Proof-reading for the authors

Dear AJA authors,

Thank you very much for your support to AJA. After the language editing, proof-reading and the typesetting, your manuscript has already formed an initial PDF file. Now we would like you for proof-reading.

1. Very important statement (please read very carefully)

(1) Some errors might occur during the process of transforming the Word file into the PDF file because the process is involved with so many techniques and software. This remains the big issue in the field of publishing business. Therefore, proof-reading is very necessary. Please pay attention on checking the file from the beginning to the end and answering the questions asked by AJA editors, and make sure that the text is accurate.

(2) It might be the last chance for you to proof-reading and report the corrections. After you report the corrections this time, if you will have new request of corrections later, it would be impossible to change anymore. If your article is published with mistakes, corrigendum will be needed. And you will be charged an amount of money for corrigendum. Therefore, we kindly remind you may pay much attention on the proof-reading this time, many thanks.

2. Common mistakes in the PDF file

(1) Missing the words or text (the whole paragraph or part of the paragraph);

(2) Some special fonts are not shown correctly (e.g. α, β);

(3) The mistake about regular or italic font (such as the gene should be in the italic font...);

(4) The content in the table might be displayed incorrectly or missing;

(5) Lack of the number of references in the text;

(6) Some important information (e.g. number, data, symbol, unit…) might be displayed incorrectly or missing;

3. How to open the PDF file? How to edit and mark the comment on the PDF file?

In order to facilitate the process of publication, please use the "Adobe Acrobat 8.0 professional" software (or higher version, you may download it from the website). Please use the "comment" to give us your feedback, and the specific steps are as below:

(1) Open the PDF file, and please use the Adobe Acrobat 8.0 professional software which could edit the PDF file. It is not the regular Adobe Acrobat Reader software which could only read the PDF file;

(2) Please click the toolbars "comments", and then click "Display the list of comments" .Please check through the PDF file, and see whether you agree with the corrections the AJA editors made. Please also answer the questions AJA editors asked. Please use the "comment" tool, and write down which part you would like to revise. In order to let AJA editors to understand, each comment at least should consist two parts: (a) which part do you want to revise?; and (b) what are the reasons that you want to revise?

(3) AJA editors have already revised your PDF file, and have asked the questions. Please answer the questions in the each comment box of AJA editors.

(4) Friendly reminder: if you find the mistakes in the article, please tell us what the corrected way is, not only stating that "it is wrong".

(5) If you have difficulty in using the "Adobe Acrobat 8.0 professional", please ask your students, friends and colleagues for help, thank you so much!
