

Slipping Under the Radar: *Pfizer Documents, Pandemic 'Treaty' and the Magical Disappearance of Covid*

*The war is a distraction, when everyone is looking up, keep your eyes on the ground. **Keep a close eye on what's slipping under the radar.***

PFIZER DOCUMENTS

In the first week of January a **federal judge in Texas, Mark Pittman**, ordered the Food and Drug Administration (FDA) publicly release the data it relied on to license Pfizer's Covid injection.

Pittman ordered the agency to turn over 55,000 pages a month. That means ***all the Pfizer injection data should be public within about 8 months rather than the 55 years, initially requested***, or the 75 years the FDA requested.

On page 3 of the Judge's four page order, the FDA must produce 55,000 pages every 30 days beginning on or before 1 March 2022. That was yesterday.

All released Pfizer documents and data can be found HERE.

2. The FDA shall produce the remaining documents at a rate of **55,000 pages every 30 days**, with the first production being due **on or before March 1, 2022**, until production is complete.

PANDEMIC "TREATY"

An international pandemic agreement "to strengthen pandemic prevention, preparedness and response" was due to be negotiated at the WHO in Geneva yesterday (1st of March).

Basically, this so-called 'treaty' is done to replace (in stealth mode) member countries constitutions by the WHO "constitution", ending national sovereignties. The same type of ploy was used in 2010 in Ireland's with the Lisbon "treaty".p

*The intergovernmental negotiating body (INB) is to hold its second meeting by 1 August 2022 (to discuss progress on a working draft). The agreement is backed by the **Bill & Melinda-Gates Foundation** and US billionaire Marcel Arsenault.*

Putin for Nobel Prize

*Vladimir Putin has managed to do in a few days what many governments weren't able to do in two years - **eradicate Covid**. He has been so effective that Strange Sounds is suggesting he be nominated for a Nobel Prize.*

I propose Vladimir Putin for the Nobel Prize in Medicine for solving COVID globally in 48 hours
