

KIRK PARK PEDESTRIAN BRIDGE

TO BE CLOSED

The bridge will be closed starting Friday, October 21, 2022.

Located in Kirk Park as indicated on the map to the right, the pedestrian bridge is currently supported on poles that have deteriorated and will not adequately support any pedestrian users.

A new bridge will be installed in approximately two years, including the design and construction process. The replacement bridge will be a fiberglass structure with a wood deck similar to the image on the left.
