Supplementary Table S1

Description of the thirteen forest dynamics plots examined in this study. Totals are for the number of taxa (species and genera) among tropical, subtropical and temperate regions, and all plots united; and the non-redundant totals count each species only once.

Local/regional/global scales	Coordinates (Latitude/Longitude)	Climatic region	Hemisphere	Plot size (ha)	Number of species	Number of genus	Number of multiple-species genus (≥ 3 species/genus)	Ratio of multiple-species genus /total genera	Species/genus ratio
Bukit-Tima	1.25/103.75	Tropics	Asia	2	132	90	9	0.1	1.466666667
BCI	9.1543/-79.8461	Tropics	Latin America	50	226	140	14	0.1	1.614285714
Luquillo	18.3262/-65.816	Tropics	Latin America	16	104	79	6	0.075949367	1.316455696
Nanjenshan	22.059/120.854	Subtropics	Asia	3	30	23	1	0.043478261	1.304347826
