Volume 233, No. 2, 1986

REVIEW ARTICLE

- Extracellular ATP: effects, sources and fate J. L. GORDON 309-319

FULL AND RAPID PAPERS

Proteins

- The amino acid sequence of cytochrome *c*-555 from the methane-oxidizing bacterium *Methylococcus capsulatus* R. P. AMBLER, H. DALTON, T. E. MEYER, R. G. BARTSCH & M. D. KAMEN 333-337
- CNBr cleavage of the light chain of human complement Factor I and alignment of the fragments J. YUAN, L. HSIUNG & J. GAGNON 339-345
- Organotin-protein interactions. Binding of triethyltin bromide to cat haemoglobin K. R. SIEBENLIST & F. TAKETA 471-477
- An extended-X-ray-absorption-fine-structure investigation of diferric transferrins and their iron-binding fragments R. C. GARRATT, R. W. EVANS, S. S. HASNAIN & P. F. LINDLEY 479-484
- Simultaneous induction of Pb-metallothionein-like protein and Zn-thionein in the liver of rats given lead acetate H. IKEBUCHI, R. TESHIMA, K. SUZUKI, T. TERAO & Y. YAMANE 541-546

Enzymes

- Suppression of high-affinity ligand binding to the major glutathione *S*-transferase from *Galleria mellonella* by physiological concentrations of glutathione A. G. CLARK & N. CARROL 325-331
- Mechanistic origin of the sigmoidal rate behaviour of glucokinase G. PETERSSON 347-350
- Inhibition of hepatic and extrahepatic glutathione *S*-transferases by primary and secondary bile acids J. D. HAYES & T. J. MANTLE 407-415
- Purification and characterization of ascamycin-hydrolysing aminopeptidase from *Xanthomonas citri* H. OSADA & K. ISONO 459-463
- Identification of an essential glutamic acid residue in β -lactamase II from *Bacillus cereus* C. LITTLE, E. L. EMANUEL, J. GAGNON & S. G. WALEY 465-469
- Inactivation of 3α -hydroxysteroid dehydrogenase by superoxide radicals. Modification of histidine and cysteine residues causes the conformational change H.-S. KIM, P. MINARD, M.-D. LEGOY & D. THOMAS 493-497
- The purification and some equilibrium properties of the nitrite reductase of the bacterium *Wolinella succinogenes* R. BLACKMORE, A. M. ROBERTON & T. BRITAIN 547-552
- Kinetic studies on the nitrite reductase of *Wolinella succinogenes* R. BLACKMORE & T. BRITAIN 553-557
- Stimulation of mouse liver glutathione *S*-transferase activity in propylthiouracil-treated mice *in vivo* by tri-iodothyronine M. T. WILLIAMS, H. CARRINGTON & A. HERRERA 595-598
- Enzyme kinetic studies from progress curves E. I. CANELA & R. FRANCO 599-605
- Microsomal epoxide hydrolase of rat liver. Purification and characterization of enzyme fractions with different chromatographic characteristics N. J. BULLEID, A. B. GRAHAM & J. A. CRAFT 607-611

Carbohydrates

- Structural analysis of the asparagine-linked oligosaccharides of human complement component C3 S. HIRANI, J. D. LAMBRIS & H. J. MÜLLER-EBERHARD 613-616

Nucleic acids and molecular genetics

- Sequence and interspecies transfer of an aminoglycoside phosphotransferase gene (*APH*) of *Bacillus circulans*. Self-defence mechanism in antibiotic-producing organisms C. J. HERBERT, M. SARWAR, S. S. NER, I. G. GILES & M. AKHTAR 383-393
- Sequences encoding two trypsin inhibitors occur in strikingly similar genomic environments I. B. KINGSTON & S. ANDERSON 443-450

Synthesis and degradation of macromolecules

- Quantitative analysis of type X-collagen biosynthesis by embryonic-chick sternal cartilage S. A. JIMENEZ, R. YANKOWSKI & A. M. REGINATO 357-367
- Determination of rates of protein synthesis, gain and degradation in intact hind-limb muscle of lambs V. H. ODDY & D. B. LINDSAY 417-425
- Complement subcomponent C1q secreted by cultured human monocytes has subunit structure identical with that of serum C1q A. J. TENNER & D. B. VOLKIN 451-458

CONTENTS (continued)

Glucocorticoids antagonize induction of prolactin-gene expression by calcitriol in rat pituitary tumour cells	J. D. WARK & V. GURTLER	513-518
Characteristics of complement subcomponents C1r and C1s synthesized by Hep G2 cells	A. REBOUL, J.-C. BENSA & M. G. COLOMB	559-564
Intermediary metabolism and metabolic control		
The stimulation of tricarboxylic acid-cycle flux by α -adrenergic agonists in perfused rat liver	W. M. TAYLOR, E. VAN DE POL & F. L. BYGRAVE	321-324
Effects of the β -adrenoceptor agonist isoprenaline on insulin-sensitivity in soleus muscle of the rat	R. A. J. CHALLISS, F. J. LOZEMAN, B. LEIGHTON & E. A. NEWSHOLME	377-381
Hepatic mitochondrial inner-membrane properties, β -oxidation and carnitine palmitoyltransferases A and B. Effects of genetic obesity and starvation	L. J. BRADY, C. L. HOPPEL & P. S. BRADY	427-433
Ketone-body metabolism in tumour-bearing rats	A. M. ROFE, R. BAIS & R. A. J. CONYERS	485-491
Phosphopeptide analysis of phenylalanine hydroxylase isolated from liver cells exposed to hormonal stimuli	M. J. FISHER, A. J. DICKSON & C. I. POGSON	507-511
Interrelationships in rats of tissue pools of cholecalciferol and 25-hydroxycholecalciferol formed in u.v. light	D. E. M. LAWSON, S. H. SEDRANI & J. DOUGLAS	535-540
Effect of insulin on low-density-lipoprotein metabolism in human lymphocytes <i>in vitro</i>	S. SURESH, V. WARTY, M. VIRJI & A. SANGHVI	565-570
Is the availability of substrate for the tricarboxylic acid cycle a limiting factor for uncoupled respiration in sycamore (<i>Acer pseudoplatanus</i>) cells?	E.-P. JOURNET, R. BLIGNY & R. DOUCE	571-576
Induction of hepatic and renal ornithine decarboxylase by cobalt and other metal ions in rats	T. YOSHIDA, S. NUMAZAWA & Y. KUROIWA	577-581
Binding of [¹⁴ C]malonyl-CoA to rat liver mitochondria after blocking of the active site of carnitine palmitoyltransferase I. Displacement of low-affinity binding by palmitoyl-CoA	B. D. GRANTHAM & V. A. ZAMMIT	589-593
Enzymic imbalance in serine metabolism in rat hepatomas	K. SNELL & G. WEBER	617-620
Bioenergetics and transport		
Transport of the aromatic amino acids into isolated rat liver cells. Properties of uptake by two distinct systems	M. SALTER, R. G. KNOWLES & C. I. POGSON	499-506
Membranes and receptors		
Proteins of the human placental microvillar cytoskeleton. α -Actinin	O. A. VANDERPUYE, H. C. EDWARDS & A. G. BOOTH	351-356
Evidence for the rapid internalization and recycling of lutropin receptors in rat testis Leydig cells	A. D. HABBERFIELD, C. J. DIX & B. A. COOKE	369-376
Cell-cell recognition of host surfaces by pathogens. The adsorption of maize (<i>Zea mays</i>) root mucilage by surfaces of pathogenic fungi	J. GOULD & D. H. NORTHCOTE	395-405
Inhibition of the apparent affinity of the epidermal growth factor receptor caused by phorbol diesters correlates with phosphorylation of threonine-654 but not other sites on the receptor	R. J. DAVIS & M. P. CZECH	435-441
The mechanism of action of β -bungarotoxin at the presynaptic plasma membrane	M. RUGOLO, J. O. DOLLY & D. G. NICHOLLS	519-523
Fractionation of membrane proteins by temperature-induced phase separation in Triton X-114. Application to subcellular fractions of the adrenal medulla	J. G. PRYDE & J. H. PHILLIPS	525-533
Leukotriene B ₄ synthesis and metabolism by neutrophils and granule-free cytoplasts	K. A. HAINES, K. N. GIEDD & G. WEISSMANN	583-588
