The Big6 Becomes the Big6.org

The Big6 Information Problem Solving Skills moved to non-profit as thebig6.org

Seattle, WA, January 7 - The Big6 information problem-solving process has been used in schools nationwide and abroad since the mid-1980s. With so many educators using The Big6 in school curriculum, maintaining access to materials, training, and resources is critical. A new non-profit organization, The Big6.org, has been established to carry the mission forward. The mission of the Big6.org is to use the Big6 model, approach, and programs to promote essential, lifelong information problem-solving skills thinking, learning, and teaching in schools and informal learning contexts.

Developed by Mike Eisenberg and Bob Berkowitz, the Big6 is used to teach inquiry, information, and research skills in thousands of K-12 schools, higher education institutions, and corporate training programs all over the world. The Big6 information problem-solving process is applicable whenever people need and use information. The Big6 integrates information search and use skills, along with technology tools, in a systematic process to find, use, apply, and evaluate information for specific needs and tasks.

The Big6.org was established as a non-profit organization in January 2018; information and resources are available on a new website thebig6.org.
