

A COMMITMENT TO SOUND MANAGEMENT OF
HIGHLY HAZARDOUS PESTICIDES

Like for all crop protection products, the industry supports

STRICT REGULATION

by governments to ensure safety for people and the environment.

In addition to ongoing evaluations, CropLife International members recently completed a voluntary review of their

ENTIRE PORTFOLIO

to identify HHPs, focused on realistic conditions of use in low income countries.

**OUT OF
6,400**

crop protection products evaluated in 2015 and 2016...

85% were not HHPs

10% were HHPs that can be used safely and responsibly

2.5% required risk mitigation measures or were withdrawn from the market

2.5% are under further evaluation

WHAT ELSE IS BEING DONE TO MANAGE THE RISK?

CropLife International undertakes regular training to build risk management capacity for regulators, farmers, distributors and other stakeholders in the developing world.
