.D., A.P.R.N., F.N.P.-B.C., Director for the D.N.P.-F.N.P. Program

Mission Statement

Integrating the science and humanity of nursing and other health disciplines, the Betty Irene Moore School of Nursing leads innovative research, education and practice and prepares leaders who advance health, transform health care and ignite bold system change locally, nationally and globally.

Nursing Science and Health-Care Leadership Graduate Degree Program

Hosted by the Betty Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment.

Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

The Doctor of Nursing Practice—Family Nurse Practitioner Degree Program is a post-baccalaureate program at the Betty Irene Moore School of Nursing that prepares new family nurse practitioners. A three-year hybrid program that combines distanced-based education with four on-campus immersions, the D.N.P.-F.N.P. program prepares advanced practice providers to engage in patient- and family-centered, evidence-based primary care. Through reflective practice and interprofessional collaboration, students are prepared to be leaders who effect bold system change and promote health care innovation by informing and advancing health policy and health equity locally, nationally and globally.

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

The Master of Science—Family Nurse Practitioner Degree Program prepares graduates to deliver care as family nurse practitioners (FNP). In alignment with the school's vision to advance health, the mission of the family nurse practitioner program is to educate health care professionals to lead clinical programs in collaborative teams and to improve the availability of culturally relevant primary health care to underserved populations throughout California.

Master's Entry Program in Nursing

Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

The Doctor of Philosophy Degree Program prepares graduates as leaders in health care, health policy and education and research at the university level to conduct transformative research, educate health professionals and researchers, effect system change, influence and implement policy, and advance health from multiple settings.

Physician Assistant Studies, Master of Health Services

Graduate Studies

Jeffrey M. Pearl, M.D., Director for the Physician Assistant Program
Teresa Thetford, D.H.Sc, M.S., P.A.-C., N.P., Assistant Director for the Physician Assistant Program

Mission Statement

Integrating the science and humanity of nursing and other health disciplines, the Betty Irene Moore School of Nursing leads innovative research, education and practice and prepares leaders who advance health, transform health care and ignite bold system change locally, nationally and globally.

Nursing Science and Health-Care Leadership Graduate Degree Programs

Hosted by the Betty Irene Moore School of Nursing at UC Davis, the Nursing Science and Health-Care Leadership Graduate Degree Programs prepare nurse leaders, physician assistants, nurse practitioners, researchers and faculty in a unique interdisciplinary and interprofessional environment.

Faculty

The UC Davis Nursing Science and Health-Care Leadership Graduate Group includes a wide cross-section of academic disciplines with faculty from the Betty Irene Moore School of Nursing as well as UC Davis Health System and other UC Davis schools, colleges, and departments. Within the graduate group faculty are experts in nursing, medicine, health informatics, nutrition, biostatistics, public health and other fields.

The Master of Health Services—Physician Assistant Studies Degree Program prepares graduates to deliver care as physician assistants. In alignment with the school's vision to advance health, the mission of the physician assistant program is to educate health care professionals to deliver care as leaders and members of interprofessional health care teams as well as to improve the availability of culturally relevant primary health care to underserved populations throughout California.

Clinical Nutrition, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

The Clinical Nutrition major provides students with training in normal and therapeutic nutrition, biological and social sciences, food science, communication, business management and food service management. This major fulfills the academic requirements for admission into a dietetics internship or the equivalent, which must be completed before qualifying for registration as a dietitian. Effective January 1, 2024, the Commission on Dietetic Registration (CDR) requires a minimum of a master's degree to be eligible to take the credentialing exam to become a registered dietitian.

The Program

The Clinical Nutrition major includes the same basic core of nutrition classes as the Nutrition Science major, but includes additional courses such as food service management, education, sociology, and communication skills to prepare for work with the public. Clinical Nutrition students spend the first two years completing preparatory course work in the basic biological sciences, along with several of the social sciences. In the final two years, students take courses in normal and clinical nutrition, food science, biochemistry, and management techniques.

Entering freshman or transfer students are assumed to have basic computer skills and to demonstrate mathematics competency adequate to pass the Mathematics Placement Examination (http://www.math.ucdavis.edu/undergrad/math_placement/) with a minimum score of 25.

Major Advisor

Francene Steinberg (Nutrition)

Advising Center for the major is located in 3202 Meyer Hall; 530-752-2512; 530-752-7094.

Career Alternatives

The Clinical Nutrition major qualifies students to apply for a dietetic internship accredited by the Accreditation Council for Education in Nutrition and Dietetics enabling them to become a Registered Dietitian, the professional credential necessary to work in a clinical setting. Once dietitians are registered, they generally seek employment in administrative, therapeutic, teaching, research, or public health/public service positions in clinics, hospitals, schools, or other similar

institutions. There is a growing role for dietitians working in settings outside of the traditional hospital (for example, in state and federal nutrition programs, nutrition education, Peace Corps and Cooperative Extension work). Students who complete the undergraduate preparation in clinical nutrition are also qualified to enter graduate programs in dietetics, nutrition science, public health nutrition, and food service management.

Maternal & Child Nutrition, Master of Advanced Study

College of Agricultural & Environmental Sciences

Master of Advanced Study in Maternal & Child Nutrition (<https://cpe.ucdavis.edu/maternal-and-child-nutrition/>); Faculty (<https://cpe.ucdavis.edu/maternal-and-child-nutrition/general-information/faculty/>)

Graduate Study

The Nutrition Department offers the degree of M.A.S. in Maternal & Child Nutrition. This program consists of four required 4- to 6-unit core courses (Nutrition During Pregnancy, Lactation & Infant Nutrition, and Child & Adolescent Nutrition), 6-8 units of special topics seminars, 2 units of electives, and a 6-unit student project (produced in consultation with a three-member guidance committee) for a total of 36 units. Most of the core courses will comprise 10 weeks of in-class instruction twice per week for two-and-a-half hours per meeting. Classes will also include online discussions of related material and readings. The program includes an option for students to complete the didactic training and supervised clinical hours required to take the exam to be an International Board-Certified Lactation Consultant.

Each student will be assigned a three-member guidance committee consisting of two members of the teaching faculty and an additional qualified faculty member to advise the student in identifying a student capstone project.

Preparation

Admission to the program requires a bachelor's degree with prior course work that includes (or is comparable to): one year of general chemistry, two quarters of organic chemistry, a course in statistics, one course in general physiology, and two quarters of the biochemistry of nutrition.

Courses in Maternal & Child Nutrition

See courses under Maternal & Child Nutrition (MCN) (p. 1046).

Nutrition Science, Bachelor of Science

College of Agricultural & Environmental Sciences

The study of nutrition encompasses all aspects of the consumption and utilization of food and its constituents. Key areas of study include: the biochemical reactions important to the utilization of nutrients and food constituents; the impact of diet on health and disease; and, nutrition-related policy and public health issues. The nutrition science major includes two options for studying these areas: nutritional biology and nutrition in public health.

The Program

Nutrition, as it is taught on the Davis campus, is a biological science and requires a complete background in chemistry and biology, along with calculus and physics (nutritional biology option) or economics (nutrition in public health option). These courses are generally completed during the first two years, and along with biochemistry, must be completed before most nutrition classes can be taken. During their junior and senior years, students in the nutritional biology option take additional course work in biochemistry, physiology, and toxicology. Students in the nutrition in public health option take additional course work in social and health-related sciences.

Career Alternatives

Both options are excellent preparation for professional or graduate training in medicine, public health, or other health sciences. The nutritional biology option also provides preparation for technical work in nutrition in the animal, food, and pharmaceutical industries. The nutrition

in public health option prepares students for jobs in administrative, teaching, or public health/public service positions.

Dietetics Internship

To fulfill the academic requirements for an internship in Dietetics, students are strongly advised to declare the Clinical Nutrition major. Within the Nutrition in Public Health option, students should also take: ENL 003 or UWP 001 & CMN 001. The following courses must also be added (some of which may meet restricted elective requirements): ARE 112; NUT 116B, NUT 116AL-NUT 116BL; FSM 120, FSM 120L, FSM 122. Students intending to apply for admission to a dietetic internship should contact the Advising Center no later than the first quarter of the junior year for information on procedures. Effective January 1, 2024, the Commission on Dietetic Registration (CDR) will require a minimum of a master's degree to be eligible to take the credentialing exam to become a registered dietitian.

Major Advisor

Gerardo Mackenzie

Advising Center for the major is located in 3202 Meyer Hall; 530-752-2512; 530-752-7094.

Graduate Study

The Department of Nutrition offers programs of study and research leading to the M.S. and Ph.D. degrees in Nutrition. For information on graduate study contact the graduate advisor. See Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Nutritional Biology, Master of Science

Graduate Studies

Graduate Study

The Graduate Group in Nutritional Biology offers programs of study and research leading to M.S. and Ph.D. degrees. The great diversity of research interests represented by the faculty members allows students to choose from a wide variety of themes: nutritional biochemistry, animal nutrition, nutrition and development, nutrient bioavailability, human/clinical nutrition, nutrition and behavior, nutritional energetics, community nutrition, community health, maternal and child nutrition, nutrition and endocrinology, international nutrition, obesity/body composition, physiology of digestion, nutrition and chronic disease, culture and nutrition, nutrition and gene expression, nutrition and aging, food preferences, nutrition and immunity, diet and exercise, dietary assessment, protein and lipid metabolism, food intake regulation, nutrition education, and more.

Graduate Advisors

Consult the Nutritional Biology Graduate Group (<http://nutritionalbiology.ucdavis.edu/>) office.

There are over 45 affiliated faculty in departments throughout HARCS and other faculty, all of whom offer courses relevant to the discipline.

- Performance Studies, Doctor of Philosophy (p. 355)

Performance Studies, Doctor of Philosophy

College of Letters & Science

Graduate Study

The Ph.D. in Performance Studies is a four-year program. In the first two years of study, students develop an understanding of performance by drawing from a range of regular course offerings in the field to identify, explore, and define a field or fields of research. Students are required to complete four core courses out of five in performance studies, and one colloquium course. Each individual program is then built from seminar and/or practice as research courses, as well as independent or group studies, developing one or more of the four strands of the program: Comparative Medias, Embodiments, Cultures/Ecologies, and History/Text. A wide range of affiliated faculty offer courses throughout the HARCS faculty, and Designated Emphases are available in Studies in Performance & Practice, African American & African Studies, Critical Theory, Feminist Theory & Research, Native American Studies, Religious Studies, Science & Technology Studies, and Writing, Rhetoric & Composition Studies. Students are required to complete a minimum of 60 units before taking the qualifying examination. No more than 12 units may be taken below the graduate level unless specifically approved by the Ph.D. graduate program advisor.

Faculty

The more than 90 faculty in the graduate group represent at least 25 academic departments and organized research units within the College of Agricultural & Environmental Sciences, the College of Biological Sciences, the School of Medicine and the School of Veterinary Medicine.

- Pharmacology & Toxicology, Master of Science (p. 356)
- Pharmacology & Toxicology, Doctor of Philosophy (p. 356)

Pharmacology & Toxicology, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The program, which offers both the M.S. and Ph.D. degree, emphasizes an interdisciplinary approach that combines coursework and experimental training in modern approaches to pharmacological and toxicological problems. Areas of research span fundamental and translational research in a broad spectrum of areas within pharmacology and toxicology, including cardiovascular pharmacology, cancer therapeutics, neuropharmacology, drug discovery and design, neurotoxicology, pulmonary toxicology and environmental toxicology. Students complete core courses in pharmacology and toxicology. Both Plan I and Plan II MS is offered. For detailed information on the program, contact the Group office, graduate advisors, or the Group chairperson.

Graduate Advisors

K. Carraway (Biochemistry & Molecular Medicine), X. Chen (Surgical & Radiological Sciences), E. Diaz (Pharmacology), H. Knych (Molecular Biosciences), P. Lein (Molecular Biosciences), L. Miller (Anatomy, Physiology & Cell Biology), R. Poppenga (Molecular Biosciences), C. Sweeney (Biochemistry & Molecular Medicine), L. Van Winkle (Anatomy, Physiology & Cell Biology), H. Wulff (Pharmacology), A. Yu (Biochemistry & Molecular Medicine)

- Philosophy, Minor (p. 359)
- Philosophy, Master of Arts (p. 359)
- Philosophy, Doctor of Philosophy (p. 360)

Philosophy, Bachelor of Arts

College of Letters & Science

The Major Program

Philosophy addresses problems and questions that arise in all areas of human thought and experience and in all disciplines. Recurring questions about the nature of value, the good life, right conduct, knowledge, truth, language, mind, and reality are central to philosophical study. Philosophy also investigates the methodologies and assumptions of the major disciplines in the university in order to deepen our understanding of the sciences, of mathematics, art, literature, and history, and of religion and morality. It leads us to address issues about the nature of these subjects, about the methods of reasoning characteristic of them, and about the contributions they make to our understanding of ourselves and our world.

Philosophy contributes to the liberal education of its students. The department emphasizes an analytic approach to philosophical questions, which trains students to understand and evaluate arguments and to think and write precisely and clearly. These skills are of immense value in a variety of careers.

The Program

The Department of Philosophy offers its majors a choice among three options. The General Emphasis provides a broad view of the field of philosophy. It includes a breadth requirement at the lower division level while providing students wide choice in more advanced courses. The Pre-Law and Pre-Med Emphases include courses that provide philosophical perspectives on law and medicine respectively and that also provide important preparation for professional school.

The Department offers courses in most areas of contemporary analytic philosophy including the theory of knowledge, metaphysics, logic, ethics, and political philosophy. In addition, upper division courses are offered in oral and political philosophy, and aesthetics, and in the philosophy of religion, of mind, of language, of mathematics, of law, and of the physical, biological and social sciences. The problems of philosophy have important roots in past. The history of philosophy is important not only as part of the heritage of educated persons, but also because it is relevant to contemporary issues. For these reasons, the department places great emphasis on the history of philosophy, providing courses on the major figures and traditions of western philosophy.

Faculty Advisor & Advising

Hanti Lin, Ph.D.; Yellow (<https://yellowcluster.ucdavis.edu/advising/undergraduate/>)Cluster Undergraduate Advising Center

Career Alternatives

Students of philosophy learn to understand and evaluate arguments and to think and write precisely and clearly. These analytical skills are assets in any career. Many of our majors have pursued graduate study in philosophy and have become philosophers in their own right. Others have pursued academic careers in related disciplines in the humanities and social sciences. Philosophy majors are well prepared for law, business, or other professional schools and have found careers in computer programming, government service, teaching, the ministry, and social work. Those wishing to attend law school or medical school should consider pursuing the Pre-Law and Pre-Med emphases, respectively.

Honors Program

The department offers an honors program, which gives qualifying majors the opportunity to work closely with faculty and graduate students. Information can be obtained on the department website.

Courses for Non-Majors

Students majoring in most disciplines in the university will find courses relevant to their educational or career goals. PHI 001 is the introductory course for both majors and non-majors. PHI 005 teaches critical thinking. The following PHI courses are recommended:

Code	Title	Units
(1) Pre-Law		
PHI 012	Introduction to Symbolic Logic	4
PHI 014	Ethical & Social Problems in Contemporary Society	4
PHI 024	Introduction to Ethics	4
PHI 030	Introduction to Philosophy of Science	4
PHI 102	Theory of Knowledge	4
PHI 112	Intermediate Symbolic Logic	4
PHI 115	Problems in Normative Ethics	4
PHI 116	Ethical Theories	4
PHI 118	Political Philosophy	4
PHI 119	Philosophy of Law (especially)	4
(2) Pre-Medical		
PHI 014	Ethical & Social Problems in Contemporary Society	4
PHI 015	Introduction to Bioethics	4
PHI 030	Introduction to Philosophy of Science	4
PHI 038	Introduction to Philosophy of Biology	4

PHI 108	Philosophy of the Biological Sciences	4
PHI 114	History of Ethics	4

PHI 108	Philosophy of the Biological Sciences	4
PHI 120	Environmental Ethics	4
(8) Humanities & the Arts		
PHI 014	Ethical & Social Problems in Contemporary Society	4
PHI 021	Philosophical Classics of the Ancient Era	4
PHI 022	Philosophical Classics of the Modern Era	4
PHI 024	Introduction to Ethics	4
PHI 101	Metaphysics	4
PHI 102	Theory of Knowledge	4
PHI 103	Philosophy on Mind	4
PHI 105	Philosophy of Religion	4
PHI 114	History of Ethics	4
PHI 116	Ethical Theories	4
PHI 118	Political Philosophy	4
PHI 123	Aesthetics	4
PHI 141 - PHI 175		4
(9) Agricultural & Environmental Science & Policy		
PHI 005	Critical Reasoning	4
PHI 014	Ethical & Social Problems in Contemporary Society	4
PHI 024	Introduction to Ethics	4
PHI 030	Introduction to Philosophy of Science	4
PHI 031	Appraising Scientific Reasoning	4
PHI 114	History of Ethics	4
PHI 115	Problems in Normative Ethics	4
PHI 116	Ethical Theories	4
PHI 118	Political Philosophy	4
PHI 120	Environmental Ethics	4

Department Activities

The Philosophy department sponsors a lecture series with well-known philosophers who present papers in their fields of expertise. The department also operates ongoing faculty and graduate student workshops. Undergraduate students are welcome to attend and join these discussions. Information can be obtained on the department website.

Graduate Study

The Department of Philosophy offers programs of study leading to M.A. and Ph.D. degrees. Detailed information is available on our website (<https://philosophy.ucdavis.edu/graduate/>), and may also be obtained by writing to the Graduate Advisor.

Graduate Advisor

Philosophy, Master of Arts

College of Letters & Science

Graduate Advising Office

1241 Social Sciences & Humanities; Philosophy (<https://philosophy.ucdavis.edu/graduate/>)

Graduate Study

The Department of Philosophy graduate program has both M.A. and Ph.D. "tracks." The M.A. track is designed for students who do not intend to pursue a Ph.D. in philosophy or who would benefit from enrolling first in a master's degree program. Students who enroll in the M.A. track may, however, later petition for admission to the Ph.D. track if they so desire.

Graduate Advisor

Alyssa Ney, Ph.D.

Philosophy, Doctor of Philosophy

College of Letters & Science

Graduate Advising Office

1241 Social Sciences & Humanities; Philosophy (<https://philosophy.ucdavis.edu/graduate/>)

Graduate Study

The Department of Philosophy graduate program has both M.A. and Ph.D. "tracks." Students who aim to complete a Ph.D. should apply directly to the Ph.D. track, even if they have not yet earned an M.A. in philosophy. Ph.D. students may earn the M.A. while progressing toward completion of the Ph.D. requirements.

Applied Physics, Bachelor of Science

College of Letters & Science

The Major Program

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe work. Knowledge gained using atomic-scale microscopes and high-energy particle accelerators and nuclear reactors teaches us not only what holds the atomic nucleus together but also how proteins function and why stars shine.

The Program

The Department of Physics & Astronomy (p. 360) offers a Bachelor of Arts in Physics and two Bachelor of Science degree programs: in Physics (which also offers an emphasis in Astrophysics), and in Applied Physics. The A.B. degree provides broad coverage of classical and modern physics

while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession, and also provides excellent training for a wide variety of technical career options. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market upon completing a B.S. degree, the applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

Career Alternatives

Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science.

Graduate Study

The Department of Physics & Astronomy (p. 360) offers programs of study and research leading to M.S. and Ph.D. degrees. Further information regarding requirements for these degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.

Physics, Bachelor of Arts

College of Letters & Science

The Major Program

From the smallest subatomic particles to atoms, molecules, stars, and galaxies, the study of physics is the study of what makes the universe work. Knowledge gained using atomic-scale microscopes and high-energy particle accelerators and nuclear reactors teaches us not only what holds the atomic nucleus together but also how proteins function and why stars shine.

The Program

The Department of Physics & Astronomy offers a Bachelor of Arts in Physics and two Bachelor of Science degree programs: in Physics (which also offers an emphasis in Astrophysics), and in Applied Physics. The A.B. degree provides broad coverage of classical and modern physics while permitting a broader liberal arts education than is possible with the other two programs. The B.S. degree in either Physics or Applied Physics should be followed by the student who plans to enter physics as a profession, and also provides excellent training for a wide variety of technical career options. The B.S. in Applied Physics provides the student with a solid introduction to a particular applied physics specialty. For the student who plans to enter the job market upon completing a B.S. degree, the applied physics orientation would be an asset. Either B.S. program provides a solid foundation in physics for the student interested in graduate work in either pure or applied physics.

Career Alternatives

Careers in physics and applied physics include research and development, either in universities, government laboratories, or industry; teaching in high schools, junior colleges, and universities; management and administration in industrial laboratories and in government agencies; and in production and sales in industry. A major in physics also provides a strong base for graduate-level work in such interdisciplinary areas as chemical physics, biophysics and medical physics, geophysics and environmental physics, astrophysics and astronomy, computer science, and materials science.

Program Variance

Similar courses from other departments may be substituted for courses in the depth subject matter requirements by obtaining prior written permission from the Undergraduate Curriculum Committee Chairperson.

Astronomy

In addition to the introductory Astronomy courses listed, upper division and graduate courses in Astronomy, Astrophysics and Cosmology are listed under Physics.

Graduate Study

The Department of Physics & Astronomy offers programs of study and research leading to M.S. and Ph.D. degrees. Further information regarding requirements for these three degrees, graduate research, teaching assistantships, and research assistantships may be obtained by writing to the Chairperson, Department of Physics, One Shields Avenue, University of California, Davis, CA 95616.

- Systems & Synthetic Biology, Bachelor of Science (p. 371)

Plant Biology, Bachelor of Arts

College of Biological Sciences

The Major Program

As organisms that sequester carbon and convert solar energy into oxygen, sugar and other usable forms, plants are a primary source of food and myriad biomaterials on the planet, and function as an important buffer against climate change. The Plant Biology major focuses on fundamental aspects of how plants function as organisms, interact with their environment, and the use of this knowledge to address global challenges. A wide variety of scientific disciplines are integrated within the Plant Biology major, including physiology, cell and molecular biology, development, biochemistry and metabolism, genetics and genomics.

The Program

The Plant Biology Bachelor of Arts major consists of a biological sciences core covering the general principles of biology plus five plant-specific classes dealing with advanced aspects of plant biology including physiology, development, and anatomy. Electives allow students to tailor the degree to suit their interests. Independent research in a laboratory setting is a requirement, and majors in Plant Biology are guaranteed this opportunity. Because of the value of plants as a model system for research in molecular genetics, cell biology, and biochemistry, Plant Biology also can make an excellent minor or second major for students in these fields.

Career Alternatives

A degree in Plant Biology serves as an excellent launching point for a wide range of career options, including domestic and international opportunities in business, research, management, and teaching in both governmental and private sectors. The program is excellent preparation for students wishing to enter graduate or other professional schools, including medicine, law (particularly environmental or patent law) or journalism. Plant biologists can work in the laboratory, in the field, in the forest, in botanical gardens or nurseries, in agricultural companies, or in biotechnology, pharmaceutical, energy or chemical industries, or in the area of environmental protection.

Honors & Honors Programs

Students on the honors list may elect to include a maximum of 5 units of 194H in their major programs. For Dean's Honors List information, see the Honors & Prizes (p. 34) for the appropriate College section.

The Major Program

As organisms that sequester carbon and convert solar energy into oxygen, sugar and other usable forms, plant are a primary source of food and myriad biomaterials on the planet and function as an important buffer against climate change. The Plant Biology major focuses on fundamental aspects of how plants function as organisms and interact with their environment, and the use of this knowledge to address global challenges. A wide variety of scientific disciplines are integrated within the Plant Biology major, including physiology, cell and molecular biology, development, genetics and genomics.

The Program

The Plant Biology major consists of a biological sciences core covering the general principles of biology plus three plant-specific classes dealing with advanced aspects of plant biology including physiology, development, and anatomy. Electives allow students to tailor the degree to suit their interests. Independent research in a laboratory setting is a requirement, and students in the Plant Biology B.S. major are guaranteed this opportunity. Because of the value of plants as a model system for research in molecular genetics, cell biology, and biochemistry, Plant Biology also can make an excellent minor or second major for student in these fields.

Career Alternatives

A degree in Plant Biology serves as an excellent launching point for a wide range of career options, including domestic and international opportunities in business, research, management, and teaching in both governmental and private sectors. The program is excellent preparation for students wishing to enter graduate or other professional schools, including medicine, law (particularly environmental or patent law) or journalism. Plant biologists can work in the laboratory, in the field, in the forest, in botanical gardens or nurseries, in agricultural companies, or in biotechnology, pharmaceutical, energy or chemical industries, or in the area of environmental protection.

Honors & Honors Programs

Students on the honors list may elect to include a maximum of 5 units of 194H in their major programs. For Dean's Honors List information, see the Honors & Prizes (p. 34) for the appropriate College section.

Plant Biology, Minor

College of Biological Sciences

The Plant Biology minor explores plants and their dynamic means of interacting with the environment. The Plant Biology minor has an 18 unit minimum requirement. Four areas of specialization are offered—

(a) Anatomy & Morphology, (b) Physiology & Development, (c) Evolution & Ecology, and (d) Biochemistry & Molecular Genetics—with a small, strategic course selection per area.

Systems & Synthetic Biology, Bachelor of Science

College of Biological Sciences

The Major Program

The Systems & Synthetic Biology major provides students with a broad understanding of these two related and interdisciplinary fields. Systems Biology aims to understand how complex organismal properties and structures arise from simple components and interactions, and to identify design principles common to many types of biological regulation. Synthetic Biology focuses on the modification (or, ultimately, de novo

construction) of organisms to generate novel pathways and processes. This major emphasizes integrative, computational and quantitative approaches to solving biological problems and engineering new biological outcomes.

The Program

In the freshman and sophomore years, students majoring in Systems & Synthetic Biology build a broad scientific background, taking courses in chemistry, biology, physics, and mathematics as well as an introduction course to computing for biologists. As juniors or seniors, students can enroll in courses that introduce them to the fundamental principles in mathematics, computer science, systems theory and application, and biological engineering.

Career Alternatives

The biotech workforce has a growing demand for biologists that are fluent in different merging disciplines that are covered by the Systems and Synthetic Biology Major. This combination of skills will allow graduates to work at the interface between biologists and engineers found in new emerging industries related to the pharmaceutical, biomedical, bioenergy, agricultural, nutrition, and microbiome industries. The program is also an excellent background for students wishing to enter graduate or other professional schools, including medicine, law, journalism or policy Honors & Honors Programs. Refer to the Academic Information section and the appropriate College section for Dean's Honors List information.

Plant Biology, Master of Science

Graduate Studies

Graduate Study

The Graduate Group in Plant Biology offers programs of study and research leading to M.S. and Ph.D. degrees. The program prepares students for careers in teaching and research at universities and colleges, government and industrial laboratories. The graduate curriculum provides both breadth in the discipline and in-depth study and research in one of four areas of specialization: cell and developmental biology; environmental and integrative biology; molecular biology, biochemistry and genomics; and systematics and evolutionary biology. These areas of specialization permit individual study and research into diverse aspects of plant biology, including anatomy, biochemistry, biotechnology, cell biology, cytology, developmental biology, ecology, genetics, genomics, molecular biology, morphology, paleo-botany, physiology, population biology, systematics, and weed science. The graduate advisor, the major

professor, and the student will design a program of advanced courses to meet individual academic needs within one of the specializations.

Preparation

For both the M.S. and Ph.D. programs, a level of scholastic development equivalent to a Bachelor's degree in biological sciences from a recognized college or university is required. Courses in the following areas are considered to be prerequisites to the advanced degrees in Plant Biology: biology, inorganic chemistry, organic chemistry, introductory physics, genetics, plant development and structure, biochemistry, introductory plant physiology, calculus, introductory statistics, ecology/systematics/evolution, and cell/molecular biology. Limited deficiencies can be made up after admission.

Global Disease Biology, Bachelor of Science

College of Agricultural & Environmental Sciences

Program Office

150 Hutchison Hall; 530-754-4131; gdb-advise@ucdavis.edu; Global Disease Biology (<http://gdb.ucdavis.edu/>)

Major Program

Approach

The Global Disease Biology (GDB) major offers students the opportunity to study disease and its relationship to the health of people, animals, plants, and the environment. The program uses an integrated approach to advance student understanding of the concept(s) of disease, the societal and personal impacts of past, present and future diseases, and the science behind disease discoveries, causes, evolution, diagnosis, treatment, and prevention. The program recognizes the interconnectedness of people, animals, plants, and the environment and aims to identify and address the fundamental causes of poor health around the world. Managing global disease problems requires a multifaceted, holistic approach to address the full spectrum of human, animal, plant, and environmental health risks (also known as a One Health approach). Throughout a series of core courses, issues related to human, animal, and plant health, along with tools available to solve these problems, will be introduced to provide students with real-world scenarios in which they can apply and advance their creative and critical thinking skills. The major prepares graduates with the knowledge, leadership skills and experiences required to excel in professions associated with global health, the environment, food safety and security, biological safety and security, and health policy. For more information, see Global Disease Biology (<http://gdb.ucdavis.edu/>).

Program

The Global Disease Biology major provides students with broad preparatory scientific course work, global disease biology core classes, flexibility in upper division electives, and a strong research experience.

Global Disease Biology core classes are intended to be transdisciplinary and focus on concepts that cut across human, animal, and plant diseases offering a unifying ecological and quantitative perspective on disease.

Flexible upper division electives are known as Restricted Electives, which allow students to plan their chosen emphasis of study as part of a required discussion course (GDB 187) and in consultation with their advisor. Students will draw from many undergraduate courses currently offered on disease and health in a way that compliments the core courses required for the Global Disease Biology major. You can read more about these electives in the Guide to Restricted Electives from our website (<https://gdb.ucdavis.edu/important-documents/>).

Strong research experience is acquired in a senior research project, called the GDB Practicum, which each student designs to bridge the disciplines of the major. You can learn more about the Practicum project requirement by reading the Guide to Practicum from our website (<https://gdb.ucdavis.edu/important-documents/>).

Internships and Careers

The program and interests of each student in solving societal problems guides students to a range of internship and career choices. On and off-campus internship opportunities are available in research laboratories, in field situations, with governmental agencies, with private industry, and in international programs. A degree in Global Disease Biology prepares graduates with the knowledge, leadership skills and experiences required to excel in a vast array of professions associated with areas such as healthcare, medicine, public health, health policy, food safety and security,

and nature conservation, as each relates to disease and health of people, animals, plants and the environment in developing and developed countries.

Learn more about our alumni on our GDB Blog (<https://gdb.ucdavis.edu/blog/>) and Facebook page (<https://www.facebook.com/UCD.GDB/>)!

Plant Pathology, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The Department of Plant Pathology offers programs of study and research leading to M.S. and Ph.D. degrees. Information can be obtained from the graduate advisor. See also the Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Graduate Advisors

Plant Pathology Advising (<https://plantpathology.ucdavis.edu/advising/>)

Plant Pathology, Doctor of Philosophy

College of Agricultural & Environmental Sciences

Graduate Study

The Department of Plant Pathology offers programs of study and research leading to M.S. and Ph.D. degrees. Information can be obtained

from the graduate advisor. See also the Graduate Studies (<http://gradstudies.ucdavis.edu/>).

Graduate Advisors

Plant Pathology Advising (<https://plantpathology.ucdavis.edu/advising/>)

Plant Sciences

College of Agricultural & Environmental Sciences

Department Office

Advising Center (<https://www.plantsciences.ucdavis.edu/undergraduate/>) is located in 1220 Plant & Environmental Sciences. For more information, see Plant Sciences (<https://www.plantsciences.ucdavis.edu/undergraduate/>).

Major Programs

- Biotechnology (p. 378)
- International Agricultural Development (p. 385)
- Plant Sciences (p. 388)

Related Courses

See the Biotechnology (BIT) (p. 581), Environmental Horticulture (ENH) (p. 787), Horticulture (HRT) (p. 898), International Agricultural Development (IAD) (p. 923), and Plant Sciences (PLS) (p. 1206) course listings.

Graduate Study

For related graduate study, see the M.S. degree program in International Agricultural Development, the M.S. and Ph.D. degree programs in the graduate groups of Horticulture & Agronomy, Plant Biology, Ecology, Genetics, Geography, and Soils & Biogeochemistry.

- Agricultural Systems & Environment, Minor (p. 377)
- Biotechnology, Bachelor of Science (p. 378)
- Ecological Management & Restoration, Bachelor of Science (p. 382)
- Environmental Horticulture & Urban Forestry, Bachelor of Science (p. 383)
- Environmental Horticulture, Minor (p. 385)
- International Agricultural Development, Bachelor of Science (p. 385)
- International Agricultural Development, Minor (p. 388)
- Landscape Restoration, Minor (p. 388)
- Plant Sciences, Bachelor of Science (p. 388)

Biotechnology, Bachelor of Science

College of Agricultural & Environmental Sciences

Faculty

Faculty includes members of the Departments of Animal Science; Engineering: Chemical Engineering & Materials Science; Computer Science; Engineering: Biological & Agricultural; Food Science & Technology; Land, Air, & Water Resources; Plant Pathology; Plant Sciences; Viticulture & Enology; and the College of Biological Sciences.

The Major Program

Every living organism, from the smallest and most primitive bacteria to every plant, insect, animal or human being, contains DNA as the primary genetic material. DNA directs all cellular processes, creating the incredible variety and diversity of living organisms in the biosphere. Biotechnology focuses on the mechanics of life processes and their application. Biotechnology means "life technology" and represents an integrated, multidisciplinary field, with a profound impact today on almost every aspect of human endeavor.

Preparatory Requirements

UC Davis students who wish to change their major to Biotechnology must complete the following courses (representing the subject areas of Biological Sciences, Chemistry, and Mathematics) with a grade point average of at least 2.500 in each subject area. All of these courses must be taken for a letter grade:

Code	Title	Units
Biological Sciences		
BIS 002A & BIS 002B & BIS 002C	Introduction to Biology: Essentials of Life on Earth and Introduction to Biology: Principles of Ecology & Evolution and Introduction to Biology: Biodiversity & the Tree of Life	15
Chemistry		
One series:		15
CHE 002A & CHE 002B & CHE 002C	General Chemistry and General Chemistry and General Chemistry	
CHE 003A & CHE 003B & CHE 003C	Chemistry for Life Sciences: Determining Structure & Predicting Properties and Chemistry for Life Sciences: Predicting & Characterizing Chemical Change and Chemistry for Life Sciences: Controlling Processes & Synthetic Pathways	
Mathematics		
One series:		6-8

MAT 016A & MAT 016B	Short Calculus and Short Calculus
MAT 071A & MAT 017B	Explorations in Elementary Mathematics and Calculus for Biology & Medicine
MAT 021A & MAT 021B	Calculus and Calculus

The Program

In the first two years, students develop a strong and general background in biological science with an emphasis on fundamental concepts and basic principles of genetics, molecular biology and cell biology. Four options, Animal Biotechnology, Plant Biotechnology, Fermentation/Microbial Biotechnology, and Bioinformatics, provide in-depth training and specialized knowledge in an aspect of biotechnology. Each option has a strong laboratory component to reinforce the theoretical concepts. Students also do an internship in a biotechnology company or university or government laboratory.

Internships & Career Opportunities

In the last decade, more industries are turning to biotechnology to solve problems and improve products, creating a growing job market for individuals trained in biotechnology in the agricultural, food and beverage, health care, chemical, pharmaceutical and biochemical, and environmental and bioremediation industries.

Graduates trained in the technologies designed for biotechnology will find their training applicable to advanced research in molecular biology, genetics, biochemistry, and the plant and animal sciences.

Ecological Management & Restoration, Bachelor of Science

College of Agricultural & Environmental Sciences

As of Fall 2022, the Ecological Management & Restoration major is no longer accepting new students. It has been absorbed into the Plant Sciences major (p. 388) as an area of specialization.

The Major Program

This major is designed for students who are interested in understanding how to manage and restore wildland and rangeland plant communities. Courses are selected to provide an interdisciplinary background that encompasses ecology, applied plant biology, and the social sciences. Students will acquire a core understanding of natural and managed ecosystems and how they function, interact with the natural environment, are connected with human society and social change, and are restored and managed.

The Program

The curriculum provides depth in the ecological and botanical sciences directed toward an integrated understanding of how communities and ecosystems function and how this knowledge can assist in their management and restoration. Courses in environmental policy and law

expose the students to the social drivers and constraints of ecosystem management. All students gain practical experience through practical field courses and a required internship. Students may also pursue an Honors thesis in their senior year.

Major Advisor

Kenneth Tate

Advising Center for the major, including peer advising, is located in 1220 Plant & Environmental Sciences; 530-752-9770.

Career Alternatives

Graduates from this program are prepared to pursue a wide range of careers, including positions in ecological restoration and ecosystem management; rangeland and reserve management; environmental consulting; public, private, or non-profit agencies concerned with restoration and natural resource management; Cooperative Extension; teaching; information and communication services. Graduates are qualified to pursue advanced studies in fields such as ecology, agroecology, environmental studies, geography or weed science.

Environmental Horticulture & Urban Forestry, Bachelor of Science

College of Agricultural & Environmental Sciences

As of Fall 2022, the Environmental Horticulture & Urban Forestry major is no longer accepting new students. It has been absorbed into the Plant Sciences major (p. 388) as an area of specialization.

The Major Program

Students majoring in Environmental Horticulture & Urban Forestry learn how plants improve the environment and the quality of our lives. The major focuses on the biological and physical concepts and horticultural principles of plant production, management of plants and plant ecosystems in landscape settings and sociological aspects of plant/people interactions in the urban environment. Plants are used to revegetate and restore disturbed landscapes, control erosion and reduce energy and water consumption. The ornamental use of plants to improve the aesthetic quality of urban and rural landscapes, recreational areas, interiorscapes and commercial sites is an important aspect of this major. Students may select one or more of the following three areas of specialization: Floriculture/Nursery, Plant Biodiversity/Restoration, or Urban Landscape Management.

Internships & Career Opportunities

Students are encouraged to develop internships on or off campus to augment their activities in the classroom and laboratory. Internships are available with the department’s greenhouse facility, the UC Davis Arboretum, landscape designers, local nurseries, government agencies, regional non-profits, and restoration firms. Career opportunities in this field include growing and/or managing plants in a variety of settings, including nurseries & arboreta, consulting as an arborist, or as an urban, landscape, or restoration horticulturist; business ownership; park management and landscape contracting; working in the public or private sector, or for non-profit organizations.

Major Advisor

Daniel Potter

Advising Center for the major, including peer advising, is located in 1220 Plant & Environmental Sciences; 530-752-9770.

Code	Title	Units
Preparatory Subject Matter		
Recommended as part of the College English Composition Requirement or the Words & Images Core Literacy Component:		
CMN 001	Introduction to Public Speaking	
<i>Environmental Horticulture</i>		
ENH 001	Introduction to Environmental Horticulture/ Urban Forestry	3
ENH 006	Introduction to Environmental Plants	4
<i>Landscape Architecture</i>		
LDA 030	History of Environmental Design	4
<i>Biological Science</i>		
BIS 002A	Introduction to Biology: Essentials of Life on Earth	5
BIS 002B	Introduction to Biology: Principles of Ecology & Evolution	5
<i>Plant Science</i>		
PLS 002	Botany & Physiology of Cultivated Plants	4
PLS 021	Application of Computers in Technology	3
<i>Chemistry</i>		
CHE 002A	General Chemistry	5
CHE 002B	General Chemistry	5
<i>Environmental Science & Policy</i>		
ESP 001	Environmental Analysis	3-4
or ESP 010	Current Issues in the Environment	
<i>Physics</i>		
PHY 001A	Principles of Physics	3
PHY 001B	Principles of Physics	3
Choose one:		3-4
MAT 016A	Short Calculus	
or STA 013	Elementary Statistics	
Choose one:		3-4
UWP 102B	Writing in the Disciplines: Biology	
UWP 102G	Writing in the Disciplines: Environmental Writing	
UWP 104E	Writing in the Professions: Science	

Other upper division composition course. May overlap with college composition requirement; may be satisfied by passing the English Composition Exam.

<i>Lower Division Restricted Electives</i>		
Choose one lower division resource science course and one lower division social science/humanities course in consultation with advisor; minimum 6 units.		6
Preparatory Subject Matter Subtotal		59-62
Depth Subject Matter		
ENH 102	Physiological Principles in Environmental Horticulture	3-4
or PLS 100A	Metabolic Processes of Cultivated Plants	
Choose one:		4-5

Plant Sciences, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

The Plant Sciences major is designed for students who are interested in a scientific understanding of how plants grow and develop in managed agricultural ecosystems and how plant products are utilized for food, fiber and environmental enhancement. Advances in science and technology have provided new insights and options for using plants to address the issues associated with providing renewable food, fiber and energy resources for a growing global population while minimizing adverse impacts on the natural environment. Graduates in Plant Sciences are able to apply their skills and knowledge to a diverse range of agricultural and environmental goals or pursue advanced degrees in plant sciences.

The Program

The curriculum provides depth in the biological and physical sciences and a sound understanding of how plants obtain and utilize resources from their environment to sustain their growth and development. The influences of genetics, management systems and environmental inputs on crop development and productivity are emphasized along with the

postharvest preservation and marketing of plant products. Students will develop an area of specialization with options in Crop Production, Plant Genetics & Breeding, or Postharvest Biology & Technology. An Individual option is also available to match specific subject matter or career goal interests in the plant sciences. All students gain practical experience through a combination of practical laboratory courses and internships. Students may also pursue an Honors thesis in their senior year.

Master Advisor

Daniel Potter (<https://www.plantsciences.ucdavis.edu/people/daniel-potter/>)

Advising for the major is located in 1220 Plant & Environmental Sciences. Please visit our department website (<https://www.plantsciences.ucdavis.edu/undergraduate/>) for more information.

Career Alternatives

Graduates from this program are prepared to pursue a wide range of careers, including various technical and management positions in agricultural & business enterprises, farming, or consulting; public, private & non-profit agencies; Cooperative Extension; international development; teaching; or agricultural & environmental journalism and communication services. Graduates are qualified to pursue graduate studies in the natural and agricultural sciences, such as plant biology, genetics, breeding, horticulture, agronomy, biotechnology, ecology, environmental studies, pest management, education, or business management.

International Relations, Bachelor of Arts

College of Letters & Science

Ethan Scheiner, Ph.D., Program Director

Major Office

469 Kerr Hall; 530-754-8098; International Relations (<https://ps.ucdavis.edu/undergraduate/majors-and-minors/international-relations-major/>)

Problems of security, development, ethnic conflict, human rights, health, and the environment are increasingly confronted at a global rather than a national level. With its theoretical models and real-world application, the study of international relations is an exciting and highly relevant interdisciplinary major.

The Major

Graduation with a major in international relations requires completion of introductory courses in political science, economics, statistics, and history. The major also requires fluency in English and a working knowledge (approximately 24 to 30 units of course credits or equivalent fluency) of one other modern language. Students choose one of four tracks that encompass major topical areas in combination with an area studies emphasis:

- World Trade & Development
- Peace & Security
- Global Environment, Health, & Natural Resources
- Peoples & Nationalities

Upper division coursework for Tracks I, II and III is composed of twelve courses. Students choosing Track IV, Peoples and Nationalities, are required to study or work abroad for a minimum of one quarter; upper division course work is reduced to nine classes in recognition of the experience gained through education abroad.

Programs, Internships, & Career Alternatives

One program of special interest to international relations majors is the Education Abroad Program, which provides insights into the life and culture of other countries. At UC Davis, the Internship and Career Center assists students in obtaining legislative, legal, and business internships. In addition, the UC Davis Washington Center and UC Center Sacramento arrange internships and run a full-credit academic program in Washington, D.C. and Sacramento respectively with a full range of opportunities for International Relations majors (see also UC Washington Center (UCDC) (p. 459). International Relations graduates are prepared for employment in government agencies (such as the Foreign Service), state agencies, international or non-governmental organizations (such as the United Nations), foundations, and companies having interests in international business, trade, or finance. The stringent language requirement of the major program enhances career prospects in jobs which demand knowledge of the language and culture of other countries.

International Relations Abroad

International Relations strongly encourages all students to participate in the UC Education Abroad Program; those who choose to study Track IV, Peoples and Nationalities, must study or work abroad for a minimum of one quarter. A maximum of five courses taken abroad may be applied toward the International Relations major. Courses are selected with the approval of an advisor for the International Relations program.

Major Advisor

Foreign Language Subtotal 0-30

Depth Subject Matter

Tracks I, II & III: Twelve upper division courses.

Track IV: Nine upper division courses.

Choose one track: 36-48

Track I: World Trade & Development (p. 394)

Track II: Peace & Security (p. 395)

Track III: Global Environment, Health, & Natural Resources (p. 395)

Track IV: Peoples & Nationalities (p. 396)

Depth Subject Matter Subtotal 36-48

Area Studies Requirement

Choose four. Courses must incorporate at least two of three groups (History, Social Analysis, Culture and Literature); we encourage students to take all four courses from one region, but will accept a minimum of three from one region and one from a different region. Tracks I, II and III students who choose to take advantage of an Education Abroad experience may fulfill the Area Studies requirement by completing three courses instead of four; all three courses must be from one region. 16

Regions

Africa & the Middle East (p. 396)

East & South Asia (p. 397)

Latin America (p. 397)

Russian & East/Central Europe (p. 398)

Western Europe (p. 398)

Area Studies Requirement Subtotal 16

Total Units 80-124

Tracks

Track I: World Trade & Development

Emphasizes contemporary economic relations of industrialized and developing countries.

For Advanced Industrialized Focus

Political Science—Public Service, Bachelor of Arts

College of Letters & Science

The Political Science Major Program

Political science is the study of politics and political systems at the local, national, and international levels. It concerns not only the institutions of government but also the analysis of such phenomena as political behavior, political values, political change and stability, parties, pressure groups, bureaucracies, administrative behavior, justice, national security, and international affairs.

The Program

The Department of Political Science offers two major programs: political science and political science-public service. The political science major aims to provide the student with a broad understanding of political concepts, political institutions, political behavior, and political processes. The political science-public service major is for students who desire opportunities for practical hands-on experience in their major. It differs in particular from the political science major in its internship requirement and its focus on the American political system.

Major Advisor

Consult Department office.

Internships & Career Alternatives

Both the proximity of UC Davis to the state capitol and the programs offered by the UC Washington Center afford exceptional internship possibilities in local, state, and national government offices, providing

students with actual experience in politics and government service while still attending school. A student who majors in political science acquires research and analytic skills relevant to many professional fields. Consequently, the majors offered in political science are valuable not only in providing students with a better understanding of politics and political systems, but also as a first step toward careers in teaching, law, management, government, urban planning, journalism, politics, administration, or for graduate studies in numerous fields.

Public Affairs Internship Program

This program is open to upper division students in any major who want to obtain an internship in the area of government and public service. Information and applications are available from the Political Science Department in 468 Kerr Hall.

Graduate Study

The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is done only in conjunction with UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator office.

Graduate Advisor

The Department of Political Science offers a program of graduate study and research leading to a Ph.D. degree or an M.A./J.D. joint degree. The M.A./J.D. joint degree is done only in conjunction with UC Davis School of Law. Information concerning admission to these programs and requirements for completion are available in the Graduate Program Coordinator office.

War-Peace Studies, Minor

College of Letters & Science

Minor

The interdisciplinary minor in War-Peace Studies examines the causes and dynamics of intra- and international wars and efforts to prevent and settle such conflicts.

Students in the minor are encouraged to participate in the educational activities of the Davis Program of the UC Institute on Global Conflict & Cooperation (IGCC).

The minor is sponsored by the International Relations Major.

Advising

International Relations Major; 530-754-8098

Code	Title	Units
<i>Restriction</i>		
No more than two courses from a single department may be offered in satisfaction of the minor requirements.		
Choose one or two from each of the following areas:		20

2320 Storer Hall; 530-752-1274; Population Biology Graduate Group (<https://pbg.ucdavis.edu/>); Faculty (<https://pbg.ucdavis.edu/faculty/>)

- Population Biology, Master of Science (p. 405)
- Population Biology, Doctor of Philosophy (p. 405)

Population Biology, Master of Science

Graduate Studies

Graduate Study

The Population Biology Graduate Group (PBGG) emphasizes programs of study and research leading to a Ph.D. degree. The PBGG concentrates on population biology as a broad discipline that unifies ecology, evolution, population genetics and phylogenetics. The course curriculum consists of a first-year core course offered by PBGG faculty, seminars, and advanced courses in population biology and related disciplines; chosen in consultation with a guidance committee.

The Master of Science is offered only as an en route degree.

Graduate Advisor

Consult the Population Biology Graduate Group office (<https://pbg.ucdavis.edu/contact/>).

Population Biology, Doctor of Philosophy

College of Biological Sciences

Graduate Study

Psychology, Bachelor of Arts

College of Letters & Science

The Major Programs

The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five core areas of psychology:

Perception, Cognition, & Cognitive Neuroscience (PCCN) involves the study of awareness and thought, and includes such topics as perception, learning, memory, language and cognition.

Biological Psychology covers a broad spectrum of topics including evolutionary, neurobiological, and molecular mechanisms of behavior.

Social-Personality Psychology involves the study of the individual in their social environment and includes such topics as personality & individual differences, emotions, stereotyping & prejudice, intergroup relations, the psychology of religion and psychological health & dysfunction.

Developmental Psychology involves the study of changes in behavioral, cognitive, emotional, and social abilities that occur throughout the lifespan. Typical and atypical development is examined using a variety

of methods including behavioral, neuroimaging, and physiological assessments.

Quantitative Psychology involves the study of linear & nonlinear models, psychometrics, mixed-effects models, and dynamic models, including experimental design, analysis of variance, regression, multivariate analysis, latent growth models, time series models, and factor analytic models.

The department offers the Bachelor of Arts (A.B.) program for students interested in the liberal arts and the Bachelor of Science (B.S.) program geared for students with an interest in either biology or mathematics. The main objective of both programs is a broad introduction to the scope of contemporary psychology. In addition to completing a number of common core courses for their degree, students may take approved elective courses from a wide range of topics including Educational Psychology, Interpersonal Communication, and Psychological Anthropology, to name a few. The department strongly encourages students to become involved in individual research projects under the direction of faculty members and to participate in our internship program to broaden experience and understanding of the field of psychology.

Preparatory Requirements

Before declaring a major in Psychology, students must complete PSC 001 and PSC 041 with a combined grade point average of at least 2.500. Both courses must be taken for a letter grade. If a 2.500 GPA is not attained in these two courses, a 2.000 GPA in a minimum of three upper division Psychology courses is also acceptable for major declaration.

Career Alternatives

A degree in psychology provides broad intellectual foundations which are useful to the graduate for the development of careers in a variety of areas, including social work, teaching, business, management and counseling. An undergraduate education in psychology also provides excellent preparation for graduate study. Individuals with degrees in psychology may enter graduate programs to prepare for teaching, research, or clinical/counseling careers in psychology, or may go on to professional schools for training in veterinary and human medicine, law, and many other professions.

Honors & Honors Program

In order to be eligible for high or highest honors in Psychology, the student must both meet the college criteria for honors and complete a research project involving a minimum of 6 units of course work over at least two quarters which represents an original analysis of data on psychological phenomena. Courses PSC 194HA-PSC 194HB or other approved courses can be used to satisfy the unit requirement. This project is to be written in thesis form and approved by the department. The quality of the thesis work will be the primary determinant for designating high or highest honors at graduation.

Recommended for All Majors

Students who plan to do graduate work in any area of psychology are strongly encouraged to gain experience through research and internship activities.

Major Advisor

² If you take one or more 3-unit course(s), you will need additional PSC Major Elective units to fulfill the 40 total units of upper division PSC required in the major.

Psychology, Minor

College of Letters & Science

The Minor Program

The psychology program at UC Davis is broad and includes students and faculty with a variety of interests. The department has developed around five core areas of psychology:

Perception, Cognition, & Cognitive Neuroscience (PCCN) involves the study of awareness and thought, and includes such topics as perception, learning, memory, language and cognition.

Biological Psychology covers a broad spectrum of topics including evolutionary, neurobiological, and molecular mechanisms of behavior.

Social-Personality Psychology involves the study of the individual in their social environment and includes such topics as personality & individual differences, emotions, stereotyping & prejudice, intergroup relations, the psychology of religion and psychological health & dysfunction.

Developmental Psychology involves the study of changes in behavioral, cognitive, emotional, and social abilities that occur throughout the lifespan. Typical and atypical development is examined using a variety of methods including behavioral, neuroimaging, and physiological assessments.

Quantitative Psychology involves the study of linear & nonlinear models, psychometrics, mixed-effects models, and dynamic models, including experimental design, analysis of variance, regression, multivariate analysis, latent growth models, time series models, and factor analytic models.

Recommended for All Majors

Students who plan to do graduate work in any area of psychology are strongly encouraged to gain experience through research and internship activities.

Minor Advisor

Staff advisors are located in Young Hall; psychadvising@ucdavis.edu; 530-752-5104. For more information on how to make an appointment

or join Drop-In Advising hours, please see Yellow Cluster Undergraduate Advising Center (<https://yellowcluster.ucdavis.edu/advising/undergraduate/>).

Graduate Study

The Department offers programs of study and research leading to the Ph.D. degree in psychology. Detailed information regarding graduate study may be obtained on our website (<https://psychology.ucdavis.edu/graduate/>).

Graduate Advisor

Education Programs

Public Health Sciences Education Programs (<https://health.ucdavis.edu/phs/education/>)

- Master of Public Health (p. 413)
- Public Health Sciences, Doctor of Philosophy (p. 414)
- Public Health Sciences, Minor (p. 414)

Master of Public Health

School of Medicine

Master of Public Health (<https://health.ucdavis.edu/phs/education/mph/>)

The UC Davis M.P.H. Program's goal is to develop the public health leaders of the future by providing a high-quality Master's degree curriculum in partnership with the public health community. We accomplish this through the collaborative efforts of the UC Davis and health networks, including the Schools of Medicine, Veterinary Medicine, Management, Law, Education, and Nursing and the California Department of Public Health, local county health departments, and non-profit agencies. These partnerships comprise teaching, student mentorship and field placements, research, service, direction, and support for the UC Davis M.P.H. Program.

The UC Davis M.P.H. Program is an accelerated, 56-unit program that focuses on the essentials of public health. It offers students two

concentration areas – General Public Health & Epidemiology – and includes a practicum experience, or internship, in a public health setting.

For program inquiries, contact PHSInstAffairs@ucdavis.edu.

Core Courses

Code	Title	Units
EPI 205	Principles of Epidemiology	4
SPH 210	Public Health Informatics	2
SPH 222	Social & Behavioral Aspects of Public Health	3
SPH 244	Introduction to Medical Statistics	4
SPH 245	Biostatistics for Biomedical Science	4
SPH 262	Principles of Environmental Health Science	3
SPH 273	Health Services Administration	3
SPH 281	Data Management in SAS	1
SPH 283	Program Planning & Evaluation	3
SPH 290	Topics in Public Health	3
SPH 297	Public Health Practicum	10
Total Core Course Units		40
Required Electives		16
Total Units		56

Elective Courses

Students choose electives reflecting their professional public health interests to complete the 56-unit requirement. The M.P.H. program provides a quarterly list of available electives to students. Students may select appropriate courses not on the electives list and have them approved by their Graduate Advisor. Electives must be upper-division undergraduate-level or graduate-level courses. See list of suggested electives. (<https://health.ucdavis.edu/phs/education/mph/documents/GGPHS-elective-courses-2020.pdf>)

Public Health Sciences, Doctor of Philosophy

Graduate Studies

As a student in the doctoral degree program in Public Health Sciences at UC Davis, you will become a highly educated public health research professional prepared for leadership in governmental public health agencies, community-based public health organizations, and academic health centers. The Ph.D. in Public Health Sciences requires two years of research courses and rotations and completion of a dissertation to allow students to practice research and translational public health sciences techniques they have learned in the classroom.

Code	Title	Units
Required Core Courses		
SPH 202	Public Health Issues in California's Central Valley	3
SPH 212	Migration & Health	3
SPH 213	Health Disparities in the U.S.	3
SPH 214	Scientific Proposal Writing	3
SPH 246	Biostatistics for Clinical Research	4
SPH 276	Critical Assessment in Health Policy & Economics	2

SPH 291	Public Health Sciences Doctoral Seminar	6
SPH 292A	Public Health Translational Science Rotation	5
SPH 292B	Public Health Translational Science Rotation	5
EPI 206	Epidemiologic Study Design	4
MHI 210	Introduction to Health Informatics	4
Total Required Core Course Units		42
Elective Units		14
Total Units		56

Upon completion of the required 56 core course and elective units, students will complete SPH 299 dissertation units.

Public Health Sciences, Minor

The Public Health Sciences minor offers undergraduate students a foundation of knowledge for those who plan to enter the field of public health immediately following graduation and for those planning to earn an advanced degree in Public Health or a related field including medicine, nursing, and dentistry.

To subscribe to the Public Health Minor mailing list, see PHS Minor listserv subscription page (https://health.ucdavis.edu/phs/education/minor_mail.html).

To contact the Public Health Science Advising Team, email PHSInstAffairs@ucdavis.edu.

- Study of Religion, Master of Arts (p. 417)
- Study of Religion, Doctor of Philosophy (p. 417)

Religious Studies, Bachelor of Arts

College of Letters & Science

The Major Program

Religion is a major force in human experience. It has shaped the world's history, literature, art, culture, politics, ethics, and economics. In addition to offering courses in all the major religious traditions (Judaism, Christianity, Islam, and Hinduism,) the Religious Studies Program has developed cross cultural courses dealing with religious symbols, myths, and rituals in written texts, art, theater, and film, and the Internet, as well as, thematic courses dealing with such topics as religion and the body, the rise of fundamentalism, religion and science, religion and ethics, and religion and violence.

The Program

The major introduces students to the academic study of religion. Students can choose from a broad range of courses both in the program itself and in other departments and programs—history, philosophy, psychology, sociology, anthropology, American studies, classics, and medieval studies. In addition to studying religious thought per se, students in the major can also study the way religion has shaped human behavior in such matters as family life, gender roles, ethics, artistic life,

concepts of individual freedom, the pursuit of science, and economics. For some students, Religious Studies is an appropriate second major and combines well with anything from philosophy to international agricultural development, political science, and the physical sciences.

Career Alternatives

Because of the program's focus on developing critical thinking, writing, and reading skills, students who major in Religious Studies are well prepared to enter a variety of careers, including, the health professions, law, business, teaching, and government. In an increasingly global society, knowledge of the world's religious traditions and practices has become an essential part of a student's education.

Recommended

A reading knowledge of a foreign language is highly recommended.

Course Equivalents

The major advisors have a list of lower and upper division courses that can be substituted for courses suggested above.

Honors & Honors Program

A student becomes eligible for graduation with honors by meeting the minimum GPA and course requirements established by the College of Letters & Science. Upon successful completion of the additional requirements of the College of Letters & Science Honors Program, individual students may be recommended by the program for graduation with high honors or highest honors on the basis of an evaluation of their academic achievements in the major.

Education Abroad Program

The Religious Studies program encourages students to study in the Summer Abroad program, the Quarter Abroad program, or the Education Abroad program. With the approval of a major advisor, applicable courses taken abroad may be accepted in the major or minor programs.

Teaching Credential Subject Representative

See the Teaching Credential/M.A. Program (<https://education.ucdavis.edu/teaching-credentialma/>).

Hebrew

Students interested in Hebrew courses should see Hebrew (<https://mesa.ucdavis.edu/language-info/hebrew/>).

Study of Religion, Master of Arts

College of Letters & Science

Graduate Study

The Study of Religion Graduate Program offers students classical training in the literatures of particular religious traditions, and they are encouraged to understand these traditions at the intersection of contemporary thematic and regional phenomena.

Students have the opportunity to concentrate primarily on one of three regional specializations: American religious cultures, Mediterranean religions, and Asian religions. An additional regional specialization typically serves as a secondary area of competence. Students further shape their scholarship through intensive engagement in one of the following thematic specializations: Values, Ethics, and Human Rights; Modernity, Science, & Secularism; Visual Culture, Media, & Technology; Language, Rhetoric, and Performance; Body & Praxis; Theory & Method.

This curriculum guides students through a rigorous course of study, providing the breadth and depth necessary to produce exciting, rigorous scholarship at the forefront of the field of Religious Studies. Graduate training prepares students for careers in academia as well as in the government and the private sector.

Preparation

Admission to the program requires a Bachelor's or Master's degree in a discipline relevant to the study of religion, as well as preparation in at least one language relevant to the intended area of primary research. The program requires three letters of recommendation and a sample of recent written work.

While an M.A. degree may be obtained while pursuing a Ph.D. degree, only Ph.D. applications will be accepted.

Contemporary Leadership, Minor

College of Agricultural & Environmental Sciences

Minor

The Science & Society Program offers a minor in Contemporary Leadership, open to all undergraduate students regardless of major. The minor provides a broad overview of leadership theory and practice, and engages students in critical thinking, self-reflection, problem solving and multicultural education. Students should contact the minor advisor for course selection and plan approval.

Consult advisors often to insure timely enrollment in SAS 192 and SAS 190X only offered in spring quarter once a year.

Minor Advisor

The list of appropriate courses may change over time. To request an advising appointment, consult Elvira Galvan Hack (eghack@ucdavis.edu) in Science & Society (Plant Pathology).

Science & Society, Minor

College of Agricultural & Environmental Sciences

The Program

Science & Society is an interdepartmental teaching program administered by the College of Agricultural & Environmental Sciences that offers students throughout the campus the opportunity to discover the

connections that link the social, biological, and physical sciences with societal issues and cultural discourses. Course work examines discovery processes in relation to societal values, public policy and ethics, including issues associated with cultural diversity. Whenever possible, opportunities outside the classroom are included as part of the learning experience.

The Science & Society teaching program serves students of all majors and interests. It can allow lower division students who have not yet declared a major a meaningful context for exploring diverse subject matters. The minor for the program includes, in addition to Science & Society courses, upper division courses from both the College of Agricultural & Environmental Sciences and the College of Letters & Science in the areas of history and philosophy of science, policy & decision making, communication of science, and culture, ethics and applications.

Science & Technology Studies, Bachelor of Arts

College of Letters & Science

The Science & Technology Studies (STS) major brings the perspectives of the humanities and social sciences together with science, technology, and medicine. It considers science, technology, and medicine in relation to their social, political, and economic contexts. The major combines history, philosophy, anthropology, sociology, cultural studies, environmental studies, law, business, literature, and media studies to address the impacts and implications of science, technology, and medicine. The major allows students to pursue a broader understanding of science than is available within a traditional science major, and it provides important skills for interpreting science, technology, and medicine with regard to society and culture.

The Major

Graduation with a degree in Science & Technology Studies requires completion of courses in the social sciences and the humanities, as well as courses in the natural sciences. Upper division work includes 16 units in STS theories and methods, 20 units in a particular STS emphasis area, and 8 units (plus prerequisites) providing depth, concentration, and field work in the sciences. The STS emphasis areas are: (1) Law & Innovation; (2) Health & Environment; (3) Data & Media Technologies; and (4) History & Philosophy of Science. Students may alternatively choose not to specialize and instead pursue a more general STS emphasis.

Prerequisites for courses in the sciences can be extensive and may require substantial advance planning. Students are encouraged to take advantage of faculty and staff advising to develop their plans of study.

Career Alternatives

The STS major enables students to analyze science and allied practices from historical, philosophical, sociological, political, anthropological, and cultural perspectives. STS prepares students for careers that address the broader ramifications of science, technology, and medicine. STS majors often pursue careers in health care & medicine, law, journalism, public policy, economics, government, media & technology industries, science education, non-profit health organizations, libraries & museums, public health administration, management consulting, and teaching. STS majors are also well prepared for advanced research careers in the sciences, the humanities, and the social sciences.

Major Advisor

Staff advisors are located in Young Hall; stsadvising@ucdavis.edu; 530-752-5104. For more information on how to make an appointment or join Drop-In Advising hours, please see Yellow Cluster Undergraduate Advising (<https://yellowcluster.ucdavis.edu/advising/undergraduate/>).

Faculty Advisor

The current chair of STS is also available for advising by appointment.

Organizational Studies, Bachelor of Arts

College of Letters & Science

The Major Programs

The Organizational Studies (OS) major is designed to provide a broad understanding of the political, social, and economic organizations that make up modern society. Whether thinking about the structure of government bureaucracies, legal systems, economic markets, educational systems, or workplaces, OS offers an interdisciplinary view from which to understand the contemporary world in which complex and formal organizations are ubiquitous. Formal organizations influence how we feel, what we think, and what we can accomplish. As such, the

OS major provides both a basic understanding of the field as well as enhances your ability to pursue their more specialized career interests.

At the upper division level, you can choose one of four specialized tracks, any one of which will help to better identify and inform your career goals—whether that be in postgraduate education or a specific type of job—and pursue them after graduation. Whether you select the “Business & Society,” “Public Policy & Social Welfare,” “Nonprofit & Social Movement Organizations” or the “Student-Initiated Theme” track, once completed you will have a unique and valuable area of expertise.

Students who plan to enroll in graduate programs in business, public policy, public administration, and education are advised to develop proficiencies in statistics and calculus (such as the MAT 016 series).

Track 1: Business & Society

The Business and Society track is for students who hold an interest in or wish to pursue careers in management or corporate professions and who are interested in economic institutions and commerce, management and administration, work and workplaces, and labor markets. Courses in this cluster analyze businesses, firms, corporations, and markets—nationally and globally—and their place in society, historically and in the present, from a critical perspective. The BAS examines the origins of business corporations and economic markets (and relations); the power relations, inequalities, and stratification associated with contemporary business organizations (firms and corporations); why business organizations rely on particular organizational structures to increase their efficiencies and effectiveness; and overviews of the role business and regulatory organizations play in the economy.

Postgraduate training and careers that follow from this cluster:

- *Professional training:* MBA programs; mediation programs; law; public policy.
- *Graduate training:* sociology; economics; Ph.D. business school programs (with concentrations in organizational behavior, entrepreneurship, industrial relations, economic analysis, policy analysis, labor relations).
- *Career paths:* managers, human resources professionals, project managers, diversity personnel, corporate social responsibility personnel, lobbyists, business entrepreneur, labor relations specialists, creative professionals, research staff at policy institutes such as Economic Policy Institute, Urban InstituteE2.

Track 2: Public Policy & Social Welfare (PPSW)

The PPSW track is for students who hold an interest in or plan to pursue careers in government and/or social welfare organizations. Courses in this track emphasize how formal organizations and institutions emerge to address key social problems and the policies they generate and utilize to solve them; the unique challenges that government and other policy-oriented organizations confront in addressing and managing public problems and promoting the common good; and the dynamics and special circumstances that specific organizational/institutional policy fields such as education, health care, and social welfare confront in seeking to fulfill their charge.

Postgraduate training and careers that follow from this track:

- *Professional training:* programs in public policy, public administration, government, social welfare, counseling, public affairs, law, leadership institutes, community psychology.

- *Graduate training:* Ph.D. programs in sociology, political science, public administration, education, educational leadership.
- *Career paths:* consultants, social service workers and administrators, staff at policy institutes and think tanks, program evaluation and development, nonprofit administrators, lawyers, teachers, research staff at policy institutes and think tanks, leadership positions in education, including higher education, counselors.

Track 3: Nonprofit & Social Movement Organizations (NSMO)

The NSMO track is for students who wish to contribute to local, national, and global transformation(s), to social justice, and/or who plan to pursue a career in the non-profit sector focusing on addressing specific causes and fulfilling social agendas. Students in this cluster may have particular interest in understanding the role that informal and formal organizations—from well-organized and mature non-profits to emergent social movement organizations—play in responding to and affecting social change. This cluster familiarizes students with the unique capacity of organizations to change the world but simultaneously, the barriers, limitations, and challenges to doing so.

Postgraduate training and careers that follow from this track:

- *Professional training:* programs in community development, regional development, urban development, public policy, public administration, Master’s programs in social change, law and social change, business programs with a concentration in corporate responsibility.
- *Graduate training:* programs sociology, history, labor studies, development, international relations, political science.
- *Career paths:* working in nongovernmental organizations around the world (NGO’s), joining the Peace Corps or Teach America; teaching in other countries; jobs in any number of areas that are the focus of social change and social justice efforts (energy, housing, labor, community and regional development, health, corporate social responsibility); working in for-profit companies in the areas of energy, corporate social responsibility, work/family support programs, research staff at policy institutes and think tanks.

Track 4: Student-Initiated Track

Select a combination of five courses from any of the above 3 themes (at least three courses should be from SOC). Students choosing this track must meet with a SOC undergraduate advisor to obtain approval of selected courses.

Major Advisor

Consult the Departmental Advising office in 1282 Social Sciences & Humanities Building or see the SOC Advising Office (<http://sociology.ucdavis.edu/undergraduate/advising/advising-office/>).

Honors Program

An Honors Program is available to Sociology & Sociology-Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.500 in the major and the recommendation of a faculty sponsor familiar with their work. In addition to meeting the standard major requirements, students are encouraged to take a 199 course with their sponsor in the spring of their third year, prior to the seminar courses. Honors students write an honors thesis and take two quarters (8 units) of Honors coursework (SOC 194HA & SOC 194HB). Successful completion of the Honors Program, when combined with College GPA requirements,

enables the student to graduate with High or Highest Honors. Students should apply for the program before they begin their fourth year.

Track 4: Student-Initiated Track

Choose a combination of five courses from any of the above three themes; at least three courses should be from SOC. Students choosing this track must meet with a SOC undergraduate advisor to obtain approval of selected courses.

Sociology, Bachelor of Arts

College of Letters & Science

The Major Programs

Sociology is the study of human society in all its manifestations. Its aim is to discover the process and structure of human interaction, to identify the main forces that sustain or weaken social groups, and to determine the conditions that transform social life. Sociology, like any science, is a disciplined, intellectual quest for knowledge about the fundamental nature of things. Students selecting the Sociology major will choose one of five options:

- The *General Sociology emphasis* allows students to gain a broad perspective of sociology by providing an introduction to the discipline and its central issues and concepts. This emphasis offers the most flexibility in allowing students to choose which upper division courses to take.
- The *Law & Society emphasis* is designed for students interested in the study of law, politics, and research. It offers a structured program of courses in law, criminology, deviance, and their relation to issues of societal order and change. Focusing on law in action, students will study how legal and criminal systems operate and theories of legal/criminal behavior. Students can expect to take courses in violence and inequality, delinquency, deviance, the criminal justice system, criminology, and social problems.
- The *Social Services emphasis* focuses on the interactive perspective of family, community, social problems, and social services. The core of the curriculum addresses the fields of social welfare, the family, and social stratification. Students round out their program with courses chosen from areas of social issues, social interaction, gender, and organizational behavior. Students will also take multiple courses within the areas of psychology and race and ethnicity. The program provides a strong liberal arts education and adequately prepares students to work in the diverse social environment of the 21st century.
- The *Global & International Sociology emphasis* is designed for students interested in developing an interdisciplinary, historically-informed understanding of global issues as well as regional challenges and characteristics. Students will study the social bases of political and economic life, culture and communities, inequalities, ethnic relations, migration, environmental changes, and other issues. Besides sociology courses, students choose classes across diverse disciplines, for example, economics, anthropology, political science, history, religious studies, and international agriculture.
- The *Race, Ethnicity, & Immigration emphasis* brings together two sociological subfields by allowing students to take common core of lower division courses that provide them with a foundational knowledge of race & ethnicity and immigration. Students will build on this foundation by choosing from an array of Sociology courses that provide in-depth instruction in specific areas related to Race, Ethnicity, and Immigration, and from electives offered by the departments of African American and African Studies, Chicana/Chicano Studies, Native American Studies, Asian American Studies

and other Social Science and Humanities departments offering relevant courses.

Career Opportunities

The Sociology major provides students with a solid liberal arts education that will prepare them for graduate work in the social sciences as well as a variety of careers. Students who major in sociology often work in areas such as business, education, law, social work or counseling, data analytics, research, health services, community engagement, and global fields.

Advising

Sociology Advising Office (<http://sociology.ucdavis.edu/undergraduate/advising/advising-office/>)

Honors Program

An Honors Program is available to Sociology and Sociology-Organizational Studies majors who have demonstrated excellence in their field of study. To be eligible for the program, students must have a grade-point average of 3.500 in the major and the recommendation of a faculty sponsor familiar with their work. In addition to meeting the standard major requirements, students are encouraged to take a 199 course with their sponsor in the spring of their third year, prior to the seminar courses. Honors students write an honors thesis and take two quarters (8 units) of Honors coursework (SOC 194HA & SOC 194HB). Successful completion of the Honors Program, when combined with College GPA requirements, enables the student to graduate with High or Highest Honors. Students should apply for the program before they begin their fourth year.

Social Dynamics

SOC/IRE 104	The Political Economy of International Migration
SOC 141	Industrialization & Social Change
SOC 143A	Urban Society
SOC 170	Population

(C)

Choose three upper division courses from one of the following clusters, not counting courses taken to fulfill requirement B: 12

Cluster 1: Individual, Culture & Society

SOC 120	Deviance
SOC 122	Sociology of Adolescence
SOC 125	Sociology of Culture
SOC 126	Social Interaction
SOC 128	Interracial Interpersonal Dynamics
SOC 129	Sociology of Black Experience in America
SOC 131	The Family
SOC 132	The Sociology of Gender

SOC 135	Social Relationships
SOC 137	African American Society & Culture 1790 to 1990
SOC 143B	Sociology of City Life
SOC 148	Collective Behavior
SOC 150	Criminology
SOC 152	Juvenile Delinquency
SOC 153	The Sociology of Childhood
SOC 162	Society, Culture, & Health
SOC 163	Population Health: Social Determinants & Disparities in Health
SOC 173	Sociology Through Literature
SOC 174	American Jewish Identities & Communities
SOC/STS 176	Sociology of Knowledge, Science, & Scientific Knowledge

Cluster 2: Stratification & Social Differentiation

SOC 118	Political Sociology
SOC 128	Interracial Interpersonal Dynamics
SOC 129	Sociology of Black Experience in America
SOC 130	Race Relations
SOC 132	The Sociology of Gender
SOC 133	Sexual Stratification & Politics
SOC 140	Social Stratification
SOC 145A	Sociology of Third World Development
SOC 145B	Gender & Rural Development in the Third World
SOC 163	Population Health: Social Determinants & Disparities in Health
SOC 171	Sociology of Violence & Inequality
SOC 185	Social Policy
SOC 185Y	Social Policy (Hybrid Version)
SOC 188	Markets, Culture & Inequality in China

Choose one:

AAS 123	Black Female Experience in Contemporary Society
ASA 100	Asian American Communities
CHI 110	Sociology of the Chicana/o Experience
NAS 115	Native Americans in the Contemporary World

Cluster 3: Organizations & Institutions

SOC 118	Political Sociology
SOC 124	Education & Inequality in the U.S.
SOC 131	The Family
SOC 133	Sexual Stratification & Politics
SOC 139	Corporations & Society
SOC 146	Sociology of Religion
SOC 150	Criminology
SOC 151	The Criminal Justice System
SOC 155	Sociology of Law
SOC 159	Work, Employment, & Careers in the 21st Century
SOC 160	Sociology of the Environment
SOC 163	Population Health: Social Determinants & Disparities in Health

SOC 164	Health Policy & Politics
SOC 178	Punishment & Corrections
SOC 180A	Complex Organizations
SOC 185	Social Policy
or SOC 185Y	Social Policy (Hybrid Version)

Cluster 4: Social Dynamics

SOC/IRE 104	The Political Economy of International Migration
SOC 125	Sociology of Culture
SOC 138	Economic Sociology
SOC 141	Industrialization & Social Change
SOC 143A	Urban Society
SOC 145A	Sociology of Third World Development
SOC 145B	Gender & Rural Development in the Third World
SOC 147	Sociological Perspectives on East Asia
SOC 148	Collective Behavior
SOC 156	Social Movements
SOC 157	Social Conflict
SOC 170	Population

Student-Initiated Thematic Cluster

Developed with a faculty advisor and approved by the Sociology Undergraduate Curriculum Committee.

(D)	8 units of Sociology beyond courses taken to fulfill above requirements, and outside of the course cluster used to fulfill requirement C.	8
-----	---	---

(E)	One additional elective upper division Sociology course not already used to fulfill other major requirements ¹	4
	Depth Subject Matter Subtotal	44

Total Units **73-75**

¹ May use 4 units of 192, 194HA, 195 or 199.

Sociology, Master of Arts

College of Letters & Science

Graduate Study

The Master of Arts degree is offered only in route to the Ph.D.

Graduate students in Sociology have the opportunity to pursue designated emphases in African American & African Studies, Critical Theory, Computational Social Science, Feminist Theory & Research, Human Rights, Science & Technology Studies, and Study of Religion.

Graduate Advisors

Sociology Graduate Advising (<https://sociology.ucdavis.edu/graduate/>)

Sociology, Doctor of Philosophy

College of Letters & Science

Graduate Study

The Department offers programs of study and research leading to a Ph.D. degree in sociology. Further information regarding graduate study may be obtained on our website (<https://sociology.ucdavis.edu/graduate/>).

Graduate students in Sociology have the opportunity to pursue designated emphases in African American & African Studies, Critical Theory, Computational Social Science, Feminist Theory & Research, Human Rights, Science & Technology Studies, and Study of Religion.

Soils & Biogeochemistry, Master of Science

College of Agricultural & Environmental Sciences

Graduate Study

The Soils & Biogeochemistry Graduate Group offers programs of study and research leading to M.S. and Ph.D. degrees. The focus of Soils and Biogeochemistry is on the physical, chemical and biological processes occurring in soils of different landforms and ecosystems. The goal is to understand the complex processes of mass and energy flow that control agricultural and natural ecosystem functions, productivity, and

sustainability. Investigations assess impacts and implications of natural processes and anthropogenic effects, such as climate change, on soil and ecosystem behavior and development. Examples include: fate and emission of greenhouse gases; soil carbon sequestration; fate and transport of native and applied chemicals; soil microbial ecology; nutrient uptake and management; nutrient cycling in managed and wildland ecosystems; pesticide and trace element adsorption on surfaces; mineral weathering; organic agriculture; bioavailability of toxics; soil erosion; conservation; ecosystem productivity and sustainability; and the study of soil evolution on the landscape. These studies are carried out within a framework of integrating applied chemical, physical, mathematical, and biological sciences.

Graduate Advisors

Kate Scow, Ph.D., Amelie Gaudin, Ph.D., Majdi Abou Najm, Ph.D., Anthony Toby O'Geen, Ph.D.

- Spanish, Doctor of Philosophy (p. 437)

Lusobrazilian Studies, Minor

College of Letters & Science

Department Office

Minor in Lusobrazilian Studies (<https://spanish.ucdavis.edu/minor-lusobrazilian-studies/>)

The Department of Spanish & Portuguese sponsors the minor in Lusobrazilian Studies, which offers students the opportunity to engage with the Portuguese-speaking world as a global space, as well as gain in-depth knowledge of Brazilian literature, culture and society. The minor is structured to facilitate engagement with Latin American, peninsular, and transatlantic topics, while ensuring that students master the essential skills of linguistic competence, and literary and cultural knowledge.

Education Abroad Program Options

We highly recommend that students participate in study abroad; see Study Abroad (<http://studyabroad.ucdavis.edu>). Courses taken abroad may count toward the Lusobrazilian Studies minor.

Minor Advisor

L. Bernucci, R. Newcomb

Note: Additional courses may count toward the minor with prior approval by a departmental advisor.

Total Units

23-24

Spanish, Bachelor of Arts

College of Letters & Science

The Major Program

The Spanish major program assures proficiency in all four language skills—speaking, understanding, reading, and writing—and acquaints students with the intellectual and cultural contributions of the Spanish-speaking world through a study of its language, literature, and cultural productions.

The Program

The department's lower division program gives students a solid foundation in the Spanish language, either through the traditional elementary and intermediate language series or through an accelerated three-course sequence of Spanish for native speakers. At the upper division level, students receive a broad introduction to basic concepts and the practice of literary and cultural criticism and to the four areas of study represented in the department's curriculum: Spanish linguistics, Spanish literature and culture, Latin-American literature and culture, and Latina/o literatures and cultures in the United States. Students are encouraged to work closely with the department's academic advisors in designing a program of studies tailored to their individual needs and interests. Many students combine the Spanish major with another major in the humanities or social sciences.

Advising

Given the great flexibility in the Spanish major, it is important that students design their programs in close consultation with their major advisor. This is especially important for students who intend to use their major as preparation for graduate study, for those who are planning a teaching career, and for those who wish to take advantage of our Education Abroad Program options.

Major Advisors

213 Sproul Hall.

Career Alternatives

The program, alone or in combination with other major programs, may lead to advanced study of the language or literature and culture of Spain and Spanish America, and to careers not only in teaching, but also in other professions such as library science, law, medicine, and in government, social service, business, or international relations.

Honors Program

Candidates for high or highest honors in Spanish must write a senior thesis under the direction of a faculty member. For this purpose, honors candidates must enroll in at least 6 units of SPA 194H distributed over two quarters. Normally, a student will undertake the honors project during the first two quarters of the senior year; other arrangements must be authorized by the department chair. Only students who, at the end of their junior year (135 units), have attained a cumulative GPA of 3.500 in courses required for the major will be eligible for the honors program. The requirements for earning high and highest honors in Spanish are in addition to the regular requirements for the major in Spanish.

UC Education Abroad Program Options

The department encourages its majors to consider study in a Spanish-speaking country with our UC Education Abroad Program (UCEAP). It is now possible for our students to complete significant portions of the Spanish major in the UCEAP centers at both the lower (Preparatory Subject Matter) and upper division levels through newly introduced options. See the Global Learning Hub (<https://globallearning.ucdavis.edu/>).

UC Davis Quarter Abroad

The Quarter Abroad Program offers programs in Mendoza, Argentina (fall quarter) and in Madrid, Spain (spring quarter). These programs aim at providing students with opportunities to increase their knowledge of the Spanish language and cultures by experiencing the life-learning challenges of living and studying abroad.

Students may earn 15-22 UC Davis units toward the Spanish major, minor, or foreign language requirement. Each program may offer an upper division course taught by the UC Davis Program Director focusing on history, culture and society.

For more information, see UC Davis Quarter Abroad.

Prerequisite Credit

Credit normally will not be given for a course if that course is the prerequisite of a course already successfully completed. Exceptions can be made by the Department Chairperson only.

NAS 184	Contemporary Indigenous Literature of Mexico	4

Educational Objectives

- *Linguistics*. Demonstrate knowledge of the Spanish speaking world's linguistic diversity through the comprehension of Spanish in a variety of situations, discursive modes and historical, regional or social variations. Demonstrates analytic, interpretative, and critical thinking skills; SPA 111N, SPA 113, SPA 115/SPA 115S, SPA 116, SPA 117, SPA 118, SPA 180.
- *Literature*. Demonstrate analytic, interpretative and critical thinking skills with respect to literary texts from Latin America, Spain, the United States and other countries in which there is a literary production in Spanish; SPA 100/SPA 100S, SPA 130, SPA 131N, SPA 134A/SPA 134B, SPA 142 (Spain); SPA 150N, SPA 151, SPA 157, SPA 159/SPA 159S (Latin America); SPA 117, SPA 174, SPA 176, SPA 177 (United States).
- *Culture*. Demonstrate cultural awareness with respect to the diversity of cultural products and manifestations produced in the Spanish speaking world (Latin America, Spain, the United States and other countries in which there is a cultural production in Spanish; SPA 100/SPA 100S, SPA 141/SPA 141S, SPA 170/SPA 170S, SPA 174).
- *Film and Art*. Demonstrate analytic interpretative and critical thinking skills with respect to linguistics, literature and cultural studies.

Department Office

4118B Mathematical Sciences; 530-752-1053; Statistics (<https://statistics.ucdavis.edu/>)

The B.S. Major

Data Science combines computational, mathematical and statistical reasoning to draw conclusions based on data. Data science techniques and methods can be applied to problems from virtually any discipline; for

example, in agricultural and environmental sciences, biological sciences, engineering, medical sciences and social sciences.

The Program

Data Science majors receive a Bachelor of Science degree. The program requires both theoretical and applied course work to underscore the strong interdependence of technical foundations in computer science, engineering, mathematics and statistics, and their applications to any field of inquiry relying on quantitative data analysis. The B.S. degree program has one track, the Foundations track.

B.S. in Data Science-Foundations Track emphasizes the underlying computer science, engineering, mathematics and statistics methodology and theory, and is especially recommended as preparation for graduate study in data science or related fields.

Career Opportunities

Inferential and computational techniques are used in many fields, including the agricultural and environmental sciences, biological sciences, social sciences, and health sciences, business, and engineering. The wide applicability of data science is reflected in the strong demand for graduates with data science training in both the public and private sectors. Employment opportunities include careers in data & policy analysis in government & industry, tech industry, insurance & healthcare industry, engineering, public health, biological & pharmaceutical research, law, and education. Students with an undergraduate degree in data science may enter advanced studies in data science, computer science, applied mathematics, statistics, economics, finance, psychology, medicine, business management & analytics, and other professional school programs.

Major Advisor

The Data Science major will not accept majors until Fall 2022. To learn more about other majors in the Department of Statistics that are currently accepting students, please consult Statistics Undergraduate Advising (<https://statistics.ucdavis.edu/undergrad/advising/>).

Statistics, Bachelor of Arts

College of Letters & Science

The Major Program

Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.

The Program

Statistics majors may receive either a Bachelor of Arts (A.B.) or a Bachelor of Science (B.S.) degree. Both the A.B. and the B.S. programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications and computational aspects of statistics. The B.S. degree program has five tracks: Applied Statistics Track, Computational Statistics Track, General Track, Machine Learning Track, and the Statistical Data Science Track. The A.B. degree program has one track.

A.B. in Statistics-Applied Statistics Track emphasizes statistical applications. This track is recommended for students who are interested in applications of statistical techniques to various disciplines, especially the social sciences.

Major Advisors

For a current list of faculty and staff advisors, see Undergraduate Advising (<https://statistics.ucdavis.edu/undergrad/advising/>).

Students are encouraged to meet with an advisor to plan a program as early as possible.

Career Alternatives

Probability models, statistical methods, and computational techniques are used in a great many fields, including the biological, physical, social, and health sciences, business, and engineering. The wide applicability of statistics is reflected in the strong demand for graduates with statistical training in both the public and private sectors. Employment opportunities include careers in data & policy analysis in government & industry, financial management, quality control, insurance & healthcare industry, actuarial science, engineering, public health, biological and pharmaceutical research, law, and education. Students with an undergraduate degree in statistics have entered advanced studies in statistics, economics, finance, psychology, medicine, business management & analytics, and other professional school programs.

Total Units 65-71

Statistics, Bachelor of Science

College of Letters & Science

The Major Program

Statistics enables us to make inferences about entire populations, based on samples extracted from those populations. Statistical methods can be applied to problems from almost every discipline and they are vitally important to researchers in agricultural, biological, environmental, social, engineering, and medical sciences.

The Program

Statistics majors may receive either a Bachelor of Arts or a Bachelor of Science degree. Both the A.B. and the B.S. programs require theoretical and applied course work and underscore the strong interdependence of statistical theory and the applications and computational aspects of statistics. The B.S. degree program has five tracks: Applied Statistics Track, Computational Statistics Track, General Track, Machine Learning Track, and the Statistical Data Science Track.

B.S. in Statistics-Applied Statistics Track emphasizes statistical applications. This track is recommended for students who are interested in applications of statistical techniques to various disciplines including the biological, physical and social sciences.

B.S. in Statistic-Computational Statistics Track emphasizes computing. This track is recommended for students interested in the computational and data management aspects of statistical analysis.

B.S. in Statistics-General Track emphasizes statistical theory and is especially recommended as preparation for graduate study in statistics.

B.S. in Statistics-Machine Learning Track emphasizes algorithmic and theoretical aspects of statistical learning methodologies that are

geared towards building predictive and explanatory models for large and complex data. It is recommended for students interested in pursuing graduate programs in statistics, machine learning, or data science, as well as for students interested in learning statistical techniques for industry.

B.S. in Statistic-Statistical Data Science Track emphasizes data handling skills and statistical computation. This track is recommended for students interested in statistical learning methodology, advanced data handling techniques and computational aspects of statistical analysis.

Major Advisors

For a current list of faculty and staff advisors, see Undergraduate Advising (<https://statistics.ucdavis.edu/undergrad/advising/>).

Students are encouraged to meet with an advisor to plan a program as early as possible.

Career Alternatives

Probability models, statistical methods, and computational techniques are used in a great many fields, including the biological, physical, social, and health sciences, business, and engineering. The wide applicability of statistics is reflected in the strong demand for graduates with statistical training in both the public and private sectors. Employment opportunities include careers in data & policy analysis in government & industry, financial management, quality control, insurance & healthcare industry, actuarial science, engineering, public health, biological & pharmaceutical research, law, and education. Students with an undergraduate degree in statistics have entered advanced studies in statistics, economics, finance, psychology, medicine, business management & analytics, and other professional school programs.

Statistics, Master of Science

College of Letters & Science

Alexander Aue, Ph.D., Chairperson of the Program
Jie Peng, Ph.D., Vice Chairperson for Graduate Affairs

Graduate Study

The Graduate Program in Statistics offers programs of study and research leading to M.S. and Ph.D. degrees. The M.S. gives students a strong foundation in the theory of statistics as well as substantial familiarity with the most widely used statistical methods. Facility in computer programming is essential for some of the course work. The supervised statistical consulting required of all M.S. students has proven to be a valuable educational experience. The Ph.D. program combines advanced course work in statistics and probability with the opportunity for in-depth concurrent study in an applied field. For detailed information contact the Chairperson of the Program or the Graduate Advisor.

Standard Track: 32 units of core coursework and 12 units of electives are required for a total of 44 units.

Emphasis in Data Science Track: 36 units of core coursework and 12 units of electives are required for a total of 48 units.

Preparation

Preparation for the graduate program requires a year of calculus, a course in linear algebra, facility with a programming language and upper division coursework in mathematics and/or statistics. For admission to the Ph.D. program, course work requirements for the master's degree, and at least one semester/two quarters of advanced calculus must be completed.

Graduate Advisor

Jie Peng (Statistics)

Textiles, Master of Science

Graduate Studies

Graduate Study

The Graduate Group in Textiles offers a program of study and research leading to the M.S. degree. Students in the program are trained in an interdisciplinary approach emphasizing the physical and behavioral science aspects of textiles. Research areas include chemical, physical, biochemical, and mechanical properties of fibers and polymers as well as fibrous assemblies, including fabrics, composites, paper, and nonwovens; and psychological and sociological factors relating to perception and consumption of textiles and apparel. Extensive specialized fiber, polymer, and textiles research facilities and a behavioral research laboratory are available. For detailed information regarding the program, contact the Chairperson of the Group.

216A Art Building; 530-752-8710; Dramatic Art M.F.A. (<http://arts.ucdavis.edu/mfa-dramatic-art/>); Faculty (<http://arts.ucdavis.edu/theatre-dance-faculty/>)

Graduate Study

The Department of Theatre & Dance offers programs of study and research leading to the M.F.A. in Dramatic Art (the interdisciplinary weaving of acting, directing, design, choreography and practice and research) and contributing to the Graduate Group Ph.D. in Performance Studies (p. 355). Detailed information may be obtained by contacting the Graduate Program Administrators: for the M.F.A. in Theatre & Dance, 530-752-8710; Graduate Group in Performance Studies (p. 355), 530-754-6973.

Theatre & Dance, Bachelor of Arts

College of Letters & Science

The A.B. degree in Theatre & Dance provides students with an appreciation for an understanding of performance and its role in culture and society. The program offers a strong foundation in all aspects of drama, theatre, dance performance, and production. Students build significant skills in specific areas (including acting, directing, choreography, design, playwriting, devising, production skills and management) as well as achieving a broad knowledge of theatre and dance.

Productions & Facilities

Each year's schedule includes opportunities to work with professional artists (directors, choreographers and writers) in three Granada Artists-in Residence productions; the Main Stage Dance/Theatre Productions; Catalyst: A Theatre Think Tank, Film Festival at UC Davis; projects generated through the Institute for Exploration in Theatre, Dance and Performance; and workshops and performance projects developed by M.F.A and Ph.D. students. These productions are staged in our proscenium (Main), thrust (Wyatt), black box (Arena), performance studio (Della Davidson Performance Studio) and intimate laboratory theatre (Lab A), as well as the Mondavi Center's Vanderhoef Studio Theatre. These productions are part of the academic program of the department and serve an important purpose in the study of theatre and dance. Participation is open to all students.

Production Requirements

All students completing a major in Theatre & Dance must participate in productions, including work in at least two of the following three areas: acting/dance; design (scenic, costume, lighting, painting, props, sound);

directing/playwriting/stage management, as well as crew assignments for a minimum of two productions and work in production labs.

Graduate Study

The Department of Theatre & Dance offers programs of study and research leading to the M.F.A. in Dramatic Art (the interdisciplinary weaving of acting, directing, design, choreography, practice and research) and contributing to the Graduate Group Ph.D. in Performance Studies (p. 355). Detailed information may be obtained by contacting the Graduate Program Administrators: for the M.F.A. in Dramatic Art, 530-752-8710, and for the Graduate Group in Performance Studies (p. 355), 530-754-6973.

Transportation Technology & Policy, Master of Science

Graduate Studies

Graduate Study

The Graduate Group in Transportation Technology & Policy offers the M.S. (Plan I—thesis; and Plan II—exam), and Ph.D. degrees. Students complete three core courses in technology, policy, and data science and choose one of three tracks: Vehicles & Fuels, Demand & Behavior or Infrastructure & Operations. The curriculum draws on multiple disciplines including civil, mechanical, and environmental engineering, economics, statistics, political science, psychology, sociology, geography, and urban planning.

Preparation

Applicants will normally be expected to have completed two courses in calculus and one course each in calculus level statistics and microeconomics.

Program of Study

M.S. students complete three core courses, two track courses, two skills courses plus electives. Ph.D. students take the same plus an additional skill course and additional electives. Master's degrees require a minimum of 36 quarter units and doctoral degrees require a minimum of 54 units. M.S. Plan I students may replace up to 6 units of regular course work with research (course 299) units. At least two thirds of all credits must be at the graduate level.

University Writing Program

College of Letters & Science

John Marx, Ph.D., Interim Program Director

Program Office

109 Voorhies Hall; 530-752-6283; University Writing Program (<http://writing.ucdavis.edu>)

The Program

The University Writing Program (UWP) offers writing courses and seeks to improve writing instruction across campus through a variety of programs. The UWP coordinates first year, intermediate, and advanced writing courses that satisfy college composition requirements and offers courses in writing across the curriculum, writing in specific disciplines, and writing in the professions. The Professional Writing Minor serves students from all majors who are planning careers as professional writers or editors, as well as those whose academic and professional careers demand advanced writing skills. The Program offers graduate courses in the teaching of writing and in composition theory, history, and research. The Designated Emphasis in Writing, Rhetoric, and Composition Studies offers Ph.D. students in affiliated programs the opportunity to prepare for leadership roles in writing research, teaching, and program administration. The UWP also administers the English Composition Examination, an alternative way to satisfy the advanced writing requirement. The UWP publishes an annual anthology

of exemplary student writing, Prized Writing, and a journal for writing instructors, *Writing on the Edge*. The Writing in the Disciplines Workshop Program presents workshops on teaching writing for faculty and TAs and workshops on writing for students. The Writing Ambassadors Program trains advanced undergraduates and places them as interns in K-12 classrooms to improve writing instruction.

- Viticulture & Enology, Bachelor of Science (p. 451)

Viticulture & Enology, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

The Viticulture & Enology major provides an interdisciplinary education in the biological and physical principles underlying grape and wine production as well as practical knowledge of grape growing (viticulture) and wine making (enology). This program provides the knowledge base for problem-solving and decision-making in commercial grape and wine production.

Preparatory Requirements

Before transferring into the Viticulture & Enology major, students must complete the following courses with a grade of C- or better and with a combined grade point average of at least 2.500 at the University of California (at least 3.000 for similar courses taken at community college) for these and all other preparatory courses. In addition, students' overall UC GPA must be 2.250 or higher. All courses must be taken for a letter grade.

Requirement	Units
BIS 002A	5
CHE 002A, 002B, 002C, 008A	17
MAT 016A	3
PHY 001A, 001B or 007A	4-6

Recommendations

Completion of UC Davis equivalents of the following preparatory courses for the major are not required for entry but are highly recommended. Failure to complete these will delay entry into required upper division courses and may thus delay graduation. Some courses may be available at UC Davis during Summer Session:

Requirement	Units
CHE 008B	4
MAT 016B	3
PLS 002	4
BIS 102	3

The Program

The curriculum builds upon a foundation of biology, chemistry, biochemistry and mathematics with specialized courses related to grape and wine production. To complete the program, students may choose to place particular emphasis on viticulture, enology or economics. Credit may also be earned for foreign language study and internships.

Major Advisors

H. Heymann

Related Major Programs

Food Science & Technology; Plant Sciences.

Career Alternatives

Graduates are qualified for a variety of vineyard and winery positions, including production management, quality control and research. Additionally, they may work in related fields such as pest management, nursery production and analytical services.

Graduate Study

Several graduate groups offer programs of study leading to advanced degrees in the fields of viticulture and enology. For the M.S. or Ph.D. degree, see Agricultural & Environmental Chemistry (Graduate

Group) (p. 57), Engineering: Chemical Engineering (p. 121), Ecology (Graduate Group) (p. 183), Food Science (Graduate Group) (p. 230), Integrative Genetics & Genomics (Graduate Group) (p. 271), Horticulture & Agronomy (Graduate Group) (p. 254), Microbiology (Graduate Group) (p. 313), Plant Biology (Graduate Group) (p. 373), Plant Pathology (p. 373), Soils & Biogeochemistry (Graduate Group) (p. 433), and Viticulture & Enology (Graduate Group) (p. 454).

Viticulture & Enology, Master of Science

Graduate Studies

Graduate Study

The M.S. program offers advanced studies in viticulture and enology, ranging from the genetics, physiology and biochemistry of grapevines to the chemistry, microbiology and sensory science of wines and the

chemical engineering of winemaking. Priority application deadline January 15, applications accepted until May 15.

Ph.D. studies are not offered by the Graduate Program in Viticulture & Enology.

Preparation

Applicants to the program are required to have a level of competence equivalent to that of a strong science undergraduate program. This includes coursework in biology, general chemistry, organic chemistry, calculus, statistics (analysis of variance), biochemistry, microbiology, and economics.

Specific requirements are outlined in detail and may be obtained by visiting Viticulture & Enology Graduate Group (<http://vengg.ucdavis.edu>).

Wildlife, Fish & Conservation Biology, Bachelor of Science

College of Agricultural & Environmental Sciences

The Major Program

The Wildlife, Fish & Conservation Biology major deals with the relationships between the requirements of wildlife and the needs of people. Understanding these relationships is vital for the maintenance of ecological diversity, recreational resources, and food supplies. Students completing the major possess a broad knowledge of ecology and natural history, but with the quantitative skills to use this knowledge in critical thinking and decision-making.

The Program

The major emphasizes broad training in biological sciences, with specialization in one of four areas. The major is designed primarily for students interested in becoming professionals in the diverse fields of wildlife, fish, & conservation biology, including veterinary & wildlife health sciences. The breadth of course requirements, when combined with electives, also make this an excellent preparatory major for secondary school teaching. Certification by professional societies such as The Wildlife Society, American Fisheries Society, or the Ecological Society of

America, or preparation for graduate studies may also be achieved by careful planning of electives with a faculty advisor.

Lead Faculty Advisor

Douglas Kelt

Wildlife, Fish, & Conservation Biology Major Advisor

Erica Cefalo

Students transferring to UC Davis from another institution or new students declaring the major of Wildlife, Fish & Conservation Biology must consult the major advisor so that their program can be evaluated and a faculty advisor assigned. Advising is located in 1086 Academic Surge and can be reached by email at wfcbadvising@ucdavis.edu.

Career Alternatives

The major prepares students to excel in the dynamic fields of environmental and conservation biology, emphasizing vertebrate animals—both native and invasive—in their natural environments, as well as resolution of conflicts between humans and wild animals. Positions now held by graduates of this major include wildlife biology, fisheries biology, wildlife damage management, and resource biologists and managers with local, state, and federal agencies, biologists or consultants with private industries such as environmental consulting firms, commercial fishing businesses, electrical utilities, sporting clubs or businesses, and aquaculture operations, as well as veterinarians, medical physicians, and professors/researchers who teach and/or conduct research in academic institutions.

PHY 007C	General Physics

Total Units**16-24**

Wildlife, Fish & Conservation Biology, Minor

College of Agricultural & Environmental Sciences

The minor in Wildlife, Fish & Conservation Biology is designed for students interested in basic training and understanding of the ecology and conservation of wild terrestrial and aquatic vertebrates, emphasizing birds, mammals, amphibians, reptiles, and fish, but with relevance and application to all life forms.

Lead Faculty Advisor

Douglas Kelt

Code	Title	Units
WFC 100	Field Methods in Wildlife, Fish, & Conservation Biology	4
WFC 151	Wildlife Ecology	4
WFC 154	Conservation Biology	4

WFC 192	Internship	
WFC 195	Field & Laboratory Research	
WFC 197T	Tutoring in Wildlife & Fisheries	
WFC 198	Directed Group Study	
WFC 199	Special Study for Advanced Undergraduates	

Total Units**20-31**

(4) Individualized

Students may, with prior approval of their advisor and the curriculum committee, design their own individualized specialization within the major. The specialization will consist of at least four upper division courses with a coherent theme.

ADDITIONAL EDUCATION OPPORTUNITIES

- Bodega Marine Laboratory Program (p. 458)
- First-Year Seminar Program (p. 458)
- Independent Study Program (p. 458)
- Internship Program (p. 459)
- UC Washington Program (UCDC) (p. 459)
- University Honors Program (p. 460)

Bodega Marine Laboratory Program

Bodega Marine Laboratory
P.O. Box 247
Bodega Bay, CA 94923
707-875-2211; Bodega Marine Laboratory (<http://bml.ucdavis.edu/>)

Integrative marine science courses at Bodega Marine Laboratory (BML) offer a multidisciplinary understanding of coastal systems through hands-on research, lab and field-based courses. The program includes courses during spring quarter, Summer Sessions One and Two.

Spring Quarter Program

The spring quarter curriculum is currently under revision and a new integrated curriculum will be in place in the near future that is 12-15 units. For updates, check Bodega Marine Laboratory (<http://bml.ucdavis.edu/>). Scholarships will be available to defray the costs of housing at BML.

For more details, follow developments of the spring quarter curriculum at Bodega Marine Laboratory (<http://bml.ucdavis.edu/>).

Summer Session Courses

This integrated program offers students a multidisciplinary understanding of coastal ecosystems and oceanography through intensive, hands on lab and field courses taught at Bodega Marine Laboratory. Students can take up to 10 units in each Summer Session. Applications are due in Spring of each year. Scholarships are available to defray the costs of housing at BML.

For more course detail, see the full description under the appropriate academic department listing or Bodega Marine Laboratory (<http://bml.ucdavis.edu/>).

Offerings Include

Summer Session One

Coastal Marine Research and Experimental Invertebrate Biology. BIS 124, EVE 114

Effects of Coastal Pollution on Marine Organisms. ETX 127/NUT 127

Summer Session Two

Biological Oceanography. GEL 150C /ESP 150C

Coastal Oceanography. ESP 152

Global Change Ecology. EVE 120

Marine & Coastal Field Ecology. ESP 124

Course offerings, sequence structure and instructors may vary from year to year.

Bodega Marine Laboratory spring and summer programs can be residential, with students housed on the laboratory grounds. Residential students are assessed a room and board fee in addition to standard campus registration fees. Students may choose to commute for Summer Session Two. Financial aid may be available to eligible students from campus. Scholarships are available from Bodega Marine Laboratory. Applications and consent of instructors are required.

For additional information, contact 707-875-2211 or see Bodega Marine Laboratory (<http://bml.ucdavis.edu/>).

First-Year Seminar Program

Program Office

1350 The Grove; First-Year Seminars Program (<http://fys.ucdavis.edu>)

First-Year Seminars (<http://fys.ucdavis.edu>) are an exciting program of small, innovative classes that reflect the instructor's intellectual interests. Limited to 19 first-year undergraduate students each, these once-in-a-lifetime courses promote intellectual exchange, critical thinking, and community. Students have the opportunity to study with faculty members, often meeting in settings more informal than the ordinary classroom. For complete information, see UC Davis First-Year Seminars Program (<http://fys.ucdavis.edu>).

Independent Study Program

Chair, Committee on Courses of Instruction, c/o Academic Senate Office; 530-752-2220.

The Independent Study Program provides an opportunity for upper division students to design and pursue a full quarter (12-15 units) of individual study in an area of special interest.

A program qualifying as Independent Study will consist of one or more courses in the 190–199 series. While the theme of such a program may be reasonably broad, a recognizable common thread should unite all the academic work you undertake during an independent study quarter. Regularly offered formal courses will only be acceptable as a part of such a program if they clearly fit its theme and contribute something essential toward the realization of its objectives. The program is not to be considered a way to take more variable-unit courses than normally permitted.

The procedure for enrolling in an Independent Study Program is as follows:

1. Develop, in general terms, a plan of study.
2. Locate a faculty sponsor or panel of sponsors and with their help and approval develop a detailed plan.
3. Complete a project proposal form (obtained from the Academic Senate office) and submit it to the Academic Senate Committee on Courses of Instruction.

The deadline for applications is the tenth day of instruction of the term before; for specific dates, see the Academic Calendar (<https://registrar.ucdavis.edu/calendar/quarter/>).

Note. Most courses in the 190-199 series are graded on a "Passed/Not Passed" basis unless the instructor has obtained approval for letter grading from the Academic Senate Committee on Courses of Instruction. Requests for letter grading must be received by the Senate Committee

no later than the fifteenth day of instruction in the quarter in which the course is offered.

You must report the completion or termination of the project to the Academic Senate Committee on Courses of Instruction.

Internship Program

Marcie Kirk Holland, Executive Director

Internship & Career Center (ICC) (<http://icc.ucdavis.edu>); South Hall; 530-752-2855

Program Areas

Agricultural & Environmental Sciences, Career Recruiting Programs, Engineering & Physical Sciences, Masters, Ph.D.s and Postdoctoral Scholars, Health & Biological Sciences, International Programs, Liberal Arts & Business, and Student Employment.

Internship Experience

An internship (also known as experiential education) is a work experience that is either directly related to your major field of study or your career interest. Internships are an opportunity to develop your skills and knowledge under the supervision of a professional. The Internship and Career Center facilitates a campus-wide internship program. All internships, both credit and non-credit, can be taken for Transcript Notation with completion of required evaluation reports submitted through Handshake (<https://ucdavis.joinhandshake.com/login/>). The notation briefly describes the nature and location of the internship experience. Questions pertaining to Transcript Notation may be directed to the Internship & Career Center.

Course Credit

Academic credit is granted through academic departments and graduate groups. The ICC advising staff can assist you in identifying internship opportunities and provide information about academic credit.

Internship courses (092, 192, & 292) are available for credit on a variable-unit and Passed/Not Passed (P/NP) grading basis. For most students, a maximum of 12 units of P/NP courses may be counted toward the 180-unit minimum needed for graduation. To qualify for the 192 course, students must have acquired 84 units of credit. All credited internships require approval and sponsorship by a faculty member from an appropriate discipline. Arrangements may be made through the department of the sponsoring faculty member and facilitated by the Internship & Career Center Staff.

UC Washington Program (UCDC)

UC Davis Washington Program Office

1350 The Grove; 530-752-9095; Washington Program (<http://washingtonprogram.ucdavis.edu>)

Residential Program Location

1608 Rhode Island Avenue, NW, Washington, D.C. 20036

The University of California hosts a system-wide academic and residential program for undergraduate students attending from each of the UC campuses. Housed within the UC Washington Center (UCDC), an 11-story, state of the art facility, convenient to public transportation

and located in downtown D.C., the program provide undergraduates the opportunity to enrich their education while in residence for one quarter in the nation's capital. The program's principal activities include enrollment in credit-bearing courses, participation in academic internships, and opportunity to explore the many educational, cultural, and historical activities in the Washington D.C. area.

Program of Study

UCDC is open to undergraduates from all majors. Preference is given to students who will have upper division standing by the start of the quarter in which they plan to participate, though 2nd year students may participate if they have substantial work, internship, and/or volunteer experience on their resume. A GPA of at least 3.000 is recommended for admission although not required. Applicants are evaluated based on overall relevant employment, internship, and volunteer experiences, written statement, and letter(s) of recommendation (only one is required).

Academic Year Component (11 weeks)

Students earn academic credit and continue to be registered as full-time UC Davis students during the quarter in which they participate.

- **Internship (Mandatory; 8 units).** Students work three to four days per week (24-32 hours per week) as interns in think-tanks, museums, Congress, federal agencies, interest groups, trade associations, research institutions, media corporations, or in other organizations related to the interests and objectives of individual students.
- **Core Seminar (Mandatory; 4 units).** Each student enrolls in a core seminar exploring a variety of topics related to Washington DC. Course subject matter varies from term to term but is typically related to international relations, history, political science, public policy and other social sciences; the arts and humanities; and science policy. In addition to regular instruction, seminars often include guest speakers, observations of congressional committees and federal agencies, and other relevant Washington experiences. Students who would like to fulfill major requirements may do so by following the policy of their major department for receiving course equivalency. For more information, students should speak with their major advisor.
- **Elective Seminar Course (Optional; 4 units).** Each student may optionally enroll in an additional upper division seminar course taught at UCDC. Course subject matter varies from term to term but is typically related to international relations, history, political science, public policy and other social sciences; the arts and humanities; and science policy. As with the Core Seminar, students who would like to fulfill major requirements may do so by following the policy of their major department for receiving course equivalency. For more information, students should speak with their major advisor.

Courses are taught by UCDC faculty appointed by the various UC campuses, or visiting faculty from the Washington area.

Financial aid eligibility and awards as determined by the UC Davis campus is maintained while enrolled in the program, and the aid package will be adjusted to reflect the additional costs of the program.

Summer Component (10 weeks)

UCDC also offers a 10-week Summer Program with a credit or non-credit option. The credit option allows students to receive up to 8 internship units. Students pay the summer sessions rate per credit hour plus an application fee. The non-credit option (internship only) has no enrollment fee. Both options have a required housing cost and allow students to participate in many educational, cultural, historical and social activities

while living in Washington D.C. and require students to intern for four to five days a week (32-40 hours per week).

University Graduation Requirements

- All prospective applicants should carefully plan their course programs in order to satisfy university, college, and major/minor requirements for their degree.
- Although units and grade points earned at UCDC are incorporated into the University transcript and GPA calculation, departments and programs retain the right to determine which UCDC courses will be accepted in satisfaction of major and minor requirements.
- All degree candidates must meet the University residence requirement. Students should consult with their college Dean's office early during the UCDC planning process for information on the university residence requirement, particularly students who intend to study abroad or participate in UCDC during their senior year.

Recognizing the special value of UCDC, the faculty has approved two exceptions to the usual residence requirement for students participating in the Washington Program:

- Students planning to graduate immediately upon completion of participation in UCDC may satisfy the University residence requirement by completing at least 35 of their final 45 units on the Davis campus immediately preceding entry into UCDC.
- Students who have not finished all of their degree requirements following completion of their participation in the UCDC program may satisfy the University residence requirement by completing at least 35 units, including at least 12 units after returning from UCDC, on the Davis campus within the final 90 units earned toward the degree.

Students who will not meet the residency requirements outlined may petition their Dean's office requesting an exception to policy:

- Students may satisfy GE requirements while at UCDC but should consult with their college Dean's office prior to departure for information on the certification process.
- Students with a large number of units may participate in the UCDC program provided that (1) they will not exceed 225 units prior to their departure and (2) that all their degree requirements have been fulfilled either before they leave campus or during their time at UCDC. Participants may only return to campus from UCDC to complete any outstanding degree requirements provided that they can do so within the 225 unit restriction.

University Honors Program

Milmon Harrison, Ph.D., Director

Program Office

1350 The Grove; 530-752-3225; University Honors Program

Faculty

Includes members from various departments across colleges.

The Program of Study

The University Honors Program (UHP) course of study is designed to enhance the undergraduate experience of high achieving, high potential, and socially conscious undergraduate students from all academic pathways. The University Honors Program is an interdisciplinary, campus-

wide honors program that fosters active and collaborative discovery through unique, small course opportunities, which facilitate close faculty contact and dynamic peer interaction.

General Education (GE) courses, seminars, and special study opportunities constitute the UHP course offerings. First-year and second-year UHP students complete six UHP courses during their first two years—one per quarter. Upper division and transfer students complete research and service learning projects, seminar, and education abroad opportunities. Students receive transcript notation for each program year successfully completed.

UHP courses and seminars provide a small, liberal arts college setting, coupled with the resources and opportunities of a world-class research university to engage critical thinking, affective learning, and interpersonal expression. Updated program information is available at University Honors Program. A complete list of courses is made available to admitted students through the UHP office.

Only active UHP students may register for HNR and IST course codes, except by consent of the program and instructor.

ABOUT COURSES

Courses listed in this catalog are subject to change without notice.

Use this guide to understand course descriptions & requirements.

Course Descriptions

Below is a sample of how a course is listed in this catalog:

AAS 100 – Survey of Ethnicity in the US (4 units)

Description:

Learning Activities:

Prerequisite(s):

Enrollment Restriction(s):

Credit Limitation(s):

Cross Listing:

Repeat Credit:

General Education:

Grade Mode:

This course version is effective from, and including: Fall Quarter 2022

- The top line is the course subject code and course number—title; units.
- Below are the various attributes for each course. An attribute, like *Cross Listing* or *General Education*, only appears if there is data.
- **Course changes during the catalog year** appear with a warning reading *This version has ended; see updated course, below*, under the title line (see example, below). The change may be anything from a unit change to the course being discontinued.

The last line is the term the course is effective *in this configuration; not when the course is taught*. Pay attention to the effective term; this is the *first* term the change is effective or the term the course is discontinued. A course that has one or more versions in a catalog year shows the latest version at the bottom of the roll-down box (see example, below).

PLS 130 — Rangelands: Ecology, Conservation & Restoration (3)

This version has ended; see updated course, below.

Course Description: Introduction to the ecological principles and processes important for an understanding of the dynamics of range ecosystems. Emphasis on ecological and evolutionary concepts underlying management strategies for conserving biological diversity and environmental quality in rangelands.

Prerequisite(s): [PLS 002](#) or [BIS 002B](#) or [BIS 002C](#); or consent of instructor. Upper division standing.

x

Learning Activities: Lecture 3 hour(s).

Credit Limitation(s): Not open for credit to students who have completed [AMR 130](#). (Former [AMR 130](#).)

Grade Mode: Letter.

General Education: Science & Engineering.

Grassland Ecology (3)

Course Description: Comprehensive survey of grassland ecology including distributions of major grassland types; systematics; morphology, physiology, and diversity of grassland species; population, community, and ecosystem processes occurring in grasslands; the role of grazing, fire, and drought in grasslands; management and conservation.

Learning Activities: Lecture 3 hour(s).

Prerequisite(s): [PLS 002](#) or [BIS 002B](#) or [BIS 002C](#); or consent of instructor; upper division standing.

General Education: Science & Engineering.

Grade Mode: Letter.

This course version is effective from, and including: Winter Quarter 2023.

General Education (GE Credit)

For complete information, see General Education (GE) Requirement (p. 38).

Courses Taught Abroad

Some courses carry the "May be taught abroad" designation. If so, for more details, registration requirements, and information, check with your advisor and the Global Learning Hub (<https://globallearning.ucdavis.edu/>).

Prerequisites

Prerequisites for most undergraduate courses are checked by Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>). It is the student's responsibility to meet these requirements and the instructor's responsibility to enforce them. Students who have completed equivalent work may be admitted to the course at the instructor's discretion. For complete information, see Student Information on Prerequisites (<https://registrar.ucdavis.edu/registration/register-for-classes/prerequisites/>).

Undergraduate Courses

001-099, Lower Division Courses

Courses open to students for lower division credit who have met the necessary prerequisites and enrollment restrictions as indicated in Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>); designed primarily for freshmen and sophomores.

100-199, Upper Division Courses

Courses open to students who have met the necessary prerequisites and enrollment restrictions as indicated in Schedule Builder (<https://my.ucdavis.edu/schedulebuilder/>). Preparation generally includes completion of one lower division course in the given subject or completion of two years of college work.

090X/190X

Seminar courses for in-depth examination of a special topic within the subject area.

092/192

Internship courses enable individual students to obtain practical experience to complement their educational goals or to explore potential career interests and opportunities. Students must have completed 84 units before enrolling in course 192.

097T&C/197T&C

Tutoring and Tutoring in the Community courses for students who want to tutor in a subject in which they are proficient—generally in their major field—while enrolled as an undergraduate.

098/198

Directed Group Study courses are set up on a one-time basis for a group of students in a subject for which no regular courses have been established.

099

Special Study for Undergraduates courses arranged for an individual student who shares, with an instructor, an academic interest that cannot be accommodated within the formal course structure; credit is limited to a total of 5 units per term.

190C

Research Conference courses where advanced undergraduate students may participate in critical discussions of research activities. These one-unit courses are graded on a Passed/Not Passed basis.

194H

Special Study for Honors Students courses are for individual students with honor status, as determined by the department offering the course and who have completed 84 units; credit is limited to a total of 5 units per term.

199

Special Study for Advanced Undergraduates courses are the upper division counterparts of course 099 and involve supervised independent study and research requiring an adequate background in the subject proposed for study as well as prior completion of 84 units; credit is limited to a total of 5 units per term.

Variable-Unit

Subject to approval by the department chair, an instructor may arrange to give a special study course to interested students; numbers include 090X, 092, 097T, 097TC, 098, 099, 190X, 192, 194H, 197T, 197TC, 198, 199.

Auto tutorial

Courses where students instruct themselves at their own pace. Courses can be identified by the letters AT at the end of their course numbers; e.g., 013AT, 141AT.

Graduate Courses**200-299**

Courses open to graduate students and to undergraduates who have completed 18 units of upper division basic work related to the subject matter of the course. However, admission is subject to the approval of the instructor in charge of the course. Grading in 290C courses and most

variable-unit 299 or 299D courses is Satisfactory/Unsatisfactory (S/U). Check the course description for grading information.

300-399, Professional Courses for Teachers & Nurse Practitioners

Professional courses for teachers and nurse practitioners are teacher-training courses in the School of Education and in other departments and are specifically intended for teachers or prospective teachers. Courses designed to provide instruction to teaching assistants are included. Courses for certification of family nurse practitioners and physician assistants are also included. Courses are open only to students enrolled in those programs.

400-499, Other Professional Courses

Professional training courses. Graduate students should consult their faculty advisor or contact Graduate Studies before registering in 400 series courses to determine if graduate credit may be awarded for the course in question.

Virtual & Hybrid Courses

Courses where instruction is delivered on the Internet. Courses delivered completely online are identified by the letter V at the end of their course numbers, e.g., 010V, 162V. Hybrid courses are a combination of online and classroom activities and are identified by the letter Y at the end of their course numbers, e.g., 010Y, 162Y.

Multi-Quarter Courses

A series of course numbers followed by two or three letters (for example, Physics (PHY) 110A-110B-110C) is continued through three successive quarters; e.g., fall through spring. The first quarter course listed this way is a prerequisite to the second and the second is a prerequisite to the third. On the other hand, where A and B portions of a course are listed separately (for example, Economics (ECN) 160A & 160B), the A course is not a prerequisite to B, unless A is specifically mentioned in the list of B prerequisites.

Cross-Listed Courses

A cross-listed course (shown as *Cross Listing:*) is a single course offered collaboratively through two or more departments or programs. Cross-listed courses have identical content. If a student passes one course in the cross-listing, they cannot register for the partner course(s).

Expanded Course Descriptions

You may find that the descriptions in the General Catalog do not include all the information you would like about a course. Expanded Course Descriptions are available for on-campus use at the College dean's offices or the Biology Academic Success Center (<https://basc.biology.ucdavis.edu/>), advisors' offices, advising centers, and departmental offices.

COURSES BY SUBJECT CODE

A

- Aerospace Science & Engineering (EAE) (p. 465)
- African American Studies (AAS) (p. 467)
- Agricultural & Environmental Chemistry (AGC) (p. 473)
- Agricultural & Environmental Technology (TAE) (p. 473)
- Agricultural & Resource Econ (ARE) (p. 473)
- Agricultural Education (AED) (p. 483)
- American Studies (AMS) (p. 484)
- Anatomy, Physiology, & Cell Biology (APC) (p. 489)
- Anesthesiology (ANE) (p. 489)
- Animal Behavior (ANB) (p. 491)
- Animal Biology (ABI) (p. 492)
- Animal Biology Graduate (ABG) (p. 493)
- Animal Genetics (ANG) (p. 494)
- Animal Science (ANS) (p. 496)
- Anthropology (ANT) (p. 504)
- Applied Biological Systems Technology (ABT) (p. 518)
- Applied Science Engineering-Davis (EAD) (p. 521)
- Arabic (ARB) (p. 522)
- Art History (AHI) (p. 525)
- Art Studio (ART) (p. 533)
- Asian American Studies (ASA) (p. 542)
- Astronomy (AST) (p. 545)
- Atmospheric Science (ATM) (p. 546)
- Avian Sciences (AVS) (p. 551)

B

- Biochemistry, Molecular, Cellular, & Developmental Biology (BCB) (p. 554)
- Biological Chemistry (BCM) (p. 555)
- Biological Sciences (BIS) (p. 557)
- Biological Systems Engineering (EBS) (p. 561)
- Biomedical Engineering (BIM) (p. 567)
- Biophotonics (BPT) (p. 579)
- Biophysics (BPH) (p. 579)
- Biostatistics (BST) (p. 580)
- Biotechnology (BIT) (p. 581)
- Business Analytics (BAX) (p. 582)

C

- Cardiology (CAR) (p. 584)
- Cell Biology & Human Anatomy (CHA) (p. 585)
- Chemical Engineering (ECH) (p. 587)
- Chemistry (CHE) (p. 595)
- Chicano Studies (CHI) (p. 608)
- Chinese (CHN) (p. 615)
- Cinema & Digital Media (CDM) (p. 621)
- Cinema & Technocultural Studies (CTS) (p. 626)
- Civil & Environmental Engineering (ECI) (p. 627)
- Classics (CLA) (p. 641)

- Clinical Research (CLH) (p. 646)
- Cognitive Science (CGS) (p. 649)
- College of Letters & Science (LTS) (p. 650)
- Communication (CMN) (p. 650)
- Community & Regional Development (CRD) (p. 660)
- Comparative Literature (COM) (p. 665)
- Computer Science Engineering (ECS) (p. 675)
- Consumer Sciences (CNS) (p. 692)
- Critical Theory (CRI) (p. 692)
- Cultural Studies (CST) (p. 693)

D

- Dermatology (DER) (p. 694)
- Design (DES) (p. 695)
- Designated Emphasis, Biotechnology (DEB) (p. 706)
- Dramatic Art (DRA) (p. 706)

E

- East Asian Studies (EAS) (p. 719)
- Ecology (ECL) (p. 719)

- Wildlife, Fish, & Conservation Biology (WFC) (p. 1352)
- Women's Studies (WMS) (p. 1357)

Aerospace Science & Engineering (EAE)

College of Engineering

EAE 001 – Introduction to Aerospace Science Engineering (1 unit)

Course Description: Description of the field of aerospace engineering with examples from industry, government, and research. Aerospace engineering principles, ethics, and responsibilities.

Learning Activities: Lecture 1 hour(s).

Grade Mode: Pass/No Pass only.

EAE 010 – From the Wright Brothers to Drones & Quadcopters (2 units)

Course Description: History of aircraft and its influence on society. Topics covered will include Unmanned Aerial Vehicles, safety considerations, economics and privacy issues. Aerodynamics, stability and control will also be introduced.

Learning Activities: Lecture 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering or Social Sciences.

EAE 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor; lower division standing.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

EAE 126 – Theoretical & Computational Aerodynamics (4 units)

Course Description: Development of general equations of fluid motion. Study of flow field kinematics and dynamics. Flow about a body. Thin airfoil theory. Viscous effects. Applications of numerical methods to wing analysis and design.

Prerequisite(s): ENG 103 C- or better; ENG 105 C- or better; (ENG 180 C- or better or EAD 115 C- or better or MAT 128C C- or better or EME 115 C- or better).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 127 – Applied Aircraft Aerodynamics (4 units)

Course Description: Principles, governing equations, and predictive theories for aircraft aerodynamics. Lift and drag of 2D airfoils, 3D wings, and high-lift devices.

Prerequisite(s): EME 106 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering; Writing Experience.

EAE 129 – Stability & Control of Aerospace Vehicles (4 units)

Course Description: Aircraft and spacecraft stability and control. Derivation of fundamental equations of motion for aircraft/spacecraft. Fundamentals of feedback. Aircraft flight control systems. Spacecraft attitude control systems.

Prerequisite(s): ENG 102 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 130A – Aircraft Performance & Design (4 units)

Course Description: Major aircraft design experience with multiple realistic constraints including aerodynamics, performance analysis, weight estimation, stability and control, and appropriate engineering standards.

Prerequisite(s): (EAE 126 or EAE 127 C- or better); EAE 129 C- or better (can be concurrent).

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 130B – Aircraft Performance & Design (4 units)

Course Description: Major aircraft design experience including detailed design, cost analysis, analysis of aircraft structure, propulsion system, aerodynamics, aircraft handling qualities, manufacturing, or meeting relevant engineering standards.

Prerequisite(s): EAE 130A C- or better.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Grade Mode: Letter.

General Education: Science & Engineering; Oral Skills.

EAE 133 – Finite Element Methods in Structures (4 units)

Course Description: Introduction to the aerospace structural design process. History of aircraft and spacecraft materials. Effects of loading beyond elastic limit. Deflections and stresses due to combined loading. Virtual work principles, and finite element methods. Applications to aerospace structures.

Prerequisite(s): ENG 104 C- or better.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Enrollment Restriction(s): Open to College of Engineering Students.

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 135 – Aerospace Structures (4 units)

Course Description: Analysis and design methods used in aerospace structures. Shear flow in open, closed and multicell beam cross-sections, buckling of flat and curved sheets, tension field beams, local buckling.

Prerequisite(s): ENG 104 C- or better; EAE 126 or EAE 127 recommended.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 137 – Structural Composites (4 units)

Course Description: Overview of materials and technology for creating structures from fiber reinforced resin matrix composite material systems. Elementary design analysis and case studies emphasizing aeronautical applications.

Prerequisite(s): ENG 104 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 138 – Aircraft Propulsion (4 units)

Course Description: Analysis/design of modern aircraft gas turbine engines. Development/application of cycle performance prediction techniques. Introduction to design of inlets, compressors, burners, turbines, and nozzles. Cycle design for specific applications.

Prerequisite(s): EME 106 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 140 – Rocket Propulsion (4 units)

Course Description: Fluid and thermodynamics of rocket engines, liquid and solid rocket propulsion. Space propulsion concepts and space mission requirements.

Prerequisite(s): EME 106 C- or better.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Credit Limitation(s): Not open for credit to students who have taken identical EAE 189A prior to Fall Quarter 2013.

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 141 – Space Systems Design (4 units)

Course Description: Introduction to space systems design including space project organization, requirements definition and specification, concepts formulation, system tradeoffs, subsystem design. Prototype space mission concepts are presented and a multidisciplinary mission design is developed that considers all relevant architecture elements.

Prerequisite(s): ENG 102 C- or better; EME 106 C- or better.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 142 – Orbital Mechanics (4 units)

Course Description: Satellite orbits, multistage rockets, current global boosters, and new technologies. Design application problems include satellites, trajectory optimizations, and interplanetary trajectories.

Prerequisite(s): ENG 102 C- or better.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Restricted to upper division standing.

Credit Limitation(s): Not open for credit to students who have completed EAE 189B prior to Fall Quarter 2013.

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 143A – Space Vehicle Design (4 units)

This version has ended; see updated course, below.

Course Description: Governing equations and operational practices of robotic and human space travel. Principles of Systems Engineering are introduced and are used as a basis for a team project in spacecraft reverse-engineering and design.

Prerequisite(s): ENG 102 C- or better; ENG 103 C- or better; ENG 105 C- or better.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

EAE 143A - Space Vehicle Design (4 units)

Course Description: Governing equations and operational practices of robotic and human space travel. Principles of Systems Engineering are introduced and are used as a basis for a team project in spacecraft reverse-engineering and design.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Prerequisite(s): EAE 140 C- or better or EAE 142 C- or better.

Grade Mode: Letter.

This course version is effective from, and including: Fall Quarter 2022.

EAE 189C – Flight Simulation & Testing in Design of Aircraft & Spacecraft (4 units)

Course Description: Teaches flight test techniques together with data analysis methods to prepare students for any type of flight testing including fixed wing, rotary wing and launch vehicles.

Prerequisite(s): ENG 102; consent of instructor.

Learning Activities: Lecture 3 hour(s), Laboratory 3 hour(s).

Grade Mode: Letter.

General Education: Science & Engineering.

EAE 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable 1-5 hour(s).

Grade Mode: Pass/No Pass only.

EAE 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

African American Studies (AAS)

College of Letters & Science

AAS 010 – African-American Culture & Society (4 units)

Course Description: Critical examination of the historical, political, social, and economic factors that have affected the development and status of African-American people in contemporary society.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences; American Cultures, Governance, & History; Domestic Diversity; Writing Experience.

AAS 012 – Introduction to African Studies (4 units)

Course Description: Introduction to African Studies which will focus on the various disciplinary perspectives through which African society and culture are generally studied. A survey of methods, resources and conceptual tools for the study of Africa.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences; World Cultures; Writing Experience.

AAS 015 – Introduction to African American Humanities (4 units)

Course Description: Introduction to the humanist tradition developed by writers, philosophers, and artists of African descent in the West. Attention also given to African sources, as well as European, Caribbean, Latin-American, and North American variations on this tradition.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited to 165 students.

Grade Mode: Letter.

General Education: Arts & Humanities; American Cultures, Governance, & History; Domestic Diversity.

AAS 016 – Verbal & Performance Arts in Africa (4 units)

Course Description: African verbal arts; oral texts from different African cultures. Types of critical response to oral texts, role of oral artists, context and esthetics of oral performance in Africa.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Visual Literacy; World Cultures.

AAS 017 – Women in African Societies (4 units)

Course Description: Gender relations in traditional and contemporary African society. Involvement of African women in politics, religion, the economy, the arts. African responses to feminist theory. Images of women in African literature.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences; World Cultures; Writing Experience.

AAS 018 – Introduction to Caribbean Studies (4 units)

Course Description: Introduction to the contemporary culture, peoples, politics, and societies of the Caribbean. Topics include movements of people, goods and ideas across the Atlantic world and creative productions within the Caribbean.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences; World Cultures.

AAS 050 – Black Popular Culture (4 units)

Course Description: Survey of the African American images in popular culture (film, television, comedy, sports and music).

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities; American Cultures, Governance, & History; Domestic Diversity; Visual Literacy; Writing Experience.

AAS 051 – History of Afro American Dance (4 units)

Course Description: Evolution of African-American dance, tracing its history and development from West and Central Africa to the United States. Investigates the social and cultural relevance of African American dance and its artistic merits through contributions from its choreographers and performers.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Domestic Diversity; Visual Literacy.

AAS 052 – African Traditional Religion (4 units)

Course Description: Introduction to traditional religions of the sub-Saharan African peoples: emphasis on myths, rituals and symbols in West, East, Central and South African indigenous religions. Examines themes: sacred kingship, divination system, women, prophecy, conversion and adaptation to Islam and Christianity.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; World Cultures.

AAS 053 – Black California (4 units)

Course Description: Introduction to the experiences and contributions of people of African descent in California from the early 18th century to the present.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences; American Cultures, Governance, & History; Domestic Diversity.

AAS 080 – Introduction to Black Politics (4 units)

Course Description: Introduction to the analysis of Afro-American politics, using conceptual frameworks from political science and other social sciences.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

AAS 099 – Special Study for Undergraduates (1-5 units)

Course Description: Special study for undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AAS 100 – Survey of Ethnicity in the US (4 units)

Course Description: Sociological and historical analysis of the experience, culture, and relations of and between groups considered racial and/or ethnic minorities in the United States.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Arts & Humanities; American Cultures, Governance, & History; Domestic Diversity.

AAS 101 – Introduction to Research in the Afro-American Community (4 units)

Course Description: Introductory survey of Afro-American Studies methods and techniques; problems and methodology in Afro-American Studies.

Prerequisite(s): AAS 010; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

AAS 107A – African Descent Communities & Culture in the Caribbean & Latin America (4 units)

Course Description: Origin and development of African descent communities and cultures in the Caribbean, and Latin America.

Similarities and differences among African descent communities and cultures in terms of religious practices, music, and national identity.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: World Cultures.

AAS 107B – African Descent Communities & Culture in North America (4 units)

Course Description: Study of the origin and development of African descent communities and cultures in the U.S.A., Canada, and Mexico.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences; Domestic Diversity.

AAS 107C – African Descent Communities & Culture in Asia (4 units)

Course Description: Study of the origin and development of African Descent communities and cultures in Asia.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences; World Cultures.

AAS 107D – African Descent Communities & Cultures in Europe (4 units)

Course Description: Study of the origin and development of African Descent communities and cultures in Europe.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences; World Cultures.

AAS 110 – West African Social Organization (4 units)

Course Description: Ecology, population, social and political organization, and culture of West Africa in the precolonial, colonial, and post-colonial periods.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences; World Cultures.

AAS 111 – Cultural Politics in Contemporary Africa (4 units)

Course Description: Themes and style of new cultural forms in Africa as displayed in art, music, film and writing, especially in regard to blending of indigenous and foreign influences. Social and political forces shaping contemporary cultural expression.

Prerequisite(s): AAS 012; or upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences; World Cultures.

AAS 123 – Black Female Experience in Contemporary Society (4 units)

Course Description: Black female social, intellectual, and psychological development. Black women's contributions in history, literature, and social science; life experiences of Black women and philosophical underpinnings of the feminist movement.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences; American Cultures, Governance, & History; Domestic Diversity.

AAS 130 – Education in the African-American Community (4 units)

Course Description: Examination of the history of the education of African Americans in the United States. Examination and critique of contemporary theories concerning the schooling of African Americans. (Former AAS 140.)

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

General Education: Social Sciences; Domestic Diversity.

AAS 133 – The Black Family In America (4 units)

Course Description: Analysis of social science research to examine relationship between black (African-descent) family structures, patterns of functioning, and political, economic, and social conditions in the U.S.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences; American Cultures, Governance, & History; Domestic Diversity.

AAS 141 – Psychology of the African American Experience (4 units)

Course Description: Introduction to the psychological issues faced by African Americans. Description of any disparities in mental health care experienced by African American and Diaspora populations in the United States. Analysis of issues from European/Western and Afrocentric frame of reference. Emphasis on Optimal Theory, a psychological theory based on an Afrocentric world view.

Prerequisite(s): AAS 010; or consent of instructor; upper division status.

Learning Activities: Discussion 1 hour(s), Lecture 3 hour(s).

Grade Mode: Letter.

AAS 145A – Black Social & Political Thought (4 units)

Course Description: Exploration and analysis of Black social and political thought in the Americas.

Prerequisite(s): AAS 010 or AAS 080; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences.

AAS 145B – Black Intellectuals (4 units)

Course Description: Exposition and critical analysis of selected theoretical writings of Black intellectuals, and especially political and social thinkers, in the Americas.

Prerequisite(s): (AAS 010, AAS 080, AAS 145A); or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences; Domestic Diversity; Writing Experience.

AAS 150A – Afro-American Visual Arts Tradition: A Historical & Cultural Study (4 units)

Course Description: Afro-American visual arts tradition, folk and formal, in historical and cultural context, from 1600 through Reconstruction.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

AAS 150B – Afro-American Visual Arts Tradition: A Historical & Cultural Study (4 units)

Course Description: Afro-American visual arts tradition, folk and formal, in historical and cultural context, from Reconstruction to the present.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture 4 hour(s).

Grade Mode: Letter.

AAS 151 – Afro-American Vernacular Music & Verbal Arts (4 units)

Course Description: Socio-political dimensions of Afro-American musical forms like spiritual, work song, minstrelsy blues, rhythm and blues, jazz, gospel, soul and contemporary pop, and related verbal arts like preaching, toasting, rapping.

Learning Activities: Lecture 2 hour(s), Discussion 2 hour(s).

Grade Mode: Letter.

AAS 152 – Major Voices in Black World Literature (4 units)

Course Description: Recurrence of cultural tropes in the works of major black world authors and formation of an African-oriented canon. Principal activities include critical reading and discovery of literature as a cultural resource.

Prerequisite(s): AAS 010 or AAS 012 or AAS 018; upper division standing.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities; Domestic Diversity; World Cultures; Writing Experience.

AAS 153 – African Literature (4 units)

Course Description: Colonial and post-colonial sub-Saharan African literature and the African oral traditions from which it emerged. Genres and themes of African literature from the 19th century to the present.

Prerequisite(s): Completion of Entry Level Writing Requirement (ELWR).

Learning Activities: Lecture 3 hour(s), Term Paper.

Cross Listing: COM 154.

Grade Mode: Letter.

General Education: Arts & Humanities; World Cultures; Writing Experience.

AAS 155A – African-American Dance & Culture in the United States, Brazil & the Caribbean (4 units)

Course Description: Comparative study of the African American dance forms in the U.S.A., Brazil, Haiti, Cuba, Jamaica, Barbados, and Trinidad. Examination of ritual, folk, and popular dance forms and the socio/historical factors that have influenced these forms.

Learning Activities: Lecture/Discussion 4 hour(s).

Cross Listing: DRA 155A.

Grade Mode: Letter.

General Education: Arts & Humanities; Visual Literacy; World Cultures.

AAS 156 – Language & Identity in Africa & the African Diaspora (4 units)

Course Description: Relationship between language and identity in literature from Africa and the African Diaspora. Use of pidgins, Creoles, translation from African languages and impact of language policies.

Prerequisite(s): AAS 012; or upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Domestic Diversity; World Cultures.

AAS 157 – Literature & Society in South Africa (4 units)

Course Description: Political and social developments in 20th-century South Africa as illustrated by a range of South African writing. Response of different writers to race relations, impact of government policy on types and context of writing.

Prerequisite(s): Upper division standing.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; World Cultures; Writing Experience.

AAS 160 – African-American Folklore (4 units)

Course Description: Theory and history of African American folklore and folklife, including music, material culture, oral narrative, proverbs, and humor. African and Caribbean cultural influences on New World folk genres will be probed.

Prerequisite(s): AAS 010.

Learning Activities: Lecture 2 hour(s), Discussion 1 hour(s), Fieldwork 3 hour(s).

Grade Mode: Letter.

AAS 162 – Islam in Africa & the Americas (4 units)

Course Description: Comparative and historical survey of Islam in the regional and cultural settings of Sub-Saharan Africa and the Americas.

Prerequisite(s): RST 060 or AAS 012 or AAS 110.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; World Cultures; Writing Experience.

AAS 163 – African Religions in the Americas (4 units)

Course Description: Comparative study of African religious heritage in the Americas: Jamaica, Trinidad, Cuba, U.S.A., Haiti, and Brazil. Emphasis on the origins and development of Candomble, Santeria, Shango, Vodun, and Rastafarianism in the New World.

Prerequisite(s): AAS 010; AAS 015; or consent of instructor.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; World Cultures; Writing Experience.

AAS 165 – Afro-Christianity & the Black Church (4 units)

Course Description: Examination of the historical role of Christian belief and practice as well as the institution of the Black Church in the experience of African Americans, from slavery to the present.

Prerequisite(s): AAS 010; AAS 015; or consent of instructor; upper division standing.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Social Sciences; American Cultures, Governance, & History; Domestic Diversity.

AAS 168 – Black Documentary: History & Practice (4 units)

Course Description: Study of Black documentary history and understanding of the use of the documentary form for political purposes. Discussion of documentary theory. Each student, singly or in a team, will create and carefully edit a documentary project.

Prerequisite(s): FMS 001; AAS 170; and consent of instructor; AAS 050 recommended.

Learning Activities: Lecture 3 hour(s), Laboratory 5 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Domestic Diversity; Visual Literacy; World Cultures.

AAS 169 – History of African American Television (4 units)

Course Description: History of the representation of African Americans in television; how the representations reflect social and political forces in American society. Role of African Americans in actively shaping their representation.

Prerequisite(s): AAS 050 recommended.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Domestic Diversity; Visual Literacy; Writing Experience.

AAS 170 – African-American Film & Video (4 units)

Course Description: Comparative approach in the study of fictional film and video dealing with the African American experience drawing on film and cultural studies to examine and discuss selected works.

Prerequisite(s): FMS 001; AAS 050 recommended.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Domestic Diversity; Visual Literacy; Writing Experience.

AAS 171 – Black African & Black European Film & Video (4 units)

Course Description: Comparative approach in the study of dramatic films and videos that treat black life in Africa and Europe. Critical attention focused on the imaginative construction of ethnicity, race, nationality, gender, and sexuality in each particular work.

Prerequisite(s): AAS 015 or AAS 050 or ENL 160 or ENL 162; or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Film Viewing 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Arts & Humanities; Visual Literacy; World Cultures.

AAS 172 – Diaspora & New Black Identities (4 units)

Course Description: Critical analysis about what it means to be Black/African American in the United States today. Topics include old and new diasporas, immigration, national origin, language, religion, class, education, politics, identity and cultural heritage.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper.

Grade Mode: Letter.

General Education: Social Sciences; American Cultures, Governance, & History; Domestic Diversity; Writing Experience.

AAS 175A – Black Documentary: History & Theory (4 units)

Course Description: Black documentary history and documentary theory. Use of black documentary for political purposes.

Prerequisite(s): FMS 001; AAS 170; AAS 050 recommended.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Domestic Diversity; Visual Literacy; Writing Experience.

AAS 175B – Black Documentary Practicum (4 units)

Course Description: Creation of documentary projects, with students working in production crews.

Prerequisite(s): AAS 175A; and consent of instructor.

Learning Activities: Lecture 2 hour(s), Laboratory 6 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Domestic Diversity.

AAS 176 – The Politics of Resources (4 units)

Course Description: Examination of the ways in which the processes of the extraction, purification and use of natural resources and the complex regimes of valuation and commodification they (re)produce lead to cooperation and conflict in contemporary Africa and beyond.

Prerequisite(s): AAS 012 or AAS 110.

Learning Activities: Lecture/Discussion 4 hour(s).

Enrollment Restriction(s): Limited enrollment.

Grade Mode: Letter.

General Education: Social Sciences; World Cultures.

AAS 177 – Politics of Life in Africa (4 units)

Course Description: Existing (in)capacities in the structures of state and society in Africa for people to live well. Topics include institutions and practices that define state and civil society encounters in Africa; democracy, ethnicity, economic crisis, religion, citizenship, etc.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences; World Cultures.

AAS 178 – African Modernity & Globalization (4 units)

Course Description: Exploration of modernity and globalization and their dimensions and impacts in/on Africa. Examination of modern necessities and constraints in Africa in relation to (neo)colonialism, transnational encounters, technology, gender, risk, ritual, identity, culture, etc.

Prerequisite(s): AAS 012; or consent of instructor.

Learning Activities: Lecture 4 hour(s).

Enrollment Restriction(s): Limited to 80 students.

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences; World Cultures.

AAS 180 – Race & Ethnicity in Latin America (4 units)

Course Description: Social and political effects of racial and ethnic categorization in Latin America, including issues of economic production, citizenship, national belonging, and access to resources. Emphasis is on peoples of African, Indigenous, and Asian descent.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Social Sciences; World Cultures; Writing Experience.

AAS 181 – Hip Hop in Urban America (4 units)

Course Description: History, aesthetics, urban context, and economics of hip-hop in the US, and its globalization. Hip-hop's four artistic elements—rap, deejaying, breakdance, and aerosol art—allow the examination of issues of race, ethnicity, and gender in youth culture and American society.

Prerequisite(s): Upper division standing or consent of instructor.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Enrollment Restriction(s): Must have Junior or Senior level standing.

Grade Mode: Letter.

General Education: Arts & Humanities; Domestic Diversity; Visual Literacy.

AAS 182 – Hip Hop Culture & Globalization (4 units)

Course Description: Investigation of hip-hop youth cultures outside the United States using globalization and Cultural Studies theories. Analysis of international hip-hop sites in Africa, Asia, Europe, South America, and the Middle East through reading, discussion, and visiting virtual sites.

Prerequisite(s): AAS 181 preferable, not required.

Learning Activities: Lecture 3 hour(s), Discussion 1 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; World Cultures.

AAS 183A – Policing, Prison, & Protest in Local Perspective (4 units)

Course Description: Study of the history and current state of policing, prisons and protest movements in the U.S. through Black Studies framework and methods.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Social Sciences; American Cultures, Governance, & History Literacy; Domestic Diversity Literacy.

AAS 183B – Policing, Prison, & Protest in Global Perspective (4 units)

Course Description: Study of the history and current workings of police, prisons, and protest movements globally through Black Studies frameworks and methods.

Learning Activities: Lecture/Discussion 4 hour(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Social Sciences; World Cultures Literacy; Writing Experience.

AAS 185 – Topics in African American Film (4 units)

Course Description: Intensive study of special topics in African American film.

Prerequisite(s): AAS 170; AAS 050 recommended.

Learning Activities: Lecture 3 hour(s), Film Viewing 3 hour(s).

Repeat Credit: May be repeated 1 time(s).

Grade Mode: Letter.

General Education: Arts & Humanities; Domestic Diversity; Visual Literacy; Writing Experience.

AAS 190 – Topics in African & African-Diaspora Studies (4 units)

Course Description: Intensive treatment of a special topic or problem in African or African Diaspora Studies.

Prerequisite(s): Upper division standing in African American African Studies (AAS) courses or consent of instructor.

Learning Activities: Lecture/Discussion 3 hour(s), Term Paper 1 hour(s).

Repeat Credit: May be repeated 1 time(s) when topic differs.

Grade Mode: Letter.

AAS 192 – Internship in African-American & African Studies (1-8 units)

Course Description: Supervised internship in community, government, or private institutions, in all subject areas offered by the African American & African Studies Program.

Prerequisite(s): Consent of instructor; completion of 12 units of upper division study in African American African Studies (AAS) courses; upper division standing.

Learning Activities: Internship 3-24 hour(s).

Enrollment Restriction(s): Restricted to African American & African Studies majors and minors.

Repeat Credit: May be repeated 12 unit(s).

Grade Mode: Pass/No Pass only.

AAS 194HA – Special Study for Honors Students (4 units)

Course Description: Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty advisor.

Prerequisite(s): Consent of instructor.

Learning Activities: Independent Study, Term Paper.

Enrollment Restriction(s): Restricted to majors in African American & African Studies with upper division standing and a GPA of 3.500 in the major.

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences.

AAS 194HB – Special Study for Honors Students (4 units)

Course Description: Directed reading, research and writing culminating in preparation of a senior honors thesis under the direction of faculty advisor.

Prerequisite(s): AAS 194HA; consent of instructor.

Learning Activities: Independent Study, Term Paper

Enrollment Restriction(s): Restricted to majors in African American & African Studies with upper division standing and a GPA of 3.500 in the major.

Grade Mode: Letter.

General Education: Arts & Humanities or Social Sciences.

AAS 197T – Tutoring in Afro-American Studies (1-5 units)

Course Description: Leading of small voluntary discussion groups affiliated with one of the department's regular courses.

Prerequisite(s): Consent of major committee; upper division standing with major in African American African Studies.

Learning Activities: Tutorial 1-5 hour(s).

Repeat Credit: May be repeated 6 unit(s).

Grade Mode: Pass/No Pass only.

AAS 198 – Directed Group Study (1-5 units)

Course Description: Directed group study.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AAS 199 – Special Study for Advanced Undergraduates (1-5 units)

Course Description: Special study for advanced undergraduates.

Prerequisite(s): Consent of instructor.

Learning Activities: Variable.

Grade Mode: Pass/No Pass only.

AAS 201 – Critical Foundations in African American Studies (4 units)

Course Description: Introduction to history of African American Studies. Topics include: research agendas, policy implications, debates, crises, and institutional frameworks.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s).

Grade Mode: Letter.

AAS 202 – Critical Foundations in African Studies (4 units)

Course Description: Introduction to the history and current organization of African Studies as area of intellectual investigation. Offers an opportunity to review research agenda and policy implications, debates, crises, and institutional frameworks surrounding the production of knowledge about Africa.

Prerequisite(s): Graduate standing.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

AAS 203 – Critical Foundations in African Diaspora Studies (4 units)

Course Description: Integrative conceptual framework includes History, Geography, Political Economy, Culture, Aesthetics as tools to investigate the African Diaspora. Engage African Diaspora theories within student's research projects understanding issues developing from the movement of Africans to the rest of the world.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

AAS 204 – Methodologies in African American & African Studies (4 units)

Course Description: Relationship between theory and methodology, with emphasis on identifying relevant methodological approaches and constructing theoretically informed research projects for studying the experience of people of African descent whether on the African continent or in the rest of the world.

Learning Activities: Seminar 3 hour(s), Term Paper.

Grade Mode: Letter.

AAS 298A – Directed Group Study in African American & African Diaspora Studies (1-5 units)
