

Two food products found to be unsafe and adulterated with medicinal substances

The Singapore Food Agency (SFA) has detected two food products, 'HUNTER HONEY' and 'DYNAMINT X', that had been adulterated with Tadalafil, a potent prescription medicine used to treat erectile dysfunction. Consumers are advised not to purchase or consume both products.

2 'HUNTER HONEY' and 'DYNAMINT X' had been marketed on multiple local e-commerce platforms as a honey product and candy respectively, with claims of male sexual enhancement effects. SFA has worked with various online e-commerce platforms to remove the listings of these products and issued warnings to the respective sellers to refrain from selling the two products with immediate effect. SFA will not hesitate to take stern enforcement actions against anyone who sells and supplies food products that are found to be adulterated with banned substances or potent ingredients as these would be unsafe food. Under Section 15 of Singapore's Sale of Food Act, the sale of unsafe food is not permitted. Any person who contravenes any of the provisions of this Act shall be guilty of an offence and shall be liable on conviction to a fine not exceeding \$5,000 and, in the case of a second or subsequent conviction, to a fine not exceeding \$10,000 or to imprisonment for a term not exceeding 3 months or to both.

3 Tadalafil is a prescription medicine used to treat erectile dysfunction and should only be given under medical supervision. Inappropriate use of tadalafil is dangerous and can increase the risk of serious adverse effects, including heart attack, stroke, headache, migraine, irregular heart rate and priapism (painful and exceedingly long erections). Tadalafil can also pose serious risks to certain individuals, including those with heart-related problems. They can cause potentially life-threatening low blood pressure in those who are on heart medications, especially those containing nitrates.
