

Supplementary Figures 3. The 1D SDS-PAGE gel image of proteins from untreated and H₂O₂-treated U266 cells. Lane 1, molecular weight markers; Lane 2, proteins from untreated cells; Lane 3, proteins from 2.5 mM H₂O₂-treated U266 cells; Lane 4, proteins from 5 mM H₂O₂-treated cells. The band with differentially expressed proteins was marked with a square.
