

Care & Application

VELCRO® Brand fasteners with heavy duty adhesive are recommended for indoor or outdoor use on most smooth surfaces, including plastic.

Instructions:

1. Clean and dry surface before application
2. Peel tape from fastener and press firmly into place
3. Adhesive reaches maximum strength after 24 hours

Note: Recommended for temperatures between 0°F to 150°F. Not recommended for fabrics, dashboards, flexible vinyl or underwater use. Continued exposure to full sunlight can damage fastener. May not adhere well to certain types of brick – testing is recommended.
